If this warning light comes on or flashes while you're driving...

NOTE

- For information regarding warning displays in the multi-information display (Color liquid crystal display type), refer to “Multi-information display” on page 5-128.
- These warning lights will come on for a few seconds for a bulb check when the ignition switch is first turned to “ON” or the operation mode is put in ON.

Warning lights	Do this	Ref. Page
 <p>Charging system warning light</p>	<ul style="list-style-type: none"> ● Park your vehicle in a safe place and stop the engine. Contact your Mitsubishi Motors dealer or a repair facility of your choice for assistance. 	<p>P. 5-174</p>
 <p>Oil pressure warning light (Vehicles equipped with mono-color liquid crystal display)</p>	<ul style="list-style-type: none"> ● Park your vehicle in a safe place and stop the engine, then check the engine oil level. If the light comes on while the engine oil level is normal, have the system checked at an authorized Mitsubishi Motors dealer or a repair facility of your choice as soon as possible. 	<p>P. 5-174</p>
<p>BRAKE or </p> <p>Brake warning light</p>	<ul style="list-style-type: none"> ● If this light comes on while driving, check to see that the parking brake is fully released. ● If this light stays on after releasing the parking brake, immediately stop and check the brake fluid level. ● If the brake fluid level is correct, there may be a system malfunction. Avoid hard braking and high speed, and contact an authorized Mitsubishi Motors dealer or a repair facility of your choice for assistance. 	<p>P. 5-173</p>

<p>Unable to turn the key. (except for vehicles equipped with the F.A.S.T.-key)</p>  <p>AGZ000752</p>	<p>Will not turn from “LOCK” to “ACC”. (Vehicles with steering lock system) Turn the key while turning the steering wheel in either direction.</p> <p>Will not turn from “ACC” to “OFF” or “LOCK”. Check the position of the selector lever. The key cannot be removed unless the selector lever is set to the “P” (PARK) position. On vehicles with steering lock system, push the key in at the “ACC” position and keep it depressed until it is turned to the “LOCK” position.</p>	<p>P. 5-62</p> <p>P. 5-61</p>
<p>The engine does not start when the engine switch is pressed. (for vehicles equipped with the F.A.S.T.-key)</p>  <p>AGZ001632</p>	<p>Make sure the F.A.S.T.-key is in the vehicle. Make sure the selector lever is in the “P” (PARK) position, and then press the engine switch while depressing the brake pedal.</p>	<p>P. 5-24</p>
<p>The F.A.S.T.-key does not operate. (for vehicles equipped with the F.A.S.T.-key)</p>	<p>Insert the F.A.S.T.-key into the key slot of the instrument panel, and then start the engine or change the operation mode. Use the emergency key to lock and unlock the driver’s door.</p>	<p>P. 5-26, 5-26</p>

If this problem occurs...

2

Problem	Do this	Ref. Page
Cannot shift the selector lever from the "P" (PARK) position.	Shift the selector lever while pressing the brake pedal. Check that the ignition switch or the operation mode is in ON.	P. 5-64
The windows are fogged up. 	Push the defogger switch to change to the "☁" position.	P. 7-9
The engine does not start. The lights do not come on. The lights are dim. The horn does not honk. The horn sound is weak.	Have the battery checked. Recharge or replace as needed.	P. 8-2, 9-13

Problem	Do this	Ref. Page
<p>The information screen in the multi information display will be interrupted and the engine coolant temperature warning display will appear. Also “” will blink. (Type 1: Color liquid crystal display type) The high coolant temperature warning light will illuminate. (Type 2: Mono-color liquid crystal display type)</p> <div data-bbox="151 497 456 701" style="border: 1px solid black; padding: 5px;"> <p>Type 1</p>  and  <p>Type 2</p>  </div>  <p>AJM102393</p> <p>Steam comes out of the engine compartment.</p>	<p>The engine is overheated. Carefully stop the vehicle in a safe place.</p>	<p>P. 8-4</p>

If this problem occurs...

2

Problem	Do this	Ref. Page
If your vehicle becomes stuck in sand, mud or snow	<ol style="list-style-type: none"> 1. Slowly press down on the accelerator pedal to get your vehicle moving again. For an all-wheel drive vehicle, set the drive mode-selector to the “4WD AUTO” or “4WD LOCK” position (Electronically controlled 4WD), “SNOW” or “LOCK” position (S-AWC) and then slowly press down on the accelerator pedal to get your vehicle moving. 2. If there is nothing to stop your tires from slipping, rock your vehicle out of the stuck position. 	P. 8-15

⚠ WARNING

- **When attempting to rock your vehicle out of a stuck position, be sure that no one is near the vehicle. The rocking motion may cause the vehicle to suddenly lurch forward or backward, possibly injuring bystanders.**
- **Avoid revving the engine or spinning the wheels. Prolonged efforts to free a stuck vehicle may result in overheating and transaxle failure. If the vehicle remains stuck after several rocking attempts, have a towing service pull the vehicle out.**

Problem	Do this	Ref. Page
The brakes are not functioning properly after crossing a puddle or stream.	Dry out the brakes by driving slowly while lightly pressing the brake pedal.	P. 5-87, 6-5
The automatic transaxle makes no gear change when accelerating. The initial movement of the vehicle is slow when the vehicle starts moving. (for vehicles with automatic transaxle)	There may be a problem in the automatic transaxle. Have the system inspected by your authorized Mitsubishi Motors dealer or a repair facility of your choice.	P. 5-70

Problem	Do this	Ref. Page
<p>The continuously variable transmission (CVT) makes no shift change when accelerating. The initial movement of the vehicle is slow when the vehicle starts moving. (for vehicles with CVT)</p>	<p>There may be a problem in the CVT. If the  or  warning lights on the multi-information display (Color liquid crystal display type) will not turn off, or if they come on frequently, please have the vehicle checked at your nearest Mitsubishi Motors dealer.</p>	<p>P. 5-77</p>
<p>A tire is punctured.</p> 	<ol style="list-style-type: none"> 1. Park the vehicle in a safe place where the surface is flat and level. 2. Replace the flat tire with the spare tire. 	<p>P. 8-6</p>

General information

Fuel selection	3-2
Filling the fuel tank	3-3
Modifications to and racing of your vehicle	3-5
Genuine Mitsubishi Motors parts	3-6
California Perchlorate Materials Requirements	3-7

Fuel selection

N00301001922

3

Your vehicle is designed to use unleaded gasoline only. It is equipped with a fuel tank filler pipe specifically designed to accept only a small diameter unleaded gasoline dispensing nozzle.

WARNING

- Gasoline is highly flammable and explosive. You could be burned, seriously injured or killed when handling it. Whenever you refuel your vehicle, stop the engine and keep flames, sparks, and smoking materials away from the vehicle. Always handle fuel in well-ventilated outdoor areas.

CAUTION

- Using leaded gasoline in your vehicle will damage the engine, catalytic converter, and the oxygen sensors. Also, using leaded gasoline is illegal, and will void your warranty coverage of the engine, catalytic converter, and oxygen sensors.

Gasoline detergent additives

In the United States, fuel suppliers are required by law to add detergents to their gas-

oline to minimize fuel-injector clogging and minimize intake-valve deposits. Detergent gasoline helps keep your engine in tune and your emission-control system working properly.

Octane requirement

2.4 liter engine model

Your vehicle is designed to operate on unleaded gasoline having a minimum octane number of 87 [(MON+RON)/2] or 91 RON.

3.0 liter engine model

Unleaded gasoline having a minimum octane number of 87 [(MON+RON)/2] or 91 RON may be used, though it is recommended your vehicle be operated on premium grade unleaded gasoline having a minimum octane number of 91 [(MON+RON)/2], or 95 RON. To obtain maximum performance, premium gasoline is recommended.

Oxygenated gasoline

Gasoline sold at some service stations contains oxygenates such as ethanol, although

the oxygenates may not be identified by those names. Oxygenates are required in some areas of the country. Oxygenated fuel can be used in your vehicle.

Ethanol (Gasohol)

A mixture of up to 10 % ethanol (grain alcohol) and 90 % unleaded gasoline may be used in your vehicle, provided the octane number is at least as high as that recommended for unleaded gasoline.

Methanol

Do not operate your vehicle on gasoline containing methanol (wood alcohol). Using this type of alcohol could adversely affect the vehicle's performance and damage critical parts of the vehicle's fuel system.

Reformulated gasoline

Many areas of the country require the use of cleaner burning fuel referred to as "Reformulated Gasoline".

Reformulated gasoline contains oxygenates and is specially blended to reduce vehicle emissions and improve air quality.

Mitsubishi Motors Corporation strongly supports the use of reformulated gasoline. Properly blended reformulated gasoline has no adverse effect on vehicle performance or the durability of the engine and the fuel system.

MMT (methylcyclopentadienyl manganese tricarbonyl)

MMT is a manganese-containing metallic additive that is blended into some gasolines to increase the octane number. Mitsubishi Motors Corporation recommends using gasolines without MMT.

Use of gasolines blended with MMT may adversely affect performance, and cause the malfunction indicator on your instrument panel to come on. If this happens, contact an authorized Mitsubishi Motors dealer or a repair facility of your choice for assistance.

Sulfur in gasoline

Your vehicle may have been designed to satisfy California's low-emission regulations based on clean-burning low-sulfur gasoline. Gasoline sold in parts of the country other than California is allowed to have a higher sulfur content. Using such gasoline could adversely affect the vehicle's catalytic converter and cause the engine malfunction indi-

cator ("SERVICE ENGINE SOON" or "Check engine light") to come on. Illumination of this indicator while using high-sulfur gasoline does not necessarily mean the vehicle's emission-control system is malfunctioning. Your authorized Mitsubishi Motors dealer may suggest using a different, lower-sulfur brand of unleaded gasoline to determine if the problem is fuel-related.

NOTE

- Poor-quality gasoline can cause problems such as hard starting, stalling during idling, abnormal engine noise, and poor acceleration. If you experience any of these problems, try using a different brand of gasoline. If the engine malfunction indicator ("SERVICE ENGINE SOON" or "Check engine light") flashes, have the vehicle inspected as soon as possible by the nearest authorized Mitsubishi Motors dealer or a repair facility of your choice.

NOTE

- Repeatedly driving short distances at low speeds can cause deposits to form in the fuel system and engine, resulting in hard starting and poor acceleration. If these problems occur, you are advised to add a detergent additive to the gasoline when you refuel the vehicle. The additive will remove the deposits, thereby returning the engine to a normal condition. Be sure to use a Mitsubishi Motors Genuine cleaning additive. Using an unsuitable additive could make an engine malfunction. For details, please contact the nearest authorized Mitsubishi Motors dealer.

Filling the fuel tank

N00301101965

WARNING

- When handling fuel, comply with the safety regulations displayed by garages and filling stations.
- Gasoline is highly flammable and explosive. You could be burned, seriously injured or killed when handling it. When refueling your vehicle, always turn the engine off and keep away from flames, sparks, and smoking materials. Always handle fuel in well-ventilated outdoor areas.

⚠ WARNING

- Before removing the fuel tank filler cap, be sure to get rid of your body's static electricity by touching a metal part of the car or fuel pump. Any static electricity on your body could create a spark that ignites fuel vapor.
- Perform the whole refueling process (opening the fuel tank filler door, removing the fuel cap, etc.) by yourself; do not let any other person near the fuel tank filler. If you allowed a person to help you and that person was carrying static electricity, fuel vapor could be ignited.
- Do not move away from the fuel tank filler until refueling is finished. If you moved away and did something else (for example, sitting on a seat) part-way through the refueling process, you could pick up a fresh charge of static electricity.
- Be careful not to inhale fuel vapor. Fuel contains toxic substances.
- Keep the doors and windows closed while refueling the vehicle. If they were open, fuel vapor could get into the cabin.

Fuel tank capacity

All-wheel drive vehicles: 15.8 gal (60 L)
Front-wheel drive vehicles: 16.6 gal (63 L)

Refueling

1. Before filling with fuel, stop the engine.
2. The fuel tank filler is located on the rear driver side of your vehicle.

The fuel tank filler door can be opened from inside the vehicle with the fuel tank filler door release lever located at the left side of the driver's seat.

3. Open the fuel tank filler pipe by slowly turning the fuel tank filler cap counter-clockwise.

- 1- Remove
- 2- Close

⚠ WARNING

- Since the fuel system may be under pressure, remove the fuel tank filler cap slowly. This relieves any pressure or vacuum that might have built up in the fuel tank. If the cap is venting vapor or if you hear a hissing sound, wait until the sound stops before removing the cap. Otherwise, fuel may spray out, injuring you or others.

📖 NOTE

- While filling with fuel, hang the fuel cap on the hook (A) located on the inside surface of the fuel tank filler door.

4. Fueling correctly depends mainly on correct handling of the fuel filler nozzle. Do not tilt the nozzle. Insert the nozzle in the fuel tank filler port as far as it goes.

⚠ CAUTION

- Your vehicle can only be operated using unleaded gasoline. Serious engine and catalytic converter damage will result if leaded gasoline is filled into these vehicles, and consequently, this must never be attempted.

5. When the nozzle stops automatically, do not add more fuel.

⚠ CAUTION

- To avoid fuel spillage and overfilling, do not “top-off” the fuel tank. Spilled fuel could discolor, stain, or crack the vehicle’s paintwork. If fuel spills on the paintwork, wipe it off with a soft cloth.

6. To re-install, turn the fuel tank filler pipe cap slowly clockwise until you hear clicking sounds, then gently push the fuel tank filler door closed.

⚠ WARNING

- Make sure the fuel tank filler cap is securely closed. If the fuel cap were loose, fuel could leak, resulting in a fire.

⚠ CAUTION

- If you need to replace the fuel tank filler cap, use only the cap specified for your model vehicle.

📖 NOTE

- If the fuel tank filler cap is not tight while driving, the engine malfunction indicator (“SERVICE ENGINE SOON” or “Check engine light”) may come on when the onboard diagnostic (OBD) system performs a self check.

Always tighten the fuel tank filler cap until you hear at least 3 clicks.

The indicator will go off after several driving cycles. If the indicator does not go off, contact your authorized Mitsubishi Motors dealer or a repair facility of your choice as soon as possible.

Modifications to and racing of your vehicle

N00301600152

3

This vehicle should not be modified with non-Mitsubishi Motors genuine parts. Mitsubishi Motors designs and manufactures high quality vehicles with an emphasis on safety and durability. Modifications using non-Mitsubishi Motors genuine parts may affect the performance, safety and/or durability of your vehicle, and may violate applicable state and/or federal regulations.

DAMAGE OR PERFORMANCE PROBLEMS RESULTING FROM MODIFICATIONS TO OR RACING OF YOUR VEHICLE ARE NOT COVERED UNDER WARRANTY.

Examples of modifications to your vehicle that can cause damage or performance problems include the following:

- Failure to use Mitsubishi Motors genuine parts
- Failure to use required fuel and fluids
- Failure to use proper size tires and wheels
- Modification of the fuel, intake, exhaust, emission, suspension, engine, drive train or electrical wiring systems

- Modification of any onboard computer/control module, including reprogramming, or replacing/adding chips to any onboard computer/control module

Review the Warranty and Maintenance Manual for further details regarding warranty coverage.

Installation of accessories

N00301701219

CAUTION

- Before any electrical or electronic accessories are installed, consult an authorized Mitsubishi Motors dealer.

● The installation of accessories, optional parts, etc., should only be performed within the limits prescribed by law, and in accordance with the guidelines and warnings contained within the documents accompanying this vehicle.

Only Mitsubishi Motors approved accessories should be fitted to your vehicle.

- Improper installation of electrical parts could cause a fire. Refer to the “Modification/alterations to the electrical or fuel systems” section within this owner’s manual.

- Using a cellular phone or radio set inside the vehicle without an external antenna may cause electrical system interference, which could lead to unsafe vehicle operation.

- Tires and wheels which do not meet specifications must not be used.

Refer to the “Specifications” section for information regarding wheel and tire sizes.

WARNING

- **While driving, do not use a cellular phone in a way that hinders safe driving. Anything, including cellular phone usage, that distracts you from the safe operation of your vehicle increases your risk of an accident.**

Refer to and follow all state and local laws in your area regarding cellular phone usage while driving.

Important point!

Due to the large number of accessory and replacement parts provided by different manufacturers in the market, it is not always possible for an authorized Mitsubishi Motors dealer to check whether the attachment or installation of a non-Mitsubishi Motors genu-

ine parts affects the driving safety of your Mitsubishi-vehicle.

Modification/alterations to the electrical or fuel systems

N00301800141

Mitsubishi Motors manufactures high quality vehicles with an emphasis on safety. It is important to consult an authorized Mitsubishi Motors dealer before installation of any accessory which may involve modification of the electrical or fuel systems.

CAUTION

- Please consult an authorized Mitsubishi Motors dealer concerning any such accessory fitment or modification.

If the wires interfere with the vehicle body or improper installation methods are used (protective fuses not included, etc.), electronic devices may be adversely affected, resulting in a fire, vehicle damage, or other accident.

Genuine Mitsubishi Motors parts

N00301400219

Mitsubishi Motors Genuine Parts are designed and manufactured to meet high standards of performance, and are recommended for all of your maintenance needs. Also avail-

able from your Mitsubishi Motors dealer are a wide variety of accessories to personalize your new vehicle. Each Mitsubishi Motors vehicle has a selection of Mitsubishi Motors authorized accessories to choose from to tailor your new vehicle to your own personal preference. Your Mitsubishi Motors dealer's Parts Manager has information on various audio systems, protection items, as well as interior and exterior accessories available for your specific model.

California Perchlorate Materials Requirements

N00300100017

Certain components of this vehicle, such as airbag modules, seat belt pretensioners, and button cell batteries, may contain perchlorate materials.

Special handling may apply. For additional information, see www.dtsc.ca.gov/hazardous-waste/perchlorate.

Seats and restraint systems

N00401601219

Your vehicle has seat belts and other safety features that help protect you and your passengers in an accident.

4 Seat belts are the most important safety device. When worn properly, seat belts can reduce the chance of serious injury or death in various types of crashes. For added protection during a severe frontal collision, your vehicle has a Supplemental Restraint System (SRS) with airbags for the driver and passengers. The seats, head restraints, and door locks also are safety equipment, which must be used correctly.

Always check the following before you drive:

- That everyone in your vehicle is properly wearing their seat belt.
- That infants and small children are properly secured in an appropriate child restraint system in the rear seat.
- That all doors are fully closed and locked.
- That seatbacks are upright, with head restraints properly adjusted.

Safety equipment cannot prevent injury or death in all motor vehicle accidents. However, you can help reduce the risk of injury or death, by following the instructions in this manual.

Front seats

N00401801426

Position the driver's seat as far back as possible while maintaining a position that still enables you to fully apply the pedals, easily control the steering wheel and safely operate the vehicle.

⚠ WARNING

- **Do not attempt to adjust the seat while driving. This can cause loss of vehicle control and result in an accident.**
- **After adjusting the seat, make sure that it is securely locked into position.**

⚠ WARNING

- **To reduce the risk to the driver of serious injury or death during deployment of the driver's airbag, always properly wear the seat belt and adjust the driver's seat as far back as possible while maintaining a position that still enables you to fully apply the pedals, easily control the steering wheel, and safely operate the vehicle.**
- **To reduce the risk to the front passenger of serious injury or death during deployment of the passenger's airbag, always properly wear the seat belt and adjust the front passenger's seat as far back as possible.**
- **Always place children 12 years old and under in the rear seat and use appropriate child restraint systems.**

⚠ CAUTION

- Make sure that the seat is adjusted by an adult. If it is adjusted by a child, an unexpected accident might occur.
- Do not place a cushion or the like between your back and the seatback while driving. The effectiveness of the head restraints will be reduced in the event of an accident.
- When sliding the seats, be careful not to catch your hand or leg.
- When sliding or reclining the seat rearward, pay careful attention to the second row seat passengers.

⚠ CAUTION

- When adjusting the front seat while the second row seat is folded, be careful not to apply strong force to the flipped second row seat cushion.

Doing so could cause damage to the cover of the front seat and the fitting of the second row seat cushion.

To adjust the seat forward or backward

N00401901326

Manual seat adjustment

Pull the seat adjusting lever up and slide the seat forward or backward to the desired position. Release the adjusting lever to lock the seat in place.

**⚠ WARNING**

- To make sure that the seat is securely locked, try to move it forward or backward without using the adjusting lever.

Power seat adjustment

Operate the switch forward or backward to move the seat to the desired position. Release the switch to lock the seat in place.

- 1- Forward (toward the front of the vehicle)
- 2- Backward (toward the rear of the vehicle)

📖 NOTE

- To prevent the battery from completely discharging, operate the power seat with the engine running.

To adjust the seatbacks

N00402001379

Manual seat adjustment

4 To adjust the seatback, lean forward slightly, gently pull the seatback lock lever up, then lean backward to a comfortable position and release the lever. The seatback will lock in place.

⚠ CAUTION

- The reclining mechanism used in the seatback is spring loaded, and will cause the seatback to return quickly to the vertical position when the lock lever is operated. When pulling the lever, sit close to the seatback or hold the seatback with your hand to control its return motion.

Power seat adjustment

Operate the switch in the direction of the arrows to adjust the seatback.

- 1- Move forward
- 2- Move backward

📖 NOTE

- To prevent the battery from completely discharging, operate the power seat with the engine running.

⚠ WARNING

- To reduce the risk of serious injury or death in the event of an accident or sudden stop, all seatbacks should be kept in the upright position while the vehicle is in motion.

Seat belt performance during an accident can be adversely affected if the seatbacks are reclined. The more a seatback is reclined, the more likely seat belt performance will be adversely affected. If the seat belt is not properly positioned against the body during an accident, there is increased risk you will slide under the belt and receive serious injury or death.

To adjust the seat height (Driver's seat only)

N00402101253

Manual seat adjustment

Operate the lever repeatedly to raise or lower the seat.

- 1- Raise
- 2- Lower

- 1- Raise or lower the front end of the seat

- 3- Raise or lower the entire seat

Power seat adjustment

Operate the switch in the direction of the arrows to raise or lower the seat.

<p> NOTE</p> <ul style="list-style-type: none"> ● To prevent the battery from completely discharging, operate the power seat with the engine running.

- 2- Raise or lower the back end of the seat

Heated seat (if so equipped)

N00435601391

The heated seats can be operated by pushing the switch when the ignition switch or the operation mode is in ON. The indicator light (A) will illuminate while the heater is on.

- 1 (HI) - Heater high (for quick heating)
- 2 - Heater off
- 3 (LO) - Heater low (to keep the seat warm)

WARNING

- Persons who are unable to feel temperature change or skin pain due to age, illness, injury, medication, alcohol use, fatigue or other physical conditions or who have sensitive skin may suffer burns when using the heated seat even at low temperatures. To reduce the risk of burns, people with such conditions must use care when using the heated seat.

CAUTION

- Switch off the heated seats when not in use. Operate the heaters at the “HI” position for quick heating. After the seat has become warm, set the heater switch to the “LO” position to keep it warm. Slight variations in the seat temperature may be felt while using the heated seats. This is caused by the operation of the heater’s internal thermostat and does not indicate a malfunction.
- Do not place heavy objects on the seat or stick pins, needles, or other pointed objects into the seat.
- Do not place a blanket, cushion, or other insulating material on the seat while using the heater; doing so can cause the heater element to overheat.
- When cleaning the seat, do not use benzine, kerosene, gasoline, alcohol, or other organic solvents; doing so can cause damage not only to the surface of the seat, but also to the heater.
- If water or any other liquid is spilled on the seat, allow it to dry thoroughly before attempting to use the heater. Turn the heater off immediately if it appears to be malfunctioning during use.

Second row seats

N00402501231

When sitting in the middle seating position of the second row seat, adjust the head restraints

to an appropriate height where they lock in position. Refer to “Head restraints” on page 4-10.

To adjust the seat forward or backward (vehicles with second row seat slide function)

Pull the seat adjusting lever up and slide the seat forward or backward to the desired position. Release the adjusting lever to lock the seat in place.

AJA100337

NOTE

- You can adjust the seat forward or backward on either side separately.

⚠ WARNING

- To make sure that the seat is securely locked, try to move it forward or backward without using the adjusting lever.

⚠ CAUTION

- When sliding (vehicles with second row seat slide function) or reclining the seat rearward, pay careful attention to the third row seat passengers.

To adjust the seatbacks

Pull the lever up and adjust the seatback by hand to the desired position, and release the lever. The seatback will lock in place.

**📖 NOTE**

- You can adjust the seatback forward or backward on either side separately.

⚠ WARNING

- To reduce the risk of serious injury or death in the event of an accident or sudden stop, all seatbacks should be kept in the upright position while the vehicle is in motion.
- Seat belt performance during an accident can be adversely affected if the seatbacks are reclined. The more a seatback is reclined, the more likely seat belt performance will be adversely affected. If the seat belt is not properly positioned against the body during an accident, there is increased risk you will slide under the belt and receive serious injury or death.
- When a person is sitting in the middle seating position of the second row seats, the two sides of the second seats must have the same forward/backward position (vehicles with second row seat slide function) and the same seatback angle.

Arm rest

N00403001318

To use the armrest, tilt the arm rest down for use as shown.

The arm rest includes a cup holder.

**📖 NOTE**

- Never sit on an arm rest. Doing so could damage the arm rest.

Accessing the third row seat (Walk-in function, Seating 7 passengers)

N00400101031

For third row seat passenger entry or exit, the second row seats can be moved forward. Pull up the lever (A) and tilt the seatback forward. Then slide the entire seat forward.

Third row seat (Seating 7 passengers)

To return the seat, slide the entire seat backward to the desired position and then raise the seatback until it locks securely.

After returning the seat, gently try to move it forward and backward to check that it is securely retained and adjust the seatback to the normal seating position.

4

⚠ WARNING

- To make sure that the seat is securely locked, try to move it forward or backward without using the lever. To reduce the risk of serious injury or death in the event of an accident or sudden stop, all seatbacks should be kept in the upright position while the vehicle is in motion.

Third row seat (Seating 7 passengers)

N00419501073

⚠ WARNING

- The third row seats are intended for use by no more than two belted occupants, each of which does not exceed 160 cm (63 inches) in height. Exceeding these limitations can result in an increased risk of personal injury or death in the event of an accident.

To adjust the seatback

Pull up the strap and adjust the seatback by hand to the desired position, and release the strap.

Head restraints

N00404301594

Head restraints can reduce the risk of a whiplash injury if your vehicle is hit from the rear. The head restraints are equipped in the illustrated position.

To maximize the effectiveness of the head restraints, adjust the seatback to the upright position, and the head restraint to the proper position. Sit back against the seatback with your head close to the head restraint.

*: Seating 7 passengers

⚠ WARNING

- Driving without the head restraints in place can cause you and your passengers serious injury or death in an accident. To reduce the risk of injury in an accident, always make sure the head restraints are installed and properly positioned when the seat is occupied.
- In order to minimize the risk of a neck injury due to a rear impact, the seatback must be adjusted to the upright position and the head restraint must be adjusted to the proper position before vehicle operation. The driver should never adjust the seat while the vehicle is in motion.
- Never place a cushion or similar device on the seatback. This can adversely affect head restraint performance by increasing the distance between your head and the restraint.

⚠ WARNING

- When a person sits in the second center seating position, pull up the head restraint to a height at which it locks in position. Be sure to make this adjustment before starting to drive. Serious injuries could otherwise be suffered in the result of an impact.

**📖 NOTE**

- The head restraint height in the second row outboard seats and the third row seats cannot be adjusted.

Adjustment of the head restraint height (front seats)

To reduce the risk of injury in an accident, adjust the head restraint height so that the center of the restraint is at your ear level when seated. Any person too tall for the restraint to reach their ear level when seated should raise the restraint to the highest locked position.

- To raise the restraint, pull it straight up.
- To lower the restraint, push down on it while pressing the lock knob (A) in the direction shown by the arrow.
- After adjusting the height, push down on the restraint to make sure it is locked in position.

Making a cargo area

To remove

Press the lock knob (A) in the direction shown by the arrows. Then pull the head restraint up and out of the seatback.

⚠ WARNING

- To help minimize the risk of neck injury in the event of an accident, the head restraints must be properly installed and positioned to proper height before vehicle operation.

To install

First check that the head restraint is facing in the right direction as shown in the previous illustration, and then insert it into the seatback. Push the head restraint down while

pressing the lock knob (A) until the restraint locks into place.

⚠ CAUTION

- Check that the lock knob (A) is extended out as shown in the illustration. Then pull the head restraint up to make sure that it is locked in place and will not come out of the seatback.

⚠ CAUTION

- The shape and size of the head restraint differs according to the seat. Always use the correct head restraint provided for the seat and do not install the head restraint in the wrong direction.

Making a cargo area

N00405501115

⚠ WARNING

- Never adjust the seats to make a cargo area when the vehicle is in motion or on a slope. The seats could move more than necessary or move suddenly and causing a serious accident and/or injury.
- When returning a seat back to its seating position after folding down, make sure that the seat is firmly secured and seat belt buckles are in proper position. If the seat is not secured, it could move causing a serious accident.
- Do not allow anyone to ride in the cargo area while the vehicle is in motion. People who are not properly seated and restrained can be seriously injured or killed in an accident.

⚠ WARNING

- When driving the vehicle, do not allow anyone to sit on the third row seat if the second row seat is in the folded position.

⚠ CAUTION

- In the cargo area, do not load the luggage higher than the top of the seats and make sure that the luggage is firmly secured. Restricted rear vision or flying objects entering the passenger compartment during sudden braking could result in a serious accident and/or injury.
- Seats should always be operated by an adult. Seat adjustments by a child could lead to an unexpected accident.
- When adjusting the seats, be careful not to catch your hand or leg. Personal injury could result.

📖 NOTE

- When the seatback of a front seat is reclined, return it to the upright position before driving.

Folding the second row seats

N0405701146

The second row seat can be folded to create an additional cargo area.

📖 NOTE

- You can separately fold the right and left side of the second row seat.

To fold the second row seat

1. When folding the left side second row seat, store the seat belt for the middle seating position of the second row seat. Refer to “Detachable center seat belt for second row” on page 4-20.
2. Lower the head restraint for second row middle seating position to its lowest position. Refer to “Head restraints” on page 4-10.
3. Pull the strap (A), then fold forward the head restraints for second row outside seating position.

AJ4109907

4. On vehicles with the second row seat slide function, move the second row seat fully backward. Refer to “To adjust the seat forward or backward” on page 4-8.

📖 NOTE

- If you do not move the second row seat fully backward, you may not be able to fold the second row seat.

5. Pull the strap (B), then flip the seat cushion forward.

AJ4100538

Making a cargo area

6. Fold forward the seat belt buckle.

CAUTION

- Do not allow any person to get on the plastic cover (C), and do not place luggage on it. Doing so could damage the plastic cover.

7. Pull up the lever (D), then fold the seat-back forward.

CAUTION

- Do not allow any person to sit on the flipped seat cushion, and do not place luggage on it. The seat's mounting fittings could bend under the weight, making it impossible for the seat cushion to be secured when it returns to the original position.

NOTE

- If the seatback cannot be folded, follow the steps below.
 - Raise the seatback once until it locks.
 - Pull the strap again.
 - Pull up the lever, then fold the seatback forward.

To return

- Raise the seatback until it locks securely into place.
- While lifting the seat belt buckle (A), gently lower the seat cushion. Make sure that there is a hook (B) at the position shown in the illustration.

NOTE

- A rubber strap (C) is attached to the seat belt buckle for the left outboard seating position. This helps raise the seat belt buckle while the seat cushion returns to the original position.

3. Push down the seat cushion until it locks securely into place.

4. Make sure that all seat belt buckles are properly positioned on the seat cushion.
5. Return the folded head restraint to its original position.

WARNING

- Ensure that the head restraints are returned to their original positions before the seats are occupied. Failure to do so could cause serious injury if involved in an accident.

6. If the center seat belt is stored;
 - Pull out the detachable anchor plate (D) from the seatback.
 - Pull the small latch plate (E) slowly and insert it into the detachable anchor plate until a click is heard.
 - Make sure that the seat belt is not twisted.

For details, refer to “Detachable center seat belt for second row” on 4-20.

**Folding the third row seats
(Seating 7 passengers)**

N00409800021

To fold

1. Remove the head restraints from the third row seats. (Refer to “Head restraints” on page 4-10.)
2. Pull up the strap (A), then fold the seat-back forward.

3. Stow the removed head restraints in the luggage floor box with their front faces facing downward.

To return

1. Pull the strap (A), then raise the seatback until it locks securely into place. Push lightly on the seatback to confirm that it has actually been secured.

2. Install the head restraints.

Making a flat seat

N00404801166

The entire interior of the vehicle may be used for sleeping accommodations by removing the head restraints and fully reclining all the seats when the vehicle is stopped.

WARNING

- Never drive with passengers or cargo on the flat seat. This is extremely dangerous and can cause severe or fatal injury or death in an accident or if heavy braking is required.

CAUTION

- Adjust the seats only when the vehicle is stopped in a safe place.
- Seat should be adjusted only by adults to avoid accidents.
- When sliding the seats, be careful not to catch your hand or leg.
- Do not walk around on top of the seats after they have been laid flat because the footing is uneven. It is safest to move about on your hands and knees.
- To ensure the seats are locked securely, attempt to move them back and forth.
- Do not jump on or drop heavy objects on the seatbacks.

CAUTION

- To raise the seatback of the front seat, firmly place your hand on the seatback, pull the seatback lock knob up, and raise the seatback slowly. (Refer to “To adjust the seatback” on page 4-6.) Do not let children adjust the seatback.

1. Remove the head restraints from the front seats and raise the arm rest on the second row seats.

For vehicles with a cargo area cover, remove the cover.

(Refer to “Head restraints” on page 4-10, “Arm rest” on page 4-9 and “Cargo area cover” on page 5-233.)

2. Slide the second row seats back as far as possible (vehicles with second row seat slide function). (Refer to “To adjust the seat forward or backward” on page 4-8.)

3. Slide the front seats fully forward, then recline their seatbacks backward to achieve a flat surface.
(Refer to “To adjust the seat forward or backward” on page 4-5 and “To adjust the seatback” on page 4-6.)

4. Recline the seatbacks of the second row seats.
(Refer to “To adjust the seatback” on page 4-8.)

5. The flat seat configuration is now complete.
To return the seats to the normal position, reverse the above procedure.

Seat belts

N00406001481

Seat belts are installed in your vehicle to help reduce the risk of injury to the driver and passenger in the event of an accident. Always use the provided seat belts.

Carefully review the following information for proper seat belt usage.

⚠ WARNING

- To help reduce the risk of injury or death in an accident, seat belts and child restraint systems must always be used. Refer to “Child restraint systems” on page 4-26 for additional information.
- Never use one seat belt for more than one person.
- Never carry more people in your vehicle than there are seat belts.
- Always adjust the seat belt for a snug fit.
- Always place the shoulder belt over your shoulder and across your chest. Never put it behind you or under your arm.
- Always wear the lap belt as low as possible across your hips, not around your waist.
- Never modify or alter the seat belts in your vehicle.

⚠ WARNING

- To reduce the risk to the driver of serious injury or death during deployment of the driver's airbag, always properly wear the seat belt and adjust the driver's seat as far back as possible while maintaining a position that still enables you to fully apply the pedals, easily control the steering wheel, and safely operate the vehicle.
- To reduce the risk to a front seat passenger of serious injury or death from a deploying airbag, make sure the passenger always wears the seat belt properly, remains seated all the way back and upright in their seat, and moves the seat as far back as possible. Refer to "Supplemental Restraint System (SRS) - airbag" on page 4-33 for additional information.
- Never hold an infant or child in your arms or on your lap when riding in this vehicle even when you are wearing your seat belt. Never place any part of the seat belt you are wearing around an infant or child. Failure to follow these simple instructions creates a risk of serious injury or death to your child in the event of an accident or sudden stop.

⚠ WARNING

- Children 12 years old and under should always ride in the rear seat and be properly restrained. This reduces their risk of serious injury or death in an accident, especially due to a deploying front passenger's airbag. Refer to "Child restraint systems" on page 4-26 for additional information.
- Any child who is too small to properly wear a seat belt must be properly restrained in an appropriate child restraint system.
- Infants **MUST** be placed in a rear-facing child safety seat and positioned in the rear seat.
- In the event of an accident, all seat belt assemblies, including retractors and attachment hardware, should be inspected by an authorized Mitsubishi Motors dealer to determine whether replacement is necessary.

Seat belt instructions

N00406201467

All seats are equipped with a seat belt which uses one combined lap-and-shoulder belt with an emergency locking retractor.

This system is designed to provide both comfort and safety. It permits full extension and automatic retraction of the belts during normal vehicle operation. A sensing device

inside the belt retractor is designed to lock the retractor in the event of a sudden change in the vehicle's motion.

📖 NOTE

- For instructions on installing a child restraint system using a seat belt, refer to "Installing a child restraint system using the seat belt" on page 4-31.

1. Occupants should always sit back in their seats with their backs against the upright seatback. To reduce the risk of serious injury or death during deployment of the airbag, adjust the driver's seat as far back as possible while maintaining a position that still enables you to fully apply the pedals, easily control the steering wheel, and safely operate the vehicle. The front passenger seat should also be moved as far back as possible. Refer to "Supplemental Restraint System (SRS) - airbag" on page 4-33. Also refer to "To adjust the seat forward or backward" on page 4-5.

4. The lap part of the belt must always be worn low and snug across the hips. Pull up on the shoulder portion of the belt to take up any slack in the lap belt.

⚠ WARNING

- To reduce the risk of serious injury or death in the event of an accident or sudden stop, all seatbacks should be kept in the upright position while the vehicle is in motion.

Seat belt performance during an accident can be adversely affected if the seatbacks are reclined. The more a seatback is reclined, the more likely seat belt performance will be adversely affected. If the seat belt is not properly positioned against the body during an accident, there is increased risk you will slide under the belt and receive serious injury or death.

3. Pull the seat belt out slowly while holding the latch plate. Push the latch plate into the buckle until you hear a “click”. Pull up on the belt to be sure the latch plate is locked securely in the buckle.

📖 NOTE

- With the exception of the seat belt for the driver, the seat belts in all other seating positions are equipped with an Automatic Locking Retractor (ALR) function. If you pull the seat belt fully out of the retractor, the retractor will switch to its ALR child restraint installation function (see page 4-31). When the ALR function has been activated, the seat belt will only retract. If this happens, let the belt fully retract, then pull the seat belt back out, repeating steps 1 through 4.

2. Grasp the latch plate and slide it up the webbing so that it easily pulls across your body.

📖 NOTE

- If the seat belt locks up and cannot be pulled out, pull it once with force and let it retract all the way. Then, pull the belt out slowly once again.

⚠ WARNING

- Be sure the lap belt portion fits snugly and is worn as low as possible across the hips, not around the waist. Failure to follow this instruction will increase the risk of serious injury or death in the event of an accident.
- Be sure the seat belt webbing is not twisted when worn. Twisted webbing may adversely affect seat belt performance.

5. To release the belt, press the button on the buckle and allow the belt to retract. If the belt does not retract smoothly, pull it out and check for kinks or twists in the webbing. Then make sure it remains untwisted as it retracts.

Detachable center seat belt for second row

N0040990035

The center seat belt for the second row can be detached to fold the left side second row seat. This seat belt must be worn correctly as illustrated.

AA0111461

⚠ WARNING

- Never detach the center seat belt except when the left side seat back in the second row is folded. Using the center seat belt with the detachable anchor unlatched increases the risk of serious injury or death in an accident. Make sure the small latch plate (A) is properly latched to the detachable anchor before the center seat belt is used.

To attach

1. Pull out the detachable anchor plate (C) from the storage pocket on seat back cushion.
2. Pull out the small latch plate (A) and then pull out the latch plate (B) by tilting it as shown in the illustration.

AJA109994

📖 NOTE

- Pulling out the latch plate by force may damage the headliner.

3. Pull the small latch plate (A) slowly and insert it into the detachable anchor plate until a click is heard. Make sure that the seat belt is not twisted.

NOTE

- If the seat belt locks up and cannot be pulled out, pull it once with force and let it retract all the way. Then, pull the belt out slowly once again.
- The seat belt can be buckled up by inserting the latch plate (B) into the buckle (D) like other seat belts.
- If the seat belt switch to the ALR child restraint installation function and cannot be pulled out, detach the latch plate (B) and move the second row seat fully backward. Refer to “Installing a child restraint system using the seat belt” on page 4-31.

To detach

1. While holding the seat belt, insert a metal plate, such the latch plate of the seat belt or a key, into the slit (E) on the detachable anchor (C) and release the center seat belt from the detachable anchor.

2. Retract the seat belt slowly by holding the seat belt.

NOTE

- If the seat belt is not held, the seat belt will rapidly retract. This could cause damage to the interior trim.

3. After the seat belt has retracted completely, insert the latch plate (B) into the upper slit (F), and then insert the small latch plate (A) into the lower slit (G).

4. Store the detachable anchor in the storage pocket on the seatback.

Driver's seat belt reminder/warning light and display

N00418401394

4

A tone and warning light are used to remind the driver to fasten the seat belt.

If the ignition switch is turned to the “ON” position or the operation mode is put in ON without the driver’s seat belt being fastened, a

warning light will come on and a tone will sound for approximately 6 seconds to remind you to fasten your seat belt.

If the vehicle is driven with the seat belt still unfastened, the warning light will blink and the tone will sound intermittently until the seat belt is fastened. At the same time, “FASTEN SEAT BELT” is displayed on the information screen in the multi information display (Type 1 only).

WARNING

- In order to reduce the risk of serious injury or death in an accident, always fasten your own seat belt. Do not allow anyone to ride in your vehicle unless he or she is also seated and fastening a seat belt. Children should additionally be restrained in a secure child restraint system.

NOTE

- If the seat belt subsequently remains unfastened, the warning light and the tone will issue further warnings each time the vehicle starts moving from a stop.

Front passenger seat belt warning light

N00418301247

The front passenger seat belt warning light is located in the instrument panel.

When the ignition switch is turned to the “ON” position or the operation mode is put in ON, this indicator normally comes on and goes off a few seconds later.

The light comes on when a person sits on the front passenger seat but does not fasten the seat belt. It goes off when the seat belt is subsequently fastened.

⚠ WARNING

- When a child booster seat is used on the front passenger seat, the front passenger seat belt warning light will not come on, if the seat belt is not fastened when the booster seat is used. Confirm that the child is wearing the seat belt properly.
- Do not install any accessory or sticker that makes the light difficult to see.

Adjustable seat belt shoulder anchor (front seats)

N00406301354

The seat belt shoulder anchor height can be adjusted. To move the anchor down, press the lock knob (A) and slide the anchor down to the desired position. To move the anchor up, slide the anchor up to the desired position.

**⚠ WARNING**

- Always adjust the shoulder belt anchor so that the shoulder belt is positioned across the center of your shoulder without touching your neck. The shoulder belt should not be able to fall off your shoulder. Failure to follow this instruction can adversely affect seat belt performance and increase the risk of serious injury or death in the event of an accident.
- Adjust the shoulder belt anchor only when the vehicle is not in motion.
- Make sure the anchor is securely locked in position after adjusting it.

Storing the second row (outboard seating positions) and third row seat belts

N00406501112

When seat belts for the second row outboard seating position and for the third row are not used, the seat belts can be stored.

4

Seat belt use during pregnancy

Put the seat belt webbing in the back slot (A) on the clip and insert the metal plate of the latch plate into the front slot (B) as shown in the illustration.

4

Seat belt extender

N00406701202

If your seat belt is not long enough, even when fully extended, a seat belt extender must be obtained. The extender may be used for either of the front seats.

⚠ WARNING

- The extender should only be used if the existing belt is not long enough. Anyone who can use the standard seat belt should not use an extender. Unnecessary use of an extender can adversely affect seat belt performance in an accident.
- When not required, the extender must be removed and stowed.

Seat belt use during pregnancy

N00406800134

Seat belts work for everyone, including pregnant women. Like all occupants, pregnant women are more likely to be seriously injured or killed in an accident if they do not wear seat belts.

⚠ WARNING

- To reduce the risk of serious injury or death to pregnant women and unborn children in an accident, pregnant women should always wear a seat belt. The lap portion of the seat belt should be worn snug and low across the hips and below the rounding. Consult your doctor if you have any additional questions or concerns.

Seat belt pre-tensioner and force limiter systems

N00417701710

The driver's and front passenger's seats each have a seat belt equipped with a pre-tensioner system and force limiter system.

Pre-tensioner system

The driver and front passenger seat belts are equipped with a seat belt pre-tensioner system. In a moderate-to-severe frontal or side collision or when a rollover or overturning of the vehicle is detected, the pre-tensioner system operates simultaneously with the deployment of the front airbags, side airbags or curtain airbags.

The seat belt pre-tensioners are located in the driver's and front passenger's seat belt retractors (A) and in the front passenger seat's final anchor (B). When activated, the pre-tensioners quickly draw back seat belt webbing and increase seat belt performance.

The seat belt pre-tensioner system includes the following components:

- 1- SRS warning light
- 2- Front impact sensors
- 3- Seat belt pre-tensioner
- 4- Airbag control unit
- 5- Side impact sensors
- 6- Seat belt buckle switches

The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch or the operation mode is under the following conditions. These include all of the items listed above and all related wiring.

[Except for vehicles equipped with the F.A.S.T.-key]

The ignition switch is in the "ON" or "START" position.

[Vehicles equipped with the F.A.S.T.-key]

The operation mode is in ON.

The seat belt pre-tensioners will operate under the same conditions as the airbag control unit.

When the seat belt pre-tensioners activate, some smoke is released and a loud noise will be heard. The smoke is not harmful, but care should be taken not to intentionally inhale it, as it may cause some temporary irritation to people with respiratory problems.

Even in the event of a severe impact, the pre-tensioners will not operate if the seat belts are not fastened. The seat belt pre-tensioners may not activate in certain collisions, even though the vehicle may appear to be severely damaged. Such non-activation does not mean that something is wrong with the seat belt pre-tensioner system, but rather that the collision forces were not severe enough to activate the system.

WARNING

- The seat belt pre-tensioner system is designed to work only once. After the seat belt pre-tensioners have been activated, they will not work again. They must promptly be replaced and the entire seat belt pre-tensioner system inspected by an authorized Mitsubishi Motors dealer.

SRS warning

N00408701147

This warning light tells you if there is a problem involving the SRS airbags and/or the seat belt pre-tensioner system. Refer to “SRS warning light/display” on page 4-39.

Force limiter system

N00408900126

In the event of an accident, the seat belt force limiter system will help reduce the force applied to the driver and front seat passenger.

Child restraint systems

N00407101740

When transporting infants or small children in your vehicle, an appropriate child restraint system must always be used. This is required by law in the U.S. and Canada.

Child restraint systems specifically designed for infants and small children are offered by several manufacturers. Choose only a child restraint system with a label certifying that it complies with Federal Motor Vehicle Safety Standard 213 (FMVSS 213) or Motor Vehicle Restraint Systems and Booster Seats Safety Regulations (RSSR). Look for the manufacturer’s statement of compliance on the box and child restraint system itself.

The child restraint system should be appropriate for your child’s weight and height, and should properly fit your vehicle’s seat.

For detailed information, refer to the instruction manual accompanying the child restraint system.

Guidelines for child restraint system selection

All children should be properly restrained in a restraint device that offers the maximum protection for their size and age.

Be sure to check local, state, or provincial requirements for child size and age that may vary from the recommendations listed below.

- Children less than 1 year old and who weigh 22 pounds (10 kg) or less **MUST** ride in a rear-facing child safety seat that **MUST ONLY** be used in the second row seat.
- Children older than 1 year of age and who weigh less than 40 pounds (18 kg) or who are less than 40 inches (100 cm) tall must be in a forward-facing restraint used only in the rear seat.

- Children who weigh more than 40 pounds (18 kg) or who are more than 40 inches (100 cm) tall, regardless of age, should use a suitable child seat or a booster seat in the rear seat until the vehicle’s lap-and-shoulder belt fits them properly.

WARNING

- All children must be seated in the rear seat, and properly restrained. Accident statistics show that children of all sizes and ages are safer when properly restrained in the rear seat, rather than in the front seat.
- Be sure to select a child restraint system that is appropriate not only for the child’s size and age but also for your vehicle. Some child restraint systems may not fit your vehicle properly.

⚠ WARNING

- Any child who is too large to use a child restraint system should ride in the rear seat and wear the lap-and-shoulder belt properly. The shoulder belt must be positioned over the shoulder and across the chest, not across their neck, and with the lap belt positioned low on the child's hips, not across their stomach. If necessary, a booster seat should be used to help achieve a proper seat belt fit. Follow the booster seat manufacturer's instructions. Only use a booster seat that is certified as complying with Federal Motor Vehicle Safety Standards or Motor Vehicle Restraint Systems and Booster Seats Safety Regulations.

⚠ WARNING

- Never hold an infant or child in your arms or on your lap when riding in this vehicle, even when you are wearing your seat belt. Never place any part of the seat belt you are wearing around an infant or child. Failure to follow these simple instructions creates a risk of serious injury or death to your child in the event of an accident or sudden stop.

**⚠ WARNING**

- Your vehicle is also equipped with a front passenger's airbag. Never put REAR-FACING CHILD RESTRAINT SYSTEMS or INFANT RESTRAINT SYSTEMS in the front passenger seat. This places the infant too close to the passenger's airbag. During deployment of that airbag, the infant can be seriously injured or killed. Rear-facing child restraint systems or infant restraint systems must only be used in the rear seat.

⚠ WARNING

- **FRONT-FACING CHILD RESTRAINT SYSTEMS** should be used in the rear seat whenever possible. If one must be used in the front passenger seat, move the seat to the most rearward position and make sure the child stays in the child restraint system, properly restrained. Failure to follow these instructions could result in serious injury or death to the child.

⚠ WARNING

- When installing a child restraint system, follow the instructions provided by the manufacturer and follow the directions in this manual. Failure to do so can result in serious injury or death to your child in an accident or sudden stop.
- After installation, push and pull the child restraint system back and forth, and side to side, to see that it is firmly secured. If the child restraint system is not installed securely, it may cause injury to the child or other occupants in the event of an accident or sudden stop.
- When not in use, keep your child restraint system secured with the seat belt, or remove it from the vehicle, in order to prevent it from being thrown around inside the vehicle during an accident.

📖 NOTE

- Before purchasing a child restraint system, try installing it in the rear seat to ensure proper fit. Due to the location of the seat belt buckles and the shape of the seat cushion, it may be difficult to securely install some manufacturer's child restraint systems. If the child restraint system can be pulled forward or to either side easily on the seat cushion after the seat belt has been tightened, choose another manufacturer's child restraint system. Depending on the seating position in the vehicle and the child restraint system that you have, the child restraint system can be attached using one of the following 2 methods:
 - Attach to the lower anchorage in the second row seat **ONLY** if the child restraint system is compatible with the LATCH system (See page 4-29).
 - Attach to the seat belt (See page 4-31).

⚠ WARNING

- It is important to use an approved rear-facing infant restraint until the infant is one year old (unless the infant outgrows the seat sooner). This allows the infant's neck and spine to develop enough to support the weight of their head in the event of an accident.

Installing a child restraint system using the LATCH (Lower Anchors and Tethers for children) system

N00418801167

Lower anchor locations

The outboard seating positions in the second row seat of your vehicle are equipped with lower anchors for attaching child restraint systems compatible with the LATCH system.

NOTE

- The symbols on the seatback show the location of the lower anchor points.

Tether anchor locations

N00418901201

Your vehicle has 3 attachment points on the backside of the second row seats. These are for securing a child restraint system tether strap to each of the 3 rear seating positions in your vehicle.

Examples of child restraint systems compatible with the LATCH system

N00419000198

- A- Rear-facing child restraint system
 - B- Front-facing child restraint system
 - C- Child restraint system lower anchor connectors
 - D- Tether strap
- (These are only examples.)

Using the LATCH system

N00419101271

1. In order to securely fasten the tether strap, remove the head restraint from the location where you wish to install the child restraint system.
2. Open the gap a little between the seat cushion (A) and the seatback (B) with your hand to locate the lower anchors (C).

Child restraint systems

4

3. For easier access, the seatback may be recline rearward.

Push the anchor connectors (D) on the child restraint system into the lower anchors (C) in accordance with the instructions provided by the child restraint system's manufacturer.

After it is security fastened, adjust the seatback to 4 steps forward from most reclined position.

Remember, the lower anchors (C) provided with your vehicle are designed to secure suitable child restraint systems compatible with the LATCH system in the outboard positions of the second row seats only. The anchor connectors are NOT designed to secure a suitable child restraint system in the middle seating position of the second row seat.

- A- Vehicle seat cushion
- B- Vehicle seatback
- C- Lower anchor

D- Connector

NOTE

- In order to secure a child restraint system compatible with the LATCH system, use the lower anchor points in the outboard positions of the second row seat. It is not necessary to use the vehicle's seat belt. The vehicle's seat belt, however, **MUST** be used to secure a child restraint system in the middle seating position of the second row seat.

WARNING

- If there is any foreign material in or around the lower anchors, remove it before installing the child restraint system. Also, make sure the seat belt is away from, not looped through or otherwise interfering with, the child restraint system. If foreign matter is not removed and/or the seat belt interferes with the child restraint system, the child restraint system will not be secured properly, could detach and move forward in the event of sudden braking or an accident, and could result in injury to the child or other vehicle occupants.
- When the vehicle is moving, do not adjust the seat where the child restraint system is installed.

4. Latch the tether strap hook (E) of the child restraint system to the tether anchor bar (F) and tighten the tether strap so it is securely fastened.

NOTE

- If it is difficult to latch the tether strap hook, turn the hook sideways.

5. Push and pull the child restraint system in all directions to ensure it is firmly secured.

WARNING

- Child restraint system tether anchors are designed only to withstand loads from correctly fitted child restraint systems. Under no circumstances are they to be used for adult seat belts, harnesses, for attaching other items, or equipment to the vehicle.

Installing a child restraint system using the seat belt (with emergency/automatic locking mechanism)

N00407301494

With the exception of the driver, the seat belt in all other seating positions can be converted from normal Emergency Locking Retractor (ELR) mode, to Automatic Locking Retractor (ALR) mode. This means that when you pull the seat belt fully out of the retractor, the retractor will switch to its ALR child restraint installation function. Always use the ALR child restraint installation function when you install a child restraint system using the seat belt.

Children 12 years old and under should always be restrained in the rear seat, whenever possible, although the front passenger seat belt can also be converted to ALR mode.

⚠ WARNING

- When you install a child restraint system using the seat belt, always make sure the retractor has been switched to the ALR child restraint installation function. The ALR function will keep the child restraint system tightly secured to the seat. Failure to convert the retractor to the ALR function may allow the child restraint system to move forward during sudden braking or an accident, resulting in serious injury or death to the child or other occupants.

Installation

1. Place the child restraint system on the seat where you wish to install it.
To help assure proper fitting of the child restraint system, always remove the head restraint.
When installing the front-facing child restraint system on the second row seat, adjust the angle of the second row seat-back to the most upright position.
2. Route the seat belt through the child restraint system according to the instructions provided by the child restraint system's manufacturer. Then insert the seat belt latch plate into the buckle. Make sure you hear a "click" when you insert the latch plate into the buckle.

3. To activate the ALR child restraint installation function, slowly pull the shoulder part of the belt all the way out of the retractor until it stops. Then let the belt feed back into the retractor.

4. After the belt has retracted, tug on it.

If the belt is in the ALR function, you will not be able to pull it out. If the webbing can be pulled out from retractor, the ALR function has not been activated and you will need to repeat steps 3 and 4.

5. After confirming that the belt is locked, grab the shoulder part of the belt near the buckle and pull up to remove any slack from the lap part of the belt allowing the slack to feed into the retractor. Remember, if the lap belt portion is not tight, the child restraint system will not be secure. It may help to put your weight on the child restraint system and/or push on its seat-back while pulling up on the belt (See illustration).

If your child restraint system requires the use of a tether strap, fasten the tether strap in accordance with the following procedures.

6. Latch the tether strap hook (A) of the child restraint system to the tether anchor bar (B) and tighten the tether strap so it is securely fastened.

NOTE

- If it is difficult to latch the tether strap hook, turn the hook sideways.

WARNING

- **Child restraint system tether anchors are designed only to withstand loads from correctly fitted child restraint systems. Under no circumstances are they to be used for adult seat belts, harnesses, for attaching other items, or equipment to the vehicle.**

7. Before putting your child in the restraint, push and pull the restraint in all directions to be sure it is firmly secure. Do this before each use. If the child restraint system is not firmly secure, repeat steps 1 through 6.
8. To remove a child restraint system from the vehicle and deactivate the ALR mode, remove the child from the restraint. Unlatch the buckle. Then remove the belt from the restraint and let the belt fully retract.
9. Reinstall the head restraint.
Refer to “Head restraints” on page 4-10.

Children who have outgrown child restraint systems

N00407601628

Children who have outgrown a child restraint system should be seated in the rear seat and wear the seat belt. If the shoulder belt crosses their face or neck, and/or the lap belt crosses their stomach, a commercially available booster seat must be used to raise the child so that the shoulder belt crosses their shoulder and the lap belt remains positioned low across their hips. The booster seat should fit the vehicle seat and have a label certifying compliance with Federal Motor Vehicle Safety Standards or Motor Vehicle Restraint

Systems and Booster Seats Safety Regulations.

WARNING

- Any child who is too small to properly wear a seat belt must be properly restrained in an appropriate child restraint system, to reduce their risk of serious injury or death in an accident.
- A child should never be left unattended in, or unsupervised around, your vehicle. When you leave the vehicle, always take the child out as well.
- Children can die from heat stroke if left or trapped inside the vehicle, especially on hot days.
- Keep your vehicle locked when not in use. Keep your vehicle keys away from children.

Maintenance and inspection of seat belts

N00407000221

The seat belt webbing may be cleaned with mild soap or detergent solution. Do not use an organic solvent. Allow the belts to dry in the shade. Do not allow them to retract until completely dry. Do not attempt to bleach or re-dye the belts. The color may rub off and the webbing strength may be affected.

Regularly check your seat belt buckles and their release mechanisms for positive engagement and release of the latch plate. Check the retractors for automatic locking when in the Automatic Locking Retractor function.

The entire seat belt assembly should be replaced if the webbing shows any obvious cuts, tears, increase in thickness in any section of the webbing from broken fibers, or severe fading from sunlight. All of these conditions indicate a weakening of the belt, which may adversely affect seat belt performance in an accident.

WARNING

- Do not attempt to repair or replace any part of the seat belt assemblies. This work should be done by an authorized Mitsubishi Motors dealer. Failure to have an authorized Mitsubishi Motors dealer perform the work could reduce the effectiveness of the belts and could result in a serious injury or death in an accident.

Supplemental Restraint System (SRS) - airbag

N00407701788

This vehicle is equipped with a Supplemental Restraint System (SRS), which includes airbags for the driver and passengers.

The SRS front airbags are designed to supplement the primary protection of the driver and front passenger seat belt systems by providing those occupants with protection against head and chest injuries in certain moderate to severe frontal collisions. The SRS front airbags, together with sensors at the front of the vehicle and sensors attached to the front seats, form an advanced airbag system.

The SRS side airbags and the curtain airbags are also designed to supplement the seat belts. The SRS side airbags provide the driver and front passenger with protection against chest injuries by deploying the bag on the side impacted in moderate to severe side impact collisions. The SRS curtain airbags provide the driver and the passengers on the front seat and the second row outboard seats with protection against head injuries by deploying the curtain airbag on the side impacted in moderate to severe side impact collisions and by deploying both curtain airbags when a rollover is detected. The curtain airbags are also designed to help reduce the risk of complete and partial ejection from the vehicle through side windows in both side impact and rollover type accidents.

The SRS airbags are NOT a substitute for use of the seat belts. For maximum protection in all types of accidents, seat belts must ALWAYS be worn by everyone who drives or

Supplemental Restraint System (SRS) - airbag

rides in this vehicle (with infants and small children in an appropriate child restraint system in the rear seat, and older children buckled in the rear seat). Refer to “Child restraint systems” on page 4-26.

4

WARNING

- **IT IS VERY IMPORTANT TO ALWAYS WEAR YOUR SEAT BELT PROPERLY EVEN WITH AN AIRBAG.**
- Seat belts help keep the driver and passengers properly positioned. This reduces the risk of injury in all collisions, and reduces the risk of serious injuries or death when the airbags inflate. During sudden braking just before a collision, an unrestrained or improperly restrained driver or front passenger can move forward into direct contact with, or within close proximity to, the airbag when it begins to inflate. The beginning stage of airbag inflation is the most forceful and can cause serious injuries or death if the occupant comes in contact with the airbag at this time.
- Seat belts reduce the risk of injury in rear impact collisions, and in lower-speed frontal collisions because the airbags are not designed to inflate in those situations.
- Seat belts reduce the risk of being thrown from your vehicle in a collision or rollover.

WARNING

- **IT IS VERY IMPORTANT TO BE PROPERLY SEATED.**
- A driver or front passenger sitting too close to the steering wheel or instrument panel during airbag deployment can be seriously injured or killed.
- Airbags inflate very quickly and with great force. If the driver and front passenger are not properly seated and restrained, the airbag may not provide the proper protection, and can cause serious injuries or death when it inflates.
- To reduce the risk to the driver of serious injury or death due to a deploying driver’s airbag, always properly wear your seat belt and adjust the driver’s seat as far back as possible, maintaining a position that still allows the driver to have good control of the steering wheel, brake, accelerator, and other vehicle controls.
- To reduce the risk to the front passenger of serious injury or death from a deploying passenger’s airbag, make sure the passenger always wears the seat belt properly, remains seated upright and all the way back in the seat, and positions the seat as far back as possible.
- Seat all infants and children in the rear seat, properly restrained in an appropriate child restraint system.

WARNING

- Airbags inflate very quickly and with great force. Do not sit on the edge of the seat or sit with your lower legs too close to the instrument panel, or lean your head or chest close to the steering wheel or the instrument panel.
- Do not put your feet or legs on or against the instrument panel.

⚠ WARNING

- Infants and small children should never ride unrestrained, or lean against the instrument panel. They should never ride held in your arms or on your lap. They can be seriously injured or killed in an accident, especially when the airbags inflate. Seat all infants and children in the rear seat, properly restrained in an appropriate child restraint system. Refer to “Child restraint systems” on page 4-26.

⚠ WARNING

- NEVER put REAR-FACING CHILD RESTRAINT SYSTEMS or INFANT RESTRAINT SYSTEMS in the front passenger seat. This places the infant too close to the passenger’s airbag. During deployment of that airbag, the infant can be seriously injured or killed. Rear-facing child restraint systems or infant restraint systems must only be used in the rear seat.

⚠ WARNING

- FRONT-FACING CHILD RESTRAINT SYSTEMS should be used in the rear seat whenever possible. If they must be used in the front passenger seat, move the seat to the most rearward position and make sure the child stays in the child restraint system, properly restrained. Failure to follow these instructions could result in serious injury or death to the child.

⚠ WARNING

- Older children should be seated in the rear seat with their seat belt properly worn, and with an appropriate booster seat if needed. Refer to “Children who have outgrown child restraint systems” on page 4-32.

How the Supplemental Restraint System works

N00407801532

The SRS includes the following components:

4

- 1- Airbag module (Driver)
- 2- SRS warning light
- 3- Passenger's airbag off indicator
- 4- Front impact sensors
- 5- Airbag module (Passenger)
- 6- Airbag module (Driver's knee)
- 7- Driver's seat position sensor
- 8- Passenger's seat occupant classification sensor system
- 9- Airbag control unit

- 10- Side airbag modules
- 11- Curtain airbag modules
- 12- Side impact sensors

The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch or the operation mode is under the following conditions. These include all of the items listed above and all related wiring.

[Except for vehicles equipped with the F.A.S.T.-key]

The ignition switch is in the "ON" or "START" position.

[Vehicles equipped with the F.A.S.T.-key]

The operation mode is in ON.

The airbags will operate under the same conditions as the airbag control unit.

When the impact sensors detect a sufficient front or side impact to deploy the airbag(s), the appropriate airbag(s) will be deployed.

When the airbag control unit detects rollover of the vehicle, curtain airbags will be deployed.

When airbags deploy, some smoke is released accompanied by a loud noise. The smoke is not harmful, but do not intentionally inhale the smoke as it may cause temporary irritation to people with respiratory problems.

An inflated airbag will deflate quickly, so you may not even notice that the airbag was inflated.

Airbag inflation does not prevent the driver from seeing or being able to steer the vehicle, and does not prevent people from leaving the vehicle.

CAUTION

- Airbags inflate very quickly and with great force. In certain situations, contact with an inflating airbag may cause small cuts, abrasions, and bruises.

Event Data Recording

N00418601266

This vehicle is equipped with an event data recorder (EDR).

The main purpose of an EDR is to record, in certain crash or near crash-like situations, such as an airbag deployment or hitting a road obstacle, data that will assist in understanding how a vehicle's systems performed. The EDR is designed to record data related to vehicle dynamics and safety systems for a short period of time, typically 30 seconds or less.

The EDR in this vehicle is designed to record such data as:

- How various systems in your vehicle were operating;
- Whether or not the driver and front passenger safety belts were buckled/fastened;
- How far (if at all) the driver was depressing the accelerator and/or brake pedal; and,
- How fast the vehicle was traveling.

These data can help provide a better understanding of the circumstances in which crashes and injuries occur.

NOTE

- EDR data are recorded by your vehicle only if a non-trivial crash situation occurs; no data are recorded by the EDR under normal driving conditions and no personal data (e.g., name, gender, age, and crash location) are recorded. However, other parties, such as law enforcement, could combine the EDR data with the type of personally identifying data routinely acquired during a crash investigation.

To read data recorded by an EDR, special equipment is required, and access to the vehicle or the EDR is needed. In addition to the vehicle manufacturer, other parties, such as law enforcement, that have the special equipment, can read the information if they have access to the vehicle or the EDR.

Driver's seat position sensor

N00417900177

The driver's seat position sensor is attached to the seat rail and provides the airbag control unit with information on the seat's fore-aft position. The airbag control unit controls deployment of the driver's front airbag in accordance with the information it receives from this sensor.

If there is a problem involving the driver's seat position sensor, the SRS warning light in

the instrument panel will come on. Refer to "SRS warning light/display" on page 4-39.

WARNING

- **If the SRS warning light or warning display comes on, have the vehicle inspected by an authorized Mitsubishi Motors dealer as soon as possible.**
- **Please observe the following instructions to ensure that the driver's seat position sensor can operate correctly.**
 - **Adjust the seat to the correct position, and sit well back against the seatback. Refer to "Front seats" on page 4-4.**
 - **Do not recline the seatback more than necessary when driving.**
 - **Do not place metallic objects or luggage under the front seat.**
- **If the vehicle is involved in a severe impact, have the SRS sensors inspected by an authorized Mitsubishi Motors dealer as soon as possible.**

Passenger's seat occupant classification sensor system

N00418001374

The passenger's seat occupant classification sensor system is attached to the front passenger seat cushion and provides the airbag control unit with information regarding the occupant on the front passenger seat. The air-

bag control unit controls deployment of the passenger's front airbag in accordance with the information it receives from this system.

The passenger's front airbag will not deploy in an impact when the system senses no occupant on the front passenger's seat or a child in a child restraint system. In this case, the passenger airbag off indicator will come on.

Refer to "Passenger's airbag off indicator" on page 4-38.

If there is a problem involving the passenger's seat occupant classification sensor system, the SRS warning light in the instrument panel will come on. Refer to "SRS warning light/display" on page 4-39.

⚠ WARNING

- If any of the following conditions occur, you should immediately have your vehicle inspected by an authorized Mitsubishi Motors dealer as soon as possible:
 - The SRS warning light does not initially come on when the ignition switch or the operation mode is under the following conditions.
[Except for vehicles equipped with the F.A.S.T.-key]
The ignition switch is in the "ON" or "START" position.
[Vehicles equipped with the F.A.S.T.-key]
The operation mode is in ON.
 - The SRS warning light does not go out after several seconds.

⚠ WARNING

- The SRS warning light comes on while you are driving.
- To ensure that the passenger's seat occupant classification sensor system can sense correctly, observe the following instructions. Failure to follow these instructions can adversely affect the performance of the passenger's airbag system.
 - Adjust the seat to the correct position, and sit well back against the seatback. Refer to "Front seats" on page 4-4.
 - Do not recline the seatback more than necessary.
 - Never have more than one person (adult or child) sitting on the seat.
 - Do not place anything between the seat and the floor console.
 - When attaching a child restraint system, secure it firmly.
 - Do not place luggage or other objects on the seat.
 - Do not use a seat cover or a cushion.
 - Do not modify or replace the seat and seat belt.
 - Do not place luggage or other objects under the seat.
 - Do not place and use an electronic device such as a computer on the seat.
 - Do not place heavy objects on the seat or stick pins, needles, or other objects into it.
 - Do not remove the seat cushion skin.

⚠ WARNING

- If any liquid is spilled on the seat, wipe it and dry the seat immediately.
- If the vehicle is involved in a severe impact, have the SRS sensors inspected by an authorized Mitsubishi Motors dealer as soon as possible.

Passenger's airbag off indicator

N00418101346

The passenger's airbag off indicator is located in the instrument panel.

AJA100568

The indicator normally comes on when the ignition switch is turned to the "ON" position or the operation mode is put in ON, and goes out a few seconds later. In the following situations, the indicator will stay on to show that the passenger front airbag is not operational.

- The front passenger's seat is not occupied.

- The system senses that a child is using a child restraint system on the front passenger's seat.

When the passenger's seat occupant classification sensor system sense there is a person seated in the front passenger's seat, the indicator goes out to show that the passenger's front airbag is operational.

⚠ WARNING

- If any of the following conditions occur, you should immediately have the airbag system in your vehicle inspected by an authorized Mitsubishi Motors dealer as soon as possible:
 - The passenger's airbag off indicator comes on when an adult is sitting on the front passenger seat.
 - The passenger's airbag off indicator does not come on when the front passenger seat is not occupied.
 - The passenger's airbag off indicator does not come on when the ignition switch is turned to the "ON" position or the operation mode is put in ON.
 - The passenger's airbag off indicator does not come on when a child is in a child restraint system on the front passenger's seat.
 - The passenger's airbag off indicator comes on and goes out repeatedly.

⚠ WARNING

- Do not attach any accessory to your vehicle that makes the passenger's airbag off indicator difficult or impossible to see. You must be able to see the passenger's airbag off indicator and verify the status of the passenger's airbag system.

SRS warning light/display

N00408301589

There is a Supplemental Restraint System (SRS) warning light on the instrument panel.

The system checks itself every time the ignition switch is turned to the "ON" position or the operation mode is put in ON. The SRS warning light will come on for several sec-

onds and then go out. This is normal and means the system is working properly.

If there is a problem involving one or more of the SRS components, the warning light will come on and stay on. At the same time, the warning display will appear on the information screen in the multi information display (Type 1 only).

The SRS warning light/display is shared by the SRS airbag and the seat belt pre-tensioner system.

⚠ WARNING

- If any of the following conditions occur, there may be a problem with the SRS airbags and/or seat belt pre-tensioners, and they may not function properly in a collision or may suddenly activate without a collision:
 - Even when the ignition switch or the operation mode is in ON, the SRS warning light does not come on or it remains on.
 - The SRS warning light and/or the warning display comes on while driving.
- The SRS airbags and seat belt pre-tensioners are designed to help reduce the risk of serious injury or death in certain collisions. If either of the above conditions occurs, immediately have your vehicle checked by an authorized Mitsubishi Motors dealer.

Driver's and passenger's front airbag system

N00407901331

The driver's airbag is located under the padded cover in the middle of the steering wheel. The front passenger's airbag is contained in the instrument panel above the glove compartment. The driver's airbag and the front passenger's airbag are designed to deploy at the same time. However, the front passenger's airbag does not deploy when the front passenger seat is not occupied or when the system senses that a child is in the child restraint system.

designed to deploy at the same time as the driver's front airbag.

Driver's knee airbag system

N00404500010

The driver's knee airbag is located under the steering wheel. The driver's knee airbag is

Deployment of front airbags

N00408001616

The front airbags and driver's knee airbag ARE DESIGNED TO DEPLOY when ...

Head-on collision with a solid wall at speeds of approx. 15 mph (25 km/h) or higher

Moderate to severe frontal impact within the shaded area between the arrows

AA1000050

The front airbags and driver's knee airbag are designed to deploy when the vehicle suffers a moderate to severe frontal impact. A typical condition is shown in the illustration to the left.

The front airbags and driver's knee airbag are designed to deploy only in certain moderate to severe frontal collisions within the shaded area between the arrows in the illustration to the right.

The front airbags and driver's knee airbag will deploy if the impact to the vehicle's main structure is above a specific threshold level. The threshold level is approximately 15 mph (25 km/h) for a frontal collision straight into a solid flat wall that does not bend or deform. If the impact to the vehicle's main structure is below this threshold level, the front airbags and driver's knee airbag may not deploy. This threshold level may also be higher if the vehicle hits something that absorbs the impact, either by bending or moving (for example,

another stationary vehicle, a pole or a guard rail).

The initial stage of airbag inflation is the most forceful, and can cause serious injury or death if you are too close to the deploying airbag. Accordingly, it is important that you always wear the available seat belt.

The front airbags and driver's knee airbag MAY NOT DEPLOY when ...

4 In certain types of front collisions, the front airbags and driver's knee airbag may not deploy, even if the deformation of the body seems to be large, because the vehicle's body structure is designed to absorb the impact and deform in order to help protect the occupants. Some typical situations where the front airbags and driver's knee airbag may not deploy are shown in the illustrations.

Since the front airbags and driver's knee airbag do not protect the occupant in all types of frontal collisions, be sure to always wear your seat belts properly.

Collision with a utility pole, tree or other narrow object

Collision where the vehicle slides under the rear body of a truck

Oblique frontal impact

AA2000233

The front airbags and driver's knee airbag ARE NOT DESIGNED TO DEPLOY when ...

The front airbags and driver's knee airbag are not designed to deploy in situations where

they cannot provide protection to the occupants. Some typical situations are shown in the illustration.

Since the front airbags and driver's knee airbag do not protect the occupants in all types of collisions, be sure to always wear your seat belts properly.

Rear end collision to your vehicle

Side collision to your vehicle

Vehicle rolls onto its side or roof

AA2000220

The front airbags and driver's knee airbag **MAY DEPLOY** when

...

The front airbags and driver's knee airbag may deploy if the underside of the vehicle suffers a moderate to severe impact (under-carriage impact). Some typical situations are shown in the illustration.

Since the front airbags and driver's knee airbag may deploy in certain types of unexpected impacts, as shown in the illustrations, and these unexpected impacts can move you out of position, it is important to always wear your seat belts properly. When worn properly, seat belts can help maintain your distance from the airbags when they begin to inflate. The initial stage of airbag inflation is the most forceful and can cause serious injury or death if you are close to the deploying airbag.

Collision with an elevated median/island or curb

Vehicle travels over a deep hole/pothole

Vehicle drives down a steep slope and hits the ground

AA2000073

⚠ WARNING

- Do not attach anything to the steering wheel's padded cover, such as trim material, badges, etc. These could strike and injure an occupant if the airbag inflates.
- Do not set anything on, or attach anything to, the instrument panel above the glove compartment. Such items could strike and injure an occupant if the airbag inflates.

4

⚠ WARNING

- Do not attach accessories to, or put them in front of, the windshield. They could restrict the airbag inflation, or strike and injure an occupant, when the airbag inflates.

⚠ WARNING

- Do not attach additional keys or accessories (hard, pointed or heavy objects) to the ignition key. Such objects could prevent the driver's knee airbag from inflation normally or could be propelled to cause serious injury if the airbag inflates.
- Do not attach accessories to the lower portion of the driver's side instrument panel. Such objects could prevent the driver's knee airbag from inflating normally or could be propelled to cause serious injury if the airbag inflates.

⚠ WARNING

- Do not attempt to remove, install, disassemble or repair the SRS airbags.

⚠ WARNING

- Do not place objects, such as packages or pets, between the airbags and the driver or the front passenger. Such objects can adversely affect airbag performance, or cause serious injury or death when the airbag deploys.
- Immediately after airbag inflation, some parts of the airbag system will be hot. Do not touch them. You could otherwise be burned.
- The airbag system is designed to work only once. After the airbags deploy, they will not work again. They must promptly be replaced and the entire airbag system must be inspected by an authorized Mitsubishi Motors dealer.

Side airbag system

N00408101431

The side airbags (A) are contained in the driver and front passenger seatbacks. The side airbag is designed to inflate only on the side of the vehicle that is impacted, even with no passenger in the front seat.

A label is attached to the seatbacks in vehicles equipped with side airbags.

Curtain airbag system

N00419201227

The curtain airbags are contained in the front pillar, the rear pillar and the side sections of the roof.

The curtain airbag is designed to inflate only on the side of the vehicle that is impacted, even with no passenger in the seat.

Also, when the airbag control unit detects rollover of the vehicle, the curtain airbags will deploy.

AJA100571

⚠ WARNING

- The side airbags and curtain airbags can cause serious injury or death to anyone too close to the airbag when it deploys. To reduce the risk of injury from a deploying side airbag or curtain airbag, driver and front passenger must be properly restrained and seated well back, upright, and in the middle of the seat. Do not lean against the door.

TA0000212

⚠ WARNING

- In order to reduce the risk of injury from a deploying side airbag, do not allow any second row seat passengers to hold onto the back of either front seat. Special care should be taken with children.

⚠ WARNING

- Do not place any objects around the area where the side airbags deploy. Such objects can interfere with proper side airbag deployment, and cause injury during deployment of the side airbag.
- Do not place stickers, labels or additional trim on the back of either front seat. They can interfere with proper side airbag deployment.
- Do not attach a microphone (A) or any other object around the part where the curtain airbag (B) deploys, such as on the windshield, side door glass or front and rear pillars and roof side rail. When the curtain airbag inflates, the microphone or other object may be hurled with great force or the curtain airbag may not inflate correctly, resulting in death or serious injury.

AG0002680

⚠ WARNING

- Do not put a hanger or any heavy or pointed object on the coat hook. If the curtain airbag was activated, any such item could be propelled away with great force and could prevent the curtain airbag from inflating correctly. Hang clothes directly on the coat hook (without using a hanger). Make sure there are no heavy or sharp objects in the pockets of clothes that you hang on the coat hook.
- Do not install seat covers or re-cover seats that have side airbags. Covers can interfere with proper side airbag deployment and adversely affect side airbag performance.
- Never install a rear-facing child restraint system in the front passenger seat. Rear-facing child restraint systems **MUST ONLY** be used in the rear seat.
- Front-facing child restraint systems should also be used **ONLY** in the rear seat. If a front-facing child restraint system must be used in the front passenger seat, move the seat as far back as possible, and make sure that the child stays in the child restraint system, properly restrained and away from the door.

⚠ WARNING

- Do not allow a child to lean against or sit close to the passenger door, even if the child is seated in a child restraint system. The child's head should also not lean against or be close to the section of the seatback where the side airbag and curtain airbag are located. It is dangerous if the side airbag or curtain airbag deploys. Failure to follow all of these instructions could lead to serious injury or death to the child.
- Work done on or in the vicinity of the side airbag or curtain airbag components should be done only by an authorized Mitsubishi Motors dealer. There is a risk of a serious injury or death. Improper work methods can cause accidental side airbag or curtain airbag deployment, or render a side airbag or curtain airbag inoperable. Either of these situations could result in serious injury or death.
- Do not place luggage heavier than the specified on the roof carrier. Such luggage may cause the curtain airbags to inflate accidentally, which could result in serious injury or death.

Deployment of side airbag and curtain airbag

N00408201546

The side airbag and curtain airbag ARE DESIGNED TO DEPLOY when...

The side airbag and curtain airbag are designed to deploy when the vehicle suffers a moderate to severe side impact to the middle of the passenger compartment. A typical situation is shown in the illustration.

Moderate to severe impact to the middle of the vehicle body's side structure

When the vehicle detects rollover of the vehicle (Curtain airbag only)

AG3000892

The seat belts in your vehicle are your primary means of protection in an accident. The

SRS side airbags and curtain airbags are designed to provide additional protection. Therefore, for your safety and the safety of all occupants, be sure to always wear your seat belts properly.

The side airbag and curtain airbag MAY NOT DEPLOY when...

In certain types of side collisions, the side airbag and curtain airbag may not deploy, even if the deformation of the body seems to be large, because the vehicle's body structure is designed to absorb the impact and to deform in order to help protect the occupants. There are also cases where the side airbag and curtain airbag may not deploy at the same time, depending on the location of the impact. Some typical situations where the side airbags and curtain airbags may not deploy are shown in the illustrations.

Since the side airbags and curtain airbags do not protect the occupant in all types of side collisions, be sure to always wear the seat belts properly.

Side impact in an area away from the passenger compartment

Motorcycle or other similar small vehicle collision with the side of vehicle

Collision with a utility pole, tree or other narrow object

AA2000246

**The side airbag and curtain airbag
ARE NOT DESIGNED TO
DEPLOY when...**

The side airbag and curtain airbag are not designed to deploy in situations where they cannot provide protection to the occupants. Some typical situations are shown in the illustration.

Since the side airbags and curtain airbags do not protect the occupant in all types of collisions, be sure to always wear your seat belts properly.

SRS servicing

N00408500669

⚠ WARNING

- Any maintenance performed on or near the components of the SRS should be performed only by an authorized Mitsubishi Motors dealer. Do not permit anyone else to do any service, inspection, maintenance or repair on any SRS components or wiring. Similarly, no part of the SRS should ever be handled, removed or disposed by anyone except an authorized Mitsubishi Motors dealer.

Improper work methods on the SRS components or wiring could result in an accidental airbag deployment or could make the SRS inoperable. Either of these situations could result in serious injury or death.

- Do not modify your steering wheel or any other SRS component or related vehicle part. For example, replacement of the steering wheel, or modifications to the front bumper or body structure can adversely affect SRS performance and may lead to injury.
- If your vehicle has received any damage, you should have the SRS inspected by an authorized Mitsubishi Motors dealer to make sure it is in proper working order.

⚠ WARNING

- Do not modify your front seats, center pillar or center console. Such modifications can adversely affect SRS performance and may lead to injury.

Also, if you discover any tear or open seam in the seat fabric near the side airbag, have the seat inspected by an authorized Mitsubishi Motors dealer.

- If you have found any scratch, crack or damage to the portion of the front and rear pillars and roof side rail, you should have the SRS inspected by an authorized Mitsubishi Motors dealer.

📖 NOTE

- When you transfer ownership of the vehicle to another person, we urge you to alert the new owner that it is equipped with the SRS and refer that owner to the applicable sections in this owner's manual.
- If you decide to junk or scrap your vehicle, we urge you to first take it to an authorized Mitsubishi Motors dealer so that the SRS can be made safe for disposal.
- If any of the following parts needs to be modified for use by a handicapped person, the advanced airbag system will be greatly affected. Please consult an authorized Mitsubishi Motors dealer.
 - Driver's seat
 - Front passenger seat
 - Front seat belt

📖 NOTE

- Steering wheel
- Instrument panel

Break-in recommendations

N00508701366

Advanced automobile manufacturing techniques permit you to operate your new vehicle without requiring a long break-in period of low-speed driving.

However, you can add to the future performance and economy of your vehicle by observing the following precautions during the first 300 miles (500 km).

Drive your vehicle at moderate speeds during the break-in period.

- Avoid revving the engine.
- Avoid rough driving such as sudden starts, sudden acceleration, prolonged high-speed driving and sudden braking. These actions would have a detrimental effect on the engine and lead to increased fuel and oil consumption; this could ultimately result in the malfunction of engine components. Be particularly careful to avoid full acceleration while in low shift position (low gears).
- Do not overload the vehicle. Stay within the seating capacity. (Refer to “Cargo load precautions” on page 6-10.)
- Refrain from towing a trailer or other vehicle (Refer to “Trailer towing” on page 6-11).

Keys

N00508801628

Type 1

Two keys are provided. The keys fit all locks. Keep one in a safe place as a spare key.

- 1- Key for the electronic immobilizer and keyless entry system
- 2- Key number plate

Type 2

Two F.A.S.T.-keys and two emergency keys are provided. Keep one F.A.S.T.-key and one emergency key in a safe place together as a set of spare keys.

- 1- F.A.S.T.-key
(with electronic immobilizer and keyless entry system function)
- 2- Emergency key
- 3- Key number plate

NOTE

- The key is a precision electronic device with a built-in signal transmitter. Please observe the following in order to prevent damage.
 - Do not leave where it may be exposed to heat caused by direct sunlight, such as on top of the dashboard.
 - Do not take the remote control transmitter apart.
 - Do not excessively bend the key or subject it to strong impacts.
 - Keep the remote control transmitter dry.
 - Keep away from magnetic objects such as key rings.

NOTE

- Keep away from devices that produce magnetism, such as audio systems, computers and televisions.
- Keep away from devices that emit strong electromagnetic waves, such as cellular phones, wireless devices and high frequency equipment (including medical devices).
- Do not clean with ultrasonic cleaners.
- Do not leave the key where it may be exposed to high temperature or high humidity.
- If you lose your key, to prevent the theft of the vehicle immediately contact an authorized Mitsubishi Motors dealer.
If you notify an authorized Mitsubishi Motors dealer of the key number, they can make a new key. The key number is stamped on the key number plate. Keep the key number plate in a safe place separate from the key itself.
- No keys other than those registered in advance can be used to start the engine.
Refer to “Electronic immobilizer (Anti-theft starting system)” on page 5-4.
Refer to “Free-hand Advanced Security Transmitter (F.A.S.T.-key): “Electronic immobilizer (Anti-theft starting system)” on page 5-18.

NOTE

- When the theft-alarm is in the system operational status, the alarm operates if a door or liftgate is opened after using the key, the door lock knob or the power door lock switch to unlock the vehicle.
- The system does not enter the preparation status if the keyless entry system or the F.A.S.T.-key operation was not used to lock the vehicle.

Electronic immobilizer (Anti-theft starting system)

N00509101790

[For vehicles equipped with the Free-hand Advanced Security Transmitter (F.A.S.T.-key)]

For information on operations for vehicles equipped with the Free-hand Advanced Security Transmitter (F.A.S.T.-key), refer to “Free-hand Advanced Security Transmitter (F.A.S.T.-key): Electronic immobilizer (Anti-theft starting system)” on page 5-18.

[Except for vehicles equipped with the Free-hand Advanced Security Transmitter (F.A.S.T.-key)]

The electronic immobilizer is designed to significantly reduce the possibility of vehicle theft. The purpose of the system is to immobilize the vehicle if an invalid start is

attempted. A valid start attempt can only be achieved (subject to certain conditions) using a key “registered” to the immobilizer system. All of the keys provided with your new vehicle have been programmed to the vehicle’s electronics.

NOTE

- In the following cases, the vehicle may not be able to recognize the registered ID code from the key. This means the engine will not start even when the key is turned to the “START” position.
- When the key contacts a key ring or other metallic or magnetic object

AJZ100345

NOTE

- When the key grip contacts metal of another key

- When the key contacts or is close to other immobilizer keys (including keys of other vehicles)

- In cases like the above, move the offending object(s) away from the key and turn the key back to the “ACC” or “LOCK” position. Then try to start the engine again. If the engine does not start, contact an authorized Mitsubishi Motors dealer.
- The key may not operate properly when it is near an object or facility that emits strong electromagnetic waves.

NOTE

- Electronic immobilizer is not compatible with commercially available remote starting systems. Use of commercially available remote starting systems may result in vehicle starting problems and a loss of security protection.
- A system failure is suspected when the ignition switch is turned to the “START” position, and the engine does not start. In such a case, contact an authorized Mitsubishi Motors dealer.

CAUTION

- Do not make any alterations or additions to the immobilizer system. Alterations or additions could cause failure of the immobilizer.

Replacement keys

Only keys that have been programmed to the vehicle’s electronics can be used to start the vehicle.

If you lose the key, you can order a key from your authorized Mitsubishi Motors dealer by referring to the key number.
To prevent vehicle theft, the ID code for the vehicle keys must be changed.

Take your vehicle and all remaining keys to your authorized Mitsubishi Motors dealer to have your ID code changed.

Additional keys

To add a key, you must already have 2 registered keys. You need to register the ID code to the vehicle.

Registering the ID code can be done by yourself (except for vehicles sold in Canada), or by your authorized Mitsubishi Motors dealer. For you to register the ID code yourself, follow the “Customer key programming” procedure below.

If you choose to have your authorized Mitsubishi Motors dealer register the ID code, take your vehicle and all remaining keys to your authorized Mitsubishi Motors dealer.

NOTE

- You are provided with 2 keys, but you may register up to 8 keys.

Customer key programming (Except for vehicles sold in Canada)

N00562201149

You can program new keys to the system if you have two valid (already registered) keys and blank immobilizer key (specially cut for your vehicle at your Mitsubishi Motors dealer) by doing the following:

1. Insert the first valid key into the ignition switch and turn the key to the “ON” position for 5 seconds.
2. Turn the key to the “OFF” or “LOCK” position and remove the first key.
3. Within 30 seconds of removing the first key, insert the second valid key into the ignition and turn it to the “ON” position. About 10 seconds later, the immobilizer display will start to blink.

4. When the immobilizer display starts blinking, turn the second valid key to the “OFF” or “LOCK” position and remove it. Within 30 seconds after doing so, insert a blank immobilizer key into the ignition switch and turn it to the “ON” position. Perform this operation no more than 30 seconds after the immobilizer display starts blinking. When registration of the ID code is complete, the immobilizer display will come on for 30 seconds then go off. If an error occurs, the blinking immobilizer display will go off during the procedure.

Type 1

Type 2

5. If you wish to register another key, perform the process again from step 1.

NOTE

- Perform the operation when the interrupt display screen is not showing. The interrupt display screen may prevent you from seeing the immobilizer display.
- It is not possible to register a key if:
 - the immobilizer display goes off during the procedure
 - the immobilizer display does not come on within 30 seconds after step 4.
- The procedure will be terminated automatically if:
 - a period of 30 seconds or longer elapses from the moment when the first key is turned to the “OFF” or “LOCK” position to the moment when the second key is turned to the “ON” position
 - a period of 30 seconds or longer elapses from the moment when the second key is turned to the “OFF” or “LOCK” position to the moment when the blank immobilizer key is turned to the “ON” position
- To use the new remote control transmitters, it is necessary to register the key with both the electronic immobilizer and keyless entry system.
Also refer to “Keyless entry system: Customer remote control transmitter programming” on page 5-10.

General information

N00562301094

Your electronic immobilizer operates on a radio frequency subject to Federal Communications Commission (FCC) Rules (For vehicles sold in U.S.A.) and Industry Canada Rules (For vehicles sold in Canada). This device complies with part 15 of FCC Rules and Industry Canada licence-exempt RSS standard(s).

Operation is subject to the following two conditions.

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

⚠ CAUTION

- Changes or modifications not expressly approved by the manufacturer for compliance could void the user's authority to operate the equipment.

Keyless entry system (if so equipped)

N00509001959

Press the remote control transmitter buttons to lock or unlock the doors and the liftgate. It can also help you signal for attention by setting off the panic alarm.

AG0000745

- 1- LOCK (🔒) button
- 2- UNLOCK (🔓) button
- 3- PANIC button
- 4- Indicator light

📖 NOTE

- On vehicles equipped with the mirror retractor switch, the outside rearview mirrors automatically retract or extend when the doors and the liftgate are locked or unlocked using the remote control switches of the keyless entry system.
Refer to “Features and controls: Outside rearview mirrors” on page 5-57.

5

To lock

Press the LOCK button (1) to lock all the doors and the liftgate.
The turn signal lights will also blink once.

📖 NOTE

- On vehicles equipped with the mirror retractor switch, the outside rearview mirrors automatically retract when the LOCK button(1) is pressed.
- If you press the LOCK button (1) twice the horn will sound once.

To unlock

Press the UNLOCK button (2) to unlock the driver's door only.

Keyless entry system (if so equipped)

Within about 2 seconds, press the UNLOCK button one more time to unlock all the doors and liftgate.

The dome light will turn on for 30 seconds.

The turn signal lights will also blink twice.

The front side-marker and parking lights will also turn on for about 30 seconds. Refer to “Welcome light” on page 5-181.

5

NOTE

- On vehicles equipped with the mirror retractor switch, the outside rearview mirrors automatically extend when the UNLOCK button(2) is pressed.
- On vehicles equipped with a Mitsubishi Multi-Communication System, the functions can be adjusted on the screen. For details, refer to the separate operation manual.
- The door and liftgate unlock function can be set so that all doors and liftgate unlock when the UNLOCK button (2) is pressed once. Refer to “Setting of door and liftgate unlock function” on page 5-9.

Operation of the outside rearview mirrors (Vehicles equipped with the mirror retractor switch)

To retract

Within 30 seconds of locking the doors and liftgate using the LOCK button, press the LOCK button twice rapidly to retract the outside rearview mirrors.

To extend

Within 30 seconds of unlocking the doors and liftgate using the UNLOCK button, press the UNLOCK button twice rapidly to return the outside rearview mirrors to their extended positions.

The outside rearview mirrors are not initially set to work as described above. If you want them to work as described above, you need to set them so that they do not retract/extend when the doors and liftgate are locked/unlocked using the keyless entry system.

For details, please consult an authorized Mitsubishi Motors dealer.

In a vehicle equipped with the Mitsubishi Multi-Communication System, it is possible to change the setting by means of screen operations.

Refer to the separate owner’s manual for details.

Answerback function

The horn and turn signal lights of the keyless entry system answerback function can be changed as required. This is done with the key removed from the ignition switch.

NOTE

- The answerback function will not operate if any of the doors are open.

Horn deactivation/reactivation

The answerback function can be set in the following three ways.

Each time the answerback function is set, a chime will sound to tell you the condition of the answerback function.

One chime: The horn will not sound.

Two chimes: The horn will sound.

Four chimes: The horn will sound if the LOCK button is pressed twice within 1 second.

1. Remove the key from the ignition switch.
2. Open the driver's door and turn the combination headlights and dimmer switch to the "OFF" position.
3. Press the LOCK button (1) for 4 to 10 seconds and press the UNLOCK button (2) during this time.
4. Release in sequence the UNLOCK and LOCK buttons within 5 seconds of pressing the UNLOCK button in step 3.

NOTE

- On a vehicle equipped with a Mitsubishi Multi-Communication System, the functions can be adjusted on the screen. For details, refer to the separate operation manual.

Turn signal lights deactivation/reactivation

The answerback function can be turned ON or OFF separately.

1. Remove the key from the ignition switch.
2. Open the driver's door and turn the combination headlights and dimmer switch to the "OFF" position.

3. Press the UNLOCK button (2) for 4 to 10 seconds and press the LOCK button (1) during this time.
4. Release in sequence the UNLOCK and LOCK buttons within 5 seconds of pressing the LOCK button in step 3.

Number of chimes	To lock	To unlock
One chime	One flash	Two flashes
Two chimes	One flash	No flash
Three chimes	No flash	Two flashes
Four chimes	Two flashes	One flash
Five chimes	No flash	One flash
Six chimes	Two flashes	No flash
Seven chimes	No flash	No flash

NOTE

- On a vehicle equipped with a Mitsubishi Multi-Communication System, the functions can be adjusted on the screen. For details, refer to the separate operation manual.

Setting of door and liftgate unlock function

N00543601115

The door and liftgate unlock function can be set to the following two conditions.

Each time the door and liftgate unlock function is set, a chime will sound to tell you the condition of the door and liftgate unlock function.

Number of chimes	Condition
One chime	All doors and the liftgate unlock
Two chimes	Driver's door unlock only

1. Remove the key from the ignition switch.
2. Open the driver's door and turn the combination headlights and dimmer switch to the "OFF" position.
3. Press the LOCK button (1) for 4 to 10 seconds and press the UNLOCK button (2) during this time.
4. Release in sequence the LOCK and UNLOCK buttons within 5 seconds of pressing the LOCK button in step 3.

 **NOTE**

- On a vehicle equipped with a Mitsubishi Multi-Communication System, the functions can be adjusted on the screen. For details, refer to the separate operation manual.

5 Using the panic alarm

N00543701060

If you are near your vehicle and feel threatened, you may activate the alarm to call attention as follows:

1. Press the PANIC button (3) for more than 1 second.
2. The headlights will blink on and off and the horn will sound intermittently for about 3 minutes.
3. To turn off the alarm, press any button on the remote control transmitter.

Replacement remote control transmitters

N00543801087

Only remote control transmitters programmed with the vehicle's electronics can lock or unlock all doors and the liftgate.

If you lose the remote control transmitter, you can order a remote control transmitter from

your authorized Mitsubishi Motors dealer by referring to the key number.

To prevent vehicle theft, the ID code for the remote control transmitter must be changed.

Take your vehicle and all remote control transmitters to your authorized Mitsubishi Motors dealer to have your ID code changed.

Additional remote control transmitters

N00543900049

To add a remote control transmitter, you must already have 1 registered remote control transmitter.

Registering the ID code can be done by yourself or by your authorized Mitsubishi Motors dealer. For you to register the ID code yourself, follow the "Customer remote control transmitter programming" procedure below. If you choose to have your authorized Mitsubishi Motors dealer register the ID code, take your vehicle and any remaining keys to your authorized Mitsubishi Motors dealer.

 **NOTE**

- You are provided with 2 remote control transmitters, but you may register up to 8 remote control transmitters.

Customer remote control transmitter programming (Except for vehicles sold in Canada)

N00544001158

You can program new remote control transmitters to the system if you have one valid (already registered) remote control transmitter by doing the following. The driver's door must be opened while you follow the steps below:

1. Have available all (current and new) remote control transmitters you wish to register.
2. With a valid (already registered) remote control transmitter, press the UNLOCK button (2) for 4 to 10 seconds. Then press and hold the LOCK button (1).
3. Within 5 seconds of pressing the LOCK button, release the LOCK and UNLOCK buttons in sequence.

At this time, ID codes for all remote control transmitters except for the transmitter used in steps 2 and 3 are erased and the answerback function (door is locked and unlocked) informs you that the registration mode has been activated.

4. Within 60 seconds after step 3, complete the following ID code registration operation using the next remote control transmitter you wish to register within 4 seconds.
- Press both the LOCK and UNLOCK buttons for 2 seconds.
 - Release both the LOCK and UNLOCK buttons for 1 second.
 - Press the UNLOCK button. The answerback function informs you that the ID code registration of the transmitter is completed.
5. To register the ID codes of additional remote control transmitters, repeat step 4 within 60 seconds after step 4.
6. If no ID code of a remote control transmitter is registered within 60 seconds after step 4, the registration mode is canceled and the normal mode returns.

NOTE

- For verification purposes, try to lock and unlock the doors after the registration is completed.
- The indicator light (4) comes on each time a button is pressed.
- The keyless entry system does not work if the key is in the ignition switch.

NOTE

- The remote control transmitter can be used from about 40 feet (12 m) away. However, this distance may change if your vehicle is near a TV transmitting tower, a power station, or a radio station.
- If the following conditions are observed after pressing the LOCK (1) or UNLOCK (2) button on the remote control transmitter, the battery in the remote control transmitter may need to be replaced.
 - The doors and the liftgate cannot be locked or unlocked.
 - The panic alarm cannot be operated.
 - The indicator light (4) is dim or does not come on.
- If you lose your remote control transmitter, please contact an authorized Mitsubishi Motors dealer for a replacement.
- If you wish to obtain an additional remote control transmitter, please contact an authorized Mitsubishi Motors dealer. A maximum of 8 remote control transmitters can be programmed for your vehicle.
- To use the new remote control transmitters, it is necessary to register the key with both the electronic immobilizer and keyless entry system. Also refer to “Electronic immobilizer (Anti-theft starting system): Customer key programming” on page 5-6.

General information

N00546101124

Your keyless entry system operates on a radio frequency subject to Federal Communications Commission (FCC) Rules (For vehicles sold in U.S.A.) and Industry Canada Rules (For vehicles sold in Canada). This device complies with Part 15 of FCC Rules and Industry Canada licence-exempt RSS standard(s).

Operation is subject to the following two conditions.

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

CAUTION

- Changes or modifications not expressly approved by the manufacturer for compliance could void the user’s authority to operate the equipment.

Procedure for replacing the remote control transmitter battery

N00544100064

1. Before replacing the battery, remove static electricity from your body by touching a metal grounded object.
2. With the Mitsubishi mark facing you, insert the cloth-covered tip of a flat blade screwdriver into the notch in the remote control transmitter case and use it to open the case.

NOTE

- Be sure to perform the procedure with the Mitsubishi mark facing you. If the Mitsubishi mark is not facing you when you open the remote control transmitter case, the buttons may come out.

3. Remove the remote control transmitter from the remote control transmitter case. Then, open the remote control transmitter using the method described in step 1.

4. Remove the old battery.
5. Install a new battery with the +side (A) down.

6. Close the remote control transmitter firmly.

7. Place the remote control transmitter in the remote control transmitter case, then securely close the remote control transmitter case.
8. Check the keyless entry system to see that it works.

NOTE

- You may purchase a replacement battery at an electric appliance store.
- An authorized Mitsubishi Motors dealer can replace the battery for you if you prefer.

CAUTION

- When the remote control transmitter case is opened, be careful to keep water, dust, etc. out. Also, do not touch the internal components.

Free-hand Advanced Security Transmitter (F.A.S.T.-key) (if so equipped)

N00503101121

The Free-hand Advanced Security Transmitter (F.A.S.T.-key) enables the doors and the liftgate to be locked and unlocked, the engine to be started and the operation mode to be changed simply by carrying it.

Free-hand Advanced Security Transmitter (F.A.S.T.-key) (if so equipped)

The F.A.S.T.-key can also be used as the remote control transmitter of the keyless entry system.

Refer to “Free-hand Advanced Security Transmitter (F.A.S.T.-key): Keyless entry system” on page 5-29.

The F.A.S.T.-key must be carried by the driver. The F.A.S.T.-key is required for vehicle operations such as locking and unlocking the doors and the liftgate, starting the engine and changing the operation mode. When leaving the vehicle, make sure you are carrying the F.A.S.T.-key and then lock the vehicle.

⚠ WARNING

- Individuals who use implantable pacemakers or implantable cardiovascular-defibrillators should keep away from the external and internal transmitters. The electromagnetic waves used in the F.A.S.T.-key may affect the operation of implantable pacemakers and implantable cardiovascular-defibrillators.

- A- External transmitter
B- Internal transmitter

⚠ WARNING

- Individuals using other electro-medical apparatus besides implantable pacemakers and implantable cardiovascular-defibrillators should check with the manufacturer of the apparatus to confirm the effect of the electromagnetic waves used by the F.A.S.T.-key. The electromagnetic waves may affect the operations of the electro-medical apparatus.

The operations possible with the F.A.S.T.-key can be modified as stated below. (Keyless entry operations are possible.) For details, contact an authorized Mitsubishi Motors dealer.

- Enabling only the locking and unlocking of the doors and the liftgate
- Enabling only the starting of the engine
- Deactivating the F.A.S.T.-key

5

NOTE

- The F.A.S.T.-key uses weak electromagnetic waves. In cases such as the following, operation may be improper or unstable.
 - The vehicle is near a facility that emits strong electromagnetic waves, such as a TV transmitting tower, a power station, a radio station or an airport
 - The key is carried together with other communication devices such as cellular phones or radios, or electrical appliances such as computers
 - The F.A.S.T.-key touches or is covered by a metal object
 - A keyless entry system is being used nearby
 - The battery of the F.A.S.T.-key is run down
 - The vehicle is in a location with strong electromagnetic waves or noise

NOTE

Use the emergency key in such circumstances.

Refer to “To operate without using the F.A.S.T.-key” on page 5-26.

- The F.A.S.T.-key is constantly performing reception operations in its communication with the vehicle. This means that the battery is always running down, regardless of how often the F.A.S.T.-key is used. The battery life is about 1 to 3 years, depending on the usage conditions.
- Since the F.A.S.T.-key is constantly performing reception operations, the reception of strong electromagnetic waves can accelerate the running down of the battery. Do not place near to electrical appliances such as televisions or computers.

NOTE

- When the battery of the F.A.S.T.-key has run down or there are strong electromagnetic waves or noise in the area, the operating range could decrease or operations could become unstable.

*: Front of the vehicle

: Operating range

NOTE

- The door or liftgate switch can only be used for locking or unlocking when a matching F.A.S.T.-key is detected.
- The system may not operate if the F.A.S.T.-key is too close to the windshield, door windows or liftgate.
- Even if the F.A.S.T.-key is within about 2.3 feet (70 cm) of the handle of the driver’s door, front passenger’s door or liftgate, the system may not operate if the key is close to the ground or in a high position.
- If the F.A.S.T.-key is within the operating range, even a person not carrying the F.A.S.T.-key can lock and unlock the doors or the liftgate by pressing the driver’s or front passenger’s door lock/unlock switch, the liftgate LOCK switch or the liftgate OPEN switch.

Operating range of the F.A.S.T.-key

N00503201177

When a person enters the operating range of the F.A.S.T.-key while carrying the F.A.S.T.-key and presses the driver’s or front passenger’s door lock/unlock switch, the liftgate LOCK switch or the liftgate OPEN switch, verification of the ID code is performed.

The doors and the liftgate can be locked and unlocked and the engine can be started only when the ID codes of the vehicle and F.A.S.T.-key match.

Operating range for locking and unlocking the doors and the lift-gate

The operating range is within about 2.3 feet (70 cm) of the handles of the driver’s door, front passenger door and liftgate.

Operating range for starting the engine and changing the operation mode

N00503301077

The operating range is the interior of the vehicle.

*: Front of the vehicle

: Operating range

NOTE

- Even if the F.A.S.T.-key is within the operating range, it may not be possible to start the engine and change the operation mode if the key is in a storage space such as the glove compartment, on top of the instrument panel, or in the door pocket or luggage compartment.

NOTE

- Even if the F.A.S.T.-key is inside the vehicle, it may not be possible to start the engine and change the operation mode if the key is too close to a door or door window.

To operate using the F.A.S.T.-key

N00503401283

To lock

While carrying the F.A.S.T.-key, press the driver's or front passenger's door lock/unlock switch (A), or the liftgate LOCK switch (B) within the operating range to lock all the doors and the liftgate.

The turn signal lights will blink once and the buzzer will sound once.

Also refer to “Doors locks”, “Power door locks”, “Liftgate” and “Power liftgate” on pages 5-33, 5-35, 5-36 and 5-38 respectively.

NOTE

- On the vehicles equipped with the mirror retractor switch, the outside rearview mirrors automatically retract when all doors and liftgate are locked using the driver's or front passenger's door lock/unlock switch (A) or the lift gate lock switch (B).
- In cases such as the following, the F.A.S.T.-key does not operate.

Free-hand Advanced Security Transmitter (F.A.S.T.-key) (if so equipped)

NOTE

- There is a F.A.S.T.-key in the passenger compartment
- A door or the liftgate is open or ajar
- The operation mode is not in OFF.
- The liftgate OPEN switch (C) can be used to confirm that the vehicle is locked properly. Press the liftgate OPEN switch within about 3 seconds of locking.
- If the liftgate OPEN switch is pressed 3 seconds or more after the vehicle is locked, the doors and the liftgate are unlocked.
- The time within which locking confirmation is possible can be adjusted. See an authorized Mitsubishi Motors dealer for details. On a vehicle equipped with a Mitsubishi Multi-Communication System, the function can be adjusted on the screen. For details, refer to the separate operation manual.

To unlock

While carrying the F.A.S.T.-key within the operating range, you can unlock the doors and the liftgate by using the F.A.S.T.-key operation.

The dome light will turn on for 30 seconds. The turn signal lights will blink twice and the buzzer will sound twice.

Also refer to “Door locks”, “Power door locks”, “Liftgate” and “Power liftgate” on pages 5-33, 5-35, 5-36 and 5-38 respectively.

5-16 Features and controls

Press the driver’s door lock/unlock switch (A) to unlock only the driver’s door. Within about 2 seconds, press the driver’s door lock/unlock switch one more time to unlock all the doors and the liftgate.

NOTE

- On the vehicles equipped with the mirror retractor switch, the outside rearview mirrors automatically extend when the driver’s door is unlocked using the driver’s lock/unlock switch (A), front passenger’s door lock/unlock switch (B) or the liftgate open switch (C).
- Settings can be changed so that all doors and the liftgate are unlocked automatically by pressing the driver’s door lock/unlock switch once. Refer to “Setting of door and liftgate unlock function” on page 5-30.

Press the front passenger’s door lock/unlock switch (B) or the liftgate OPEN switch (C) to unlock all the doors and the liftgate.

 **NOTE**

- If the doors and the liftgate are unlocked using the driver's or front passenger's door lock/unlock switch when all doors and the liftgate are locked and no doors or the liftgate are opened within about 30 seconds, the doors and the liftgate will automatically re-lock.
- The amount of time after unlocking until the vehicle re-locks automatically can be adjusted. See an authorized Mitsubishi Motors dealer for details.
On a vehicle equipped with a Mitsubishi Multi-Communication System, the functions can be adjusted on the screen. For details, refer to the separate operation manual.
- In cases such as the following, the F.A.S.T.-key does not operate.
 - A door or the liftgate is open or ajar
 - The operation mode is not in OFF.
- The doors and the liftgate cannot be unlocked by using the liftgate OPEN switch for about 3 seconds after locking.
- The time within which locking confirmation is possible can be adjusted. See an authorized Mitsubishi Motors dealer for details.
On a vehicle equipped with a Mitsubishi Multi-Communication System, the function can be adjusted on the screen. For details, refer to the separate operation manual.

 **NOTE**

- Functions settings can be modified as stated below.
See an authorized Mitsubishi Motors dealer for details.
On a vehicle equipped with a Mitsubishi Multi-Communication System, the functions can be adjusted on the screen. For details, refer to the separate operation manual.
- Activating the operation confirmation function (blinking of the turn signal lights) only during locking, or only during unlocking.
- Deactivating the operation confirmation function (blinking of the turn signal lights) and buzzer.
- Modifying the number of blinks in the operation confirmation function (blinking of the turn signal lights).
- Making the buzzer sound when the F.A.S.T.-key is removed from the passenger compartment when all the doors and the liftgate are closed.

Operation of the outside rear-view mirrors (Vehicles equipped with the mirror retractor switch)

N00585700027

To retract

Within 30 seconds of locking the doors and liftgate using the LOCK switch, press the LOCK switch twice rapidly to retract the outside rearview mirrors.

To extend

Within 30 seconds of unlocking the doors and liftgate using the UNLOCK switch, press the UNLOCK switch twice rapidly to return the outside rearview mirrors to their extended positions.

The outside rearview mirrors are not initially set to work as described above. If you want them to work as described above, you need to set them so that they do not retract/extend when the doors and liftgate are locked/unlocked using the F.A.S.T.-key or the keyless entry system of the F.A.S.T.-key.

For details, please consult an authorized Mitsubishi Motors dealer.

Free-hand Advanced Security Transmitter (F.A.S.T.-key) (if so equipped)

On vehicles equipped with the Mitsubishi Multi-Communication System, it is possible to change the setting by means of screen operations.

Refer to the separate owner's manual for details.

5

NOTE

- On vehicles with F.A.S.T.-key and equipped with the mirror retractor switch, the outside rearview mirrors automatically retract when all the doors and liftgate are locked using the F.A.S.T.-key function.
Refer to "Features and controls: Outside rearview mirrors" on page 5-57.

Electronic immobilizer (Anti-theft starting system)

N00529600114

The electronic immobilizer is designed to significantly reduce the possibility of vehicle theft. The purpose of the system is to immobilize the vehicle if an invalid start is attempted. A valid start attempt can only be achieved (subject to certain conditions) using a F.A.S.T.-Key "registered" to the immobilizer system.

All of the keys provided with your new vehicle have been programmed to the vehicle's electronics.

Engine switch

N00513501098

To prevent vehicle theft, no F.A.S.T.-keys other than those registered in advance can be used to start the engine. (Electronic immobilizer function)

While carrying the F.A.S.T.-key, the engine switch can be used to start the engine.

AA0110839

CAUTION

- The indicator light (A) will flash orange when there is a problem or malfunction in Free-hand Advanced Security Transmitter. Never drive if the indicator light on the engine switch is flashing orange. Immediately contact your authorized Mitsubishi Motors dealer.

CAUTION

- If the engine switch operation is not smooth and feels like it is sticking, do not operate the switch.
Immediately contact an authorized Mitsubishi Motors dealer.

NOTE

- When operating the engine switch, press the switch all the way in. If the switch is not fully pressed, the engine may not start or the operation mode may not change. If the engine switch is pressed correctly, there is no need to hold the engine switch down.

Operation mode of the engine switch and its function

■ OFF

The indicator light on the engine switch turns off.

The operation mode cannot be put in OFF when the selector lever is in any position other than the "P" (PARK) position.

■ ACC

Allows operation of electrical accessories.

The indicator light on the engine switch illuminates orange.

■ ON

All electrical accessories can be used.
The indicator light on the engine switch illuminates green.
The indicator light turns off when the engine is running.

NOTE

- Your vehicle is equipped with an electronic immobilizer. To start the engine, the ID code which the F.A.S.T.-key sends must match the one registered to the immobilizer computer. (Refer to “Electronic immobilizer (Anti-theft starting system)” on page 5-18)

Changing the operation mode

N00568001035

If you press the engine switch without pressing the brake pedal while the vehicle is stationary, you can change the operation mode in the order of OFF, ACC, ON, OFF.

CAUTION

- When the engine is not running, put the operation mode in OFF. Leaving the operation mode in ON or ACC for a long time when the engine is not running may cause the battery to be discharged, making it impossible to start the engine.
- When the battery is disconnected, the current operation mode is memorized. After reconnecting the battery, the memorized mode is selected automatically. Before disconnecting the battery for repair or replacement, make sure to put the operation mode in OFF. Be careful if you are not sure which operation mode the vehicle is in when the battery is run down.
- The operation mode cannot be changed from OFF to ACC or ON if the F.A.S.T.-key is not detected to be in the vehicle. Refer to “Operating range for starting the engine and changing the operation mode” on page 5-15.

ACC power auto-cutout function

N00568101023

After approximately 30 minutes has elapsed with the operation mode in ACC, the function automatically cuts out the power for the audio system and other electric devices that can be operated with that mode.

When the engine switch is pressed while the operation mode is in ACC, the power is supplied again to those devices.

5

NOTE

- It is possible to modify functions as follows:
 - The time until the power cuts out can be changed to approximately 60 minutes.
 - The ACC power auto-cutout function can be deactivated.

For details, we recommend you to consult an authorized Mitsubishi Motors dealer.
On vehicles equipped with Mitsubishi Motors Multi-Communication System, screen operations can be used to make the adjustment.

Refer to the separate Mitsubishi Multi-Communications System manual for details.

Warning activation

N00503501213

With the F.A.S.T.-key, warnings are given through buzzers and displays on the information screen in the multi information display in order to prevent mistaken operations or vehicle theft.

When a warning operates, be sure to check the vehicle and the F.A.S.T.-key. A warning is also displayed if there is a problem in the F.A.S.T.-key.

Type 1: Color liquid crystal display type

Type 2: Mono-color liquid crystal display type

5

Item	Type 1		Type 2		Solution	Note
	Display	Buzzer	Indicator	Buzzer		
Detection of failure		Inner buzzer sounds once	 Illuminates	No sounds	There is a problem in the F.A.S.T.-key.	—
Fall of battery voltage		Inner buzzer sounds once	 Blinks	No sounds	The battery of the F.A.S.T.-key is run down.	The warning is not activated if the battery is completely dead.

Operation mode OFF reminder system		Inner buzzer sounds once Outer buzzer sounds about 3 seconds intermittently	 Blinks	Outer buzzer sounds about 3 seconds intermittently	When the operation mode is in any mode other than OFF, all the doors and the liftgate are closed, and someone tries to lock the vehicle by pressing the driver's or front passenger's door lock/unlock switch, or the liftgate LOCK switch, a warning is issued and you cannot lock the doors and liftgate.	—

5

Steering wheel lock (if so equipped)

N00514301080

To lock

After pressing the engine switch and operation mode in OFF, when driver's door is opened, the steering wheel is locked.

NOTE

- When the following operation is performed with the operation mode in OFF, the steering wheel is locked.
 - Open or close one of the doors. (except the liftgate)
 - Lock all door and the liftgate by using the F.A.S.T.-key operation or the remote control transmitter of the F.A.S.T.-key.
- When the driver's door is opened while the steering wheel does not unlock, warning display will appear and the buzzer sounds to alert the steering wheel is unlocked.

Warning display

To unlock

The following methods can be used to unlock the steering wheel.

- Put the operation mode in ACC.
- Start the engine.

WARNING

- **If the engine is stopped while driving, do not open a door or press the LOCK switch on the remote control switch until the vehicle stops in a safe place. This could cause the steering wheel to lock, making it impossible to operate the vehicle.**

CAUTION

- Carry the F.A.S.T.-key with you when leaving the vehicle.
If your vehicle needs to be towed, put the operation mode in ACC to unlock the steering wheel.

NOTE

- When the steering wheel does not unlock, the warning display will appear. Press the engine switch again while moving the steering wheel slightly right and left.

Warning display

- When the steering wheel lock is abnormal, the warning display will appear and the inner buzzer will sounds. Put the operation mode in OFF and then press the lock switch of the F.A.S.T.-key. If the warning will appear again, contact an authorized Mitsubishi Motors dealer.

warning display

NOTE

- If there is a fault in the steering wheel lock, the warning display will appear. Immediately stop the vehicle in a safe place and contact an authorized Mitsubishi Motors dealer.

Warning display

Starting and stopping the engine

N00514601331

Tips for starting

- The operation mode can be in any mode to start the engine.
- The starter motor will be turning for up to approximately 15 seconds if the engine switch is released at once. Pressing the engine switch again while the starter motor is still turning will stop the starter motor.

The starter motor will be turning for up to approximately 30 seconds while the engine switch is pressed.

If the engine does not start, wait for a while and then attempt to start the engine again. Trying repeatedly with the engine or starter motor still turning will damage the starter mechanism.

- If the engine will not start because the battery is weak or discharged, refer to “Jump-starting the engine” on page 8-2 for instructions.
- A longer warm up period will only consume extra fuel.

The engine is warmed up enough for driving when the bar graph of engine coolant temperature display starts to move or the low coolant temperature indicator goes out. Refer to “Engine coolant temperature display” on page 5-134 or “Low coolant temperature indicator” on page 5-172.

WARNING

- **Never run the engine in a closed or poorly ventilated area any longer than is needed to move your vehicle out of the area. Carbon monoxide gas, which is odorless and extremely poisonous, could build up and cause serious injury or death.**

CAUTION

- Do not push-start the vehicle.

CAUTION

- Do not run the engine at high rpms or drive at high speeds until the engine has had a chance to warm up.

Starting the engine

Your vehicle is equipped with an electronically controlled fuel injection system. This system automatically controls fuel injection. There is no need to depress the accelerator pedal when starting the engine.

To prevent battery drain, wait a few seconds between attempts to restart the engine.

1. Make sure all occupants are properly seated with seat belts fastened.
2. Make sure the parking brake is applied.
3. Press and hold the brake pedal down firmly with your right foot.

NOTE

- After the engine has not started for a while, the brake pedal effort needed to start the engine may become greater. If this occurs, depress the brake pedal more firmly than usual.

4. Make sure the selector lever is in the “P” (PARK) position.

 **NOTE**

- The engine can only be started when the selector lever is in the “P” (PARK) or “N” (NEUTRAL) position. For safety reasons, the engine should be started when the selector lever is in the “P” (PARK) position in which the driving wheels lock.

5. Press the engine switch.
6. Confirm that all warning lights and warning displays are functioning properly.

 **NOTE**

- Minor noises may be heard on engine start-up. These will disappear as the engine warms up.

When the engine is hard to start

After several attempts, you may experience that the engine still does not start.

1. Make sure that all electric devices, such as lights, air conditioning blower and rear window defogger, are turned off.
2. While depressing the brake pedal, press the accelerator pedal halfway and hold it there, then crank the engine. Release the accelerator pedal, immediately after the engine starts.

3. If the engine still will not start, the engine could be flooded with too much gasoline. While depressing the brake pedal, push the accelerator pedal all the way down and hold it there, then press the engine switch to crank the engine. If the engine does not start after 5 to 6 seconds, push the engine switch to stop cranking the engine, and release the accelerator pedal. Put the operation mode in OFF. Wait a few seconds, and then press the engine switch to crank the engine again while depressing the brake pedal, but do not push the accelerator pedal. If the engine fails to start, repeat these procedures. If the engine still will not start, contact your local Mitsubishi Motors dealer or a repair facility of your choice for assistance.

Startability of the engine with an ambient temperature of -22 °F (-30 °C) or lower

When the ambient temperature is -22 °F (-30 °C) or lower, it may not be possible to start from a standstill even with the selector lever in the “D” (DRIVE) position.

This phenomenon occurs because the transaxle has not warmed up sufficiently; it does not indicate a problem. If this occurs, place the selector lever in the “P” (PARK) position and let the engine idle for at least 10 minutes. The transaxle will warm up, and you will be able to start normally.

Do not leave the vehicle during warm-up operation.

Using the MIVEC engine

The MIVEC engine automatically switches its intake-valve control between a low-speed mode and a high-speed mode in accordance with driving conditions for maximum engine performance.

 **NOTE**

- To protect the engine, the high-speed mode may not be selected while the engine coolant temperature is low. In such a case, the engine revolutions do not rise to over 5,000 rpm even if the accelerator pedal is depressed.

Stopping the engine

N00568201024

 **WARNING**

- **Do not operate the engine switch while driving except in an emergency. If the engine is stopped while driving, the brake servomechanism will cease to function and braking efficiency will deteriorate. Also, the power steering system will not function and it will require greater manual effort to operate the steering. This could result in a serious accident.**

NOTE

- If you have to bring the engine to an emergency stop while driving, press and hold the engine switch for 3 seconds or more, or press it quickly 3 times or more. The engine will stop and the operation mode will go to ACC.
- Do not stop the engine with the selector lever in any position other than the “P” (PARK) position. If the engine is stopped with the selector lever in any position other than the “P” (PARK) position, the operation mode will go to ACC rather than OFF. Put the operation mode in OFF after placing the selector lever in the “P” (PARK) position.

1. Stop the vehicle.
2. Fully engage the parking brake while depressing the brake pedal.
3. Move the selector lever to the “P” (PARK) position, and then press the engine switch to stop the engine.

If the F.A.S.T.-key is not operating properly

N00568301041

Insert the F.A.S.T.-key into the key slot in the instrument panel. Starting the engine and changing the operation mode should be now possible.

Remove the F.A.S.T.-key from the key slot after starting the engine or changing the operation mode.

NOTE

- Do not insert into the key slot anything other than the F.A.S.T.-key. This could cause damage or a malfunction.
- Remove the object or additional key from the F.A.S.T.-key before inserting the key into the key slot. The vehicle may not be able to receive the registered ID code from the registered key. Therefore, the engine may not start and the operation mode may not change.
- The F.A.S.T.-key is fixed in the key slot when inserted in the illustrated direction. Simply pull out the key to remove it from the key slot.

F.A.S.T.-key reminder

Warning display (color liquid crystal display type)

Warning light (mono-color liquid crystal display type)

If the operation mode is in OFF and the driver's door is opened with the F.A.S.T.-key in the key slot, a warning is issued with the warning display and the buzzer buzzing for approximately 3 seconds to remind you to remove the key.

To operate without using the F.A.S.T.-key

N00514800017

Emergency key

N00515201158

The emergency key is built into the F.A.S.T.-key.

When the F.A.S.T.-key cannot be used, such as when the battery of the F.A.S.T.-key or the vehicle has run down, the emergency key can be used to lock and unlock the driver's door.

To use the emergency key (A), unlock the lock knob (B) and remove it from the F.A.S.T.-key (C).

NOTE

- Only use the emergency key in an emergency. When the battery of the F.A.S.T.-key has run down, replace the battery as soon as possible and use it as a F.A.S.T.-key again.
- After using the emergency key, be sure to reinsert it into the F.A.S.T.-key.

Locking and unlocking the driver's door

Turn the emergency key toward the front of the vehicle to lock the door. After checking

that the door is locked, turn the emergency key back to the center and remove it.

- 1- Insert or remove the emergency key
- 2- Lock
- 3- Unlock

Electronic immobilizer (Anti-theft starting system)

N0052960055

The electronic immobilizer is designed to significantly reduce the possibility of vehicle theft. The purpose of the system is to immobilize the vehicle if an invalid start is attempted. A valid start attempt can only be achieved (subject to certain conditions) using a F.A.S.T.-Key “registered” to the immobilizer system.

All of the keys provided with your new vehicle have been programmed to the vehicle's electronics.

Replacement F.A.S.T.-keys

N0056100042

Only the F.A.S.T.-keys that have been programmed to the vehicle's electronics can be used to start the vehicle.

5

If you lose the F.A.S.T.-key, you can order a F.A.S.T.-key from your authorized Mitsubishi Motors dealer by referring to the key number. To prevent vehicle theft, take your vehicle and the remaining F.A.S.T.-keys to an authorized Mitsubishi Motors dealer to have the ID codes reprogrammed.

Additional F.A.S.T.-keys

N00561100014

To add a F.A.S.T.-key, you must already have 2 registered F.A.S.T.-keys. You need to register the ID code to the vehicle.

Registering the ID code can be done by your authorized Mitsubishi Motors dealer. Or it can be done by yourself (except for vehicles sold in Canada).

For you to register the ID code yourself, follow the “Customer F.A.S.T.-key programming” procedure below.

Free-hand Advanced Security Transmitter (F.A.S.T.-key) (if so equipped)

If you choose to have your authorized Mitsubishi Motors dealer register the ID code, take your vehicle and all remaining F.A.S.T.-keys to your authorized Mitsubishi Motors dealer.

NOTE

- You are provided with 2 F.A.S.T.-keys, but you may register up to 4 F.A.S.T.-keys. You can obtain blank F.A.S.T.-keys specially cut for your vehicle from your Mitsubishi Motors dealer.

Customer F.A.S.T.-key programming (Except for vehicles sold in Canada)

N00561201197

You can program new F.A.S.T.-keys to the system if you have two valid (already registered) F.A.S.T.-keys and a blank (not registered) F.A.S.T.-key.

For F.A.S.T.-key programming, follow the procedures below.

1. Open the driver's door.

NOTE

- Keep the driver's door open until F.A.S.T.-key programming is finished. Do not open or close other doors.

2. While carrying the first valid F.A.S.T.-key, put the operation mode in ON. (Perform the following procedure within 30 seconds.)
3. Insert the new F.A.S.T.-key into the key slot in the illustrated direction.

4. With the first valid F.A.S.T.-key, press the UNLOCK button for 4 to 10 seconds and press the LOCK button during this time.
5. Release in sequence the LOCK and UNLOCK buttons within 10 seconds of pressing the LOCK button in step 4. (Perform the following procedure within 30 seconds.)
6. With the second valid F.A.S.T.-key, press the UNLOCK button for 4 to 10 seconds and press the LOCK button during this time.

7. Release in sequence the LOCK and UNLOCK buttons within 10 seconds of pressing the LOCK button in step 6. The immobilizer display on the information screen in the multi-information display will blink.

When registration of ID code is complete, the buzzer will sound 3 times and the immobilizer display will come on for 30 seconds.

If an error occurs, F.A.S.T.-key programming will be terminated and the buzzer will sound for 3 seconds.

NOTE

- F.A.S.T.-key programming will be terminated if the operation mode is put in OFF before the immobilizer display starts blinking.

8. If you wish to register another F.A.S.T.-key, repeat the process from step 1 after the operation mode is put in OFF.
9. When all F.A.S.T.-keys are registered, remove the F.A.S.T.-key from the key slot.

NOTE

- The immobilizer display will go off immediately if the operation mode is put in OFF.
- Perform the operation when the interrupt display screen is not showing. The interrupt display screen may prevent you from seeing the immobilizer display.
- It is not possible to register a F.A.S.T.-key if the immobilizer display goes off during the procedure.

Keyless entry system

N00515501249

Press the remote control transmitter buttons to lock or unlock the doors and the liftgate. It can also help you signal for attention by setting off the panic alarm.

- 1- LOCK (🔒) button
- 2- UNLOCK (🔓) button

- 3- Power liftgate button (if so equipped)
- 4- PANIC button
- 5- Operation indicator light

NOTE

- On vehicles equipped with the mirror retractor switch, the outside rearview mirrors automatically retract or extend when the doors and the liftgate are locked or unlocked using the remote control transmitter buttons. Refer to “Features and controls: Outside rearview mirrors” on page 5-57.

To lock

Press the LOCK button (1) to lock all the doors and the liftgate.

The turn signal lights will also blink once.

NOTE

- On vehicles equipped with the mirror retractor switch, the outside rearview mirrors automatically retract when the LOCK button (1) is pressed.
- If you press the LOCK button (1) twice, the horn will sound once.

To unlock

Press the UNLOCK button (2) to unlock the driver’s door only.

Within about 2 seconds, press the UNLOCK button one more time to unlock all the doors and liftgate.

The dome light will turn on for 30 seconds. The turn signal lights will also blink twice. The front side-marker and parking lights will also turn on for about 30 seconds. Refer to “Welcome light” on page 5-181.

NOTE

- On vehicles equipped with the mirror retractor switch, the outside rearview mirrors automatically extend when the UNLOCK button (2) is pressed.
- On a vehicle equipped with a Mitsubishi Multi-Communication System, the functions can be adjusted on the screen. For details, refer to the separate operation manual.
- The door and liftgate unlock function can be set so that all doors and liftgate unlock when the UNLOCK button (2) is pressed once. Refer to “Setting of door and liftgate unlock function” on page 5-30.

Answerback function

The horn and turn signal lights of the keyless entry system answerback function can be changed as required. This is done with the key removed from the ignition switch.

5

Horn deactivation/reactivation

The answerback function can be set in the following three ways.

One chime: The horn will not sound.

Two chimes: The horn will sound.

Four chimes: The horn will sound if the LOCK button is pressed twice within 1 second.

1. Put the operation mode in OFF.
2. Open the driver's door and turn the combination headlights and dimmer switch to the "OFF" position.
3. Press the LOCK button (1) for 4 to 10 seconds and press the UNLOCK button (2) during this time.
4. Release in sequence the UNLOCK and LOCK buttons within 10 seconds of pressing the UNLOCK button in step 3.

NOTE

- On a vehicle equipped with a Mitsubishi Multi-Communication System, the functions can be adjusted on the screen. For details, refer to the separate operation manual.

Turn signal light deactivation/reactivation

The answerback function from the turn signal lights can be turned ON or OFF separately.

1. Put the operation mode in OFF.
2. Open the driver's door and turn the combination headlights and dimmer switch to the "OFF" position.
3. Press the UNLOCK button (2) for 4 to 10 seconds and press the LOCK button (1) during this time.
4. Release in sequence the UNLOCK and LOCK buttons within 10 seconds of pressing the LOCK button in step 3.

Number of chimes	To lock	To unlock
One chime	One flash	Two flashes
Two chimes	One flash	No flash
Three chimes	No flash	Two flashes
Four chimes	Two flashes	One flash
Five chimes	No flash	One flash

Number of chimes	To lock	To unlock
Six chimes	Two flashes	No flash
Seven chimes	No flash	No flash

NOTE

- On a vehicle equipped with a Mitsubishi Multi-Communication System, the functions can be adjusted on the screen. For details, refer to the separate operation manual.

Buzzer deactivation/reactivation

The buzzer answerback function can be turned ON or OFF as required.

NOTE

- On a vehicle equipped with a Mitsubishi Multi-Communication System, the functions can be adjusted on the screen. For details, refer to a separate operation manual.

Setting of door and liftgate unlock function

N00544601095

The door and liftgate unlock function can be set to the following two conditions. Each time the door and liftgate unlock function is set, a chime will sound to tell you the

condition of the door and liftgate unlock function.

Number of chimes	Condition
One chime	All doors and the liftgate unlock
Two chimes	Driver's door unlock only

1. Put the operation mode in OFF.
2. Open the driver's door and turn the combination headlights and dimmer switch to the "OFF" position.
3. Press the LOCK button (1) for 4 to 10 seconds and press the UNLOCK button (2) during this time.
4. Release in sequence the LOCK and UNLOCK buttons within 10 seconds of pressing the LOCK button in step 3.

NOTE

- On a vehicle equipped with a Mitsubishi Multi-Communication System, the functions can be adjusted on the screen. For details, refer to the separate operation manual.

Operating the power liftgate

N00579500020

After unlocking the doors and the liftgate, the power liftgate can be operated by pressing the power liftgate button (3). Refer to "Power liftgate" on page 5-38.

Using the panic alarm

N00544701067

If you are near your vehicle and feel threatened, you can activate the alarm to call attention as follows:

1. Press the PANIC button (4) for more than 1 second.
2. The headlights will blink on and off and the horn will sound intermittently for about 3 minutes.
3. To turn off the alarm, press any button on the remote control transmitter.

NOTE

- The indicator light (5) comes on each time a button is pressed.
- The F.A.S.T.-key can be used from about 40 feet (12 m) away. However, this distance may change if your vehicle is near a TV transmitting tower, a power station, or a radio station.

NOTE

- If the UNLOCK button (2) is pressed when all doors and the liftgate are locked and no doors or the liftgate are opened within about 30 seconds, the doors and the liftgate will automatically re-lock. On a vehicle equipped with a Mitsubishi Multi-Communication System, the functions can be adjusted on the screen. For details, refer to the separate operation manual.
- If the following conditions are observed after pressing the LOCK (1) or UNLOCK (2) button on the remote control transmitter, the battery in the F.A.S.T.-key may need to be replaced.
 - The doors and the liftgate cannot be locked or unlocked.
 - The panic alarm cannot be operated.
 - The indicator light (5) is dim or does not come on.
- If you lose your F.A.S.T.-key, please contact an authorized Mitsubishi Motors dealer for a replacement.
- If you wish to obtain an additional F.A.S.T.-key, please contact an authorized Mitsubishi Motors dealer. A maximum of four F.A.S.T.-key can be programmed for your vehicle.
- To use the new remote control transmitters, it is necessary to register the key with both the electronic immobilizer and keyless entry system. Also refer to "Electronic immobilizer (Anti-theft starting system): Customer F.A.S.T.-key programming" on page 5-28.

General information

N00562001062

Your F.A.S.T.-key operates on a radio frequency subject to Federal Communications Commission (FCC) Rules (For vehicles sold in U.S.A.) and Industry Canada Rules (For vehicles sold in Canada). This device complies with Part 15 of FCC Rules and Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions.

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

CAUTION

- Changes or modifications not expressly approved by the manufacturer for compliance could void the user's authority to operate the equipment.

Procedure for replacing the remote control transmitter battery

N00562101076

1. Before replacing the battery, remove static electricity from your body by touching a metal grounded object.
2. With the Mitsubishi mark facing you, insert the cloth-covered tip of a flat blade screwdriver into the notch in the case and use it to open the case.

NOTE

- Be sure to perform the procedure with the Mitsubishi mark facing you. If the Mitsubishi mark is not facing you when you open the case, the transmitter may come out.

3. Remove the old battery.

4. Install a new battery with the + side (A) up.

5. Close the case firmly.
6. Check the keyless entry system to see that it works.

NOTE

- You may purchase a replacement battery at an electric appliance store.
- An authorized Mitsubishi Motors dealer can replace the battery for you if you prefer.

CAUTION

- When the remote control transmitter case is opened, be careful to keep water, dust, etc. out. Also, do not touch the internal components.

Door locks

N00509201544

⚠ WARNING

- Make sure all doors are tightly closed and locked while driving.
- Locked doors, in combination with the use of seat belts, can help reduce the risk of ejection in an accident.
- Locked doors can help keep passengers, especially small children, from opening doors and falling out of moving vehicles.
- Locked doors can help prevent outsiders from gaining access to your vehicle when you slow or come to a stop.
- Lock your vehicle whenever you leave it. Children who get into unlocked vehicles may not be able to get out. Children trapped inside vehicles can quickly be overcome by heat and suffer serious injury or death due to heat stroke.
- Never leave a child alone in the vehicle. In addition to the risk of heat stroke, children can activate switches and controls, resulting in an injury or fatal accident.
- When closing a door, make sure that the door is fully closed and the door-ajar warning display goes out on the information screen on the multi-information display. If the door is ajar it could open while driving and cause an accident.

To lock and unlock with the key (driver's door)

Turn the key toward the front of the vehicle to lock the door. After checking that the door is locked, turn the key back to the center and remove it.

- 1- Insert or remove the key
- 2- Lock
- 3- Unlock

📖 NOTE

- When locking or unlocking with the key, only the driver's door will be locked or unlocked.
To lock or unlock all doors and liftgate, use the power door lock switch, the keyless entry system or the F.A.S.T.-key operation. Refer to "Power door locks" on page 5-35, "Keyless entry system" on pages 5-7 and 5-29, and "To operate using the F.A.S.T.-key" on page 5-15.
- In vehicles equipped with the F.A.S.T.-key, the driver's door can be locked and unlocked using the emergency key. Refer to "Emergency key" on page 5-26.

To lock or unlock the door from the inside

Move the lock knob to the lock position to lock the door.

All doors should be kept locked while driving.

5

- 1- Lock
- 2- Unlock

The driver's door can be unlocked without using the lock knob by pulling on the inside door handle.

To lock the door without using the key

1. Move the inside lock knob to the locked position.

2. Be sure the keys are not inside the vehicle. Close the door.

Key reminder system (except for vehicles equipped with the F.A.S.T.-key)

N00549601250

If the ignition switch is turned off and the driver's door is opened with the key in the ignition switch, the key reminder buzzer will sound intermittently to remind you to remove the key.

The warning display will be displayed on the information screen in the multi-information

display. (Color liquid crystal display type only)

Lock out protection

N00517301052

If the key is in the ignition switch or the operation mode is in any mode other than OFF, when you push the lock knob forward with the driver's door or passenger's door open, the lock knob will automatically return to the unlocked position.

Operation mode ON reminder system (vehicles equipped with F.A.S.T.-key)

N00503801157

If the driver's door is opened while the engine is stopped and the operation mode is in any mode other than OFF, the operation mode ON buzzer will sound intermittently to remind you put the operation mode in OFF. The warning display will be displayed on the information screen in the multi-information display. (Color liquid crystal display type only)

Power door locks

N00509301617

NOTE

- When locking or unlocking with the key on the driver's door, only the driver's door will lock or unlock.
- Repeated continuous operation between lock and unlock could activate the power door locking system's built-in protection circuit, and prevent the system from operating. If this occurs, wait about 1 minute before operating the power door lock switch.

To lock and unlock the doors and liftgate

Using the power door lock switch

- 1- Lock
2- Unlock

All of the doors and the liftgate can be locked or unlocked by pressing the power door lock switch on the driver's or the front passenger door.

To unlock the doors and liftgate

N00563401119

You can select the functions to unlock the doors and liftgate either using the ignition switch position or the engine switch, or using the selector lever position.

These functions are not activated when the vehicle is shipped from the factory. To activate or deactivate these functions, please contact your authorized Mitsubishi Motors dealer.

Using the ignition switch or the engine switch

All doors and the liftgate will unlock when the ignition switch is turned to the "OFF" or "LOCK" position or the operation mode is put in OFF.

Using the selector lever position

All doors and the liftgate will unlock when the selector lever is moved to the "P" (PARK) position with the ignition switch or the operation mode in ON.

NOTE

- On a vehicle equipped with a Mitsubishi Multi-Communication System, the functions can be adjusted on the screen. For details, refer to a separate operation manual.

Child safety locks for rear door

N00509401298

- 1- To lock
- 2- To release

Child safety locks help prevent rear passengers, especially children, from opening the rear door using the inside door handle.

A lock lever for the child safety lock is provided on each rear door.

When the lever is in the lock position (1), the rear door cannot be opened using the inside door handle.

To open the rear door when the child safety lock lever is in the lock position, pull the outside door handle.

When the lever is in the release position (2), the child safety lock is released and the rear

door can be opened using the inside door handle.

WARNING

- Always keep the doors tightly closed and locked when driving. An unlocked door may be accidentally opened by a passenger, especially by a child who could fall out. Also, if the doors are not locked, there is a greater risk of someone being thrown from the vehicle in an accident.

Liftgate (except for vehicles equipped with the power liftgate)

N00510101282

WARNING

- It is dangerous to drive with the liftgate open since carbon monoxide (CO) gas can enter the passenger compartment. CO is an invisible, odorless gas that can cause unconsciousness and even death.
- When opening and closing the liftgate, make sure that there are no people nearby and be careful not to hit your head or pinch your hands, neck, etc.
- If snow or ice has accumulated on the liftgate, remove it before opening the liftgate. Otherwise the liftgate may abruptly close due to the weight of the snow or ice.

⚠ WARNING

- When opening the liftgate, always fully open it. A partially opened liftgate can unexpectedly close due to its own weight.
- When the vehicle is parked on a slope, the effort required to open or close the liftgate may be greater or less than expected. The liftgate may also open or close more quickly.

**📖 NOTE**

- On vehicles equipped with the mirror retractor switch, the outside rearview mirrors automatically extend when the liftgate and all doors are unlocked using the liftgate open switch (A).

⚠ CAUTION

- Do not stand behind the exhaust pipe when loading and unloading luggage. Heat from the exhaust could lead to burns.
- To avoid damage to the liftgate, make sure that area above and behind the liftgate is clear before opening it.

⚠ CAUTION

- Make sure there is no one standing nearby when opening the liftgate.

📖 NOTE

- The liftgate cannot be raised if it is not raised immediately after pressing the liftgate open switch. If this happens, raise the liftgate again after pressing the liftgate open switch.
- It is not possible to open the liftgate while the battery is disconnected. If necessary, use the inside liftgate release.
- When the battery is reconnected, all doors and the liftgate will be locked. Unlock them before trying to open the liftgate.

📖 NOTE

- Locking and unlocking the doors by using power door locks (driver and front passenger side), keyless entry system, or F.A.S.T.-key operation (vehicles equipped with the F.A.S.T.-key) also locks and unlocks the liftgate.

To open

1. After unlocking, push the liftgate open switch (A) and raise the liftgate.

To close

1. Pull the liftgate grip (B) downward as illustrated and release it before the liftgate closes completely. Gently close the liftgate from the outside so that it is completely closed.

**⚠ CAUTION**

- To avoid injuring your hand or arm, do not attempt to close the liftgate without releasing the liftgate grip (B).

⚠ CAUTION

- Before starting the vehicle, be sure to confirm that the liftgate is locked. If the liftgate opens while driving the vehicle, objects stored in the luggage compartment could fall out into the road.

5

📖 NOTE

- Gas struts (C) are installed in the locations illustrated in order to support the liftgate. Please observe the following in order to prevent damage or faulty operation:
 - Do not touch, push or pull the gas struts when closing the liftgate.
 - Do not attach any plastic material, tape, etc., to the gas struts.
 - Do not tie string, etc., around the gas struts.
 - Do not hang objects on the gas struts.

Power liftgate (if so equipped)

N00575900026

Before operating the power liftgate, unlock the power liftgate by pushing the power door lock switch or the unlock button on the keyless entry system or F.A.S.T.-key.

Refer to “Keyless entry system”, “Free-hand Advanced Security Transmitter (F.A.S.T.-key)” and “Power door locks” on pages 5-7, 5-12 and 5-35 respectively.

Operating the power liftgate

N00576000037

⚠ WARNING

- **The luggage area was not designed for people to ride in. Do not let your children ride in or play in the luggage area. Riding or playing in the luggage area could result in a serious accident and/or injury.**
- **Before driving, make sure the power liftgate is securely closed.**
If you drive with the power liftgate open, exhaust gas may enter the vehicle and cause carbon monoxide poisoning.
- **To avoid injury, the power liftgate should not be operated by children.**

⚠ WARNING

- **When opening and closing the power liftgate, make sure that there are no people nearby and be careful not to hit your head or pinch your hands, neck, etc.**
Make sure the power liftgate is completely open before loading and unloading luggage.

⚠ CAUTION

- Do not stand behind the exhaust pipe when loading and unloading luggage.
The heat from the exhaust could cause burns.
- Before driving, make sure the power liftgate is securely closed. If the liftgate opens while driving, objects stored in the luggage compartment could fall out into the road.
- Do not install any accessory other than Mitsubishi Motors Genuine parts on the power liftgate. The weight of the accessory may cause faulty operation of the liftgate.
- Before closing the liftgate, make sure there is no foreign object around the striker (A).
If a foreign object matter gets into the striker, it could prevent the power liftgate from closing securely.

Automatic operation

N0057650029

When the power liftgate main switch (A) is on, the power liftgate can be operated using either the power liftgate switch on the F.A.S.T.-key, the driver's side power liftgate switch or the open/close switches on the power liftgate.

Refer to "Operating conditions" on page 5-40.

NOTE

- When opening and closing the power liftgate, do not place your hands near the arm (B) and gas struts (C).
- To prevent damage to the gas struts:
 - Do not push or pull on the gas struts.
 - Do not wrap, attach or hang anything on the gas struts.

WARNING

- To avoid accidental or unintended operation of the power liftgate, turn off the power liftgate main switch when not operating the power liftgate.
- Do not turn off the power liftgate main switch while the power liftgate is opening or closing.

CAUTION

- Do not apply excessive force to the power liftgate when opening or closing it. Doing so could damage to the power liftgate.

NOTE

- Do not start the engine while the power liftgate is operating. The sudden operation prevention mechanism could operate, making the power liftgate stop intermittently while it moves.
- The power liftgate cannot be opened when the battery is discharged or disconnected. The liftgate must be then opened using the inside liftgate release. Refer to "Inside liftgate release" on page 5-44.
- If the keyless entry system or close switch is operated when the power liftgate main switch is off, the warning buzzer sounds 4 times to notify the driver that the power liftgate cannot be operated.
- The power liftgate does not operate normally under the following conditions:
 - When parked on an incline
 - In strong winds
 - When the power liftgate is covered with snow
- Repeated continuous opening and closing operation of the power liftgate will activate a built-in protection circuit and switch the power liftgate to manual operation.

NOTE

- If one of the power liftgate switches is operated while the power liftgate is operating, the power liftgate will reverse and return to the full open or close position.
- If the selector lever is moved from “P” (PARK) position to another position while the power liftgate is operating or completely open, a warning buzzer will sound for approximately 10 seconds to notify the driver that the power liftgate is open.
- If the battery or fuse is replaced while the power liftgate is open, it cannot be closed automatically.
In this case close the power liftgate manually.

Operating conditions

N00576100038

The power liftgate can be opened automatically when all of the following conditions are met.

<Using the F.A.S.T.-key>

- The operation mode is in OFF.
- The power liftgate is completely closed.
- The power liftgate is unlocked.

<Using the driver’s side power liftgate switch>

- The operation mode is in ON with the selector lever in the “P” (PARK) position.

- The power liftgate is completely closed.
- The power liftgate is unlocked.

<Using the open switch on the power liftgate>

- The power liftgate is unlocked.
- The F.A.S.T.-key is within the operating range (2.3 feet (70 cm) from the power liftgate open switch) and the power liftgate is locked.

The power liftgate can be closed automatically when all of the following conditions are met.

<Using the F.A.S.T.-key>

- The operation mode is in OFF.
- The power liftgate is completely open.
- Nothing is touching the auto reverse sensors (A) on the power liftgate.

<Using the driver’s side power liftgate switch or the close switch on the power liftgate>

- The operation mode is in ON with the selector lever in the “P” (PARK) position, or the operation mode is in ACC or OFF.
- The power liftgate is completely open.
- Nothing is touching the auto reverse sensors on the power liftgate.

Operating the power liftgate using the F.A.S.T.-key or the driver’s side power liftgate switch

After unlocking the doors and the power liftgate, the power liftgate can be operated by pressing the switch (A) of the F.A.S.T.-key or the driver’s side power liftgate switch (B).

<Using the F.A.S.T.-key>

If the power liftgate switch is pressed twice in a row, the power liftgate operates after the warning buzzer sounds and the hazard warning flasher blinks.

The power liftgate operates as follows:

- While closed: The warning buzzer sounds and the power liftgate completely opens.

- While open: The warning buzzer sounds and the power liftgate completely closes.

If the power liftgate switch is pressed once while the power liftgate is operating, the warning buzzer sounds and the liftgate will reverse and return to the full open or closed position.

NOTE

- If the power liftgate switch is pressed 3 or more times in a row, the power liftgate may not operate normally. If this occurs, wait a short time before again pressing the power liftgate switch twice.

<Using the driver's side power liftgate switch>

If the driver's side power liftgate switch is pressed for more than 1 second, the power liftgate will operate after the buzzer sounds and the hazard warning flasher blinks.

The power liftgate operates as follows.

- While closed: The warning buzzer sounds and the power liftgate completely opens.
- While open: The warning buzzer sounds and the power liftgate completely closes.

If the driver's side power liftgate switch is pressed once while the power liftgate is operating, the warning buzzer will sound and the power liftgate will move in the direction opposite to the one in which it was operating.

WARNING

- When operating the power liftgate, make sure that there are no people near the power liftgate and that there is sufficient space behind and above the vehicle.

5

Opening the power liftgate using the open switch

The power liftgate can be opened by pressing the open switch (C).

If the open switch is pressed while the power liftgate and all doors are unlocked, the power

Power liftgate (if so equipped)

liftgate will open after the warning buzzer sounds and the hazard warning flasher blinks.

NOTE

- When you are carrying the F.A.S.T.-key with the power liftgate is locked, the power liftgate can be opened by pressing the open switch even if the power liftgate is locked.
- For vehicles equipped with the mirror retractor switch, the outside rearview mirrors automatically extend when the power liftgate and all doors are unlocked using the liftgate open switch (C).

5

Closing the power liftgate using the close switch

The power liftgate can be closed by pressing the close switch (D) on the power liftgate.

If the close switch on the power liftgate is pressed, the power liftgate will close after the warning buzzer sounds 3 times and the hazard warning flasher blinks 2 times.

If the close switch is pressed once while the power liftgate is closing, the warning buzzer sounds once and the power liftgate opens.

NOTE

- If the close switch is again pressed once while the power liftgate is operating in the opening direction, the warning buzzer will sound once and the power liftgate will close.

Auto reverse

N0057620026

If the auto reverse sensors (A) on either side of the power liftgate detect that something is being trapped by the closing power liftgate, the warning buzzer will sound once and the liftgate will automatically reverse direction and return to the full open position.

WARNING

- The auto reverse mechanism will not operate just before the power liftgate becomes fully closed. Therefore, be careful not to trap a hand, part of your body or an object at this time.
- When the power liftgate is closed manually, the auto reverse mechanism will not operate.
- If the auto reverse mechanism has been repeatedly activated, the power liftgate may stop and then, depending on its position, may abruptly open or close. Once the power liftgate is completely closed or open, automatic operation will be resumed.

⚠ CAUTION

- Do not damage the auto reverse sensor, when loading or unloading luggage. If the sensor is damaged, the power liftgate will not close automatically.

Drop prevention mechanism

After the power liftgate has opened automatically, if it is detected that the power liftgate is dropping due to factors such as accumulated snow, the power liftgate will close automatically.

A warning buzzer will sound continuously while the drop prevention mechanism is operating.

📖 NOTE

- If snow has accumulated on the power liftgate, remove it before operating the power liftgate.
- Do not install any accessory other than Mitsubishi Motors Genuine parts on the power liftgate. The drop prevention mechanism may be activated due to the weight of the accessory.
- The drop prevention mechanism could be activated if you attempt to close the liftgate manually immediately after the power liftgate has been completely opened automatically.

Sudden operation prevention mechanism

If the engine is started while the power liftgate is operating, the power liftgate may intermittently move or stop moving to prevent the power liftgate from moving abruptly. Approximately 10 seconds after the power liftgate has fully closed or opened, power liftgate operation will again resume.

⚠ CAUTION

- The auto reverse will not operate while the sudden operation prevention mechanism is activated.

Manual operation

N00576300030

When the power liftgate main switch is off, the power liftgate can be manually opened and closed.

After unlocking the power liftgate, push the power liftgate open switch (A) and pull up the power liftgate.

5

⚠ WARNING

- When the power liftgate is closed manually, the auto reverse mechanism will not operate even if something is trapped under the liftgate.

⚠ CAUTION

- Make sure there is no one around the power liftgate when opening it.

📖 NOTE

- The liftgate cannot be opened if it is not raised immediately after pressing the power liftgate open switch. If this happens, raise the liftgate again after pressing the liftgate open switch.

NOTE

- When the battery is discharged or disconnected, the power liftgate cannot be opened even manually. At that time, the liftgate can be opened only by using the inside liftgate release. Refer to “Inside liftgate release” on page 5-44.

5

To close the power liftgate, pull the power liftgate grip (B) downward and release it before the power liftgate is completely closed, and then gently close the power liftgate from the outside.

CAUTION

- The auto reverse mechanism will not operate when the power liftgate is closed manually. Therefore be especially careful not to trap a hand or finger.

CAUTION

- Do not fully close the power liftgate with your hand still on the power liftgate grip. Doing so could trap and injure your hand or arm.

Power liftgate easy closer

N00576400028

The power liftgate easy closer is designed to help the power liftgate close securely. If the power liftgate is closed to a position where it is detected as being ajar, it closes automatically.

WARNING

- **Keep your hands and fingers away from the power liftgate while the power liftgate easy closer is activated. To return the power liftgate to the slightly ajar position while the power liftgate easy closer is activated, press the power liftgate open switch.**

CAUTION

- Do not touch the latch (A) on the inside of the power liftgate. The power liftgate easy closer could operate and catch your fingers.

NOTE

- The power liftgate easy closer operates even when the power liftgate main switch is OFF.
- Repeated continuous operation of the handle could activate the protection circuit and temporarily prevent the power liftgate easy closer from operating. If this occurs, wait about 1 minute before operating the power liftgate easy closer again.

Inside liftgate release

N00523101084

The inside liftgate release is designed to provide a way to open the liftgate if the battery is dead or disconnected. The liftgate release lever (see illustration) is mounted on the liftgate.

You and your family should familiarize yourselves with the location and operation of the liftgate release lever.

To open

1. Open the lid (A) inside of the liftgate.

2. Move the lever (B) to open the liftgate.

3. Push out on the liftgate to open it.

CAUTION

- Always keep the release lever lid on the liftgate closed when driving so that your luggage cannot accidentally bump the lever and open the liftgate.

Theft-alarm system

N00510201267

The theft-alarm system is designed to provide protection from unauthorized entry into the vehicle. This system is operated in three stages: the first is the “armed” stage, the second is the “alarm” stage, and third is the “disarmed” stage. If triggered, the system provides both audible and visual alarm signals.

CAUTION

- Do not modify or add parts to the theft-alarm system. Doing so could cause the theft-alarm to malfunction.

Armed stage

N00510301200

5

Park the vehicle and stop the engine. Arm the system as described below.

1. Except for vehicles equipped with the F.A.S.T.-key, remove the key from the ignition switch.
For vehicles equipped with the F.A.S.T.-key, put the operation mode in OFF.
2. Make sure that the engine hood is closed.
3. Lock all doors and the liftgate by using the keyless entry system or the F.A.S.T.-key operation.

Arm the system and leave

Theft-alarm system

At this time, the theft-alarm indicator (A) on the instrument panel flashes for confirmation.

5

4. The system has entered the armed stage after about 20 seconds, when the theft-alarm indicator (A) flashing becomes slower.

The theft-alarm indicator (A) continues to flash while the system is in the armed stage.

NOTE

- If the engine hood is open, the theft-alarm indicator (A) illuminates and the system cannot enter the armed stage.
The system enters the armed stage about 20 seconds after the engine hood is closed.
- The system will be disarmed if, while the theft-alarm indicator (A) is illuminated, all doors and the liftgate are unlocked by using the keyless entry system or the F.A.S.T.-key operation.

NOTE

- The system will be disarmed if, while the theft-alarm indicator is illuminated, the following operation is performed.
 - Except for vehicles equipped with the F.A.S.T.-key, if the ignition switch is turned to the “ON” position.
 - For vehicles equipped with the F.A.S.T.-key, if the operation mode is put in ON.
- The system will not be armed if a door, the liftgate or the engine hood is not completely closed. If this happens, rearm the system as described above.
- The theft-alarm system can be activated when people are riding inside the vehicle or when the windows are open. To prevent accidental activation of the alarm, do not set the system to the system armed mode while people are riding in the vehicle.

NOTE

- For vehicles equipped with the interior alarm sensor, if the turn signal lights do not flash after the locking and unlocking operation using the keyless entry system or the F.A.S.T.-key operation, the theft-alarm system may be malfunctioning.
Have the vehicle inspected by an authorized Mitsubishi Motors dealer.
If the answerback function (flashing of the turn signal lights by locking and unlocking the doors and the liftgate) is deactivated, the turn signal lights do not flash after the locking and unlocking operation.
For information on the answerback function, refer to “Keyless entry system” on pages 5-7 and 5-29 and “To operate using the F.A.S.T.-key” on page 5-15.
- For vehicles equipped with the interior alarm sensor, the theft-alarm system could be activated in the following situations.
 - Using a car washer.
 - Taking the vehicle on a ferry.
 - Parking in an automated car park.
 - Leaving someone or a pet in the vehicle.
 - Leaving a window or the sunroof open.
 - Leaving an unstable object such as a stuffed toy or accessory in the vehicle.

NOTE

- During a continuous impact or vibration by hail, thunder, etc.
According to the situations, deactivate the vehicle inclination detection function and the interior intrusion detection function. Refer to “Theft-alarm system: To deactivate the vehicle inclination detection function and the interior intrusion detection function” on page 5-47.
- For vehicles equipped with the interior alarm sensor, the sensitivity of the interior intrusion detection function can be adjusted. For further details, please contact an authorized Mitsubishi Motors dealer.

Alarm stage

N00510401214

The alarm will be activated if any of the following occur while the vehicle is parked and the system is armed.

- One of the doors and the liftgate is opened without using the keyless entry system or the F.A.S.T.-key operation.
- The engine hood is opened.

Also, for vehicles equipped with the interior alarm sensor, the alarm will be activated if any of the following occur.

- Attempt an unauthorized moving of the vehicle. (the vehicle inclination detection function)
- Detect a motion in the vehicle. (the interior intrusion detection function)
- Disconnect the battery terminal.

Type of alarm

N00582500024

When the alarm is activated:

1. The headlights blink on and off for 3 minutes.
After 3 minutes the headlights automatically shut off.
2. The horn (the siren for vehicles equipped with the interior alarm sensor) will sound intermittently for 3 minutes.

**NOTE**

- The alarm will continue to operate for 3 minutes. At the end of that period, the alarm will automatically shut off to save battery power. The system will then be rearmed until the proper disarming step is taken.
- The alarm will resume if unauthorized actions are taken again, even if the alarm has stopped.

Alarm deactivation

N00582600025

The alarm can be deactivated in the following ways.

- By using the keyless entry system or the F.A.S.T.-key operation to lock or unlock the doors and liftgate.
- Turn the ignition switch to the “ON” position or put the operation mode in ON.

To deactivate the vehicle inclination detection function and the interior intrusion detection function (vehicles equipped with the interior alarm sensor)

N00582700026

The vehicle inclination detection function and the interior intrusion detection function can

Theft-alarm system

be deactivated when parking in automated car parks or leaving pets in the vehicle.

1. Except for vehicles equipped with the F.A.S.T.-key, remove the key from the ignition switch.
For vehicles equipped with the F.A.S.T.-key, put the operation mode in OFF.
2. Raise and hold the wiper and washer switch to the "MIST" position for about 3 seconds. The buzzer will sound once and the function will be deactivated.

To activate the function again, raise and hold the wiper and washer switch to the "MIST" position for about 3 seconds. The buzzer will sound twice and the function will be activated.

5

NOTE

- The function will be activated again if the following operation is performed.
 - If the doors and the liftgate are unlocked using the keyless entry system or the F.A.S.T.-key operation.
 - If the ignition switch is turned to the "ON" or "ACC" position or the operation mode is put in ON or ACC.

Disarmed stage

N00510501172

The system will be disarmed if the following operation is performed.

- Except for vehicles equipped with the F.A.S.T.-key, if the ignition switch is turned to the "ON" position.
- For vehicles equipped with the F.A.S.T.-key, if the operation mode is put in ON.
- All doors and the liftgate are unlocked by using the keyless entry system or the F.A.S.T.-key operation.

Disarm...by using the keyless entry system or F.A.S.T.-key operation

NOTE

- If the UNLOCK button on the remote control transmitter, or the driver's or front passenger's door lock/unlock switch is pressed when all doors and the liftgate are closed and no door is opened within approximately 30 seconds, re-arming will automatically occur.
- The amount of time after unlocking until the vehicle relocks automatically can be adjusted. See an authorized Mitsubishi Motors dealer for details.
On a vehicle equipped with a Mitsubishi Multi-Communication System, the functions can be adjusted on the screen. For details, refer to a separate operation manual.
- Once the system has been disarmed, it cannot be rearmed except by repeating the arming procedure.

Testing the theft-alarm system

N00510601144

Use the following procedure to test the system:

1. Lower the driver's window.
2. Arm the system as explained in "Armed stage".
3. Make sure that the theft-alarm indicator comes on and flashes for approximately 20 seconds.
4. Wait a few seconds and then unlock the driver's side door by using the inside door lock knob. Open the door.
5. Make sure that the horn (the siren for vehicles equipped with the interior alarm sensor) sounds intermittently and the headlights blink when a door is opened.
6. Disarm the system by unlocking all doors and the liftgate by using the keyless entry system or the F.A.S.T.-key operation.

Power window control

N00510800383

- 1- Open (down)
2- Close (up)

⚠ WARNING

- Never leave the vehicle without carrying the key.
- Never leave children or unreliable adults unattended inside the vehicle.

📖 NOTE

- Never try to operate the main switch and sub-switch in different directions at the same time. This will freeze the window in position.
- Operating the power windows repeatedly with the engine stopped will run down the battery. Use the window switches only while the engine is running.

⚠ WARNING

- Before operating the power windows, make sure that nothing can be trapped (head, hands, fingers, etc.) in the window.

Main switch

N00548701137

The main switch located on the driver's door can be used to operate all the windows.

A window can be opened or closed by operating the corresponding switch.

Press the switch down to open the window, and pull up the switch to close it.

If the driver's door window switch is fully pressed down/pulled up, the driver's door window automatically opens/closes completely.

If you want to stop the window movement, operate the switch lightly in the reverse direction.

- 1- Driver's door window switch
- 2- Front passenger door window switch
- 3- Left rear door window switch
- 4- Right rear door window switch
- 5- Lock switch

Sub switch

N00548800102

- 1- Close
- 2- Open

Each sub-switch can be used for its own passenger door window, unless the driver's window lock switch is activated.

NOTE

- The rear door windows open only half-way.

Power window timer function

N00548901155

The power windows can be run up or down when the ignition switch or the operation mode is in ON.

The door windows can be opened or closed for a 30-second period after the engine is

stopped. However, once the driver's door or the front passenger's door is opened, the power windows cannot be operated.

Lock switch

N00549001166

When this switch is in the lock mode, the passenger door switches cannot be used to open or close the door windows, and the main switch will open or close only the driver's door window. To unlock the switch, press it again.

- 1- Lock
- 2- Unlock

⚠ WARNING

- Before driving with a child in the vehicle, be sure to lock the window switch to make it inoperative. Children tampering with the switch could easily trap their hands or heads in the window.

Safety mechanism (Driver's door window only)

N00528801129

If a hand or head is trapped, for safety the door window is automatically lowered a little. After the obstruction is removed, pull up the switch again to close the door window.

⚠ WARNING

- If the battery terminals are disconnected or the fuse for electric window is replaced, the safety mechanism will be cancelled. If a hand or head got trapped, a serious injury could result.

⚠ CAUTION

- The safety mechanism is deactivated just before the door window closes. This allows the door window to close completely. Therefore be especially careful that fingers are not trapped in the door window opening.

⚠ CAUTION

- The safety mechanism is deactivated while the switch is pulled up. Therefore be especially careful that fingers are not trapped in the door window opening.
- Do not deliberately trap your hands or head in order to activate the safety mechanism. Your hand or head could be trapped and personal injury could result.

📖 NOTE

- The safety mechanism can be activated if the driving conditions or other circumstances cause the door window to be subjected to a physical shock similar to that caused by trapped hand or head.
- If the battery terminals are disconnected or the fuse for power window is replaced, the safety mechanism will be cancelled and the door window will not automatically open/close completely. If the window is open, repeatedly raise the driver's door window switch until the window has been fully closed. Following this, release the switch, raise the switch once again and hold it in this condition for at least 1 second, then release it. You should now be able to operate the driver's door window in the normal function.

What to do if you hear wind buffeting when driving

N00551400014

Wind buffeting can be described as the perception of pressure on the ears or a booming or rumbling sound. Your vehicle may exhibit wind buffeting when driving with one or both rear door windows down or partially opened. This is a normal occurrence that can be minimized. If the buffeting occurs with the rear door windows open, open the front door windows as well as the rear door windows to minimize the condition.

5

Sunroof (if so equipped)

N00511001682

The sunroof can be opened and closed with the ignition switch or the operation mode in ON.

AG0001120

Sunroof (if so equipped)

To open

Press the switch (1), the sunroof automatically opens.

To stop the moving sunroof, press the switch.

NOTE

- The sunroof stops just before reaching the fully open position. If the vehicle is driven with the sunroof in this position, wind buffeting is lower than with the sunroof fully open.

To close

Press the switch (3), the sunroof automatically closes.

To stop the moving sunroof, press the switch.

To tilt up

When the switch (2) is pressed, the rear of the sunroof raises for ventilation.

To tilt down

Press the switch (3).

NOTE

- Be sure to tilt down the sunroof before closing the sunshade.

Sunroof timer function

The sunroof can be operated when the ignition switch or the operation mode is in ON. The sunroof can be opened or closed for a 30-second period after the engine is stopped. However, when the driver's door or the front passenger door is opened, the sunroof cannot be operated. Turn on the ignition switch again to operate.

Safety mechanism

If a hand or head is trapped in the closing sunroof opening, the safety mechanism will cause the sunroof to re-open automatically. The opened sunroof will become operational again after a few seconds.

If the safety mechanism is activated 5 or more times consecutively, normal closing of the sunroof will be aborted.

As an emergency measure, the sunroof can be closed bit by bit until the sunroof is completely closed by repeatedly pressing the switch (2).

After that, the sunroof can be set the initialized state in the following procedure.

1. Move the sunroof in slide open position.
2. Press the tilt up switch (2) continually in 10 seconds.
3. The sunroof will be moved to tilt up position automatically bit by bit.
4. The initialize is completed when the sunroof is stopped at tilt up position.
If the sunroof does not return to normal, consult an authorized Mitsubishi Motors dealer.

NOTE

- The safety mechanism can be activated if the driving conditions or other circumstances cause the sunroof to be subjected to a physical shock similar to that caused by a trapped hand or head.

CAUTION

- The safety mechanism is deactivated while the switch (2) is pressed. Therefore be especially careful that fingers are not trapped in the sunroof opening.
- Do not deliberately trap your hands or head in order to activate the safety mechanism. Personal injury and malfunction of the sunroof could result.

Sunshade

The sunshade can be opened or closed manually while the sunroof is closed.

CAUTION

- Do not attempt to close the sunshade when the sunroof is opened.
- Be careful that hands are not trapped when closing the sunshade.

WARNING

- Do not stick your head, hands or anything else in the sunroof opening.
- Before operating the sunroof, make sure that nothing can be trapped (head, hands, fingers, etc.).
- Never leave a child unreliable adults unattended inside the vehicle.

NOTE

- When leaving the vehicle unattended, be sure to close the sunroof and carry the key.
- Do not try to operate the sunroof if it is frozen closed (after snowfall or during extreme cold).
- Do not sit on or place heavy luggage on the sunroof or roof opening edge.
- Do not apply any force that may cause damage to the sunroof.
- Release the switch when the sunroof has reached a completely open or completely closed position.
- If the sunroof does not operate when the sunroof switch is operated, release the switch and check whether something is trapped by the sunroof. If nothing is trapped, have the sunroof checked at an authorized Mitsubishi Motors dealer.
- Be careful when tilting up the sunroof if a ski carrier or a roof carrier is installed. Depending on the model of ski carrier or roof carrier, the sunroof may contact the carrier when the sunroof is tilted up.
- Be sure to close the sunroof completely when washing the vehicle or when leaving the vehicle.
- Do not put any wax on the weatherstrip (black rubber) around the sunroof opening. If it is waxed, the weatherstrip cannot maintain a weatherproof seal with the sunroof.
- After washing the vehicle or after rain be sure to wipe off any water that is on the sunroof before operating it.

NOTE

- Operating the sunroof repeatedly with the engine turned off will run down the battery. Operate the sunroof only while the engine is running.

Parking brake

N00511401400

5

To park the vehicle, first bring it to a complete stop, fully engage the parking brake, and then move the selector lever to the “P” (PARK) position.

To apply

- 1- Pull the lever up without pushing the button at the end of hand grip. When the parking brake is set and the ignition switch is in the “ON” position, the brake warning light in the instrument cluster will come on.

Before driving, be sure to release the parking brake.

To deactivate

- 1- Pull the lever up slightly.
- 2- Press and hold the button at the end of the hand grip.
- 3- Push the lever downward.

When parking on a hill, set the parking brake, and turn the front wheels toward the curb on a downhill, or away from the curb on an uphill.

⚠ CAUTION

- Before driving, be sure that the parking brake is fully released and brake warning light is off. If you drive without the parking brake fully released, the warning display will appear on the information screen in the multi-information display. If a vehicle is driven without releasing the parking brake, the brakes will be overheated, resulting in ineffective braking and possible brake failure.

Warning light

Warning display

Steering wheel height and reach adjustment

N00511501241

To adjust the steering wheel to the desired position, move the lever upward or downward while moving the steering wheel to the desired position.

- 1- Wheel lock
- 2- Release

AAA056596

⚠ WARNING

- After adjusting, make sure the lock lever is secured in the locked (1) position.
- Do not attempt to adjust the steering wheel while driving. This can be dangerous.

Inside rearview mirror

N00511601356

Adjust the inside rearview mirror only after making any seat adjustments so as to have a clear view to the rear of the vehicle.

AJ4100525

⚠ WARNING

- Do not attempt to adjust the inside rearview mirror while driving. This can be dangerous.
Be sure to adjust the mirrors before driving.

Adjust the inside mirror to maximize the view through the rear window.

To adjust the vertical mirror position

It is possible to move the mirror up and down to adjust its position.

AA0022369

To adjust the mirror position

It is possible to move the mirror up/down and left/right to adjust its position.

5

To reduce the glare

Type 1

The day/night knob (A) at the bottom of the mirror can be used to adjust the mirror to reduce the glare from the headlights of vehicles behind you during night driving.

- 1- Daytime position
- 2- Night position

Type 2

When the headlights of the vehicles behind you are very bright, the reflection factor of the rearview mirror is automatically changed to reduce the glare.

Normally, use the automatic mode. When the ignition switch is turned to the “ON” position or the operation mode is put in ON, the reflection factor of the mirror is automatically changed.

NOTE

- Do not hang items on, or spray glass cleaner on the sensor (1), as reduced sensitivity could result.

Type 3

When the headlights of the vehicles behind you are very bright, the reflection factor of the rearview mirror is automatically changed to reduce the glare.

Normally, use the automatic mode. When the ignition switch is turned to the “ON” position or the operation mode is put in ON, the green indicator (1) illuminates and the reflection factor of the mirror is automatically changed.

NOTE

- Do not hang items on, or spray glass cleaner on the sensors (2), as reduced sensitivity could result.

NOTE

- If you want to stop automatic mode, press the switch (3) and the indicator will go off. To return to automatic mode, press the switch again or perform the following operation. [Except for vehicles equipped with the Free-hand Advanced Security Transmitter (F.A.S.T.-key)] Turn the ignition switch to the “ON” position after turning to “OFF” or “ACC” position. [For vehicles equipped with the Free-hand Advanced Security Transmitter (F.A.S.T.-key)] Put the operation mode in ON after putting the operation mode in OFF.

Outside rearview mirrors

N00512201232

Adjust the outside rearview mirrors only after making any seat adjustments so as to have a clear view to the rear of the vehicle.

WARNING

- Do not attempt to adjust the outside rearview mirrors while driving. This can be dangerous. Be sure to adjust the mirrors before driving.

WARNING

- Your passenger’s side mirror is convex. The objects you see in the mirror will look smaller and farther away than they appear in a regular flat mirror. Do not use this mirror to estimate the distance of vehicles following you when changing lanes.

To adjust the mirror position

N00549101167

The outside rearview mirrors can be adjusted when the ignition switch is in the “ON” or “ACC” position or the operation mode is put in ON or ACC.

Move the lever (A) to the same side as the mirror you wish to adjust.

5

L- Left outside mirror adjustment
R- Right outside mirror adjustment

Press the switch (B) to adjust the mirror position.

- 1- Up
- 2- Down
- 3- Right

4- Left

NOTE

- After adjusting, return the lever to the “•”(OFF) position.

To retract the mirror

N00549201113

The outside mirror can be retracted towards the side window to prevent damage when parking in tight locations.

Except for vehicles equipped with the mirror retractor switch

Push the mirror towards the back of the vehicle with your hand to retract it in. When extending the mirror, pull it out towards the front of the vehicle until it clicks to lock in place.

For vehicles equipped with the mirror retractor switch

Retracting and extending the mirrors using the mirror retractor switch

With the ignition switch in the “ON” or “ACC” position or the operation mode in ON or ACC, push the mirror retractor switch to retract the mirrors. Push it again to extend the mirrors to their original positions.

After placing the ignition switch in the “LOCK” position or the operation mode in OFF, it is possible to retract and extend the mirrors using the mirror retractor switch for about 30 seconds.

⚠ CAUTION

- It is possible to retract and extend the mirrors by hand. After retracting a mirror using the mirror retractor switch, however, you should extend it by using the switch again, not by hand. If you extended the mirror by hand after retracting it using the switch, it would not properly lock in position. As a result, it could move because of the wind or vibration while you are driving, taking away your rearward visibility.

📖 NOTE

- Be careful not to get your hands trapped while a mirror is moving.
- If you move a mirror by hand or it moves after hitting a person or object, you may not be able to return it to its original position using the mirror retractor switch. If this happens, push the mirror retractor switch to place the mirror in its retracted position and then push the switch again to return the mirror to its original position.
- When freezing has occurred and mirrors fail to operate as intended, please refrain from repeated pushing of the retractor switch as this action can result in burn-out of the mirror motor circuits.

Retracting and extending the mirrors without using the mirror retractor switch (automatic extension function)

[Vehicles with the keyless entry system]

The mirrors automatically retract or extend when the doors are locked or unlocked using the remote control switches of the keyless entry system.

Refer to “Keyless entry system” on page 5-7.

[Vehicles with the Free-hand Advanced Security Transmitter (F.A.S.T-key)]

The mirrors automatically retract or extend when the doors are locked or unlocked using the remote control switches or the F.A.S.T-key.

Refer to “Keyless entry system” on page 5-29 or “To operate using the F.A.S.T.-key” on page 5-15.

📖 NOTE

- Functions can be modified as stated below. Please consult an authorized Mitsubishi Motors dealer.
On vehicles equipped with Mitsubishi Multi-Communication System, screen operations can be used to make the adjustment. Refer to the separate owner’s manual for details.

📖 NOTE

- Automatically extend when the ignition switch is turned to the “ON” position or the operation mode is put in ON with the driver’s door closed, and automatically retract when the ignition switch is turned to the “LOCK” position or the operation mode is put in OFF with the driver’s door opened.
- Automatically extend when the vehicle speed reaches approximately 19 mph (30 km/h).
- Deactivate the automatic extension function.

Door mirror heater (if so equipped)

N00549301260

When the rear window defogger switch is pressed with the engine running, the outside rearview mirrors are defogged or defrosted. Current will flow through the heater element inside the mirrors, thus clearing away frost or condensation.

The indicator light (A) will illuminate while the defogger is on.

The heater will be turned off automatically in about 15 to 20 minutes depending on the outside temperature.

Ignition switch

5

NOTE

- The door mirror heater can be turned on automatically.
For further information, please contact your authorized Mitsubishi Motors dealer.
On vehicles equipped with Mitsubishi Multi-Communication System, screen operations can be used to make the adjustment.
Refer to the separate owner's manual for details.

Ignition switch

N00512401696

[For vehicles equipped with the Free-hand Advanced Security Transmitter (F.A.S.T.-key).]

For information on operations for vehicles equipped with the Free-hand Advanced Security Transmitter (F.A.S.T.-key), refer to

“Free-hand Advanced Security Transmitter (F.A.S.T.-key): Engine switch” on page 5-18.

[Except for vehicles equipped with the Free-hand Advanced Security Transmitter (F.A.S.T.-key).]

LOCK (Type 2)

The engine is off and the steering wheel is locked. The key can be inserted and removed only when the switch is in this position.

OFF (Type 1)

The engine is off. The key can be inserted and removed only when the switch is in this position.

ACC

Allows operation of electrical accessories with the engine off.

ON

All accessories can be used.

START

Engages the starter. Release the key when the engine starts. It will automatically return to the “ON” position.

NOTE

- Your vehicle is equipped with an electronic immobilizer. To start the engine, the ID code which the transponder inside the key sends must match the one registered to the immobilizer computer. (Refer to “Electronic immobilizer” on page 5-4.)

ACC power auto-cutout function

N00539601071

After about 30 minutes has elapsed with the ignition switch in the “ACC” position, the

function automatically cuts out the power for the audio system and other electric devices that can be operated with that position.

When the ignition switch is turned from the “ACC” position, the power is supplied again to those devices.

NOTE

- It is possible to modify functions as follows:
 - The time until the power cuts out can be changed to about 60 minutes.
 - The ACC power auto-cutout function can be deactivated.

For details, we recommend you to consult an authorized Mitsubishi Motors dealer.

On vehicles equipped with Mitsubishi Multi-Communication System, screen operations can be used to make the adjustment.

Refer to the separate Mitsubishi Multi-Communications System manual for details.

NOTE

- The key cannot be removed unless the selector lever is set to the “P” (PARK) position, which allows the ignition switch to turn to the “OFF” position.

Type 2

When removing the key, first set the selector lever to the “P” (PARK) position, and push the key in at the “ACC” position and keep it depressed until it is turned to the “LOCK” position, and remove it.

NOTE

- The key cannot be removed unless the selector lever is set to the “P” (PARK) position, which allows the ignition switch to turn to the “LOCK” position.

CAUTION

- If the engine is stopped while driving, the power brake booster will stop functioning and greater effort for braking will be required. Also, the power steering system will not function and it will require greater effort to manually steer the vehicle.
- Do not leave the key in the “ON” position for a long time when the engine is not running. This will cause the battery to run down.
- Do not turn the key to the “START” position when the engine is running. It will damage the starter motor.

To remove the key

N00550901211

Type 1

When removing the key, first set the selector lever to the “P” (PARK) position, and then turn the key to the “OFF” position and remove it.

Steering wheel lock (if so equipped)

N00512501222

[For vehicles equipped with the Free-hand Advanced Security Transmitter (F.A.S.T.-key).]

For information on operations for vehicles equipped with the Free-hand Advanced Security Transmitter (F.A.S.T.-key), refer to “Free-hand Advanced Security Transmitter (F.A.S.T.-key): Steering wheel lock” on page5-23

[Except for vehicles equipped with the Free-hand Advanced Security Transmitter (F.A.S.T.-key).] (Vehicles with steering lock system)

AA0110842

To lock

Remove the key at the “LOCK” position.
Turn the steering wheel until it is locked.

To unlock

Turn the key to the “ACC” position while moving the steering wheel slightly.

CAUTION

- Remove the key when leaving the vehicle.

NOTE

- If the front wheels are turned, the anti-theft lock may sometimes make it difficult to turn the key from “LOCK” to “ACC”. Firmly turn the steering wheel to the left or to the right as you turn the key.

Starting the engine

N00512601803

[For vehicles equipped with the Free-hand Advanced Security Transmitter (F.A.S.T.-key).]

For information on operation for vehicles equipped with the Free-hand Advanced Security Transmitter (F.A.S.T.-key), refer to

“Free-hand Advanced Security Transmitter (F.A.S.T.-key): Starting” on page5-12.

[Except for vehicles equipped with the Free-hand Advanced Security Transmitter (F.A.S.T.-key).]

Tips for starting

- Do not operate the starter motor continuously for longer than 15 seconds as this could run the battery down or damage the starter motor. If the engine does not start, turn the ignition switch back to the “OFF” or “LOCK” position, wait a few seconds, and then try again. Trying repeatedly with the engine or starter motor still turning will damage the starter mechanism.
- If the engine will not start because the battery is weak or discharged, refer to “Jump-starting the engine” (on page 8-2) for instructions.
- A longer warm up period will only consume extra fuel. The engine is warmed up enough for driving when the bar graph of engine coolant temperature display starts to move or the low coolant temperature indicator goes out. Refer to “Engine coolant temperature display” on page 5-134 or “Low coolant temperature indicator” on page 5-172.

⚠ WARNING

- Never run the engine in a closed or poorly ventilated area any longer than is needed to move your vehicle out of the area. Carbon monoxide gas, which is odorless and extremely poisonous, could build up and cause serious injury or death.

⚠ CAUTION

- Do not push-start the vehicle.
- Do not run the engine at high rpms or drive at high speeds until the engine has had a chance to warm up.
- Release the ignition switch as soon as the engine starts. Otherwise, the starter motor will be damaged

Starting the engine

This model is equipped with an electronically controlled fuel injection system. This is a system that automatically controls fuel injection. There is usually no need to depress the accelerator pedal when starting the engine.

The starter should not be run for more than 15 seconds at a time.

To prevent battery drain, wait a few seconds between attempts to restart the engine.

1. Make sure all occupants are properly seated with seat belts fastened.

2. Insert the ignition key.
3. Press and hold the brake pedal down with your right foot.
4. Make sure the selector lever is in the “P” (PARK) position.
5. Turn the ignition switch to the “ON” position and make certain that all warning lights are functioning properly before starting the engine.
6. Turn the ignition switch to the “START” position without pressing the accelerator pedal. Release the ignition switch when the engine starts.

📖 NOTE

- Minor noises may be heard on engine start-up. These will disappear as the engine warms up.

When the engine is hard to start

After several attempts, you may experience that the engine still does not start.

1. Make sure that all electric devices, such as lights, air conditioning blower and rear window defogger, are turned off.

2. While depressing the brake pedal, press the accelerator pedal halfway and hold it there, then crank the engine. Release the accelerator pedal, immediately after the engine starts.
3. If the engine still will not start, the engine could be flooded with too much gasoline. While depressing the brake pedal, push the accelerator pedal all the way down and hold it there, then crank the engine for 5 to 6 seconds. Return the ignition switch to the “OFF” or “LOCK” position and release the accelerator pedal. Wait a few seconds, and then crank the engine again for 5 to 6 seconds while depressing the brake pedal, but do not push the accelerator pedal. Release the ignition key if the engine starts. If the engine fails to start, repeat these procedures. If the engine still will not start, contact your local Mitsubishi Motors dealer or a repair facility of your choice for assistance.

Startability of automatic transaxle vehicle and CVT vehicle with ambient temperature of -22 °F (-30 °C) or lower

When the ambient temperature is -22 °F (-30 °C) or lower, it may not be possible to start from a standstill even with the selector lever

Automatic transaxle (if so equipped)

in the “D” (DRIVE) or “R” (REVERSE) position.

This occurs because the transaxle has not warmed up sufficiently; it does not indicate a problem. If this occurs, place the selector lever in the “P” (PARK) position and let the engine idle for at least 10 minutes.

The transaxle will warm up, and you will be able to start normally.

Do not leave the vehicle during warm-up operation.

Using the MIVEC engine

The MIVEC engine automatically switches its intake-valve control between a low-speed mode and a high-speed mode in accordance with driving conditions for maximum engine performance.

NOTE

- To protect the engine, the high-speed mode may not be selected while the engine coolant temperature is low. In such a case, the engine revolutions do not rise to over 5,000 rpm even if the accelerator pedal is depressed.

Automatic transaxle (if so equipped)

N00513200216

Automatic transaxle will automatically change its gear depending on road and driving conditions. This helps achieve smooth driving and excellent fuel efficiency.

Also you can manually shift up and shift down the transaxle. Refer to “Sports mode” on page 5-68.

DRIVING UPHILL

The transaxle prevents unnecessary upshifts even when the accelerator pedal is released and ensures smooth driving.

DRIVING DOWNHILL

According to the conditions, the transaxle will automatically shift to a lower gear to achieve stronger engine braking. This may help reduce your need to use the service brake.

NOTE

- During the break-in period or immediately after reconnecting the battery, your vehicle may not shift smoothly. This does not indicate a problem in the transaxle. Shifting will become smoother once the transaxle has been shifted several times by the electronic control system.

Selector lever operation

N00513801408

As an additional safety precaution, models equipped with an automatic transaxle have a shift-lock device that holds the selector lever in the “P” (PARK) position. To move the selector lever from the “P” (PARK) position to another position, follow the steps below.

1. Press and hold the brake pedal down.
2. Move the selector lever to the desired position.

NOTE

- The selector lever cannot be moved from “P” (PARK) to another position if the operation mode is put in OFF or ACC, or if the brake pedal is not pressed and held down.

The transaxle has 6 forward gears and 1 reverse gear.

The individual gears are selected automatically, depending on the position of the gear selector lever, the speed of the vehicle and the position of the accelerator pedal.

⚠ WARNING

- Always press the brake pedal when shifting the selector lever into a gear from the “N” (NEUTRAL) position. When beginning to drive, do not shift the selector lever from the “N” (NEUTRAL) position while pressing the accelerator pedal. This will cause the vehicle to “jump” forward or backward.

📖 NOTE

- To prevent mistakes in operating the lever, make sure you stop briefly at each position. After operating, check the position in the multi-information display.
- If the brake pedal is not depressed and held, the shift-lock device activates to prevent the selector lever from being moved from the “P” (PARK) position.
- For a shift indicated by  in the illustration, depress the brake pedal before moving the selector lever. If you attempt to move the selector lever before depressing the brake pedal, the selector lever may become immovable.

When the selector lever cannot be shifted from the “P” (PARK) position

N00563101044

When the selector lever cannot be shifted from the “P” (PARK) position to another position while the brake pedal is pressed and held down with the operation mode in ON, the battery may be flat or the shift-lock mechanism may be malfunctioning.

Immediately have your vehicle checked by an authorized Mitsubishi Motors dealer or a repair facility of your choice.

If you need to move the vehicle, shift the selector lever as follows.

1. Make sure the parking brake is fully applied.
2. Stop the engine if it is running.
3. Insert a screwdriver with a cloth over its tip into the notch (A) of the cover. Pry gently as shown to remove the cover.

5

4. Depress the brake pedal with the right foot.
5. Insert a screwdriver in the shift-lock release hole (B). Shift the selector lever to the “N” (NEUTRAL) position while pressing the screwdriver down.

Selector lever position display

N00513901441

When the operation mode is put in ON, the selector lever position is shown on the multi-information display.

Warning display

N00514001289

[For vehicles equipped mono-color liquid crystal display meter]

When the selector lever position indicator blinks

When the selector lever position indicator blinks while you are driving, there could be a malfunction in the automatic transmission

system or A/T fluid temperature becomes abnormally high.

NOTE

- The “A” indicator on the selector lever position display will only blink if there is a problem with the A/T position switch. It is not seen during normal driving.

⚠ CAUTION

- If a malfunction occurs in the A/T while driving, the indicator will blink.

In this case, immediately park your vehicle in a safe place and follow these procedures:

[If the indicator blinks rapidly (once per second), the A/T fluid is overheating.]

Park your vehicle in a safe place but do not turn off the engine. Move the selector lever to the “P” (PARK) position and open the bonnet. Keep the engine, idling.

After a while, move the selector lever into any position other than “P” (PARK) position and confirm that the indicator stops blinking. It is safe to continue driving if the indicator no longer blinks.

If the indicator continues blinking or blinks intermittently, have your vehicle inspected by an authorized Mitsubishi Motors dealer.

[If the indicator blinks slowly (once per 2 seconds), the A/T safety device may be operating due to a malfunction.]

Have the vehicle inspected by an authorized Mitsubishi Motors dealer as soon as possible.

[For vehicles equipped with color liquid crystal display meter]

OR

When the  warning display or the  warning display appears on the information screen

in the multi-information display while you are driving, there could be a malfunction in the automatic transaxle.

⚠ CAUTION

- If a malfunction occurs in the automatic transaxle while driving, the  warning display or the  warning display will appear on the information screen in the multi-information display. In this case, immediately park your vehicle in a safe place and follow these procedures:

When  warning display is showing

The automatic transaxle fluid is overheating. Stop your vehicle in a safe place, put the selector lever in the “P” position, and open the engine hood with the engine running to allow the engine to cool down. After a while,

confirm that the  warning display is no longer showing. It is safe to continue driving if the display is no longer showing. If the warning display remains or flashes frequently, have your vehicle inspected by an authorized Mitsubishi Motors dealer or a repair facility of your choice.

When  warning display is showing

It may be that there is something unusual happening in the automatic transaxle, causing a safety device to activate. Have your vehicle inspected by an authorized Mitsubishi Motors dealer or a repair facility of your choice as soon as possible.

Selector lever positions

N00514201395

“P” PARK

This position locks the transaxle to prevent the vehicle from moving. The engine can be started from the “P” (PARK) position.

“R” REVERSE

Move the lever to this position only after the vehicle has come to a complete stop.

CAUTION

- Never shift into the “P” (PARK) or “R” (REVERSE) position while the vehicle is in motion. If the lever is shifted into the “P” (PARK) or “R” (REVERSE) position while the vehicle is in motion, the transaxle may be damaged.

“N” NEUTRAL

At this position, the transaxle is disengaged. It is the same as the neutral position on a manual transaxle and should be used when the vehicle is not moving for an extended length of time during driving, such as in a traffic jam.

WARNING

- Never move the selector lever to the “N” (NEUTRAL) position while driving since you could accidentally slip it into the “P” (PARK) or “R” (REVERSE) position, damaging the transaxle.
- To prevent the vehicle from rolling when stopped on a slope, the engine should be started in the “P” (PARK) position, not in “N” (NEUTRAL) position.
- To prevent rolling, always keep your foot on the brake pedal when the vehicle is in “N” (NEUTRAL) position, or when shifting into or out of “N” (NEUTRAL) position.

“D” DRIVE

This position is used for most city and highway driving. The transaxle will automatically change its gear depending on road and driving conditions.

CAUTION

- To prevent transaxle damage, never shift into the “D” (DRIVE) position from the “R” (REVERSE) position while the vehicle is in motion.

“L” LOW

This position is for driving up very steep hills and for engine braking at low speeds when driving down steep hills.

WARNING

- this position can be used for maximum engine braking. Be very careful not to shift into “L” (LOW) suddenly. Sudden engine braking may cause the tires to skid. Select this position according to the road conditions and vehicle speed.

Sports mode

N00514401456

While the vehicle is stopped or being driven with the selector lever in the “D” (DRIVE) or “L” (LOW) position, sports mode can be selected by pulling one of the sportronic steering wheel paddle shifter towards you.

In sports mode, rapid shifting is possible simply by operating the sportronic steering wheel paddle shifter.

Unlike the manual transaxle, sports mode allows shifting with the accelerator pedal depressed.

+ (SHIFT UP)

The transaxle shifts up by one gear with each operation.

– (SHIFT DOWN)

The transaxle shifts down by one gear with each operation.

To return to “D” (DRIVE) or “L” (LOW) operation, pull the sportronic steering wheel paddle shifter on the + (SHIFT UP) side for longer than 2 seconds.

When returning to “D” (DRIVE) or “L” (LOW) operation, the selector lever position display will change to “D” (DRIVE) or “L” (LOW) position.

⚠ CAUTION

- In sports mode, the driver must execute upward shifts in accordance with prevailing road conditions, taking care to keep the engine speed below the red zone.
- Repeated continuous operation of the sportronic steering wheel paddle shifter will continuously switch shift position.
- Gears may not change when the lateral paddle shifters are operated at the same time.

📖 NOTE

- Gears can only be selected in a forward direction from 1st gear to 6th gear. To reverse or park the vehicle, move the selector lever to the “R” or “P” position.
- To maintain good running performance, the transaxle may refuse to perform an upshift when the selector lever is moved to the “+(SHIFT UP)” position at certain vehicle speeds. Also, to prevent over-revving of the engine, the transaxle may refuse to perform a downshift when the lever is moved to the “–(SHIFT DOWN)” position at certain vehicle speeds. When this happens, a buzzer sounds to indicate that a downshift is not going to take place.
- Downward shifts are made automatically when the vehicle slows down. Before the vehicle stops, 1st gear is automatically selected.

📖 NOTE

- When the selector lever is in the “D” (DRIVE) position and sports mode is selected, the vehicle will automatically return to “D” (DRIVE) operation if the vehicle is stopped.
- When the selector lever is in the “L” (LOW) position and sports mode is selected, the vehicle will stay in sports mode and not return to “L” (LOW) operation even if the vehicle is stopped.
- The upward shift may be made automatically in sports mode when the engine revolutions rise and approach the tachometer’s red zone (the red-coloured part of the tachometer dial).
- When pulling away from a standstill on a slippery road, pull the sportronic steering wheel paddle shifter on the + (SHIFT UP) side to select 2nd gear. Pull the sportronic steering wheel paddle shifter on the – (SHIFT DOWN) side to shift back to 1st gear.
- When the sportronic steering wheel paddle shifter is operated with the selector lever in the “L” (LOW) position, gear is not shifted because the selectable shift range is limited.

Sports mode display

N00538801180

In sports mode, the currently selected gear is displayed on the information screen in the multi-information display.

NOTE

- While driving in sports mode, the sports mode display may change to show “D” and shifting in sports mode may no longer be possible. This indicates that controls to drive in the “D” position are operating normally in order to lower the temperature of the automatic transaxle fluid; it does not indicate a malfunction. Once the temperature of the automatic transaxle fluid drops, shifting in the sports mode will be possible again.

Operation of the automatic transaxle

N00514501369

CAUTION

- Before selecting a gear with the engine running and the vehicle stationary, firmly depress the brake pedal to prevent the vehicle from creeping.

The vehicle will begin to move as soon as the gear is engaged, especially when the engine speed or idle speed is high, or with the air conditioning operating.

Do not release the brake pedal until you are ready to drive away.

- Depress the brake pedal with the right foot at all times. Using the left foot could cause driver movement delay in case of an emergency.
- To prevent sudden acceleration, never run the engine at high rpms when shifting from the “P” (PARK) or “N” (NEUTRAL).
- Operating the accelerator pedal while the other foot is resting on the brake pedal will affect braking efficiency and may cause premature wear of brake pads.

CAUTION

- Use the selector lever in the correct shift position in accordance with driving conditions.

Never coast downhill backward in the driving shift position {“D” (DRIVE), “L” (LOW) position or sports mode} or coast forward in the “R” (REVERSE) position.

Engine stopping and increased brake pedal and steering effort could lead to an accident.

- Do not rev the engine with the brake pedal pressed when the vehicle is stationary.

This can damage the transaxle.

Also, when you depress the accelerator pedal while holding down the brake pedal with the selector lever in the “D” (DRIVE) position, the engine revolutions may not rise as high as when performing the same operation with the selector lever in the “N” (NEUTRAL) position.

Passing acceleration

To gain extra acceleration in “D” (DRIVE) position (when passing another vehicle) push the accelerator to the floor. The automatic transaxle will automatically downshift.

NOTE

- In sports mode, downshifts do not take place when the accelerator is depressed all the way to the floor.

Waiting

For short waiting periods, such as at traffic lights, the vehicle can be left in gear and held stationary with the service brake.

For longer waiting periods with the engine running, place the selector lever in the “N” (NEUTRAL) position and apply the parking brake, while holding the vehicle stationary with the service brake.

Prior to moving off after having stopped the vehicle, make sure that the selector lever is in “D” (DRIVE) position or Sports mode position.

CAUTION

- To avoid transaxle overheating, never try to keep your vehicle stationary on a hill by using the accelerator pedal. Always apply the parking brake and/or service brake.
- Do not rev the engine unnecessarily while the vehicle is stationary. Unexpected acceleration may occur if the selector lever is in a position other than “P” (PARK) or “N” (NEUTRAL).

Parking

To park the vehicle, first bring it to a complete stop, fully engage the parking brake,

and then move the selector lever to the “P” (PARK) position.

When the automatic transaxle makes no gear change

If the transaxle does not change gears while driving, or your vehicle does not pick up enough speed when starting on an uphill slope, it may be that there is something unusual happening in the transaxle, causing a safety device to activate. Have your vehicle checked at an authorized Mitsubishi Motors dealer or a repair facility of your choice as soon as possible.

NOTE

- When the  warning display and “SLOW DOWN” or the  warning display and “SERVICE REQUIRED” appear on the information screen in the multi-information display, there could be a malfunction in the automatic transaxle. Refer to “Automatic transaxle: Warning display” on page 5-66.

Continuously variable transmission (CVT) (if so equipped)

N00560201060

5

The CVT will automatically and continuously change its gear ratio depending on road and driving conditions. This helps achieve smooth driving and excellent fuel efficiency. If your vehicle is equipped with the sportronic steering wheel paddle shifter, you can manually shift up and shift down the transmission. Refer to “Sports mode” on page 5-76.

DRIVING UPHILL

The transmission prevents unnecessary upshifts even when the accelerator pedal is released and ensures smooth driving.

DRIVING DOWNHILL

According to the conditions, the transmission will automatically shift to a lower gear ratio to achieve stronger engine braking. This may help reduce your need to use the service brake.

Selector lever operation

N00560301074

As an additional safety precaution, models equipped with a continuously variable transmission have a shift-lock device that holds the selector lever in the “P” (PARK) position. To move the selector lever from the “P” (PARK) position to another position, follow the steps below.

1. Press and hold the brake pedal down.
2. Move the selector lever to the desired position.

NOTE

- The selector lever cannot be moved from “P” (PARK) to another position if the ignition switch is set to the “OFF” or “LOCK” or “ACC” position, or if the key has been removed, or the operation mode is put in OFF or ACC, or if the brake pedal is not pressed and held down.

The CVT selects an optimum ratio automatically when the selector lever is in the “D” (DRIVE) position, depending on the speed of the vehicle and the position of the accelerator pedal.

Except for vehicles equipped with sportronic steering wheel paddle shifter

For vehicles equipped with sportronic steering wheel paddle shifter

Set the selector lever in the gate to operate.

WARNING

- Always press the brake pedal when shifting the selector lever into a selector position from the “N” (NEUTRAL) position. When beginning to drive, do not shift the selector lever from the “N” (NEUTRAL) position while pressing the accelerator pedal. This will cause the vehicle to “jump” forward or backward.

NOTE

- To prevent mistakes in operating the lever, make sure you stop briefly at each position. After operating, check the position in the multi-information display.
- If the brake pedal is not depressed and held, the shift-lock device activates to prevent the selector lever from being moved from the “P” (PARK) position.
- For a shift indicated by  in the illustration, depress the brake pedal before moving the selector lever. If you attempt to move the selector lever before depressing the brake pedal, the selector lever may be immovable.

Set the selector lever in the gate to operate while the brake pedal is depressed.

When the selector lever cannot be shifted from the “P” (PARK) position

N00563301059

When the selector lever cannot be shifted from the “P” (PARK) position while the brake pedal is pressed and held down with the ignition switch at the “ON” position or the operation mode in ON, the battery may be flat or the shift-lock mechanism may be malfunctioning.

Immediately have your vehicle checked by an authorized Mitsubishi Motors dealer or a repair facility of your choice.

If you need to move the vehicle, shift the selector lever as follows.

1. Make sure the parking brake is fully applied.
2. Stop the engine if it is running.
3. Insert a screwdriver with a cloth over its tip into the notch (A) of the cover. Pry gently as shown to remove the cover.

4. Depress the brake pedal with the right foot.

5. Insert a screwdriver in the shift-lock release hole (B). Shift the selector lever to the “N” (NEUTRAL) position while pressing the screwdriver down.

Selector lever position display

N00560401088

When the ignition switch is turned to the “ON” position or the operation mode is put in ON, the selector lever position is shown on the multi-information display.

When the selector lever position display blinks

N00582900031

⚠ WARNING

- To avoid unintended vehicle movement, keep brake pedal applied with your right foot and do not depress the accelerator pedal, while the selector lever position display is blinking.

Continuously variable transmission (CVT) (if so equipped)

If the ambient temperature is low, the selector lever position display on the multi information display may blink when the selector lever is placed in the “D” (DRIVE), “Ds” (DOWNSHIFT & SPORTY DRIVING), “L” (LOW) or “R” (REVERSE) position immediately after the engine has been started. This indicates that the transmission requires warming up. While the display is blinking, the vehicle will not move, because the transmission keeps disengaging until the warm up is completed even if the selector lever is placed in the “D”, “Ds”, “L” or “R” position.

When the selector lever position display is blinking, perform the following procedure:

1. Depress the brake pedal with your right foot and place the selector lever in the “N” (NEUTRAL) position for several seconds.
2. Keep depressing the brake pedal and then place the selector lever in the “D” (DRIVE), “Ds” (DOWNSHIFT & SPORTY DRIVING), “L” (LOW) or “R” (REVERSE) position. If the selector lever position display stops blinking, the warm up is completed and the transmission will function normally.
3. If the display is still blinking, repeat steps 1 and 2 above.

NOTE

- While the selector lever position display is blinking, a buzzer will sound intermittently.

Warning display

N00560501076

[For vehicles equipped mono-color liquid crystal display meter]

When the selector lever position indicator blinks

When the selector lever position indicator blinks while you are driving, there could be a malfunction in the automatic transmission system or CVT fluid temperature becomes abnormally high.

NOTE

- The “A” indicator on the selector lever position display will only blink if there is a problem with the CVT position switch. It is not seen during normal driving.

CAUTION

- If a malfunction occurs in the CVT while driving, the indicator will blink. In this case, immediately park your vehicle in a safe place and follow these procedures: [If the indicator blinks rapidly (once per second), the CVT fluid is overheating.] Park your vehicle in a safe place but do not turn off the engine. Move the selector lever to the “P” (PARK) position and open the bonnet. Keep the engine, idling. After a while, move the selector lever into any position other than “P” (PARK) position and confirm that the indicator stops blinking. It is safe to continue driving if the indicator no longer blinks. If the indicator continues blinking or blinks intermittently, have your vehicle inspected by an authorized Mitsubishi Motors dealer. [If the indicator blinks slowly (once per 2 seconds), the CVT safety device may be operating due to a malfunction.] Have the vehicle inspected by an authorized Mitsubishi Motors dealer as soon as possible.

[For vehicles equipped with color liquid crystal display meter]

OR

When the warning display or the warning display appears on the information screen in the multi-information display while you are driving, there could be a malfunction in the CVT.

CAUTION

- If a malfunction occurs in the CVT while driving, the warning display or the warning display will appear on the information screen in the multi-information display. In this case, follow these procedures:

[When warning display is showing]

The continuously variable transmission (CVT) fluid is overheating. The engine control may activate to lower the CVT fluid temperature, causing the engine revolutions and vehicle speed to decrease. In this case, take one of the following procedures.

- Slow down your vehicle.
- Stop your vehicle in a safe place, put the selector lever in the “P” (PARK) position, and open the engine hood with the engine running to allow the engine to cool down.

CAUTION

After a while, confirm that the warning display is no longer showing. It is safe to continue driving if the display is no longer showing. If the warning display remains or flashes frequently, have your vehicle inspected by an authorized Mitsubishi Motors dealer or a repair facility of your choice.

[When warning display is showing]

It may be that there is something unusual happening in the CVT, causing a safety device to activate. Have your vehicle inspected by an authorized Mitsubishi Motors dealer or a repair facility of your choice as soon as possible.

Selector lever positions

N00560601080

“P” PARK

This position locks the transmission to prevent the vehicle from moving. The engine can be started from the “P” (PARK) position.

“R” REVERSE

Move the lever to this position only after the vehicle has come to a complete stop.

CAUTION

- Never shift into the “P” (PARK) or “R” (REVERSE) position while the vehicle is in motion. If the lever is shifted into the “P” (PARK) or “R” (REVERSE) position while the vehicle is in motion, the transmission may be damaged.

“N” NEUTRAL

At this position, the transmission is disengaged. It is the same as the neutral position on a manual transaxle and should be used when the vehicle is not moving for an extended length of time during driving, such as in a traffic jam.

WARNING

- Never move the selector lever to the “N” (NEUTRAL) position while driving since you could accidentally slip it into the “P” (PARK) or “R” (REVERSE) position, damaging the transmission.
- To prevent the vehicle from rolling when stopped on a slope, the engine should be started in the “P” (PARK) position, not in “N” (NEUTRAL) position.

⚠ WARNING

- To prevent rolling, always keep your foot on the brake pedal when the vehicle is in “N” (NEUTRAL) position, or when shifting into or out of “N” (NEUTRAL) position.

5

“D” DRIVE

This position is used for most city and highway driving. The transmission will automatically and continuously change its gear ratio depending on road and driving conditions.

⚠ CAUTION

- To prevent transmission damage, never shift into the “D” (DRIVE) position from the “R” (REVERSE) position while the vehicle is in motion.

“Ds” DOWNSHIFT & SPORTY DRIVING (except for vehicles equipped with sportronic steering wheel paddle shifter)

Use when engine braking is needed, or for high-power sport drive.

“L” LOW

This position is for driving up very steep hills and for engine braking at low speeds when driving down steep hills.

⚠ WARNING

- This position can be used for maximum engine braking. Be very careful not to shift into “L” (LOW) suddenly. Sudden engine braking may cause the tires to skid. Select this position according to the road conditions and vehicle speed.

Sports mode (for vehicles equipped with sportronic steering wheel paddle shifter)

N00560701081

While the vehicle is stopped or being driven with the selector lever in the “D” (DRIVE), sports mode can be selected by pulling one of the sportronic steering wheel paddle shifter towards you.

In sports mode, rapid shifting is possible simply by operating the sportronic steering wheel paddle shifter.

Unlike the manual transaxle, sports mode allows shifting with the accelerator pedal depressed.

+ (SHIFT UP)

Transmission shifts up once by each operation.

– (SHIFT DOWN)

Transmission shifts down once by each operation.

To return to “D” (DRIVE) operation, pull the sportronic steering wheel paddle shifter on the + (SHIFT UP) side for longer than 2 seconds.

When returning to “D” (DRIVE) operation, the selector lever position display will change to “D” (DRIVE) position.

⚠ CAUTION

- Upward shifts do not take place automatically in sports mode. The driver must make upward shifts in accordance with prevailing road conditions, making sure the engine rpm remains below the red zone on the tachometer.
- Repeated continuous operation of the sportronic steering wheel paddle shifter will continuously switch shift position.
- Shift ranges may not change when the lateral paddle shifters are operated at the same time.

📖 NOTE

- Shift ranges can only be selected in a forward direction from 1st to 6th. To reverse or park the vehicle, move the selector lever to the “R” or “P” position.

📖 NOTE

- To maintain good running performance, the transmission may refuse to perform an upshift when the sportronic steering wheel paddle shifter is moved to the “+(SHIFT UP)” position at certain vehicle speeds. Also, to prevent over-revving of the engine, the transmission may refuse to perform a downshift when the sportronic steering wheel paddle shifter is moved to the “-(SHIFT DOWN)” position at certain vehicle speeds. When this happens, a buzzer sounds to indicate that a downshift is not going to take place.
- Downward shifts are made automatically when the vehicle slows down. Before the vehicle stops, 1st gear is automatically selected. Also, the vehicle will automatically return to “D” (DRIVE) operation if the vehicle is stopped.
- When the selector lever is in the “L” (LOW) position, the sport mode is not selected even if you operate the sportronic steering wheel paddle shifter.

Sports mode display

N00560901067

In sports mode, the currently selected shift range is displayed on the information screen in the multi-information display.

5

Operation of the CVT

N00560801053

⚠ CAUTION

- Before selecting a position with the engine running and the vehicle stationary, firmly depress the brake pedal to prevent the vehicle from creeping. The vehicle will begin to move as soon as the CVT is engaged, especially when the engine speed or idle speed is high, or with the air conditioning operating. Do not release the brake pedal until you are ready to drive away.
- Depress the brake pedal with the right foot at all times. Using the left foot could cause driver movement delay in case of an emergency.
- To prevent sudden acceleration, never run the engine at high rpms when shifting from the “P” (PARK) or “N” (NEUTRAL).

CAUTION

- Operating the accelerator pedal while the other foot is resting on the brake pedal will affect braking efficiency and may cause premature wear of brake pads.

- Use the selector lever in the correct shift position in accordance with driving conditions.

Never coast downhill backward in the driving shift position {"D" (DRIVE), "DS" (DOWN SHIFT & SPORTY DRIVING), "L" (LOW) position or sports mode} or coast forward in the "R" (REVERSE) position.

Engine stopping and increased brake pedal and steering effort could lead to an accident.

- Do not rev the engine with the brake pedal pressed when the vehicle is stationary.

This can damage the CVT.

Also, when you depress the accelerator pedal while holding down the brake pedal with the selector lever in the "D" (DRIVE) position, the engine revolutions may not rise as high as when performing the same operation with the selector lever in the "N" (NEUTRAL) position.

Passing acceleration

To gain extra acceleration in "D" (DRIVE) position (when passing another vehicle) push the accelerator to the floor. The CVT will automatically downshift.

NOTE

- In sports mode, downshifts do not take place when the accelerator is depressed all the way to the floor.

Waiting

For short waiting periods, such as at traffic lights, the vehicle can be left in selector lever position and held stationary with the service brake.

For longer waiting periods with the engine running, place the selector lever in the "N" (NEUTRAL) position and apply the parking brake, while holding the vehicle stationary with the service brake.

Prior to moving off after having stopped the vehicle, make sure that the selector lever is in "D" (DRIVE) position or Sports mode position.

CAUTION

- To avoid transmission overheating, never try to keep your vehicle stationary on a hill by using the accelerator pedal. Always apply the parking brake and/or service brake.
- Do not rev the engine unnecessarily while the vehicle is stationary. Unexpected acceleration may occur if the selector lever is in a position other than "P" (PARK) or "N" (NEUTRAL).

Parking

To park the vehicle, first bring it to a complete stop, fully engage the parking brake, and then move the selector lever to the "P" (PARK) position.

When the CVT makes no speed change

If the CVT does not shift while driving, or your vehicle does not pick up enough speed when starting on an uphill slope, it may be that there is something unusual happening in the transmission, causing a safety device to activate. Have your vehicle checked at an authorized Mitsubishi Motors dealer or a repair facility of your choice as soon as possible.

 **NOTE**

- [For vehicles equipped with mono-color liquid crystal display meter]
When the selector lever position indicator blinks while you are driving, there could be a malfunction in the automatic transmission system or CVT fluid temperature becomes abnormally high.
[For vehicles equipped with color liquid crystal display meter]
When the  warning display and “SLOW DOWN” or the  warning display and “SERVICE REQUIRED” appear on the information screen in the multi-information display, there could be a malfunction in the CVT. Refer to “Continuously variable transmission (CVT): Warning display” on page 5-74.

Electronically controlled 4WD system (if so equipped)

N00548301032

The electronically controlled 4WD system helps improve acceleration and vehicle stability by controlling the front-rear distribution of driving torque using the electronic control coupling in the rear differential assembly.

 **NOTE**

- If the parking brake lever is pulled up while the vehicle is moving, the front-rear distribution of driving torque control will turn OFF which will allow the rear wheels to lock easier.

Drive mode

Select the drive mode from the following 3 types to suit the driving conditions.

Drive mode	Function
4WD ECO	This is most fuel efficient mode Normal operation is 2WD, but 4WD will engage in the event of wheel slip.
4WD AUTO	All driving is in 4WD and the distribution of traction torque to each wheel is automatically controlled depending on the driving conditions.

Drive mode	Function
4WD LOCK	This mode is for driving in slippery conditions, such as snow covered roads or on sand. Large traction torque is distributed to the rear wheels to assist in getting out of slippery areas.

4-wheel drive operation requires special driving skills.
Carefully read the “4-wheel drive operation” section on page 5-85 and take care to drive safely.

Drive mode-selector

N00548401020

The drive mode can be switched by pressing the drive mode switch while the ignition is in the “ON” position or the operation mode in ON.

5

If you press the switch, you can change the drive mode in the order of 4WD ECO, 4WD AUTO, 4WD LOCK, 4WD ECO.

⚠ CAUTION

- Do not operate the drive mode-selector with the front wheels spinning on a snowy road or in similar conditions. The vehicle could lunge in an unexpected direction.
- Driving on dry, paved roads in “4WD LOCK” mode causes increased fuel consumption and noise.

📖 NOTE

- The drive mode can be switched while driving or stopped.

Drive mode indicator

N00549401030

Normally the indicator illuminates when the operation mode put in ON, and then the drive mode is displayed a few seconds after the engine is started.

The status of each drive mode display is as follows.

Drive Mode	Drive mode indicator	
	color liquid crystal display meter	mono-color liquid crystal display meter
4WD ECO	4WD ECO	4WD-E
4WD AUTO	4WD AUTO	—
4WD LOCK	4WD LOCK	LOCK

On vehicles with color liquid crystal display meter, the drive mode is displayed as an interrupt display on the information screen in the multi information display when the drive mode is switched.

After a few seconds, the information screen returns from the drive mode display to the previous screen.

Drive mode	Display
4WD ECO	
4WD AUTO	
4WD LOCK	

CAUTION

- If the selected drive mode indicator begins blinking, the drive mode will automatically switch to protect the drive-system components. A warning will also be displayed in the information screen in the multi information display.

Warning display (color liquid crystal display)

Reduce speed and, if the indicator stops blinking, you may resume normal driving. For vehicles equipped with mono-color liquid crystal display meter, drive mode indicator (“4WD-E”, “LOCK”) is blinking alternately

CAUTION

- If the drive mode indicator (4WD) is blinking, a problem has occurred with the electronically controlled 4WD. A warning will also be displayed in the information screen in the multi information display.

Warning display (color liquid crystal display)

Have your vehicle inspected by an authorized Mitsubishi Motors dealer.

For vehicles equipped with mono-color liquid crystal display meter, drive mode indicator (“4WD-E”, “LOCK”) is blinking at the same time.

- Make sure that all four tires are the same specified size, type, and brand, and have no significant difference in the amount of wear. Otherwise, the electronically controlled 4WD system may not work properly, and the 4WD system warning (overheating or service required) may be displayed.

When the ECO mode switch is ON

N00576600020

While the drive mode is in the “4WD AUTO” position, if the ECO mode switch is switched

ON, the drive mode will be changed to “4WD ECO” mode.

If the ECO mode switch is switched OFF, the drive mode will be returned to “4WD AUTO” mode.

Refer to the “ECO mode switch” on page 5-184.

NOTE

- If the drive mode is switched in any mode after the drive mode is switched in “4WD ECO”, the drive mode will not be changed even if the ECO mode switch is switched OFF.

S-AWC (Super-All Wheel Control) (if so equipped)

N00541301062

S-AWC is an integrated vehicle dynamics control system that helps enhance driving performance, cornering performance, and vehicle stability over a wide range of driving conditions through integrated management of the electronically controlled 4WD, the AYC (Active Yaw Control), the ABS and the ASC.

⚠ CAUTION

- Do not over-rely on the S-AWC. Even the S-AWC cannot prevent the natural laws of physics from acting on the vehicle. This system, like any other system, has limits and cannot help you to maintain traction and control of the vehicle in all circumstances. Reckless driving can lead to accidents. It is the driver's responsibility to drive carefully. This means taking into account the traffic, road and environmental conditions.

Electronically Controlled 4WD

The electronically controlled 4WD is a system that improves acceleration performance and stability performance by controlling front-rear distribution of driving torque with operating the electronic control coupling arranged in the rear differential assembly.

📖 NOTE

- If the parking brake lever is pulled up while the vehicle is moving, the front-rear distribution of driving torque control will turn OFF which will allow the rear wheels to lock easier.

Active Yaw Control (AYC)

The AYC is a system, with a left-right differential limiting function and yaw control function, that controls the left-right driving/braking force by managing the AFD* (Active Front Differential), the brake, the EPS.

*: AFD (Active Front Differential)

The Differential assembly that limits the front left-right differential speed by operating electronic control clutch arranged in the transfer assembly.

Left-right differential limiting function

The left-right differential limiting function is a function that enhances driving performance and vehicle stability by preventing idle spinning of a wheel when driving on slippery road or when the road surfaces of left and right wheels are different.

Yaw control function

The yaw control function is a function that enhances vehicle cornering performance and vehicle stability with management of vehicle turning power (yaw moment) by controlling

the drive power difference of the left and right wheels and the braking force when the vehicle does not turn in response to steering input, such as when the steering wheel is turned quickly or when driving on slippery road.

⚠ CAUTION

- Control of the braking force does not enhance the stopping performance of the vehicle, therefore, pay careful attention to the safety of your surroundings when driving.

S-AWC drive mode

N00542401086

Select the drive mode from the following four types to suit the driving conditions.

S-AWC drive mode	Function
AWC ECO	This is the most fuel efficient mode. Normal operation is in 2WD, but 4WD performance will be provided under slippery conditions.

S-AWC drive mode	Function
NORMAL	This mode can be used on both dry and wet roads. The distribution of driving/braking torque to each wheel is automatically controlled according to the driving condition.
SNOW	This mode is for driving on slippery road surfaces, such as snow-covered roads.
LOCK	This mode is for driving where maximum traction is required. This mode is suitable for driving on rough roads or driving in mud, sand or fresh snow.

4-wheel drive operation requires special driving skills.
Carefully read the “4-wheel drive operation” section on page 5-85 and take care to drive safely.

S-AWC drive mode-selector

N00583000042

The drive mode can be switched by press the switch while the operation mode in ON.

If you press the switch, you can change the drive mode in the order of AWC ECO, NORMAL, SNOW, LOCK, AWC ECO.

CAUTION

- Do not operate the drive mode-selector with the front wheels spinning on a snowy road or in similar conditions. The vehicle could lunge in an unexpected direction.
- Driving on dry, paved roads in “LOCK” mode causes increased fuel consumption and noise.

NOTE

- The drive mode can be switched while driving or stopped.

S-AWC drive mode display

N00583100030

Example: “AWC ECO” mode is selected.

The currently selected drive mode is displayed on the multi-information display. In addition, when the drive mode is changed, the selected mode appears on the interrupt display screen of the information screen in the multi-information display. The drive mode display will appear on the information screen for a few seconds, and then the original screen will return.

⚠ CAUTION

- If the selected drive mode indicator begins blinking, the drive mode will automatically switch to protect the drive-system components. A warning will also be displayed in the information screen in the multi information display.

Warning display

Reduce speed and, if the indicator stops blinking, you may resume normal driving.

- If the drive mode indicator (4WD) is blinking, a problem has occurred with the S-AWC. A warning will also be displayed in the information screen in the multi information display.

Warning display

Have your vehicle inspected by an authorized Mitsubishi Motors dealer.

⚠ CAUTION

- Make sure that all four tires are the same specified size, type, and brand, and have no significant difference in the amount of wear for all 4 wheels. Otherwise, the S-AWC system may not work properly, and a 4WD system warning (overheating or service required) may be displayed.

S-AWC operation display

N00542501058

The S-AWC operation status can be displayed on the information screen in the multi-information display.

To display the status, press the multi-information meter switch to change the information screen.

Refer to “Information screen (when the operation mode in ON)” on page 5-132.

Display example

The S-AWC operation status is displayed.

AG0018409

Yaw control function display

The amount of the yaw moment is displayed as a bar graph.

- A, D- Clockwise yaw moment about the vehicle's center of gravity
- B, C- Counterclockwise yaw moment about the vehicle's center of gravity

Differential limiting function display

The strength of the differential limiting operation (between front-rear wheels and between left-right wheels) is displayed in section E of the meter as a bar graph.

⚠ WARNING

- Always concentrate on your driving first. Keep your eyes and mind on the road. Distractions while driving can lead to an accident.

When the ECO mode switch is ON

N00576700021

While the drive mode is in the “NORMAL” position, if the ECO mode switch is switched ON, the drive mode will be changed to “AWC ECO” mode.

If the ECO mode switch is switched OFF, the drive mode will be returned to “NORMAL” mode.

Refer to the “ECO mode switch” on page 5-184.

NOTE

- If the drive mode is switched in any mode after the drive mode is switched in “AWC ECO”, the drive mode will not be changed even if the ECO mode switch is switched OFF.

4-wheel drive operation

N00530601182

Your vehicle has been designed primarily for use on pavement.

But its unique 4 -wheel drive system allows you to occasionally travel on unpaved roads, to campgrounds, picnic sites, and similar locations.

Not only does this ensure better handling on dry, paved roads but also permits better trac-

tion when driving on slippery, wet or snow-covered roads and when moving out of mud. But it is not suitable for heavy off road use or towing in rough conditions.

It is particularly important to note that 4-wheel drive may not give sufficient hill climbing ability and engine braking on steep slopes. You should try to avoid driving on steep slopes.

Also, you must exercise caution when driving on sand and mud and when driving through water because sufficient traction may not be available in certain circumstances.

Please avoid driving the vehicle through areas where the tires may get stuck in deep sand or mud.

WARNING

- **Do not over-rely on the 4-wheel drive vehicles. Even 4-wheel drive vehicles have limits to the system and ability to maintain control and traction. Reckless driving may lead to accidents. Always drive carefully, taking account of the road conditions.**
- **Improperly operating this vehicle on or off-pavement can cause an accident or rollover in which you and your passengers could be seriously injured or killed.**
 - Follow all instructions and guidelines in the owner’s manual.
 - Keep your speed low and do not drive faster than conditions.

NOTE

- Driving on rough roads can be hard on a vehicle. Before you leave the pavement, be sure all scheduled maintenance and service has been done, and that you have inspected your vehicle. Pay special attention to the condition of the tires, and check the tire pressures.
- Mitsubishi Motors is not responsible to the operator for any damage or injury caused or liability incurred by improper and negligent operation of a vehicle. All techniques of vehicle operation depend on the skill and experience of the operator and other participating parties. Any deviation from the recommended operating instructions above is at their own risk.
- Note that the stopping distance required of the 4-wheel drive vehicle differs very little from that of the front-wheel drive vehicle. When driving on a snow-covered road or a slippery, muddy surface, make sure that you keep a sufficient distance between your vehicle and the one ahead of you.
- The driving posture should be more upright; adjust the seat to a good position for easy steering and pedal operation. Be sure to wear the seat belt.
- After driving on rough roads, check each part of the vehicle and wash it thoroughly with water. Refer to the “Inspection and maintenance following rough road operation” section and “Vehicle care and Maintenance” sections.

CAUTION

- Setting the drive mode-selector to “4WD LOCK” (Electronically controlled 4WD) or “LOCK” (S-AWC) position to drive on dry paved road will increase fuel consumption, with possible noise generation.

NOTE

- The use of snow tires is recommended.
- Maintain a safe distance between vehicles, avoid sudden braking, and use engine braking (downshifting).

CAUTION

- If any of the following conditions occur while the vehicle is being driven, immediately park your vehicle in a safe place and follow these procedures:
 - If the engine coolant temperature display  flashes on the information screen in the multi-information display or the engine power drops suddenly. Refer to “Engine overheating” on page 8-4.
 - If the  warning display and “SLOW DOWN” or the  warning display and “SERVICE REQUIRED” appear on the information screen in the multi-information display. Refer to “Warning display” on page 5-66, 5-74.

5

Turning sharp corners

When turning a sharp corner in “4WD LOCK” (Electronically controlled 4WD) or “LOCK” (S-AWC) position at low speed, a slight difference in steering may be experienced similar to feeling as if the brakes were applied. This is called tight corner braking and results from each of the four tires being at a different distance from the corner. The phenomenon is typical of 4-wheel drive vehicles. If this occurs, either straighten out the steering wheel or change to another mode.

On snowy or icy roads

Set the drive mode-selector to “4WD AUTO”, “4WD LOCK” (Electronically controlled 4WD) or “SNOW” (S-AWC) in accordance with the road conditions, and then gradually depress the accelerator pedal for a smooth start.

CAUTION

- Avoid sudden braking, sudden acceleration and sharp turning. Skidding occurs and control of the vehicle could be lost.

Driving on sandy or muddy roads

Set the drive mode-selector to “4WD LOCK” (Electronically controlled 4WD) or “LOCK” (S-AWC) and then gradually depress the accelerator pedal for a smooth start. Keep the pressure on the accelerator pedal as constant as possible, and drive at low speed.

CAUTION

- Do not force the vehicle or drive recklessly on sandy surfaces. In comparison with normal road surfaces, the engine and other drive-system components are put under excessive strain when driving on such a surface. This could lead to accidents.

WARNING

- **When attempting to rock your vehicle out of a stuck position, be sure that the area around the vehicle is clear of people and physical objects. The rocking motion may cause the vehicle to suddenly launch forward/backward, causing injury or damage to nearby people or objects.**

 **NOTE**

- Avoid sudden braking, sudden acceleration and sharp turning; such operations could result in the vehicle becoming stuck.
- If the vehicle becomes stuck in sandy or muddy roads, it can often be moved with a rocking motion. Move the selector lever alternately between the “D” (DRIVE) and “R” (REVERSE) positions while pressing lightly on the accelerator pedal.
- Driving on rough road can cause rust on the vehicle; wash the vehicle thoroughly as soon as possible after such use.

Climbing/descending sharp grades

Your vehicle may not provide sufficient hill climbing ability and engine braking on steep slope. Avoid driving on steep slopes even though the vehicle is an 4-wheel drive vehicle.

Driving through water

N00537800085

If the electrical circuits become wet, further operation of the vehicle will be impossible; therefore, avoid driving through water unless absolutely necessary. If driving through water is unavoidable, use the following procedure:

Check the depth of the water and the terrain before attempting to drive through it. Drive slowly to avoid creating excessive water splashing.

 **CAUTION**

- Never drive through water that is deep enough to cover wheel hubs, axles or exhaust pipe. Do not change the selector lever position while driving through water. Frequent driving through water can adversely affect the life span of the vehicle; consult an authorized Mitsubishi Motors dealer or a repair facility of your choice and take the necessary measures to prepare, inspect, and repair the vehicle.
- After driving through water, apply the brakes to be sure they are functioning properly. If the brakes are wet and not functioning properly, dry them out by driving slowly while lightly depressing the brake pedal. Inspect each part of the vehicle carefully.

Inspection and maintenance following rough road operation

N00530700085

After operating the vehicle in rough road conditions, be sure to perform the following inspection and maintenance procedures:

- Check that the vehicle has not been damaged by rocks, gravel, etc.
- Carefully wash the vehicle with water. Drive the vehicle slowly while lightly depressing the brake pedal in order to dry out the brakes. If the brakes still do not function properly, contact an authorized Mitsubishi Motors dealer or a repair facility of your choice as soon as possible to have the brakes checked.
- Remove the insects, dried grass, etc. clogging the radiator core.
- After driving through water, check the engine, transaxle and differential oil. If the oil or grease is milky or cloudy because of water contamination, it must be replaced with new oil.
- Check the inside of the vehicle. If water entry is found, dry the carpet etc.
- Inspect the headlights. If water is in the headlight housing, have it drained at an authorized Mitsubishi Motors dealer or a repair facility of your choice.

Cautions on the handling of 4-wheel drive vehicles

N00530801214

Tires and wheels

5 Since the driving torque can be applied to the four wheels, the driving performance of the vehicle when operating in 4-wheel drive is greatly affected by the condition of the tires.

Pay close attention to the tires.

- Install only the specified tires on all wheels. Refer to “Tires and wheels” on page 11-7.
- Be sure all four tires and wheels are the same size and type.
When it is necessary to replace any of the tires or wheels, replace all four.
- All tires should be rotated before the wear difference between the front and rear tires is recognizable.

Good vehicle performance cannot be expected if there is a difference in wear between tires. Refer to “Tire rotation” on page 9-20.

- Check the tire inflation pressure regularly.

CAUTION

- Always use tires of the same size, type, and brand that have no wear differences. Using tires of different size, type, brands or degree of wear, will increase the differential oil temperature and result in possible damage to the driving system. Further, the drive train will be subject to excessive loading, possibly leading to oil leakage, component seizure, or other serious failures.

Towing

CAUTION

- Do not tow 4-wheel drive vehicles with the front or rear wheels on the ground (Type A or Type B) as illustrated. This could result in damage to the drivetrain, or unstable towing. If you tow 4-wheel drive vehicles, use Type C or Type D equipment.
- Even in “4WD ECO” (Electronically controlled 4WD) or “AWC ECO” (S-AWC) drive mode, the vehicle cannot be towed with the front or the rear wheels on the ground.

Jacking up a 4-wheel drive vehicle

WARNING

- Do not crank the engine while jacking up the vehicle.
The tire on the ground may turn and the vehicle may roll off the jack.

Service brake

N00517500275

Brake pedal

Overuse of the brake can cause weakening, resulting in poor brake response and premature wear of the brake pads.

When driving down a long or steep hill, use engine braking by downshifting.

WARNING

- Do not leave any objects near the brake pedal or let a floor mat slide under it; doing so could prevent the full pedal stroke that would be necessary in an emergency. Make sure that the pedal can be operated freely at all times. Make sure the floor mat is securely held in place.

CAUTION

- It is important not to drive the vehicle with your foot resting on the brake pedal when braking is not required. This practice can result in very high brake temperatures, premature lining wear, and possible damage to the brakes.

Power brakes

N00517600364

Your vehicle is equipped with power brakes for more braking force with less brake pedal effort.

Your brakes are designed to operate at full capacity, even if the power assist is not being used.

If the power assist is not being used, the effort needed to press the brake pedal is greater.

If you should lose the power assist for some reason, the brakes will still work.

If the power brake unit or either of the two brake hydraulic systems stops working properly, the rest of the brake system will still work, but the vehicle will not slow down as quickly.

You will know this has happened if you find you need to press the brake down farther, or harder when slowing down or stopping, or if the brake warning light and the warning display in the multi-information display come on.

WARNING

- Never coast downhill with the engine OFF. Keep the engine running whenever your vehicle is in motion. If you turn off the engine while driving, the power brake booster will stop working and your brakes will not work as well.

WARNING

- If the power assist is lost or if either brake hydraulic system stops working properly, take your vehicle to an authorized Mitsubishi Motors dealer or a repair facility of your choice immediately.

Brake pad wear alarm

N00550700124

The disc brakes have an alarm that makes a metallic squeal when the brake pads have worn down enough to need service.

If you hear this sound, have the brake pads replaced at an authorized Mitsubishi Motors dealer or a repair facility of your choice.

WARNING

- Driving with worn brake pads will make it harder to stop, and can cause an accident.

Hill start assist (if so equipped)

N00562601097

The hill start assist makes it easy to start off on a steep uphill slope by preventing the vehicle from moving backwards. It keeps the braking force for about 2 second when you move your foot from the brake pedal to the accelerator pedal.

CAUTION

- Do not overly rely on the hill start assist to prevent backwards movement of the vehicle. Under certain circumstances, even when hill start assist is activated, the vehicle may move backwards if the brake pedal is not sufficiently depressed, if the vehicle is heavily loaded, or if the road is very steep or slippery.
- The hill start assist is not designed to keep the vehicle stopped in place on uphill slopes for more than 2 seconds.
- When facing uphill, do not rely on using the hill start assist to maintain a stopped position as an alternative to depressing the brake pedal. Doing so could cause an accident.
- Do not turn the ignition switch to the “OFF”, “LOCK” or “ACC” position while the hill start assist is operating. The hill start assist could stop operating, which could result in an accident.

To operate

N00562700075

1. Stop the vehicle completely using the brake pedal.
2. Release the brake pedal and the hill start assist will maintain the braking force applied while stopping for approximately 2 seconds.

3. Depress the accelerator pedal and the hill start assist gradually will decrease the braking force as the vehicle starts moving.

NOTE

- The hill start assist is activated when all of the following conditions are met.
 - The engine is running.
(The hill start assist will not be activated while the engine is starting or immediately after the engine is started.)
 - The selector lever is in any position other than “P” (PARK) or “N” (NEUTRAL).
 - The vehicle is completely stationary, with the brake pedal depressed.
 - The parking brake is released.
- The hill start assist will not operate if the accelerator pedal is depressed before the brake pedal is released.
- The hill start assist also operates when reversing on an uphill slope.

Warning display

N00562801103

 - ASC indicator

If an abnormal condition occurs in the system, the following display/indicator will turn on.

Warning display

CAUTION

- If the warning is displayed, the hill start assist will not operate. Start off carefully.
- Park your vehicle in a safe place and stop the engine.
Restart the engine and check whether the indicator/display goes out, in which case the hill start assist is again working normally. If they remain displayed or reappear frequently, it is not necessary to stop the vehicle immediately, but the vehicle should be inspected by an authorized Mitsubishi Motors dealer or a repair facility of your choice as soon as possible.

Brake assist system

N00567301099

The brake assist system is a device assisting drivers who cannot depress the brake pedal firmly such as in emergency stop situations and provides greater braking force.

If the brake pedal is depressed suddenly, the brakes will be applied with more force than usual.

⚠ CAUTION

- The brake assist system is not a device designed to exercise braking force greater than its capacity. Make sure to always keep a sufficient distance between vehicles in front of you without relying too much on the brake assist system.

📖 NOTE

- Once the brake assist system is operational, it maintains great braking force even if the brake pedal is lightly released. To stop its operation, completely remove your foot from the brake pedal.
- The brake assist system may become operational when the brake pedal is fully depressed even if it has not been depressed suddenly.
- When the brake assist system is in use while driving, you may feel as if the depressed brake pedal is soft, the pedal moves in small motions in conjunction with the operation noise, or the vehicle body and the steering wheel vibrate. This occurs when the brake assist system is operating normally and does not indicate faulty operation. Continue to depress the brake pedal.
- You may hear an operation noise when the brake pedal is suddenly or fully depressed while stationary. This does not indicate a malfunction and the brake assist system is operating normally.

📖 NOTE

- When the anti-lock brake system warning light or only active stability control warning light illuminate, the brake assist system is not functioning.

Anti-lock braking system

N00517900240

The anti-lock braking system helps prevent the wheels from locking up when braking. This helps maintain vehicle drivability and steering wheel handling.

Driving hints

- When using the anti-lock brakes (sudden braking), steering is slightly different from normal driving conditions. Use the steering wheel carefully.
- Always keep a safe distance from the vehicle in front of you. Even if your vehicle is equipped with the anti-lock braking system, leave a greater braking distance when:
 - Driving on gravel or snow-covered roads.
 - Driving on uneven road surfaces.

- Operation of anti-lock braking system is not restricted situations where brakes are applied suddenly. This system may also prevent the wheels from locking when you drive over manholes, steel roadwork plates, road markings, or any uneven road surface.
- When the anti-lock braking system is in use, you may feel the brake pedal vibrating and hear a unique sound. It may also feel as if the pedal resists being pressed. **In this situation, simply hold the brake pedal down firmly. Do not pump the brake, which will result in reduced braking performance.**

5

⚠ CAUTION

- The anti-lock braking system cannot prevent accidents. It is your responsibility to take safety precautions and to drive carefully.
- To prevent failure of the anti-lock braking system, be sure all 4 wheels and tires are the same size and the same type.

📖 NOTE

- A whining sound is emitted from the engine compartment when driving immediately after starting the engine. These are the normal sounds the anti-lock braking system makes when performing a self-check. It does not indicate a malfunction.

 **NOTE**

- The anti-lock braking system can be used after the vehicle has reached a speed over approximately 6 mph (10 km/h). It stops working when the vehicle slows below 3 mph (5 km/h).

5 Anti-lock braking system warning light / display

N00531601684

Warning light

Warning display

If there is a malfunction in the system, the anti-lock braking system warning light will come on and the warning display will appear on the information screen in the multi-information display.

Under normal conditions, the anti-lock braking system warning light only comes on when the ignition switch is turned to the “ON” position or the operation mode is put in ON and goes off a few seconds later.

 **CAUTION**

- Any of the following indicates that the anti-lock braking system is not functioning and only the standard brake system is working. (The standard brake system is functioning normally.) If this happens, take your vehicle to an authorized Mitsubishi Motors dealer or a repair facility of your choice.
 - When the ignition switch is in the “ON” position or the operation mode is put in ON, the warning light does not come on or it remains on and does not go off
 - The warning light comes on while driving
 - The warning display appears while driving

If the warning light / display illuminate while driving

N00531701614

If only the anti-lock braking system warning light/display illuminate

- Avoid hard braking and high-speed driving. Stop the vehicle in a safe place. Test the system by restarting the engine and driving at a speed of about 12 mph (20 km/h) or higher. If the warning light / display then remains off during driving, there is no abnormal condition.

However, if the warning light / display do not disappear, or if they come on again when the vehicle is driven, have the vehicle checked by an authorized Mitsubishi Motors dealer or repair facility of your choice as soon as possible.

If the anti-lock braking system warning light / display and brake warning light / display illuminate at the same time

Warning light

Warning display

The anti-lock braking system and brake force distribution function may not work, so hard braking could make the vehicle unstable.

Avoid hard braking and high-speed driving. Stop the vehicle in a safe place and contact an authorized Mitsubishi Motors dealer or repair facility of your choice.

NOTE

- The anti-lock braking system warning light and brake warning light illuminate at the same time and the warning displays appear alternately on the information screen in the multi-information display.

After driving on icy roads

N00529201090

After driving on snow or icy roads, remove any snow and ice which may have be left around the wheels. On vehicles that have an anti-lock braking system, be careful not to damage the wheel speed sensors (A) or the cables located at each wheel.

Electric power steering system (EPS)

N00568401084

The power steering system operates while the engine is running. It helps reduce the effort needed to turn the steering wheel.

The power steering system has mechanical steering capability in case the power assist is lost. If the power assist is lost for some reason, you will still be able to steer your vehicle, but you will notice it takes much more effort to steer. If this happens, have your vehicle inspected at an authorized Mitsubishi Motors dealer or a repair facility of your choice.

WARNING

- Do not stop the engine while the vehicle is moving. Stopping the engine would make the steering wheel extremely hard to turn, possibly resulting in an accident.

NOTE

- During repeated full-lock turning of the steering wheel (for example, while you are manoeuvring the vehicle into a parking space), a protection function may be activated to prevent overheating of the power steering system. This function will make the steering wheel gradually harder to turn. In this event, limit your turning of the steering wheel for a while. When the system has cooled down, the steering effort will return to normal.
- If you turn the steering wheel while the vehicle is stationary with the headlights on, the headlights may become dim. This behavior is not abnormal. The headlights will return to their original brightness after a short while.

5

Electric power steering system warning display

Warning lamp

Warning display

Active stability control (ASC)

If there is a malfunction in the system, the warning light will come on and the warning display will appear on the information screen in the multi information display.

Under normal conditions, the warning light come on when the ignition switch is turned to the “ON” position or the operation mode is put in ON, and goes off after the engine has started.

CAUTION

- If the warning display appears while the engine is running, have the vehicle inspected by an authorized Mitsubishi Motors dealer or a repair facility of your choice as soon as possible. It may become harder to turn the steering wheel.

Active stability control (ASC)

N00559100147

The Active stability control (ASC) takes overall control of the anti-lock braking system, traction control function and skid control function to help maintain the vehicle's control and traction. Please read this section in conjunction with the page on the anti-lock braking system, traction control function and skid control function.

Anti-lock braking system → P.5-91

5-94 Features and controls

Traction control function → P.5-94
Skid control function → P.5-94

CAUTION

- Do not over-rely on the ASC. Even the ASC cannot prevent the natural laws of physics from acting on the vehicle. This system, like any other system, has limits and cannot help you to maintain traction and control of the vehicle in all circumstances. Reckless driving can lead to accidents. It is the driver's responsibility to drive carefully. This means taking into account the traffic, road and environmental conditions.
- Be sure to use the same specified type and size of tire on all four wheels. Otherwise, the ASC may not work properly.
- Do not install any aftermarket limited slip differential (LSD) on your vehicle. The ASC may stop functioning properly.

NOTE

- An operation noise may be emitted from the engine compartment in the following situations. The sound is associated with checking the operations of the ASC. At this time, you may feel a shock from the brake pedal if you depress it. These do not indicate a malfunction.
 - When the ignition switch is set to the “ON” position.
 - When the vehicle is driven for a while after the engine is turned on.

NOTE

- When the ASC is activated, you may feel a vibration in the vehicle body or hear a whining sound from the engine compartment. This indicates that the system is operating normally. It does not indicate a malfunction.
- When the anti-lock braking system warning light is illuminated, the ASC is not active.

Traction control function

N00559200021

On slippery surfaces, the traction control function prevents the drive wheels from spinning excessive, thus helping the vehicle to start moving from a stopped condition. It also provides sufficient driving force and steering performance as the vehicle turns while pressing the acceleration pedal.

CAUTION

- When driving a vehicle on a snowy or icy road, be sure to install snow tires and drive the vehicle at moderate speeds.

Skid control function

N00559300019

The skid control function is designed to help the driver maintain control of the vehicle on slippery roads or during rapid steering

maneuvers. It works by controlling the engine output and the brake on each wheel.

NOTE

- The skid control function operates at speeds of about 9 mph (15 km/h) or higher.

ASC OFF switch

N00559401264

The ASC is automatically activated when the ignition switch is turned to the “ON” position. You can deactivate the system by pressing down the “ASC OFF” switch for 3 seconds or longer.

When the ASC is deactivated, the  indicator will turn on. To reactivate the ASC, momentarily press the “ASC OFF” switch; the  indicator is turned off.

AA0111995

CAUTION

- For safety reasons, the “ASC OFF” switch should be operated when your vehicle is stopped.
- Be sure to keep the ASC on while driving in normal circumstances.

NOTE

- Using the “ASC OFF” switch turns off both the stability control function and the traction control function.
- When moving out of mud, sand or fresh snow, pressing the accelerator pedal may not allow the engine speed to increase. In such situations, temporarily turning off ASC with the “ASC OFF” switch will make it easier to move out your vehicle.
- If you continue to press the “ASC OFF” switch after the ASC is turned off, the “mistaken operation protection function” will activate and the ASC will turn back on.

ASC operation display or ASC OFF indicator

N00559501223

ASC operation display/ASC indicator
The display/indicator will blink when the ASC is operating.

ASC OFF indicator
This indicator will turn on when the ASC is turned off with the “ASC OFF” switch.

CAUTION

- When  display/indicator blinks, ASC is operating, which means that the road is slippery or that your vehicle’s wheels are beginning to slip. If this happens, drive slower.
- If the temperature in the braking system continues to increase due to continuous brake control on a slippery road surface, the  indicator will blink. To prevent the brake system from overheating, the brake control of the traction control function will be temporarily suspended. The engine control of the traction control function and normal brake operation will not be affected. Park your vehicle in a safe place. When the temperature in the braking system has come down, the  indicator will be turned off and the traction control function will start operating again.

 **NOTE**

- The  indicator may come on when you start the engine. This means that the battery voltage momentarily dropped when the engine was started. It does not indicate a malfunction, provided that the display goes out immediately.
- When a spare tire has been put on your vehicle, the gripping ability of the tire will be lower, making it more likely that the  display/indicator will blink.

5

ASC warning display

N00546601129

If an abnormal condition occurs in the system, the following display/indicator will turn on.

- ASC indicator

- ASC OFF indicator

Warning display

 **CAUTION**

- The system may be malfunctioning. Park your vehicle in a safe place and stop the engine. Restart the engine and check whether the display/indicator goes out. If they go out, there is no abnormal condition. If they do not go out or if they turn on frequently, it is not necessary to stop the vehicle immediately, but you should have your vehicle inspected by an authorized Mitsubishi Motors dealer or a repair facility of your choice as soon as possible.

Towing

N00546301070

 **CAUTION**

- If the 2WD vehicle is towed with the ignition switch in the “ON” position or the operation mode in ON and only the front wheels or only the rear wheels raised off the ground, the ASC may operate, resulting in an accident. When towing the 2WD vehicle with the front wheels raised, keep the ignition switch in the “OFF”, “LOCK” or “ACC” position or the operation mode in ACC or OFF. When towing the vehicle with the rear wheels raised, keep the ignition switch in the “ACC” position or the operation mode in ACC. Refer to “Towing” on page 8-14.

Cruise control (if so equipped)

N00518301626

Cruise control is an automatic speed control system that keeps a set speed. It can be activated at speeds from about 25 mph (40 km/h). Cruise control does not work at speeds below about 25 mph (40 km/h).

 **CAUTION**

- When you do not wish to drive at a set speed, turn off the cruise control for safety.
- Do not use cruise control when driving conditions will not allow you to stay at the same speed, such as in heavy traffic or on roads that are winding, icy, snow-covered, wet, slippery, on a steep downhill slope.

 **NOTE**

- Cruise control may not be able to keep your speed on uphill or downhill.
- Your speed may decrease on a steep uphill. You may use the accelerator pedal if you want to stay at your set speed.
- Your speed may increase to more than the set speed on a steep downhill. You have to use the brake to control your speed. As a result, the set speed driving is deactivated.

Cruise control switches

A- CRUISE CONTROL ON/OFF switch

Used to turn on and off the cruise control.

B- SET - switch

Used to reduce the set speed and to set the desired speed.

C- RES + switch

Used to increase the set speed and to return to the original set speed.

D- CANCEL switch

Used to deactivate the set speed driving.

NOTE

- When operating the cruise control switches, press the cruise control switches correctly. The set speed driving may be deactivated automatically if two or more switches of the cruise control are pressed at the same time.

To activate

N00518401395

- With the operation mode in ON, press the CRUISE CONTROL ON/OFF switch (A) to turn on the cruise control. The indicator/indicator display in the meter cluster will come on.

AA0110611

Indicator

Indicator display

- Accelerate or decelerate to your desired speed, then push down and release the SET - switch (B) when the indicator/indicator display is illuminated. The vehicle will then maintain the desired speed.

The "SET" indicator appears on the information display in the meter cluster. (For vehicles equipped with color liquid crystal display meter)

AA0110624

NOTE

- When you release the SET - switch (B), the vehicle speed will be set.

To increase the set speed

N00518501354

There are 2 ways to increase the set speed.

RES + switch

Push up and hold the RES + switch (C) while driving at the set speed, and your speed will then gradually increase.

Cruise control (if so equipped)

When you reach your desired speed, release the switch. Your new cruising speed is now set.

To increase your speed in small amounts, push up the RES + switch (C) for less than about 1 second and release it.

Each time you press the RES + switch (C), your vehicle will go about 1 mph (1.6 km/h) faster.

Accelerator pedal

While driving at the set speed, use the accelerator pedal to reach your desired speed and then push down the SET - switch (B) and release the switch momentarily to set a new desired cruising speed.

To decrease the set speed

N00518601283

There are 2 ways to decrease the set speed.

SET - switch

Push down and hold the SET - switch (B) while driving at the set speed, and your speed will slow down gradually.

When you reach your desired speed, release the switch. Your new cruising speed is now set.

To slow down your speed in small amounts, push down the SET - switch (B) for less than about 1 second and release it.

Each time you push down the SET - switch (B), your vehicle will slow down by about 1 mph (1.6 km/h).

Brake pedal

While driving at the set speed, use the brake pedal, which disengages the cruise control, then push down the SET - switch (B) and release the switch momentarily to set a new desired cruising speed.

To temporarily increase or decrease the speed

N00541701066

To temporarily increase the speed

Depress the accelerator pedal as you would normally. When you release the pedal, you will return to your set speed.

NOTE

- In some driving conditions, the set speed driving may be deactivated. If this happens, refer to “To activate” on page 5-97 and repeat the speed setting procedure.

To temporarily decrease the speed

Depress the brake pedal to decrease the speed. To return to the previously set speed, push up the RES + switch (C). Refer to “To resume the set speed” on page 5-100.

To deactivate

N00518801575

The set speed driving can be deactivated as follows:

- Press the CRUISE CONTROL ON/OFF switch (A) (Cruise control will be turned off.)
- Press the CANCEL switch (D).
- Depress the brake pedal.

Adaptive Cruise Control System (ACC) (if so equipped)

The set speed driving is deactivated automatically in any of the following ways.

- When your speed slows to about 10 mph (15 km/h) or more below the set speed because of a hill, etc.
- When your speed slows to about 25 mph (40 km/h) or less.
- When the active stability control (ASC) starts operating. (if so equipped)
Refer to “Active stability control (ASC)” on page 5-94.

⚠ WARNING

- **Although the set speed driving will be deactivated when shifting to the “N” (NEUTRAL) position, never move the selector lever to the “N” (NEUTRAL) position while driving. You would have no engine braking and could cause a serious accident.**

Also, the set speed driving may be deactivated as follow:

- When the engine speed rises and approaches the tachometer’s red zone (the red-coloured part of the tachometer dial).

⚠ CAUTION

- When the set speed driving is deactivated automatically in any situation other than those listed above, there may be a system malfunction.
Press the CRUISE CONTROL ON/OFF switch to turn off the cruise control and have your vehicle inspected by an authorized Mitsubishi Motors dealer or a repair facility of your choice.

To resume the set speed

N00518901345

If the set speed driving is deactivated by the condition described in “To deactivate” on page 5-99, you can resume the previously set speed by push up the RES+ switch (C) while driving at a speed of about 25 mph (40 km/h) or higher.

The “SET” indicator appears on the information display in the meter cluster. (For vehicles equipped with the color liquid crystal display meter)

Under either of the following conditions, however, using the switch does not allow you to resume the previously set speed. In these situations, repeat the speed setting procedure:

- The CRUISE CONTROL ON/OFF switch is pressed.
- The operation mode is put in OFF.
- Indicator go off.

Adaptive Cruise Control System (ACC) (if so equipped)

N00576800048

ACC maintains a set speed with no need for you to use the accelerator pedal. Using a sensor (A), the system also measures the relative speed and distance between your vehicle and a vehicle in front, and maintains a set following distance between your vehicle and the vehicle in front by automatically decelerating

your vehicle if it becomes too close to the vehicle in front.

The cruising set speed can be set from 25 mph (40 km/h) to 110 mph (180 km/h). The distance can be selected from three levels.

If the vehicle in front decelerates, the ACC will automatically apply limited braking to maintain the distance, and if the front vehicle then accelerates, the ACC will automatically accelerate your vehicle up to the set speed. If your vehicle is approaching too close to the front vehicle, a buzzer will sound and a warning is shown in the multi information display. When the ACC detects no vehicle ahead, the set speed will be maintained.

Conventional cruise control mode without the distance control can also be selected.

Stop lights are illuminated during automatic braking.

⚠ WARNING

- Before using the ACC, read this entire section to understand the limitations of this system. Failure to follow instructions could result in an accident.
- Never rely solely on the ACC. The ACC is not a collision avoidance system or an automatic driving system. It is designed to use only limited braking and is never a substitute for your safe and careful driving. Always be ready to apply the brakes manually.

Cruise control switch

N00577000021

1- “ACC ON/OFF” switch

Used to turn on and off the ACC system.

2- “SET -” switch

Used to set a desired speed or to reduce the set speed.

3- “RES +” switch

Used to resume the control function after cancelling the ACC or the conventional cruise control.

Also used to increase the set speed.

4- “CANCEL” switch

Used to cancel the control function of the ACC or the cruise control.

5- ACC distance switch

Used to set or change the following distance between your vehicle and a vehicle in front.

📖 NOTE

- Operate the individual switches correctly and one after another.

The ACC may be turned off or its control function may be cancelled if two or more switches are pressed concurrently

ACC Indicators

N00577100035

While the ACC is turned on, indicators for the ACC are shown in the multi information display.

AJA100744

1- ACC indicator:

Indicating that the ACC is turned on.

2- Control state indicator:

Indicating that ACC is activated.

3- Set speed indicator:

Indicating the set speed.

If the set speed is not set, “---” is shown.

4- Front vehicle indicator:

Indicating when the ACC detects a vehicle ahead.

When a front vehicle is detected while the ACC is activated, the ‘Active’ front vehicle indicator shown in the illustration below will illuminate.

When a front vehicle is detected while the ACC is not activated or the ACC is canceled, the ‘Stand by’ front vehicle indicator will illuminate.

Display	State	
	Stand by	Active
Vehicle in front detected		

5-Following distance indicator:

Indicating the following distance.

Two states: “Stand by” and “Active”

When a front vehicle is detected while the ACC is activated, the ‘Active’ following distance indicator shown in the illustration below will illuminate.

When a front vehicle is detected while the ACC is not activated or the ACC is canceled, the ‘Stand by’ following distance indicator will illuminate.

How to use ACC

N00577200023

To turn on ACC

When the operation mode is in the “ON” position, press the “ACC ON/OFF” switch.

AA0114273

Following distance setting symbol	State	
	Stand by	Active
Long		
Middle		
Short		

The ACC indicators will appear in the multi information display.

NOTE

- Every time the operation mode is turned to the “OFF” position, the ACC is turned off.

To turn off ACC

Press the “ACC ON/OFF” switch to turn off the ACC.

**NOTE**

- The ACC can be turned off even while the ACC is active.
- Every time the operation mode is turned off, the ACC is turned off and the set speed is erased.

To activate ACC control

With the ACC turned on, push down the “SET -” switch while driving, and when your vehicle reaches your desired speed, release the “SET -” switch. The ACC will activate and initiate the speed control to maintain the set speed.

The set indicator comes on, the set speed is indicated and the following distance indicator changes to the ‘active’ display. Also a buzzer will sound.

You can set the speed anywhere from approximately 25 mph (40 km/h) to 110 mph (180 km/h).

While a vehicle in front is being detected and your vehicle speed is between approximately 6 mph (10 km/h) and 25 mph (40 km/h), you can activate the ACC. In this case, the set speed will be set at 25 mph (40 km/h).

The ACC cannot otherwise be activated while your vehicle is traveling less than 25 mph (40 km/h) or greater than 110 mph (180 km/h).

NOTE

- When any of the following conditions are present, the ACC will not activate.
 - When your vehicle speed is lower than approximately 6 mph (10 km/h) or greater than 110 mph (180 km/h).
 - When your vehicle is driven at speeds between approximately 6 mph (10 km/h) and 25 mph (40 km/h) and the ACC is not detecting a vehicle in front.
 - When ACC is in the OFF position.

NOTE

- While ABS, ASC or TCL is activated.
- When the selector lever is in positions other than “D” (DRIVE) and “Ds” (DOWN-SHIFT & SPORTY DRIVING).
- While the brake pedal is depressed.
- While the parking brake is engaged.
- When the ACC system has judged that the performance for detecting a front vehicle is degraded.
- When an abnormality in the ACC system has been detected.

When ACC detects no vehicle in front within the set distance

N00581300025

The speed of your vehicle will be maintained at the speed you have set. The speed can be set between approximately 25 mph (40 km/h) and 110 mph (180 km/h).

NOTE

- If the vehicle speed exceeds the set speed on a down slope, the system will automatically apply the brake to maintain the vehicle set speed.

When ACC detects a vehicle in front within the set distance

N00581400039

The ACC will maintain the distance to the front vehicle and will apply the brakes automatically when the system judges braking is necessary. The distance can be selected from three levels.

When the front vehicle stops, the ACC will automatically apply the brakes to stop your vehicle.

A few seconds after your vehicle has stopped, the ACC will release the brakes and your vehicle will start to move or creep slowly. You must apply the brakes to keep your vehicle stationary.

NOTE

- If the brake pedal is not depressed within 2 seconds after your vehicle has been stopped by the ACC, a warning buzzer will sound, the above warning will be shown in the multi information display to alert the driver, and the ACC control will be canceled.
- When depressing the brake pedal while the automatic brake is applied, the brake pedal will feel firm. This is normal. Depress the brake pedal harder to apply greater braking force.
- During the automatic braking, operation sounds may be heard. This is normal.

WARNING

- Never leave the vehicle while it is being stopped by the ACC.

When the ACC no longer detects a vehicle in front, the buzzer will sound, the vehicle symbol in the display will disappear and your

vehicle will slowly accelerate to the set speed.

WARNING

- Your vehicle may accelerate up to the set speed in the following situations. Apply the brake, if necessary, to slow down.
- When your vehicle no longer follows the vehicle in front, e.g. at a freeway exit or when your vehicle or the vehicle in front changes its lane.

AJM101484

WARNING

- When driving on a curve.

AJM101497

- When the vehicle in front has changed its course or lane, if a stationary vehicle appears in front your vehicle, the ACC will not decelerate your vehicle.

Approach alarm

N00576900036

While the ACC is activated, if your vehicle is approaching too closely to the vehicle in front, the ACC gives a warning by sounding a buzzer and displaying a message. Apply the brakes to maintain the appropriate distance to the vehicle in front.

WARNING

- When the ACC is not being used, turn off the system to avoid unexpected ACC activation.
- Never operate the ACC from outside the vehicle.
- The ACC will not decelerate your vehicle and/or give the approach alarm in the following cases.
 - When an object other than a vehicle, such as a pedestrian, is in front.
 - When a malfunction is detected in the system.
- The ACC will not decelerate your vehicle in the following cases, but will give the approach alarm.
 - When the front vehicle is stationary or moving at an extremely slow speed.
 - When your brake system has a problem, such as overheating.
- The ACC may not be able to maintain the set speed or the distance to a vehicle in front and may not alert the driver, if the system cannot detect the front vehicle properly. Typical situations include:
 - When a vehicle cuts into your path at a close distance.
 - When a vehicle in front is not completely in your path.
 - When a vehicle in front is towing a trailer.
 - When a motorcycle or a bicycle is in front.

⚠ WARNING

- When a vehicle in front is a truck loaded with freight that protrudes rearward from the cargo bed.
- When the height of a vehicle in front is extremely low or the road clearance of the vehicle is extremely high.
- When driving on a road with alternating up and down surfaces.
- When driving on a curve.
- When driving on a bumpy or rough road.
- When driving in a tunnel.
- When driving in construction zones.
- When the rear of your vehicle is weighed down with the weight of passengers and luggage
- For up to two minutes after starting driving.
- When driving in curved sections of road including their entrance/outlet or running beside a closed lane in a traffic work or similar zone.

- When the surface of the sensor is covered with dirt, snow, ice, etc.
- When a front vehicle or an oncoming vehicle is splashing water, snow or dirt.

⚠ WARNING

- When driving on a winding road.

- Never use the ACC in the following situations:
 - In heavy traffic.
 - On winding roads.
 - On slippery roads, such as icy, snow-covered or dirt roads.
 - In adverse weather conditions, such as rain, snow or sand storms, etc.
 - On steep downslopes.
 - When the inclination of a road frequently changes.
 - When the approach alarm frequently sounds.
 - When your vehicle is towed or is towing another vehicle.
 - When your vehicle is on a chassis dynamometer or free rollers.
 - When tire inflation pressures are not adequate.
 - When the temporary spare tire is being used.
 - When the radar sensor and/or its surrounding area are damaged or deformed.

⚠ CAUTION

- To maintain proper performance of the ACC:
 - Always clean the surface of the radar sensor.
 - Avoid impacting the radar sensor or its surrounding area.
 - Do not put a sticker on the radar sensor or its surrounding area.
 - Do not paint the radar sensor.
 - Do not install a grill guard.
 - Do not modify the radar sensor or its surrounding area.
 - Always use tires of the same size, same type, and same brand, and which have no significant wear differences.
 - Do not modify the vehicle's suspension.

To increase the set speed

N00581500027

There are two ways to increase the set speed.

By using the “RES +” switch:

The set speed will increase by 1 mph (1 km/h) every time you push up the “RES +” switch while the ACC is activated. If you hold the switch pushed up, the set speed increases in 5 mph (5 km/h) increments.

switch and release the accelerator pedal; the new speed is then set in the system.

To decrease the set speed

N00581600028

There are two ways to decrease the set speed.

By using the “SET -” switch:

The set speed will decrease by 1 mph (1 km/h) every time you push down the “SET -” switch while the ACC is activated. If you hold the switch pushed down, the set speed decreases in 5 mph (5 km/h) increments.

5

NOTE

- There is some time lag until the vehicle begins accelerating to the new set speed after the set speed has been changed.
- The set speed can be changed even while your vehicle is following a vehicle in front using the ACC. In this case, however, although the set speed itself is increased, your vehicle will not accelerate.
- When the switch is held, a buzzer will sound every time the set speed changes

WARNING

- The ACC braking control and approach alarm functions will not work while the accelerator pedal is depressed.

NOTE

- The set speed indicator in the multi information display will show “---” while the accelerator pedal is depressed.
- If the “SET -” button is not pushed down while depressing the accelerator pedal, your vehicle speed will return to the set speed, after the accelerator pedal is released. When the accelerator pedal is released, the ACC braking control and approach alarm functions may not immediately work.

NOTE

- There is some time lag until the vehicle begins decelerating after the set speed has been changed.

By using the accelerator pedal:

When the accelerator pedal is depressed while driving with the ACC control working, you can accelerate the vehicle beyond the presently set speed.

When the vehicle speed reaches your desired speed, push down and release the “SET -”

NOTE

- The set speed can be changed even while your vehicle is following a vehicle in front using the ACC. In this case, however, although the set speed itself is decreased, your vehicle will not decelerate.
- When the switch is held, a buzzer will sound every time the set speed changes

NOTE

- The ACC control will not resume after releasing the brake pedal.

NOTE

- The set speed indication on the display turns to “---” when the accelerator pedal is depressed. This indication remains as long as the pedal is in a depressed position.
- In certain conditions, the braking control and alarming functions of ACC may not work for a short while after releasing the accelerator pedal.

5

By using the brake pedal:

By depressing the brake pedal while the ACC is activated, the ACC control is canceled and your vehicle speed will decrease.

At the point where the vehicle speed reaches your desired speed, push down and release the “SET -” switch; the new speed is then set in the system.

To temporarily accelerate the vehicle

N00582800027

Simply depress the accelerator pedal to temporarily accelerate the vehicle. Releasing the pedal automatically slows down the vehicle to the set speed and ACC restarts its control.

WARNING

- The ACC braking control and approach alarm functions will not work while the accelerator pedal is depressed.

To cancel ACC control

N00581700045

There are two ways to cancel the ACC control.

- By pressing the “CANCEL” switch.
- By depressing the brake pedal.

NOTE

- You can also cancel the ACC control by pressing the “ACC ON/OFF” switch. If this switch is pressed while the ACC is “ON”, the ACC will be turned off.

When the ACC is canceled, the “SET” indicator goes off and the following distance indicator turns to the ‘standby’ display. The front vehicle indicator also turns to the ‘standby’ display when a front vehicle is detected.

In any of the situations listed below, the ACC control is automatically canceled, a buzzer sounds and a message is shown in the multi-information display.

- When your vehicle stops.
- When the ASC is turned off.
- While ABS, ASC or TCL is activated.
- When the selector lever is in a position other than “D” (DRIVE) and “Ds” (DOWNSHIFT & SPORTY DRIVING).
- When the parking brake is engaged.

When the ACC system determines that its performance has been degraded, a buzzer will sound and a message will be displayed in the multi information display.

This can occur when

- In adverse weather conditions, such as rain, snow or sand storms, etc.
- Foreign objects, such as dirt, snow or ice, adhere to the surface of the radar sensor.
- A front vehicle or an oncoming vehicle is splashing water, snow or dirt.
- Driving on a nonbusy road with a few vehicles and obstacles in front.
- The brake pads are overheating.

If the display keeps showing the message, there is a possibility that the ACC has a malfunction. Contact your authorized Mitsubishi Motors dealer.

When the ACC system detects an abnormality in the system, the ACC system will be turned off, a buzzer will sound and a message will be displayed in the multi information display. If the message remains after the operation mode has been turned to the “OFF” position and then turned back to the “ON” position, contact your authorized Mitsubishi Motors dealer.

To resume the control

N00581800033

After the ACC control has been canceled with the ACC turned on, the ACC control can be resumed by pushing up and releasing the “RES +” switch.

NOTE

- When any of the following conditions are present, the ACC control cannot be resumed.
- When your vehicle speed is lower than approximately 6 mph (10 km/h) or higher than 110 mph (180 km/h).
- When your vehicle is driven at speeds between approximately 6 mph (10 km/h) and 25 mph (40 km/h) and the ACC is not detecting a vehicle in front.
- When ASC is in the OFF position.
- While ABS, ASC or TCL is activated.
- When the selector lever is in positions other than “D” (DRIVE) and “Ds” (DOWN-SHIFT & SPORTY DRIVING).
- While the brake pedal is depressed.

NOTE

- While the parking brake is engaged.
- When the ACC system has judged that the performance for detecting a front vehicle is degraded.
- When an abnormality in the ACC system has been detected.

To change the following distance

N00581900021

With the ACC turned on, the distance between your vehicle and a vehicle ahead can be selected from three levels by pushing the ACC distance switch. Each time the ACC distance switch is pushed, the following distance will change from “Long” to “Middle”, to “Short”, and return to “Long” again. Every time the ACC is turned ON, the following distance is reset to “Long”.

AA0114332

NOTE

- Actual distance will vary depending on your vehicle speed and the front vehicle speed. The distance will become longer when the vehicle speeds are higher.

The following distance indicator shows the level of the following distance:

“Long”

“Middle”

“Short”

To activate conventional cruise control

N00582000029

Press and hold the “ACC ON/OFF” switch while the operation mode is in the “ON” position. A buzzer will sound and the multi information display will show the following indicator.

The conventional cruise control is turned off when the operation mode is tuned off. For operation of the cruise control, refer to “Cruise control” on page 5-96.

NOTE

- The conventional cruise control does not sound or display the approach alarm, will not adjust your vehicle speed, and does not control the distance between your vehicle and a vehicle in front.

General information

N00582100020

FCC ID:OAYARS3-B (for vehicles sold in the U.S.A)

IC: 4135A-ARS3B (for vehicles sold in the Canada)

This device complies with Part 15 of FCC Rules and Industry Canada licence-exempt RSS standard(s).

Operation is subject to the following two conditions.

- this device may not cause harmful interference.

- this device must accept any interference received, including interference that may cause undesired operation.

CAUTION

- Changes or modifications not expressly approved by the manufacturer for compliance could void the user’s authority to operate the equipment.

For vehicles sold in the Mexico

Certificado de homologación: RVLCOAR10-0980-A1
Continental ARS3-B

Este equipo opera a título secundario, consecuentemente, debe aceptar interferencias perjudiciales incluyendo equipos de la misma clase y puede no causar interferencias a sistemas operando a título primario.

Cofetel notice:

“La operación de este equipo está sujeta a las siguientes dos condiciones:

- es posible que este equipo o dispositivo no cause interferencia perjudicial y
- este equipo o dispositivo debe aceptar cualquier interferencia, incluyendo la que pueda causar su operación no deseada.”

Forward Collision Mitigation System (FCM) (if so equipped)

N00577300040

The Forward Collision Mitigation System (FCM) is designed to help reduce the risk of a collision with a vehicle straight ahead of your vehicle. The FCM uses a radar sensor (A) to determine the distance to a vehicle in front and relative speed to that vehicle. The FCM is not designed as an automatic driving system or as a collision avoidance system.

When your vehicle is approaching a vehicle straight ahead in your path and the FCM judges that there is the risk of a collision, the system will give audible and visual warnings. When the FCM judges that a collision with the vehicle straight-ahead is imminent, the system will automatically apply moderate braking to warn you to apply the brakes immediately.

When the FCM judges that a collision with the vehicle straight-ahead is highly unavoidable, the system will apply emergency braking to reduce the severity of the collision and, if possible, to avoid the collision.

Stop lights are illuminated during automatic braking.

5

WARNING

- Before using the FCM, read this entire section to fully understand the limitations of this system. Failure to follow instructions could result in an accident.
- The FCM is designed to help avoid certain frontal collisions or reduce the crash speed in such collisions. It is not a substitute for your safe and careful driving. Under certain circumstances, the system may not operate or may not detect correctly a vehicle in front. When your vehicle is approaching a vehicle too closely, take all necessary actions to avoid a collision, such as braking and steering, regardless of whether the FCM is activated or not. Never rely on the FCM to prevent a collision.

Forward collision warning function

N00577400025

If the system judges that there is a risk of your vehicle colliding with a vehicle in front, this function warns you of the potential hazard with visual and audible alarms.

When this function is triggered, a buzzer sounds and, at the same time, a “BRAKE” message appears on the information screen of the multi-information display.

The FCM will also prepare to provide quick brake response and greater brake force when you apply the brakes.

NOTE

- If the FCM detects that the driver is making steering and/or acceleration inputs to try and avoid a collision, the forward collision warnings may stop.

FCM braking function

N00577700057

When the FCM judges that a collision with the vehicle straight-ahead is imminent, the FCM will automatically apply moderate braking to warn the driver to apply the brakes immediately.

If the FCM judges that the collision is highly unavoidable, it will automatically apply emergency braking to reduce the severity of the collision and, if possible, to avoid the collision.

When the FCM applies emergency braking, a buzzer sounds and a warning message is displayed in the information screen of the multi-information display.

WARNING

- If the ASC is turned off, the FCM braking function will not operate. Refer to “Active stability control” on page 5-94.

⚠ WARNING

- If the brake pedal is not depressed within 2 seconds after your vehicle has been stopped by the FCM, a warning buzzer will sound and the brakes activated by the FCM will automatically be released. Apply the brakes as necessary to keep your vehicle stationary.

📖 NOTE

- When depressing the brake pedal while automatic braking is applied, the brake pedal will feel firm. This is normal. Depress the brake pedal harder to apply greater braking force.
- During the automatic braking, operating sounds may be heard. This is normal.

⚠ WARNING

- The FCM will not activate and will not provide either warning or braking in certain situations. Some of these include:
 - When the selector lever is in the “P” (PARK), the “R” (REVERSE), or the “N” (NEUTRAL) position.
 - When your vehicle speed is extremely low, less than approximately 2 mph (2km/h).
 - When an object other than a vehicle, such as a pedestrian, is in front.
 - When the FCM has detected a problem in the system.

⚠ WARNING

- When a vehicle suddenly cuts in front of your vehicle.
- When the vehicle in front is moving at a speed much lower than your vehicle’s speed.
- Braking function will not work in the following situations.
 - Your vehicle is driving at approximately 19 mph (30 km/h) or faster while the vehicle in front is stationary or moving extremely slow.
 - ASC is OFF.
- The forward collision warning function and/or the FCM braking function may not activate in certain situations. Some of these include:
 - When a vehicle cuts into your path at a close distance.
 - When a vehicle ahead is moving at low speed.
 - When a vehicle ahead is not completely in your path.
 - When a vehicle ahead is towing a trailer.
 - When a motorcycle or a bicycle is in front.
 - When a vehicle ahead is a truck loaded with freight that protrudes rearward from the cargo bed.
 - When the height of a vehicle ahead is extremely low or its road clearance is extremely high.

⚠ WARNING

- When driving on a road with alternating up and down steep slopes.
- When driving on a curve.
- When driving on a bumpy or rough road.
- When driving in a tunnel.
- When the system recognizes driver’s steering, accelerating, braking or gear shifting actions as evasive actions to avoid collision.
- When the rear of your vehicle is weighed down with the weight of passengers and luggage
- For up to two minutes after starting driving.
- In adverse weather conditions, such as rain, snow or fog.
- When the surface of the sensor is covered with dirt, snow and ice, etc.
- When a vehicle ahead or an oncoming vehicle is splashing water, snow or dirt.
- When the system recognizes driver’s steering or accelerating actions as evasive actions to avoid collision, FCM control and alarm functions may be canceled.
- In certain situations, though there is little or no risk of a collision, the FCM may activate. Examples include:
 - When overtaking a vehicle.
 - When driving on a curve.

⚠ WARNING

- When there is a road side object (B) that reflects the radar sensor signal, such as a road sign.

- When approaching a gate, a railroad crossing, an underpass, a narrow bridge, manhole lid or a speed bump.
- When driving under an overpass or pedestrian bridge.
- When driving in a narrow tunnel.
- When driving in a parking structure.
- When approaching a slope where the incline changes significantly.
- When trying to stop your vehicle very close to a vehicle or an object in front.
- When passing a vehicle or an object closely.

⚠ WARNING

- When a vehicle in the next lane becomes positioned directly in front of your vehicle due to winding road conditions.

- The FCM should be tuned off if any of following situations occur:
 - When the tires are not properly inflated.
 - When the emergency spare tire is used.
 - When your vehicle is towed or your vehicle tows another vehicle.
 - When your vehicle is carried on a truck.
 - When your vehicle is on a chassis dynamometer or free rollers.
 - When the area where the radar sensor is installed has been damaged or deformed.

⚠ CAUTION

- To maintain proper performance of the FCM;
 - Always clean the surface of the radar sensor.
 - Avoid impacting the radar sensor or its surrounding area.
 - Do not put a sticker on the radar sensor or its surrounding area.
 - Do not paint the radar sensor.

⚠ CAUTION

- Do not install a grill guard.
- Do not modify the radar sensor or its surrounding area.
- Always use tires of the same size, same type and same brand, and which have no significant wear differences.
- Do not modify the vehicle's suspensions.

FCM ON/OFF switch

N00577800045

This switch is used to turn on or off the FCM and also to select the distance which will trigger the forward collision warning function.

To turn on/off the FCM system

Every time the operation mode is turned to “ON”, the FCM will automatically be turned on.

To turn off the FCM, press and hold the FCM switch. A buzzer will sound and the “FCM OFF” message and  indicator will appear in the multi-information display.

To turn on the FCM again, press and hold the FCM switch. A buzzer will sound, the “FCM OFF” message and the  indicator will go off, and a current distance mode for the forward collision warning will be shown in the multi-information display.

To change forward collision warning distance

The distance to the vehicle ahead which triggers the forward collision warnings can be selected from two levels, “NEAR” or “FAR”. To change the distance mode, push the FCM ON/OFF switch. Every time the switch is pushed, the distance mode will be switched. The selected distance mode is shown on the information screen of the multi-information display.

When “NEAR” is selected

When “FAR” is selected

NOTE

- Actual distance which triggers the forward collision warnings will vary depending on your vehicle speed and the front vehicle speed. The distance will become longer when the vehicle speeds are higher.

NOTE

- The distance which will trigger the FCM braking function cannot be adjusted.

When a problem is detected

When the FCM system determines that its performance has been degraded, the forward collision warning function and the FCM braking function will become inoperative. This can occur when

- Foreign objects, such as dirt, snow or ice, adhere to the surface of the radar sensor.
- In adverse weather conditions, such as rain, snow, sand storms, etc.
- A front vehicle or an oncoming vehicle is splashing water, snow or dirt.
- Driving on a nonbusy road with a few vehicles and obstacles in front.
- The brake pads are overheating.

“FCM TEMPORARILY NOT AVAILABLE” message will appear and the “FCM OFF” indicator will be lit on the information screen of the multi-information display.

When the radar sensor performance returns, the FCM functions will resume operation.

5

NOTE

- The “FCM TEMPORARILY NOT AVAILABLE” message may temporarily appear on the information screen when the radar cannot detect a vehicle or object within range. This is not a malfunction. When a vehicle or an object comes within range, the FCM function will resume and the message will go off.

If the FCM detects a malfunction in the system, the “FCM!” and the “FCM SERVICE REQUIRED” message will appear, the “FCM OFF” indicator will be lit on the information screen of the multi-information display and the FCM will automatically be turned off. If the message remains even after the operation mode is tuned to “OFF” and then back to “ON”, please contact your authorized Mitsubishi Motors dealer.

General information

N0058090024

FCC ID:OAYARS3-B (for vehicles sold in the U.S.A)

IC: 4135A-ARS3B (for vehicles sold in the Canada)

This device complies with Part 15 of FCC Rules and Industry Canada licence-exempt RSS standard(s).

Operation is subject to the following two conditions.

- this device may not cause harmful interference received.
- this device must accept any interference received including interference that may cause undesired operation.

CAUTION

- Changes or modifications not expressly approved by the manufacturer for compliance could void the user’s authority to operate the equipment.

Lane Departure Warning System (LDW) (if so equipped)

N0057790033

The Lane Departure Warning system (LDW) is a driving aid system to help prevent unintentional lane departure. The LDW is designed to read lane markers by using a camera (A) under certain conditions. The LDW will give you both visual and audible

warnings when your vehicle is leaving or has left the lane.

⚠ WARNING

- Never rely solely on the LDW. The LDW is not a collision avoidance system and is not a substitute for your safe and careful driving.

⚠ WARNING

- Before using the LDW, read this entire section to understand the limitations of this system. Failure to follow instructions could result in an accident.

Turning on the LDW

N00578000028

Every time the operation mode is turned to “ON”, the LDW will automatically be turned on and the “LDW” indicator will appear on the information screen of the multi-information display,

Turning off the LDW

N00581000035

To turn off the LDW, press the LDW switch. The “LDW” indicator on the information screen of the multi-information display will then go out.

To return the LDW to “ON”, press the LDW switch again.

5

📖 NOTE

- When you set the operation mode to “OFF” with the system “OFF,” the system will be restored “ON.” (“LDW 1” mode) You can also select the “LDW 2” mode which makes always the LDW system in ‘OFF state’.

1. Press the LDW switch, and the system is placed in the ‘OFF state’.
2. Press and hold the LDW switch for more than approximately 10 seconds. The “LDW 2” indicator appears on the multi information display.
3. Press the LDW switch, and the “LDW” indicator on the top-right of the multi information display goes out.

To return to the “LDW 1” mode, put the system in ‘OFF state’, press and hold the LDW switch for more than approximately 10 seconds. The “LDW 1” indicator appears on the multi information display.

Operation of the LDW

N00581100023

The LDW, when turned ON, is capable of recognizing the lane in which your vehicle is travelling and issuing an audible warning when your vehicle begins to leave that travel lane. When operating, the “LDW” indicator on the multi-information display will be changed to  indicator (green). The LDW will not operate, however, and the “LDW” indicator will be appeared if any of following conditions have occurred:

- The vehicle speed is less than 38 mph (60 km/h).
- The turn signal lever is being operated or has been operated in the past 7 seconds.
- The hazard warning light is being operated or has been operated in the past 7 seconds.
- The brake pedal is being depressed.

Lane departure warning

N00581200037

While the “LDW” indicator in the information display is lit in green, if your vehicle is leaving or has left the lane, a buzzer will sound intermittently, “LANE DEPARTURE” will appear in the information display and the  indicator will be flashing in amber.

NOTE

- The warnings will not continue for more than 3 seconds, even if your vehicle continues leaving the lane.

WARNING

- **The LDW will not function when no lane marker exists, such as at an intersection or near a toll booth.**
- **The LDW may not be able to detect the lane correctly in the following situations and the LDW may not give warnings or may give false warnings:**
 - When lane markers are not clearly visible.
 - When the road surface is shiny.
 - When old lane markers remain on the road surface.
 - When the lane markers are double lines or the shape of the lane markers are complicated.

WARNING

- When driving in an extremely narrow lane.
- When the distance between your vehicle and a vehicle in front is short.
- When driving into the sun light.
- When driving on curves.
- When driving on bumpy roads.
- When driving in construction zones.
- When passing through a place where the brightness suddenly changes, such as at the entrance to or exit of a tunnel.
- When the headlights of an oncoming vehicle are very bright.
- When the rear of your vehicle is weighed down with the weight of passengers and luggage.
- When the headlights of your vehicle are not clean or are not properly aimed.
- When the front windshield is not clean.
- When the front windshield wipers do not clean the windshield properly.

CAUTION

- To maintain proper function of the LDW:
 - Always keep the windshield and the headlamps clean.
 - Do not put anything, such as a sticker, on the front windshield in front of the LDW camera
 - Avoid applying a shock or load to the LDW camera.

CAUTION

- Do not attempt to detach or disassemble the LDW camera.
- Use only Mitsubishi Motors genuine Parts when replacing the windshield wipers.

NOTE

- When driving conditions are not suitable to use the LDW, turn off the LDW.

System problem warning

N00578100029

If a problem occurs with the system, a visual warning specific to the type of the problem is given together with an audible alarm.

LDW camera is too hot

The alarm shown below is displayed if the system becomes temporarily unavailable due to the high temperature of the LDW camera. After the camera has cooled down, the system will automatically return to operation.

**NOTE**

- The warning message can be cleared temporarily by setting the LDW switch to "OFF."

LDW deactivation due to fault

If the LDW is deactivated due to a malfunction in the system, the alarm shown below is displayed. Contact your authorized Mitsubishi Motors dealer for inspection of the system.

**Tire pressure monitoring system**

N00530201540

The tire pressure monitoring system uses tire inflation pressure sensors (A) on the wheels to monitor the tire inflation pressures. The system only indicates when a tire is significantly under-inflated.

5

AG0001377

WARNING

- **The compact spare wheel does not have a tire inflation pressure sensor.** When the spare tire is used, the tire pressure monitoring system will not work properly. See an authorized Mitsubishi Motors dealer as soon as possible to replace or repair the original tire.

NOTE

- The tire pressure monitoring system is not a substitute for regularly checking tire inflation pressures.
Be sure to check the tire inflation pressures as described in “Tires” on page 9-15.
- The tire inflation pressure sensor (A) is installed in the illustrated location.
- On vehicles with Type 1 sensor which has the metallic air valve (B), replace grommet and washer (C) with a new one when the tire is replaced.
- On vehicles with Type 2 sensor which has the rubber air valve (D), replace rubber valve (D) with new one when the tire is replaced.

5

NOTE

For details, please contact your authorized Mitsubishi Motors dealer.

warning light normally illuminates and goes off a few seconds later.

If one or more of the vehicle tires (except for the spare tire) is significantly under-inflated, the warning light will remain illuminated while the ignition switch is in the “ON” position or the operation mode is put in ON. Refer to “If the warning light / display illuminates while driving” on page 5-122 and take the necessary measures.

NOTE

- In addition, the warning display is displayed on the information screen in the multi-information display.

Tire pressure monitoring system warning light / display

N00532701334

When the ignition switch is turned to the “ON” position or the operation mode is put in ON, the tire pressure monitoring system

⚠ CAUTION

- If the tire pressure monitoring system warning light does not illuminate when the ignition switch is turned to the “ON” position or the operation mode is put in ON, it means that the tire pressure monitoring system is not working properly. Have the system inspected by an authorized Mitsubishi Motors dealer.

In such situations, a malfunctioning of the system may be preventing the monitoring of the tire pressure. Avoid sudden braking, sharp turning and high-speed driving.

- If a malfunction is detected in the tire pressure monitoring system, the tire pressure monitoring system warning light will blink for approximately 1 minute and then remain continuously illuminated. The warning light will issue further warnings each time the engine is restarted as long as the malfunction exists.

Check to see whether the warning light goes off after few minutes driving.

If it then goes off during driving, there is no problem.

However, if the warning light does not go off, or if it blinks again when the engine is restarted, have the vehicle inspected by an authorized Mitsubishi Motors dealer.

In such situations, a malfunctioning of the system may be preventing the monitoring of the tire pressure. For safety reasons, when the warning light appears while driving, avoid sudden braking, sharp turning and high-speed driving.

📖 NOTE

- In addition, the warning display is displayed on the information screen in the multi-information display.

Each tire, including the spare (if provided), should be checked monthly when cold and inflated to the inflation pressure recommended by the vehicle manufacturer on the vehicle placard or tire inflation pressure label. (If your vehicle has tires of a different size than the size indicated on the vehicle placard or tire inflation pressure label, you should determine the proper tire inflation pressure for those tires.)

As an added safety feature, your vehicle has been equipped with a tire pressure monitoring system (TPMS) that illuminates a low tire pressure telltale when one or more of your tires is significantly under-inflated.

Accordingly, when the low tire pressure telltale illuminates, you should stop and check your tires as soon as possible, and inflate them to the proper pressure. Driving on a significantly under-inflated tire causes the tire to overheat and can lead to tire failure.

Under-inflation also reduces fuel efficiency and tire tread life, and may affect the vehicle's handling and stopping ability. Please note that the TPMS is not a substitute for proper tire maintenance, and it is the driver's responsibility to maintain correct tire pressure, even if under-inflation has not reached the level to trigger illumination of the TPMS low tire pressure telltale.

Your vehicle has also been equipped with a TPMS malfunction indicator to indicate when the system is not operating properly. The TPMS malfunction indicator is combined with the low tire pressure telltale.

When the system detects a malfunction, the telltale will flash for approximately one minute and then remain continuously illuminated. This sequence will continue upon subsequent vehicle start-ups as long as the malfunction exists.

When the malfunction indicator is illuminated, the system may not be able to detect or signal low tire pressure as intended.

TPMS malfunctions may occur for a variety of reasons, including the installation of replacement or alternate tires or wheels on the vehicle that prevent the TPMS from functioning properly. Always check the TPMS malfunction telltale after replacing one or more tires or wheels on your vehicle to ensure that the replacement or alternate tires and wheels

Tire pressure monitoring system

allow the TPMS to continue to function properly.

If the warning light / display illuminates while driving

N00532801511

5

1. If the tire pressure monitoring system warning light illuminates, avoiding hard braking, sharp steering maneuvers and high speeds. You should stop and adjust the tires to the proper inflation pressure as soon as possible. Adjust the spare tire at the same time. Refer to “Tires” on page 9-15.

NOTE

- In addition, the warning display is displayed on the information screen in the multi-information display.
- When inspecting or adjusting the tire pressure, do not apply excessive force to the valve stem to avoid breakage.
- After inspecting or adjusting the tire pressure, always reinstall the valve cap on the valve stem.
Without the valve cap, dirt or moisture could get into the valve, resulting in damage to the tire inflation pressure sensor.
- Do not use metal valve caps, which may cause a metal reaction, resulting in corrosion and damage of the tire inflation pressure sensors.

NOTE

- Once adjustments have been made, the warning light will go off after a few minutes of driving.

2. If the tire pressure monitoring system warning light remains illuminated after you have been driving for about 20 minutes after you adjust the tire inflation pressure, one or more of the tires may have a puncture. Inspect the tire and if it has a puncture, have it repaired by an authorized Mitsubishi Motors dealer as soon as possible.

WARNING

- **If the warning light / display illuminates while you are driving, avoid hard braking, sharp steering maneuvers and high speeds.
Driving with an under-inflated tire adversely affects vehicle performance and can result in an accident.**

CAUTION

- If a tire has a puncture, replace that tire with the spare tire. Driving on a punctured tire could lead to an accident.
- The warning light / display may not illuminate immediately in the event of a tire blow-out or rapid leak.

NOTE

- To avoid the risk of damage to the tire inflation pressure sensors, have any punctured tire repaired by an authorized Mitsubishi Motors dealer. If the tire repair is not done by an authorized Mitsubishi Motors dealer, it is not covered by your warranty.
- Do not use an aerosol puncture-repair spray on any tire.
Such a spray could damage the tire inflation pressure sensors.
Have any puncture repaired by an authorized Mitsubishi Motors dealer.

The tire pressure monitoring system may not work normally in the following circumstances:

- A wireless facility or device using the same frequency is near the vehicle.
- Snow or ice is stuck inside the fenders and/or on the wheels.
- The tire inflation pressure sensor's battery is dead.
- Wheels other than Mitsubishi genuine wheels are being used.
- Wheels that are not fitted with tire inflation pressure sensors are being used.
- Wheels whose ID codes are not memorized by the vehicle are used.
- Compact spare tire is fitted as a road wheel.

- A window tint that affects the radio wave signals is installed.

NOTE

- Tire inflation pressures vary with the ambient temperature. If the vehicle is subjected to large variations in ambient temperature, the tire inflation pressures may be under-inflated (causing the warning light / display come on) when the ambient temperature is relatively low. If the warning light / display comes on, adjust the tire inflation pressure.

Whenever the tires and wheels are replaced with new ones

N00532900081

If new wheels with new tire inflation pressure sensors are installed, their ID codes must be programmed into the tire pressure monitoring system. Have tire and wheel replacement performed by an authorized Mitsubishi Motors dealer to avoid the risk of damaging the tire inflation pressure sensors. If the wheel replacement is not done by an authorized Mitsubishi Motors dealer, it is not covered by your warranty.

CAUTION

- The use of non-genuine wheels will prevent the proper fit of the tire inflation pressure sensors, resulting air leakage or damage of the sensors.

Tire ID set change

N00584300026

In case that 2 sets of tire inflation pressure sensor ID are registered in the receiver, the valid tire ID set can be changed by following procedure.

[For vehicles equipped with color liquid crystal display meter]

1. Operate the multi information display switch to switch the information screen to the menu screen.
Refer to “Multi information display switch” on page 5-129.
Refer to “Changing the function settings” on page 5-140.
2. Lightly press the multi information display switch to select “ 1 - 2” (tire ID set change).

3. Hold down the multi information display switch for about 3 seconds or more. The setting changes to the selected tire ID set.

4. The valid tire ID set is changed, and the number of the tire pressure monitoring system (TPMS) SET indicator is changed.

NOTE

- Each time this procedure is done, the tire ID set is changed. (1 - 2 - 1 - 2 ...)
- The tire ID set is NOT changed, in case that only 1 set of ID is registered.

[For vehicles equipped with mono-color liquid crystal display meter]

1. Transit the display by multi information display switch until the tire pressure monitoring system (TPMS) SET indicator is displayed.

Rear-view camera (if so equipped)

2. Hold down the multi information display switch for 10 seconds or more. (A beep is heard.)

(Although the reset execution starts at holding down the switch for 3 seconds, keep holding down the switch continuously.)

5

3. The valid tire ID set is changed, and the number of the tire pressure monitoring system (TPMS) SET indicator is changed.

NOTE

- Each time this procedure is done, the tire ID set is changed. (1 - 2 - 1 - 2 ...)
- The tire ID set is NOT changed, in case that only 1 set of ID is registered.

General information

N00533001233

Your tire pressure monitoring system operates on a radio frequency subject to Federal Communications Commission (FCC) Rules (For vehicles sold in U.S.A.) and Industry Canada Rules (For vehicles sold in Canada). This device complies with part 15 of FCC Rules and Industry Canada licence-exempt RSS standard(s).

Operation is subject to the following two conditions.

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

CAUTION

- Changes or modifications not expressly approved by the manufacturer for compliance could void the user's authority to operate the equipment.

Rear-view camera (if so equipped)

N00546201213

When the selector lever is in the “R” (REVERSE) position with the ignition switch in the “ON” position, or the operation mode is put in ON, the rear-view image will be displayed on the screen of the Mitsubishi Multi-Communication System or the DISPLAY AUDIO.

When the selector lever is shifted out of the “R” (REVERSE) position, the rear-view image will go off.

WARNING

- Never rely solely on the rear-view camera to clear the area behind your vehicle. Always check visually behind and all around your vehicle for persons, animals, obstructions or other vehicles. Failure to do so can result in vehicle damage, serious injury or death.
- The rear-view camera is an aid system for backing up, but it is not a substitute for your visual confirmation.
- The view on the screen is limited, and objects outside the view, such as under the bumper or around either corner of the bumper end, cannot be seen on the screen.

Location of rear-view camera

The rear-view camera (A) is in the liftgate, at the left side of the liftgate handle.

AJA109037

CAUTION

- If the camera lens gets dirty, a clear image cannot be obtained. As necessary, rinse the lens with clean water and gently wipe with a clean, soft cloth.
- To avoid damaging the camera;
 - Do not rub the cover excessively or polish it by using an abrasive compound.
 - Do not disassemble the camera.
 - Do not splash hot water directly on the lens.
 - Do not spray the camera and its surroundings with high-pressure water.
 - Make sure that the liftgate is securely closed when backing up.

Reference lines on the screen

Reference lines and upper surface of the rear bumper (A) are displayed on the screen.

- Red line (B) indicates approximately 20 inches (50 cm) behind the rear bumper.
- Two Green lines (C) indicate approximately 8 inches (20 cm) outside of the vehicle body.
- Short transverse lines (1 to 3) indicate distance from the rear bumper.

- 1: Approximately at the rear edge of the rear bumper
- 2: Approximately 39 inches (100 cm)
- 3: Approximately 79 inches (200 cm)

CAUTION

- The rear-view camera uses a wide-angle lens. As a result, images and distances shown on the screen are not exact.
- Actual distance may be different from distance indicated by the lines on the screen, depending on the loading condition of the vehicle and road surface condition. The reference lines for distance and vehicle width are based on a level, flat road surface. In the following cases, objects shown on the screen will appear to be farther off than they actually are.
 - When the rear of the vehicle is weighed down with the weight of passengers and luggage in the vehicle. (Case 1)
 - When there is an upward slope at the back. (Case2)

Case 1

A- Actual objects
B- Objects shown on the screen

CAUTION

- The reference lines for distance and vehicle width are intended to indicate the distance to a flat object such as a level, flat road surface. They may not indicate correct distance depending on the shape of an obstacle. For example, when there is an object behind the vehicle that has upper sections projecting in the direction of the vehicle, the reference lines on the screen will indicate that point A is the farthest point and point B is the closest point to the vehicle. In reality, point A and B are actually the same distance from the vehicle, and point C is farther off than point A and B.

NOTE

- Mirror image is displayed on the screen.
- Monitor brightness is adjusted automatically by sensors.
- On vehicles equipped with Mitsubishi Multi-Communication System, it is possible to change the display language of the screen. For details, please refer to the separated owner's manual for "Mitsubishi Multi-Communication System".
- Under certain circumstances, it may become difficult to see an image on the screen, even when the system is functioning correctly.
 - In a dark area, such as at night.
 - When water drops or condensation are on the lens.
 - When sun light or headlights shine directly into the lens.

Instrument cluster

N00519001402

1- Tachometer → P.5-127

- 2- Multi Information display (Type 1:Color liquid crystal display type) → P.5-128
- Information screen display list (Type 1) → P.5-155
- Multi Information display (Type 2:Mono-color liquid crystal display type) → P.5-146
- 3- Speedometer →P.5-127
- 4- Rheostat illumination button (Type 1) → P.5-127
- 5- Multi information display switch (Type 2) → P.5-147

Speedometer

N00519101272

The speedometer shows the vehicle speed in miles per hour (mph) or kilometers per hour (km/h).

Tachometer

N00519201303

The tachometer shows engine revolutions per minute. This allows the driver to determine the most efficient selector position and engine speed combinations. This gauge also assists in evaluating engine performance.

CAUTION

- The red zone indicates an engine speed beyond the range of safe operation.

Select the correct selector position to control the engine speed so that the tachometer indicator does not enter the red zone.

5

Meter illumination control (Vehicle equipped with the multi information display - Type 1)

N00554901248

Each time you press this button, there is a sound and the brightness of the instruments changes.

- 1- Brightness level
- 2- Rheostat illumination button

NOTE

- You can adjust to 8 different levels for when the front side-marker lights are illuminated and when they are not.
 - If the vehicle is equipped with the automatic light control, the light switch is in a position other than the “OFF” position and it is sufficiently dark outside the vehicle, the meter illumination switches automatically to the adjusted brightness.
 - The brightness level of the instruments is stored when the ignition switch is turned to the “OFF” or “LOCK” position or the operation mode is put in OFF.
 - If you press and hold the button for longer than about 2 second when the front side-marker lights are illuminated, the brightness level changes to the maximum level. Pressing and holding the button for longer than about 2 second again returns the brightness level to the previous level.
- On vehicles equipped with Mitsubishi Multi-Communication System, the map screen color of Mitsubishi Multi-Communication System may not be switched to nighttime setting when the meter illumination brightness level is at the maximum.

Multi Information display - Type 1

N00555001347

The multi information display displays warnings, the odometer, trip odometer, service reminder, engine coolant temperature, fuel remaining, outside temperature, selector lever position, average and momentary fuel consumption, driving range, average speed, etc.

It is also possible to change elements such as the language and units used on the multi information display.

[With ignition switch or operation mode in OFF]

AJA100874

- 1-  Warning display screen → P.5-134
- 2- Information screen → P.5-130
Interrupt display screen → P.5-133

- 3- Door ajar warning display screen → P.5-134
- 4- Odometer → P.5-135

[With ignition switch or operation mode in ON]

5

- 1- Drive mode indicator display screen (if so equipped) → P.5-80
- 2- S-AWC drive mode display screen (if so equipped) → P.5-83
- 3-  Warning display screen → P.5-134
- 4- Forward Collision Mitigation System (FCM) OFF display screen (if so equipped) → P.5-111
- 5- Lane Departure Warning (LDW) display screen (if so equipped) → P.5-116
- 6- ECO mode indicator display screen → P.5-184
- 7- Information screen → P.5-130
- 8- Selector lever position display → P.5-66, 5-73
- 9- Engine coolant temperature display → P.5-134
- 10- Odometer → P.5-135
- 11- Cruise control display screen (if so equipped) → P.5-96
- 12- Adaptive Cruise Control System (ACC) display screen (if so equipped) → P.5-100
- 13- ECO indicator → P.5-139
- 14- Fuel remaining display screen → P.5-135
- 15- Outside temperature display screen → P.5-135

NOTE

- The fuel units, outside temperature units, display language, and other settings can be changed. Refer to “Changing the function settings” on page 5-140.

Multi information display switch

N00555101205

Each time the multi information display switch is operated, the buzzer sounds and the multi information display changes between information such as warnings, trip odometer,

Multi Information display - Type 1

average and momentary fuel consumption, distance range, etc.

It is also possible to change elements such as the language and units used on the multi information display by operating the multi information display switch.

5

Information screen (With the ignition switch in “OFF” or “LOCK” position or the operation mode in OFF)

N00555301177

Each time you lightly press the multi information display switch, the display screen switches in the following order.

AJ1100159

5-130 Features and controls

- 1- Trip odometer **A** → P.5-135
- 2- Trip odometer **B** → P.5-135
- 3- ECO score display → P.5-139
- 4- Service reminder → P.5-136
- 5- Redisplay of a warning display screen → P.5-134

Information screen (With the ignition switch is turned from the “OFF” or “LOCK” position to the “ON” position or the operation mode is changed from OFF to ON)

N0055801202

When the ignition switch is turned to the “ON” position or the operation mode is put in ON, the display screen switches in the following order.

*: When the inspection time has arrived

- 1- Screen when the ignition switch or the operation mode is OFF
- 2- System check screen → P.5-137
- 3- Screen when the ignition switch or the operation mode is ON
- 4- Service reminder → P.5-136

Information screen (With the ignition switch or the operation mode in ON)

N00556201232

Each time you lightly press the multi information display switch, the display screen switches in the following order.

AJ1100175

*: When there is a warning display

1- Trip odometer **A** → P.5-135

2- Trip odometer **B** → P.5-135

3- Driving range display → P.5-138

ECO drive assist display → P.5-139

4- Average fuel consumption display

→ P.5-138

ECO drive assist display → P.5-139

5- Average speed display → P.5-138

Momentary fuel consumption display → P.5-139

6- ECO score display → P.5-139

7- S-AWC operation display (if so equipped) → P.5-84

8- Service reminder → P.5-136

9- Function setting screen → P.5-140

10- Redisplay of a warning display screen → P.5-134

NOTE

- While driving, the service reminder are not displayed even if you operate the multi information display switch. Always stop the vehicle in a safe place before operating.
- While driving, the function setting screen is not displayed even if you operate the multi information display switch. Always park the vehicle in a safe place, firmly apply the parking brake and put the selector lever into the “P” (PARK) position before operating the function setting screen.
Refer to “Changing the function settings” on page 5-140.
- When there is information to be announced, such as a system fault, the tone sounds and the screen display is switched.
Refer to “Interrupt display screen” on page 5-133.

Interrupt display screen

N00556301217

Warning display

When there is information to be announced, such as a system fault, the tone sounds and the information screen is switched to the warning display screen.

Refer to the warning list and take the necessary measures.

Refer to “Warning display list” on page 5-156.

When the cause of the warning display is eliminated, the warning display goes out automatically.

■ Returning to the display screen from before the warning display

Even if the cause of the warning display is not eliminated, you can return to the screen that was displayed before the warning display.

If you press the multi information display switch, the display screen switches to the screen display from before the warning and the  warning (A) is displayed.

NOTE

- Warning display screens with a “” or “” mark displayed in the upper right of the screen can be switched. If you want to switch the display, press the multi information display switch as follows.
 - “” : Press lightly.
 - “” : Press for about 2 seconds or more.

5

Redisplay of a warning display screen

N00579600021

When the  warning is displayed, if you lightly press the multi information display switch a few times, the warning display screen you switched from is redisplayed.

Other interrupt displays

N00579700022

The operation status of each system is displayed on the information screen. For further details, refer to the appropriate page in the warning display list. Refer to “Other interrupt displays” on page 5-167.

warning display screen

N00555201222

This is displayed when you press the multi information display switch and return from the warning display screen to the previous screen.

This mark is also displayed if there is another warning other than the one displayed. When the cause of the warning display is eliminated, the  warning goes out automatically.

NOTE

- When the  warning is displayed, the warning display screen can be redisplayed on the information screen. Refer to “Information screen (with the ignition switch in “OFF” or “LOCK” position or the operation mode in OFF)” on page 5-130. Refer to “Information screen (with the ignition switch or the operation mode in ON)” on page 5-132.

Door ajar warning display screen

N00529700014

If any of the doors or the liftgate is not completely closed, this displays the open door or liftgate.

If the speed increases to about 5 mph (8 km/h) or higher with a door ajar, a tone will sound 4 times to inform you that a door is ajar.

CAUTION

- Always make sure that the warning display goes out before beginning to drive.

Engine coolant temperature display

N00578200020

Shows the engine coolant temperature.

If the coolant becomes hot, “” will blink. Pay careful attention to the engine coolant temperature display while you are driving.

CAUTION

- If the engine is overheating, "E" will blink. In this case, the bar graph is on the red zone. Immediately park the vehicle in a safe place and take the required measures. Refer to "Engine overheating" on page 8-4.

Fuel remaining display screen

N00556601180

Shows the amount of fuel remaining.

AJA102982

F- Full
E- Empty

CAUTION

- Running out of gas could damage the catalytic converter. If the warning display appears, refuel as soon as possible.

NOTE

- It may take several seconds to stabilize the display after refilling the tank.
- If fuel is added with the ignition switch or the operation mode in ON, the remaining fuel display may incorrectly indicate the fuel level.
- The arrow (A) indicates that the fuel tank filler door is located on the left side of the vehicle. (Refer to "Filling the fuel tank" on page 3-3.)

Fuel remaining warning display

N00578300021

When the fuel level runs low, the information screen switches to the interrupt display of the fuel remaining warning display and the mark (B) on the fuel remaining display flashes. If the warning display appears, refuel as soon as possible.

AJA100920

NOTE

- On hills or curves, the display may be incorrect due to the movement of fuel in the tank.

Outside temperature display screen

N00556501118

Shows the temperature outside the vehicle.

NOTE

- The display setting can be changed to the preferred units (°F or °C). Refer to "Changing the function settings" on page 5-140.
- Depending on factors such as the driving conditions, the displayed temperature may vary from the actual outside temperature.

Odometer

N00574901026

Shows the total distance traveled.

Trip odometer

N00575001024

Shows the distance traveled between two points.

Multi Information display - Type 1

Usage examples for trip odometer **A**, trip odometer **B**

It is possible to measure two currently traveled distances, from home using trip odometer **A** and from a particular point on the way using trip odometer **B**.

5

To reset the trip odometer

To return the display to 0, hold down the multi information display switch for about 2 seconds or more. Only the currently displayed value will be reset.

Example

If trip odometer **A** is displayed, only trip odometer **A** will be reset.

- Both trip odometers **A** and **B** can count up to 9999.9 miles/kilometers. When a trip odometer goes past 9999.9 miles/kilometers, it returns to 0.0 miles/kilometers.
- When disconnecting the battery terminal, the memories of trip odometer displays **A** and **B** are cleared, and their displays return to “0.0 miles/kilometers”.

Service reminder

N00556701237

Displays the approximate time until the next recommended periodic inspection. “---” is displayed when the inspection time has arrived.

NOTE

- The service reminder time can be modified by an authorized Mitsubishi Motors dealer, to adjust for severe usage, etc. Refer to “Severe maintenance schedule” in your vehicle’s Warranty and Maintenance Manual. For further information, please contact your authorized Mitsubishi Motors dealer.

1. Shows the time until the next periodic inspection.

NOTE

- Shows the distance in units of 100 miles (100 km) and the time in units of 1 month.

2. This informs you that a periodic inspection is due. Contact an authorized Mitsubishi Motors dealer or a repair facility of your choice to have the system checked.

At that time, when the ignition switch is switched from the “OFF” or “LOCK” position to the “ON” position or the operation mode is changed from OFF to ON, the warning display is displayed for a few seconds on the information screen.

3. After your vehicle is inspected at an authorized Mitsubishi Motors dealer, it displays the time until the next periodic inspection.

To reset

The “---” display can be reset while the ignition switch or the operation mode is in OFF.

When the display is reset, the time until the next periodic inspection is displayed and the warning display is no longer displayed when the ignition switch is switched from the “OFF” or “LOCK” position to the “ON” position or the operation mode is changed from OFF to ON.

1. When you lightly press the multi information display switch, the information screen switches to the service reminder display screen.

2. Press and hold the multi information display switch (for about 2 seconds or more) to display “” and make it flash. (If there is no operation for about 10 seconds with this indicator flashing, the display returns to the previous screen.)

3. With this indicator flashing, if you lightly press the multi information display switch, the screen switches from “---” to “CLEAR”. After that, the time until the next periodic inspection is shown.

CAUTION

- The customer is responsible for making sure that regular inspections and maintenance and periodic inspections and maintenance are performed. Inspections and maintenance must be performed to prevent accidents and malfunctions.

NOTE

- The “---” display cannot be reset while the ignition switch or the operation mode is in ON.

NOTE

- When “---” is displayed, after a certain distance and a certain period of time, the display is reset and the time until the next periodic inspection is displayed.
- If you accidentally reset the display, consult an authorized Mitsubishi Motors dealer for assistance.

5

System check screen

N00578400022

When the ignition switch is turned to the “ON” position or the operation mode is put in ON, the system check screen is displayed for about 4 seconds. If there is no fault, the information screen is displayed. If there is a fault, the screen changes to warning display. Refer to “Warning display list” on page 5-156.

NOTE

- The system check screen display varies depending on your equipment.

Driving range display

N00575201026

Shows the approximate driving range (how many more miles or kilometers you can drive). When this driving range falls below 30 miles (50 km), “---” is displayed. Refuel as soon as possible.

NOTE

- The driving range is determined based on the fuel consumption data. This may vary depending on the driving conditions and habits. Treat the distance displayed as just a rough guideline.
- When you refuel, the driving range display is updated.
However, if you only add a small amount of fuel, the correct value will not be displayed. Fill to a full tank whenever possible.
- When your vehicle is stopped on an extremely steep hill, the driving range value may, change. This is due to the movement of fuel in the tank and does not indicate any breakdown.
- The display setting can be changed to the preferred units (miles or km).
Refer to “Changing the function settings” on page 5-140.

Average fuel consumption display

N00575301027

This displays the average fuel consumption from the last reset to the present. There are 2 types of mode settings of manual reset and automatic reset. Refer to “Changing the reset mode for average fuel consumption and average speed” on page 5-141.

For information on how to change the average fuel consumption display setting, refer to “Changing the function settings” on page 5-140.

NOTE

- The average fuel consumption display can be reset separately in both auto reset mode and manual reset mode.
- “---” is displayed when the average fuel consumption cannot be measured.
- The initial (default) setting is “Auto reset mode”.
- Average fuel consumption may vary depending on the driving conditions (road conditions, how you drive, etc.) The actual fuel consumption may differ from the fuel consumption displayed, so treat the fuel consumption displayed as just a rough guideline.

NOTE

- Disconnecting the battery cable will erase from memory the manual reset mode or auto reset mode setting for the average fuel consumption display.
- The display setting can be changed to the preferred units {mpg (US), mpg (UK), L/100km or km/L}.
Refer to “Changing the function settings” on page 5-140.

Average speed display

N00578500023

This displays the average speed from the last reset to the present.

There are 2 types of mode setting of manual reset and automatic reset.

Refer to “Changing the reset mode for average fuel consumption and average speed” on page 5-141.

For the method for changing the average speed display setting, refer to “Changing the function settings” on page 5-140.

NOTE

- The average speed display can be reset separately in both auto reset mode and manual reset mode.
- “---” is displayed when the average speed cannot be measured.
- The initial (default) setting is “Auto reset mode”.

NOTE

- The display setting can be changed to the preferred units (mph or km/h). Refer to “Changing the function settings” on page 5-140.
- Disconnecting the battery cable will erase from memory the manual reset mode or auto reset mode setting for the average speed display.

Momentary fuel consumption display

N00578600024

While driving, the momentary fuel consumption is shown with a bar graph.

The “” mark in the momentary fuel gauge shows the average fuel consumption.

When the momentary fuel consumption surpasses the average fuel consumption, the momentary fuel consumption is displayed with a green bar graph.

Be conscious of maintaining the momentary fuel consumption above the average fuel consumption, it can help you drive with the better fuel consumption.

NOTE

- When the momentary fuel consumption cannot be measured, a bar graph is not shown.

NOTE

- The display setting can be changed to the preferred units {mpg (US), mpg (UK), L/100km or km/L}. Refer to “Changing the function settings” on page 5-140.
- It is possible to cancel the green bar graph. Refer to “Changing the function settings” on page 5-140.

ECO indicator

N00568701032

This indicator will be displayed when fuel-efficient driving is achieved.

ECO Drive Assist

N00578700038

This function displays how fuel-efficiently you are driving under different driving conditions.

The ECO drive assist display will change as follows if you do fuel-efficient driving using the accelerator in a way well matched with the vehicle speed.

**NOTE**

- The ECO drive assist is displayed only when vehicle is driven with the selector lever in the “D” (DRIVE) position or when vehicle is driven in the sport mode (for vehicles equipped with sportronic steering wheel paddle shifter).

ECO Score

N00578800026

ECO score indicates the points you have scored on fuel-efficient driving by the number of leaves as follows:

[When the ignition switch or the operation mode is ON]

The display shows the score you achieved in the last several minutes.

Multi Information display - Type 1

[When the ignition switch is turned to the “OFF” or “LOCK” position or the operation mode is put in OFF]

The display shows the overall ECO score the function has counted from the time when the ignition switch is turned to the “ON” position to the time when it is turned to the “OFF” or “LOCK” or “ACC” position, or from the time when the operation mode is set to “ON” to the time when it is set to “OFF”.

5

Changing the function settings

N00556801238

1. Park your vehicle in a safe place.
Fully apply the parking brake and move the selector lever into the “P” (PARK) position.
2. When you lightly press the multi information meter switch, the information screen switches to the function setting screen.

Refer to “Information screen” on page 5-132.

CAUTION

- For safety, stop the vehicle before operating. While driving, even if you operate the multi information display switch, the function setting screen is not displayed.

3. Press and hold the multi information display switch (for about 2 seconds or more) to switch from the setting mode screen to the menu screen.

NOTE

- To return the menu screen to the function setting screen, press and hold the multi information display switch (for about 2 seconds or more).
- If no operations are made within about 30 seconds of the menu screen being displayed, the display returns to the function setting screen.

4. Select the item to change on the menu screen and change to the desired setting. For further details on the operation methods, refer to the following sections.

Refer to “Changing the reset mode for average fuel consumption and average speed” on page 5-141.

Refer to “Changing the fuel consumption display unit” on page 5-142.

Refer to “Changing the temperature unit” on page 5-143.

Refer to “Changing the display language” on page 5-143.

Refer to “Changing the language on Mitsubishi Multi-Communication System or Bluetooth® 2.0 interface to match the multi information display (if so equipped)” on page 5-144.

Refer to “Operation sound setting” on page 5-144.

Refer to “Changing the time until “REST REMINDER” is displayed” on page 5-145.

Refer to “Changing the turn signal sound” on page 5-145.

Refer to “Changing the momentary fuel consumption display” on page 5-145.

Refer to “Tire ID set change” on page 5-123.

Refer to “Returning to the factory settings” on page 5-146.

NOTE

- If the battery is disconnected, these function settings are reset from memory and is automatically to the factory settings (except the tire ID set).
- You can not select an item that is displayed dimly on the menu.

Changing the reset mode for average fuel consumption and average speed

N00557001240

You can change the mode condition for the average fuel consumption and average speed display to “Auto reset” or “Manual reset.”

1. Press and hold the multi information display switch (for about 2 seconds or more) to switch from the setting mode screen to the menu screen.
Refer to “Changing the function settings” on page 5-140.
2. Lightly press the multi information display switch to select “AVG” (average fuel consumption and average speed setting).

3. Press and hold the multi information display switch (for about 2 seconds or more) to switch in sequence from A or 1 (Auto reset) → M, 2 or P (Manual reset) → A or 1 (Auto reset).
The setting is changed to the selected reset condition.

Manual reset mode

- If you press and hold the multi information meter switch when the average fuel consumption and average speed are displayed, these calculations will be reset to zero.
- When the following operation is performed, the mode setting changes automatically from manual to auto.

[Except for vehicles equipped with the F.A.S.T.-key]

Turn the ignition switch to the “ON” position from the “ACC”, “LOCK” or “OFF” position.

[For vehicles equipped with the F.A.S.T.-key]

Change the operation mode to ON from ACC or OFF.

Auto reset mode

- When the average fuel consumption and average speed are being displayed, if you hold down the multi information display switch, these calculations will be reset to zero.

- When the engine switch or the operation mode is in the following conditions, the average fuel consumption display and the average speed display will automatically reset.

[Except for vehicles equipped with the F.A.S.T.-key]

The ignition switch has been set to the “ACC”, “LOCK” or “OFF” position for about 4 hours or more.

[For vehicles equipped with the F.A.S.T.-key]

The operation mode has been in ACC or OFF for about 4 hours or more.

5

NOTE

- The average fuel consumption display and average speed display can be reset separately in both auto reset mode and manual reset mode.
- Disconnecting the battery cable will erase from memory the manual reset mode or auto reset mode setting for the average speed display and average fuel consumption display.
- The initial (default) setting is “Auto reset mode”.

Changing the fuel consumption display unit

N00557101166

The fuel consumption display unit can be changed. The distance, speed, and amount units are also changed to match the selected fuel consumption unit.

- Press and hold the multi information display switch (for about 2 seconds or more) to change from the setting mode screen to the menu screen. Refer to “Changing the function settings” on page 5-140.
- Lightly press the multi information display switch to select “AVG UNIT” (fuel consumption display unit setting).

AJA100991

- Press and hold the multi information display switch (for about 2 seconds or more) to display “AVG UNIT” (fuel consumption display unit setting).

- Lightly press the multi information display switch to switch to select the units.
- Press and hold the multi information display switch (for about 2 seconds or more) to change the setting to the selected unit.

NOTE

- The display units for the driving range, the average fuel consumption, the average speed and the momentary fuel consumption are changed, but the units for the indicating needle (speedometer), the odometer and the trip odometer will remain unchanged.
- If the battery is disconnected, the memory of the unit setting is erased and is automatically set to {mpg (US) or L/100 km}.

The distance and speed units are also changed in the following combinations to match the selected fuel consumption unit.

Fuel economy	Distance (driving range)	Speed (average speed)
mpg (US)	mile (s)	mph
mpg (UK)	mile (s)	mph
km /L	km	km /h
L /100 km	km	km /h

Changing the temperature unit

N00557201154

The temperature display unit can be switched.

1. Press and hold the multi information display switch (for about 2 seconds or more) to switch from the setting mode screen to the menu screen.
Refer to “Changing the function settings” on page 5-140.
2. Lightly press the multi information display switch to select “” (temperature unit setting).
3. Press and hold the multi information display switch (for about 2 seconds or more) to switch in from °C to °F, or from °F to °C.
The setting is changed to the selected temperature unit.

NOTE

- The temperature value on air conditioner panel is switched in conjunction with outside temperature display unit of the multi information display.
However, “°F” or “°C” are not shown to temperature display of an air conditioner.

NOTE

- On vehicles equipped with Mitsubishi Multi-Communication System, the temperature value of the air conditioner screen of Mitsubishi Multi-Communication System is switched in conjunction with outside temperature display unit of the multi information display.
However, “°F” or “°C” are not shown to the air conditioner screen.
- If the battery is disconnected, the memory of the unit setting is erased and is automatically set to °F (°C).

Changing the display language

N00557301184

The language of the multi information display can be changed.

1. Press and hold the multi information display switch (for about 2 seconds or more) to change from the setting mode screen to the menu screen.
Refer to “Changing the function settings” on page 5-140.
2. Lightly press the multi information display switch to select “LANGUAGE” (language setting).

3. Press and hold the multi information display switch (for about 2 seconds or more) to display “LANGUAGE” (language setting).
4. Lightly press the multi information display switch to select the desired language.
5. Press and hold the multi information display switch (for about 2 seconds or more) to change the setting to the selected language.

NOTE

- If the battery is disconnected, the memory of the language setting is erased and is automatically set to ENGLISH.
- If “---” is selected in the language setting, a warning message is not displayed when there is a warning display or interrupt display.

Changing the language on Mitsubishi Multi-Communication System or Bluetooth® 2.0 interface to match the multi information display

N00529801302

5 The language used in Mitsubishi Multi-Communication System (if so equipped) or Bluetooth® 2.0 interface (if so equipped) can be changed automatically to the same language as that shown in the multi information display.

1. Press and hold the multi information display switch (for about 2 seconds or more) to switch from the setting mode screen to the menu screen. Refer to “Changing the function settings” on page 5-140.
2. Lightly press the multi information display switch to select “” (language cooperative control).

AJA101015

3. Press and hold the multi information display switch to switch from A/1 (language cooperation: enabled) to M/2/P (language cooperation: disabled), or from M/2/P to A/1. The setting is changed to the selected condition.

NOTE

- If the battery is disconnected, the language cooperative control is automatically set to “A or 1” (language cooperation: enabled).
- The language cooperation setting can be switched in the following manner.

NOTE

- When “A or 1” (language cooperation: enabled) has been selected, the language for Mitsubishi Multi-Communication System (if so equipped) or Bluetooth® 2.0 interface (if so equipped) is automatically changed to the language selected for the multi information display. However, this changing function may not work depending on the language selected for the multi information display.
- When “M, 2 or P” (language cooperation: disabled) has been selected, the language for Mitsubishi Multi-Communication System (if so equipped) or Bluetooth® 2.0 interface (if so equipped) is not automatically changed to match the language selected for the multi information display.
- The language on the audio system’s display does not automatically change when you select A or 1 (language cooperation: enabled) in the language cooperation control.

Operation sound setting

N00557401156

You can turn off the operation sounds of the multi information display switch and rheostat illumination button.

1. Press and hold the multi information display switch (for about 2 seconds or more) to switch from the setting mode screen to the menu screen.

Refer to “Changing the function settings” on page 5-140.

2. Lightly press the multi information display switch to select “” (operation sound setting).
3. Press and hold the multi information display switch (for about 2 seconds or more) to switch from ON (operation sound on) to OFF (operation sound off), or from OFF to ON.

The setting is changed to the selected condition.

NOTE

- If the battery is disconnected, the memory of the operation sound setting is erased and is automatically set to “ON” (operation sound on).
- The operation sound setting only deactivates the operation sound of the multi information display switch and rheostat illumination button. The warning display and other sounds cannot be deactivated.

Changing the time until “REST REMINDER” is displayed

N00557501160

The time until the display appears can be changed.

1. Press and hold the multi information display switch (for about 2 seconds or more) to switch from the setting mode screen to the menu screen.
Refer to “Changing the function settings” on page 5-140.
2. Lightly press the multi information display switch to select “ALARM” (rest time setting).
3. Press and hold the multi information display switch (for about 2 seconds or more) to display “ALARM” (rest time setting).
4. Lightly press the multi information display switch to select the time until the display appears.
5. Press and hold the multi information display switch (for about 2 seconds or more) to change the setting to the selected time.

NOTE

- If the battery is disconnected, the memory of the unit setting is erased and is automatically set to the “OFF”.
- The drive time is reset when the ignition switch is in the “LOCK” or “OFF” position or the operation mode is in OFF.

Changing the turn signal sound

N00563501080

It is possible to change the turn signal sound.

1. Press and hold the multi information display switch (for about 2 seconds or more) to switch from the setting mode screen to the menu screen.
Refer to “Changing the function settings” on page 5-140.
2. Lightly press the multi information display switch to select  (changing the turn signal sound)
3. Press and hold the multi information display switch (for about 2 seconds or more) to switch from 1 (turn-signal sound 1) to 2 (turn-signal sound 2), or from 2 to 1.
The setting changes to the selected turn signal sound.

Changing the momentary fuel consumption display

N00563601049

It is possible to change the bar graph setting of the momentary fuel consumption display.

1. Press and hold the multi information display switch (for about 2 seconds or more) to switch from the setting mode screen to the menu screen.
Refer to “Changing the function settings” on page 5-140.
2. Lightly press the multi information display switch to select  (changing the momentary fuel consumption display)

Multi Information display - Type 2

- Press and hold the multi information display switch (for about 2 seconds or more) to switch from ON (with the green bar graph) to OFF (without the green bar graph), or from OFF to ON.

The setting changes to the selected bar graph setting.

5

Returning to the factory settings

N00557601217

Many of the function settings can be returned to their factory settings.

- Press and hold the multi information display switch (for about 2 seconds or more) to switch from the setting mode screen to the menu screen.

Refer to “Changing the function settings” on page 5-140.

- Lightly press the multi information display switch to select “RESET” (return to the factory settings).
- Press and hold the multi information display switch (for about 5 seconds or more), the buzzer sounds and all of the function settings are returned to the factory settings.

NOTE

- The factory settings are as follows.

NOTE

- Average fuel consumption and average speed reset mode: A (Auto reset)
- Fuel consumption display unit: mpg (US) or (L/100 km)
- Temperature unit: °F (Fahrenheit) or {°C (Celsius)}
- Display language: ENGLISH
- Cooperative language setting: A (language cooperation: enabled)
- Operation sounds: ON (Operation sound on)
- “REST REMINDER” display: OFF
- Turn signal sound: Turn signal sound 1
- Momentary fuel consumption with the green bar graph: ON
- The tire ID set cannot be returned to the factory settings.

Multi Information display - Type 2

N00555001291

The multi information display displays the odometer, trip odometer, service reminder, fuel remaining, outside temperature, selector lever position, average fuel consumption, driving range, etc.

It is also possible to change elements such as the units used on the multi information display.

AJA100816

- Frozen road warning → P.5-149
- Information display → P.5-147
- Selector lever position display → P.5-66, 5-73
- Service reminder → P.5-150
- Fuel remaining display → P.5-150

NOTE

- When the ignition switch is in the “OFF” position, the selector lever position display, fuel remaining display and frozen road warning are not displayed.

Information display

Each time you lightly press the multi information display switch (A), the display switches in the following order.

AJ1101446

5

- | | |
|---|---|
| 1- Odometer | 6- Average fuel consumption display → P.5-149 |
| 2- Trip odometer A | 7- Outside temperature display → P.5-149 |
| 3- Trip odometer B | 8- Service reminder (distance) → P.5-150 |
| 4- Meter illumination control → P.5-148 | 9- Service reminder (month) → P.5-150 |
| 5- Driving range display → P.5-148 | 10- Tire pressure monitoring system display → P.5-123 |

NOTE

- When the ignition switch is in the “OFF” position, the driving range display, average fuel consumption display, outside temperature display and tire pressure monitoring system display are not displayed.
- While driving, the service reminder is not displayed even if you operate the multi information display switch.

Odometer

N00574901039

The odometer indicates the total distance the vehicle has traveled.

Trip odometer

N00575001037

The trip odometer indicates the distance traveled between two points.

Usage examples for trip odometer **A**, trip odometer **B**

It is possible to measure two currently traveled distances, from home using trip odometer **A** and from a particular point on the way using trip odometer **B**.

To reset the trip odometer

To return the display to 0, hold down the multi information display switch for about 2 seconds or more. Only the currently displayed value will be reset.

Example

If trip odometer **A** is displayed, only trip odometer **A** will be reset.

- Both trip odometers **A** and **B** can count up to 9999.9 miles/kilometers. When a trip odometer goes past 9999.9 miles/kilometers, it returns to 0.0 miles/kilometers.
- When disconnecting the battery terminal, the memories of trip odometer displays **A** and **B** are cleared, and their displays return to “0.0 miles/kilometers”.

Meter illumination control

N00578900030

Each time you press and hold the multi information display switch for about 2 seconds or more, there is a sound and the brightness of the instruments changes.

- 1- Brightness level
- 2- Multi information display switch

NOTE

- You can adjust to 8 different levels respectively for when the front side-marker lights are illuminated and when they are not. Each time you reduce two brightness levels, the segment display of the brightness level decreases one by one.
- If the vehicle is equipped with the automatic light control, when the lamp switch is in a position other than the “OFF” position, the meter illumination switches automatically to the adjusted brightness, depending on the brightness outside the vehicle.
- The brightness level of the instruments is stored when the ignition switch is turned to the “OFF” position.

Driving range display

N00575201039

This displays the approximate driving range (how many more miles or kilometers you can drive). When the driving range falls below approximately 30 miles (50 km), “---” is displayed.

NOTE

- The driving range is determined based on the fuel consumption data. This may vary depending on the driving conditions and habits. Treat the distance displayed as just a rough guideline.

NOTE

- When you refuel, the driving range display is updated. However, if you only add a small amount of fuel, the correct value will not be displayed. Fill to a full tank whenever possible.
- When your vehicle is stopped on an extremely steep hill, the driving range value may change. This is due to the movement of fuel in the tank and does not indicate any breakdown.
- The display setting can be changed to the preferred units (miles or km). Refer to “Changing the function settings” on page 5-152.

Average fuel consumption display

N00575301030

This displays the average fuel consumption from the last reset to the present.

The reset mode conditions for the average fuel consumption display can be switched between “Auto reset” and “Manual reset”.

For information on how to change the average fuel consumption display setting, refer to “Changing the function settings” on page 5-152.

NOTE

- The average fuel consumption display can be reset separately for the auto reset mode and for the manual reset mode.
- “---” is displayed when the average fuel consumption cannot be measured.
- The initial (default) setting is “Auto reset mode”.
- Average fuel consumption may vary depend on the driving conditions (road conditions, how you drive, etc.). The actual fuel consumption may differ from the fuel consumption displayed, so treat the fuel consumption displayed as just a rough guideline.
- Disconnecting the battery cable will erase from memory the manual reset mode or auto reset mode setting for the average fuel consumption display.
- The display setting can be changed to the preferred units {mpg, km/L, L/100 km}. Refer to “Changing the function settings” on page 5-152.

Outside temperature display

N00556501121

Shows the temperature outside the vehicle.

NOTE

- The display setting can be changed to the preferred units (°F or °C). Refer to “Changing the function settings” on page 5-152.
- Depending on factors such as the driving conditions, the displayed temperature may vary from the actual outside temperature.

5

Frozen road warning

N00579000025

If the outside air temperature drops below approx. 37 °F (3 °C), the alarm sounds and the outside air temperature warning symbol (A) flashes for about 10 seconds.

AJA100829

CAUTION

- There is a danger the road might be icy, even when this symbol is not flashing, so please take care when driving.

Fuel remaining display

N00556601193

The fuel remaining display indicates the fuel level in the fuel tank when the ignition switch is in the “ON” position.

AA0112455

- 1- Full
- 0- Empty

NOTE

- It may take several seconds to stabilize the display after refilling the tank.

NOTE

- If fuel is added with the ignition switch in the “ON” position, the remaining fuel display may incorrectly indicate the fuel level.
- The fuel lid mark (A) indicates that the fuel tank filler door is located on the left side of the vehicle. (Refer to “Filling the fuel tank” on page 3-3.)

Fuel remaining warning display

N00578300034

When the remaining fuel level runs low (one segment displayed), the last segment of the fuel gauge flashes when the ignition switch is turned to the “ON” position.

When the remaining fuel level very runs low (no segments displayed), “0” and the bar graph flash.

If the warning display appears, refuel as soon as possible.

AA0112468

CAUTION

- Running out of gas could damage the catalytic converter.
If the warning display appears, refuel as soon as possible.

NOTE

- On hills or curves, the display may be incorrect due to the movement of fuel in the tank.

Service reminder

N00556701240

Displays the approximate time until the next recommended periodic inspection. “---” is displayed when the inspection time has arrived.

NOTE

- The service reminder time can be modified by an authorized Mitsubishi Motors dealer, to adjust for severe usage, etc. Refer to “Severe maintenance schedule” in your vehicle’s Warranty and Maintenance Manual. For further information, please contact your authorized Mitsubishi Motors dealer.

- Shows the time until the next periodic inspection.

NOTE

- Shows the distance in units of 100 miles (100 km) and the time in units of 1 month.

- This informs you that a periodic inspection is due. Contact an authorized Mitsubishi Motors dealer or a repair facility of your choice to have the system checked.
- After your vehicle is inspected at an authorized Mitsubishi Motors dealer, it displays the time until the next periodic inspection.

To reset

The “---” display can be reset while the ignition switch is in the “OFF” position.

- When you lightly press the multi information display switch a few times, the information display switches to the service reminder display.

- Press and hold the multi information display switch for about 2 seconds or more to make the spanner mark start flashing. (If there is no operation for about 10 seconds with flashing, the display will revert to its original indication.)
- With this indicator flashing, if you lightly press the multi information display switch, the screen switches from “---” to “cLEAR”. After that, the time until the next periodic inspection is shown.

CAUTION

- The customer is responsible for making sure that regular inspections and maintenance and periodic inspections and maintenance are performed. Inspections and maintenance must be performed to prevent accidents and malfunctions.

NOTE

- The “---” display cannot be reset while the ignition switch is in the “ON” position.
- When “---” is displayed, after a certain distance and a certain period of time, the display is reset and the time until the next periodic inspection is displayed.
- If you accidentally reset the display, consult an authorized Mitsubishi Motors dealer for assistance.

Changing the function settings

N00556801209

The “Average fuel consumption reset mode”, “Fuel consumption unit” and “Temperature unit” setting can be modified as desired, when the ignition switch is in the “ON” position.

5

CAUTION

- The driver should not operate the display while the vehicle is in motion.
- When operating the system, stop the vehicle in a safe area.

Changing the reset mode for average fuel consumption

N00575501029

You can change the mode condition for the average fuel consumption display to “Auto reset” or “Manual reset”.

1. When you lightly press the multi information display switch a few times, the information display switches to the driving range display.
Refer to “Information display” on page 5-147.

2. Each time you press the multi information display switch for 2 seconds or more on driving range display, you can switch reset mode for average fuel consumption. (A: Auto reset mode, B: Manual reset mode)

Manual reset mode

- When the average fuel consumption is being displayed, if you hold down the multi information display switch, these calculations will be reset to zero.
- When the ignition switch is turned to the “ON” position from the “ACC” or “OFF” position, the mode setting changes automatically from manual to auto.

Auto reset mode

- When the average fuel consumption is being displayed, if you hold down the multi information display switch, these calculations will be reset to zero.
- When the ignition switch has been set to the “ACC” or “OFF” position for about 4 hours or more, the average fuel consumption display will automatically reset.

NOTE

- The average fuel consumption display can be reset separately for the auto reset mode and for the manual reset mode.
- Disconnecting the battery cable will erase from memory the manual reset mode or auto reset mode setting for the average fuel consumption display.
- The initial (default) setting is “Auto reset mode”.

Changing the fuel consumption display unit

N00557101179

The fuel consumption display unit can be changed. The distance and amount units are also switched to match the selected fuel consumption unit.

- When you lightly press the multi information display switch a few times, the information display switches to the average fuel consumption display. Refer to “Information display” on page 5-147.
- Press and hold the multi information display switch for about 5 seconds or more until buzzer sound is heard twice.
- Press and hold the multi information display switch to switch in sequence from “km/L” → “L/100 km” → “mpg” → “km/L”.

NOTE

- The display units for the driving range, the average fuel consumption are changed, but the units for the indicating needle (speedometer), the odometer, the trip odometer and the service reminder will remain unchanged.

NOTE

- If the battery is disconnected, the memory of the unit setting is erased and it returns automatically to factory setting.

The distance units is also changed in the following combinations to match the selected fuel consumption unit.

Fuel consumption	Distance (driving range)
km/L	km
L/100 km	km
mpg	mile (s)

Changing the temperature unit

N00557201167

The temperature display unit can be switched.

- When you lightly press the multi information display switch a few times, the information display switches to the outside temperature display. Refer to “Information display” on page 5-147.
- Each time you press the multi information display switch for 2 seconds or more on outside temperature display, you can switch from °F to °C or from °C to °F unit of outside temperature display.

NOTE

- The temperature value on air conditioner panel is switched in conjunction with outside temperature display unit of the multi information display. However, “°F” or “°C” are not shown to temperature display of an air conditioner.
- On vehicles equipped with Mitsubishi Multi-Communication System, the temperature value of the air conditioner screen of Mitsubishi Multi-Communication System is switched in conjunction with outside temperature display unit of the multi information display. However, “°F” or “°C” are not shown to the air conditioner screen.

Information screen display list

N00557901092

When there is information to be announced, such as light reminder, the tone sounds and the screen switches to the displays shown below. Refer to the appropriate page and take the necessary measures.

When the cause of the warning display is eliminated, the warning display goes out automatically.

Refer to Warning display list on page 5-156.

Refer to Navigation information display on page 5-166.

Refer to Other interrupt displays on page 5-167.

5

NOTE

- In the following cases, a warning may be displayed on the information screen and the buzzer may sound for a few seconds, at times. This is caused by the system picking up interference such as strong electromagnetic waves or noise, and is not a functional problem.
 - An extremely strong electromagnetic wave is received from a source such as an illegal radio set, a spark from a wire, or a radar station.
 - Abnormal voltage or a static electricity discharge is generated by the operation of your vehicle's electronics (including after-market parts).
- If the warning display has occurred a number of times, take your vehicle to an authorized Mitsubishi Motors dealer or a repair facility of your choice and have the system checked.

This informs you that a periodic inspection is due.

Screen	Do this
 <p>ROUTINE MAINTENANCE REQUIRED</p>	Have an inspection made by an authorized Mitsubishi Motors dealer. For further details, refer to “Service reminder” on page 5-136.

The rest time can be set.

5

Screen	Do this
	<p>Park the vehicle in a safe place, turn off the engine, and take a rest. Use this display as rough guide for taking rests during a long drive. The interval from the start of your trip until this message is displayed can be set. Refer to “Changing the function settings” on page 5-140. The display and buzzer alert the driver when the set time is reached. If you continue to drive without having a rest, the buzzer sounds about every 5 minutes to encourage you to take a rest.</p> <ul style="list-style-type: none"> ● In the following cases, the time driven is reset and the display returns to the previous display screen. After this, when the set time is reached again, the display and buzzer encourage you to take a rest. <ul style="list-style-type: none"> • The buzzer sounds 3 times. • The ignition switch is turned to the “OFF” or “LOCK” position or the operation mode is put in OFF. • The multi information display switch is held (for about 2 seconds or more).

Indicators

- 24- Seat belt reminder/warning light
→ P. 4-22
- 25- Tire pressure monitoring system warning light → P. 5-120
- 26- Brake warning light → P. 5-173
- 27- Multi information display → P. 5-146

5

Indicators

N00519900127

Turn signal indicators/Hazard warning lights

N00520000216

The arrows will flash in time with the corresponding exterior turn signals when the turn signal lever is used.

Both arrows will flash when the hazard warning flasher switch is pressed.

NOTE

- If the indicator flashes faster than usual or if the indicator stays on without flashing, check for a malfunctioning turn signal light bulb or turn signal connection.

High beam indicator

N00520100086

A blue light comes on when the headlights are on high beam.

5-172 Features and controls

Front fog light indicator (if so equipped)

N00520200175

This indicator comes on while the front fog lights are on.

Position indicator

N00551300026

This indicator light illuminates while the position lights are on.

Low coolant temperature indicator - blue (Vehicle equipped with the multi information display - Type 2)

N00575601020

This indicator comes on in blue while the coolant temperature is low.

NOTE

- When the indicator goes out, this should be used as a rough indication of when the heating starts working.

ECO Drive Assist (Vehicle equipped with the multi information display - Type 2)

N00579200030

This function displays how fuel-efficiently you are driving under different driving conditions.

The ECO drive assist display will change as follows if you do fuel-efficient driving using the accelerator in a way well matched with the vehicle speed.

NOTE

- The ECO drive assist is displayed only when vehicle is driven with the selector lever in the “D” (DRIVE) position or when vehicle is driven in the sport mode (for vehicles equipped with sportronic steering wheel paddle shifter).

Warning lights

N00520300147

Brake warning light and buzzer

N00520401536

This light comes on when the ignition switch is turned to the “ON” position (engine off) or the operation mode is put in ON.

When the engine is started, the light should go off a few seconds later. A warning is also displayed in the multi information display.

The warning light also illuminates after starting the engine under the following conditions.

- When the parking brake is still applied.
- When the brake fluid level is low.
- When the brake system circuit is not working properly.

When the vehicle is moving at more than 5 mph (8 km/h) and parking brake applied, a buzzer will sound to inform the driver that the parking brake is not properly release.

Before driving, be sure that the parking brake is fully released and brake warning light is off.

CAUTION

● If the brake warning light and the Anti-lock braking system warning light are illuminated at the same time, the braking force distribution function will not operate, so the vehicle may be destabilized during sudden braking under the following conditions.

- When the brake warning light does not go out even when the parking brake is released.
- When the brake warning light stays on while driving.
- If the above occurs, avoid sudden braking and high-speed driving. Park the vehicle in a safe place, and contact an authorized Mitsubishi Motors dealer or a repair facility of your choice as soon as possible.
- The vehicle should be brought to a halt in the following manner when brake performance is deteriorated.
 - Confirm that the vehicle slows down when you press down on the brake pedal harder than usual. In some cases, the brake pedal may go all the way to the floor.
 - Should the brakes fail, use engine braking to reduce your speed and slowly apply the parking brake. Depress the brake pedal to illuminate the stop lights to alert the vehicles behind you.

Engine malfunction indicator (“SERVICE ENGINE SOON” or “Check engine light”)

N00520501814

This indicator is a part of the onboard diagnostic (OBD) system which monitors the emissions, engine control system or automatic transaxle control system/continuously variable transmission (CVT) control system. If a problem is detected in one of these systems, this indicator illuminates or flashes. When the ignition switch is turned to the “ON” position or the operation mode is put in ON, this indicator normally comes on and goes off after the engine has started.

This indicator will come on if the fuel tank filler cap is not properly tightened. If this indicator comes on and stays on after refueling, stop the engine and check that the cap is properly tightened. (Turn the cap clockwise until you hear clicking sounds.)

If this indicator does not go off after several seconds or lights up while driving, have the system checked as soon as possible at an authorized Mitsubishi Motors dealer or a repair facility of your choice.

⚠ CAUTION

- Driving for a long time with the engine malfunction indicator on may cause more damage to the emission control system. This could also affect fuel economy and drivability.
- If this indicator does not come on when the ignition switch is turned to the “ON” position or the operation mode is put in ON, have the system checked at an authorized Mitsubishi Motors dealer or a repair facility of your choice.
- If the engine malfunction indicator comes on while the engine is running, avoid driving at high speeds.
During vehicle operation with the indicator on, the vehicle may not accelerate when you depress the accelerator pedal.
When the vehicle is stationary with the indicator on, you must depress the brake pedal more firmly than usual since the engine idling speed is higher than usual and a vehicle with an automatic transaxle or CVT has a stronger tendency to creep forward.

📖 NOTE

- Do not disconnect the battery cable when the engine malfunction indicator (“SERVICE ENGINE SOON” or “Check engine light”) is on.
The engine electronic control module stores critical OBD information (especially exhaust emission data), which may be lost if the battery cable is disconnected while the engine malfunction indicator is on. This will make it difficult to diagnose the cause of future problems.

Charging system warning light

N00520601323

This light comes on in the event of a malfunction in the charging system or when the ignition switch is turned to the “ON” position (engine off) or the operation mode is put in ON. On vehicle equipped with the multi information display - Type 1, a warning is also displayed in the multi information display. When the engine is started, the light should go out. Check to make sure that the light has gone out before driving.

⚠ CAUTION

- If the warning light stays on while the engine is running, park your vehicle in a safe place as soon as possible and contact an authorized Mitsubishi Motors dealer or a repair facility of your choice to have the system checked.

**Oil pressure warning light
(Vehicle equipped with the
multi information display -
Type 2)**

N00520701278

This light comes on when the engine oil pressure is below normal. If the light stays on while driving, stop the engine as soon as possible. Do not run the engine until the cause of the low oil pressure is corrected.

⚠ CAUTION

- If this light comes on when the engine oil level is not low, have your vehicle checked at an authorized Mitsubishi Motors dealer or a repair facility of your choice.
- This warning light does not show the amount of oil in the crankcase. This can only be determined by checking the oil level with the dipstick with the engine turned off.

High coolant temperature warning light - red (Vehicle equipped with the multi information display - Type 2)

N00575701021

This light comes on in red if the coolant temperature becomes excessively high.

CAUTION

- If the light comes on during vehicle operation, it indicates that the engine is possibly overheating. Continued driving could make the engine fail. Immediately stop the vehicle in a safe place and take appropriate action. (Refer to “Engine overheating” on page 8-4.)

NOTE

- The high coolant temperature warning light may illuminate when the vehicle has been driven at high speeds or on hilly roads. This illuminating does not necessarily indicate a problem. It should stop if you keep the engine running for a while or continue driving the vehicle.

Door-ajar warning light and buzzer (Vehicle equipped with the multi information display - Type 2)

N00520901339

This light comes on when any door or the liftgate is open or not completely closed.

When the vehicle is moving at more than 5 mph (8 km/h) and any door or the liftgate is open or ajar, a tone will sound 4 times to inform the driver that any door or the liftgate is not properly shut.

CAUTION

- Before driving, make sure that the door-ajar warning light is off.

NOTE

- When the interior light auto-cutout function is been activated, the light goes out automatically after about 30 minutes. Refer to “Interior light auto-cutout function (dome light and other lights)” on page 5-228.

Information screen display (Vehicle equipped with the multi information display - Type 1)

N00558301048

Brake warning display

N00558401153

This warning is displayed if the vehicle is being driven with the parking brake still applied. The warning light in the instrument cluster only comes on when the parking brake is applied.

CAUTION

- If a vehicle is driven without releasing the parking brake, the brakes will overheat, resulting in ineffective braking and possible brake failure. If this warning is displayed, release the parking brake.

**BRAKE SYSTEM
SERVICE REQUIRED**

When the ignition switch is turned to the “ON” position or the operation mode is put in ON, if the brake fluid is low, this warning is displayed.

The warning light in the instrument cluster also illuminates.

CAUTION

- If this warning stays on and does not go out while driving, there is a danger of ineffective braking. If this happens, park the vehicle in a safe place, and contact an authorized Mitsubishi Motors dealer or a repair facility of your choice.
- If the brake warning display, brake warning light, and the Anti-lock braking system warning light are illuminated at the same time, the braking force distribution function will not operate, so the vehicle may be destabilized during sudden braking. Avoid sudden braking and high-speed driving. Park the vehicle in a safe place, and contact an authorized Mitsubishi Motors dealer or a repair facility of your choice.
- The vehicle should be brought to a halt in the following manner when brake performance is deteriorated.

CAUTION

- Confirm that the vehicle slows down when you press down on the brake pedal harder than usual. In some cases, the brake pedal may go all the way to the floor.
- Should the brakes fail, use engine braking to reduce your speed and slowly apply the parking brake.
Depress the brake pedal to illuminate the stop lights to alert the vehicles behind you.

Charging system warning display

N00558601113

**CHARGING SYSTEM
SERVICE REQUIRED**

If there is a fault in the charging system, the warning display is displayed on the information screen in the multi information display. The warning light in the instrument cluster also illuminates.

CAUTION

- If warnings are displayed while the engine is running, park your vehicle in a safe place as soon as possible and contact an authorized Mitsubishi Motors dealer or a repair facility of your choice to have the system checked.

Oil pressure warning display

N00558701101

LOW OIL PRESSURE

If the engine oil pressure drops while the engine is running, the warning display is displayed on the information screen in the multi information display.

CAUTION

- If the vehicle is driven while the engine oil is low, or the oil level is normal but the warning is displayed, the engine may overheat and damage may result.
- If the warning is displayed while the engine is running, park your vehicle in a safe place as soon as possible and check the engine oil level.
- If this warning display comes on when the engine oil level is proper, have your vehicle checked at an authorized Mitsubishi Motors dealer or a repair facility of your choice.

NOTE

- The oil pressure warning display does not show the amount of oil. The oil level must be checked using the dipstick.

Combination headlights and dimmer switch

N00522501834

Headlights

NOTE

- Do not leave the headlights and other lights on for a long period of time when the engine is not running. The battery will run down.
- When it rains, or when the vehicle has been washed, the inside of the lens sometimes becomes foggy. This is the same as when window glass mists up on a humid day, and does not indicate a problem. When the light is switched on, the heat will dry out the fog. However, if water collects inside the light, have it checked by an authorized Mitsubishi Motors dealer or a repair facility of your choice.

Type 1

Rotate the switch to operate the lights.

The combinations of switch operations and illuminated lights differ in accordance with the following conditions.

Except for vehicles equipped with daytime running lights

OFF	All lights off
	Parking, tail, front and rear side-marker lights, license plate, instrument panel lights and downlight on
	Headlights and other lights on

Vehicles equipped with daytime running lights

[When the engine is started, and the parking brake is released]

OFF	The daytime running lights illuminated
	The daytime running lights illuminated Tail, front and rear side-marker lights, license plate, instrument panel lights and downlight on
	Headlights and other lights on

NOTE

- Once the daytime running light come on, they do not go out until the ignition switch is turned to the “OFF” or “ACC” position or the operation mode is changed to OFF or ACC.

[When the engine is not running, or when the engine is running but the parking brake is not released]

The engine starts when the lights are off.

OFF	All lights off
-----	----------------

Combination headlights and dimmer switch

	Parking, tail, front and rear side-marker lights, license plate, instrument panel lights and downlight on
	Headlights and other lights on

	Parking, tail, front and rear side-marker lights, license plate, instrument panel lights and downlight on
	Headlights and other lights on

NOTE

- Once the daytime running light come on, they do not go out until the ignition switch is turned to the “OFF” or “ACC” position or the operation mode is changed to OFF or ACC.

Type 2

5

Rotate the switch to operate the lights.

The combinations of switch operations and illuminated lights differ in accordance with the following conditions.

Except for vehicles equipped with daytime running lights

OFF	All lights off
AUTO	Headlights and other lights turn on and off automatically in accordance with outside light level.

Vehicles equipped with daytime running lights

[When the engine is started, and the parking brake is released]

OFF	The daytime running lights illuminated
AUTO	The daytime running lights illuminated (when it is light outside the vehicle) Headlights and other lights turn on and off automatically in accordance with outside light level.
	The daytime running lights illuminated Tail, front and rear side-marker lights, license plate, instrument panel lights and downlight on
	Headlights and other lights on

[When the engine is not running, or when the engine is running but the parking brake is not released]

The engine starts when the lights are off.

OFF	All lights off
AUTO	Headlights and other lights turn on and off automatically in accordance with outside light level.
	Parking, tail, front and rear side-marker lights, license plate, instrument panel lights and downlight on
	Headlights and other lights on

NOTE

- The sensitivity of the automatic on/off control can be adjusted.
For further information, please contact your authorized Mitsubishi Motors dealer or a repair facility of your choice.
On vehicles equipped with Mitsubishi Multi-Communication System, screen operations can be used to make the adjustment.
Refer to the separate owner's manual for details.
- Do not place anything on the automatic light sensor (A), and do not clean with a glass cleaner.

NOTE

- Do not cover the sensor (A) for the automatic on/off control by affixing a sticker or label to the windshield.

NOTE

- If the lights do not turn on or off with the switch in the "AUTO" position, manually operate the switch. Have the system checked by an authorized Mitsubishi Motors dealer or a repair facility of your choice.

Light auto-cutout function (headlights and other lights)

N00532601580

- If the following operation is performed with the combination headlights and dimmer switch in the "☰☷" or "☷☰" position, the lights automatically turn off.

[Except for vehicles equipped with the F.A.S.T.-key]

The ignition switch is turned to the "OFF" or "ACC" position or the key is removed from the ignition switch and the driver's door is opened.

[For vehicles equipped with the F.A.S.T.-key]

The operation mode is changed to OFF or ACC and the driver's door is opened.

- If the following operation is performed with the combination headlights and dimmer switch in the "☰☷" or "☷☰" position, the lights automatically turn off after about 3 minutes.

[Except for vehicles equipped with the F.A.S.T.-key]

The ignition switch is turned to the "OFF" or "ACC" position or the key is removed from the ignition switch and the driver's door is not opened.

[For vehicles equipped with the F.A.S.T.-key]

The operation mode is changed to OFF or ACC and the driver's door is not opened.

NOTE

- The light auto-cutout function can be deactivated. See your authorized Mitsubishi Motors dealer for details. For vehicles equipped with the Mitsubishi Multi-Communication System, adjustments can be made using screen operations. For further details, refer to the separate owner's manual.

5

When you want to keep the lights on:

If the combination headlights and dimmer switch is turned to the “

LED headlight warning light (if so equipped)

N00584500028

This warning light will illuminate when there is a malfunction in the LED headlights.

NOTE

- If the warning light illuminates, there may be a malfunction in the unit. Contact an authorized Mitsubishi Motors dealer or a repair facility of your choice to have the system checked.

Headlight reminder buzzer

N00549801236

[When using a key to start the engine]
If the driver's door is opened with the key in the “OFF” or “LOCK” or “ACC” position or removed from the ignition switch while the lights are on, the tone will sound to remind you to turn off the lights.

[When using the F.A.S.T.-key to start the engine]

If the driver's door is opened with the operation mode is put in OFF or ACC, or if the operation mode is changed to OFF while the lights are on, the tone will sound to remind you to turn off the lights.

In either case, the lights will turn off automatically and so will the tone. Or you can turn the light switch to the “OFF” position to stop the tone.

Dimmer (high/low beam change)

N00549901178

To change the headlights from high beam to low beam and vice versa, pull the turn signal lever to (1). Switch the headlights to low beam as a courtesy whenever there are oncoming vehicles, or when there is traffic moving ahead of you. An illuminated blue light in the instrument cluster indicates when the headlights are on high beam.

Headlight flasher

N00550001209

You can flash the high beams by pulling the lever gently toward you (2). The lights will go back to normal when you let go. While the high beam is on, you will see a blue light on the instrument panel.

NOTE

- You can flash the high beams by pulling the lever toward you, even if the light switch is off.
- If you turn the lights off with the head lights set to high-beam illumination, the headlights are automatically returned to their low-beam setting when the light switch is next turned to the “” position.

Welcome light

N00563201117

This function turns on the front side-marker and parking lights for about 30 seconds after the UNLOCK button on the remote control transmitter is pressed when the combination headlights and dimmer switch is in the “OFF” or “AUTO” position (for vehicles equipped with the automatic light control). On vehicles equipped with the automatic light control (except for vehicles equipped with LDW), the welcome light function will operate only when it is dark outside the vehicle.

NOTE

- While the welcome light function is operating, perform one of the following operations to cancel the function.
 - Push the LOCK button on the remote control transmitter.
 - Turn the combination headlights and dimmer switch to the “” or “” position.
 - Turn the ignition switch to the “ON” position or put the operation mode in ON.
- It is possible to modify functions as follows:
 - The headlights can be set to come on in the low beam setting.
 - The welcome light function can be deactivated.

NOTE

For details, consult a Mitsubishi Motors dealer.
On vehicles equipped with Mitsubishi Multi-Communication System, screen operations can be used to make the adjustment. Refer to the separate owner’s manual for details.

Coming home light

N00547301110

This function turns on the headlights in the low beam setting for about 30 seconds after the ignition switch is turned to the “OFF” or “LOCK” position or the operation mode is put in OFF.

1. Turn the combination headlights and dimmer switch to the “OFF” or “AUTO” position (for vehicles equipped with the automatic light control).
2. Turn the ignition switch to the “OFF” or “LOCK” position or put the operation mode in OFF. Also, if a key was used to start the engine, remove the key from the ignition switch.
3. Within 60 seconds of turning the ignition switch to the “OFF” or “LOCK” position or putting the operation mode in OFF, pull the turn signal lever toward you.

Headlight leveling switch (if so equipped)

5

4. The headlights will come on in the low beam setting for about 30 seconds. After the headlights go off, the headlights can be turned on again in the low beam setting for about 30 seconds by pulling the turn signal lever toward you within 60 seconds of turning the ignition switch to the “OFF” or “LOCK” position or putting the operation mode in OFF. To turn on the headlights again after 60 seconds of turning the ignition switch to the “OFF” or “LOCK” position or putting the operation mode in OFF, repeat the process from step 1.

NOTE

- While the coming home light function is operating, perform one of the following operations to cancel the function.
 - Pull the turn signal lever toward you.

NOTE

- Turn the combination headlights and dimmer switch to the “ ” or “ ” position or put the operation mode in ON.
- Turn the ignition switch to the “ON” position or put the operation mode in ON.
- It is possible to modify functions as follows:
 - The time that the headlights remain on can be changed.
 - The coming home light function can be deactivated.

For details, consult a Mitsubishi Motors dealer.

On vehicles equipped with Mitsubishi Multi-Communication System, screen operations can be used to make the adjustment.

Refer to separate owner’s manual for details.

Headlight leveling switch (if so equipped)

N00537101115

The direction of the headlight beam (the direction in which the light shines) alters according to the number of people and the load in the vehicle. Lower the headlight angle if it is too high due to the number of people and/or the load in the vehicle so that the headlights’ glare does not distract the drivers of approaching vehicles. First set the light switch to the “ ” position, then turn the headlight leveling switch knob to lower the

beam. The greater the number on the headlight leveling switch knob, the lower the beam will point.

Set the switch to the appropriate position so that the headlight beam is level with the road.

WARNING

- To avoid distraction while driving, always perform headlight adjustments before vehicle operation.

NOTE

- Start adjusting when the knob is at the “0” position (when the beam is at its highest).
- Keep the knob in the “0” position except when using the knob to lower the headlight beam angle.
- Always return the knob to the “0” position when the load is removed and the people have left the vehicle.

Turn signal lever

N00522601529

When changing lanes, or to making a gradual turn, hold the lever in the “lane change” position (1). It will return to the neutral position when you let go. Use the full position (2) when making a normal turn. The lever will return to the neutral position when the turn is complete. There may be times when the lever does not return to the neutral position. This usually happens when the steering wheel is turned only slightly. You can easily return the lever by hand.

Also, when you move the lever to (1) slightly then release it, the turn signal lights and the indicator light in the instrument cluster will flash three times.

NOTE

- A light in the instrument panel flashes to show when the front and rear turn signal lights are working properly. If this light flashes faster than usual, check for a burned out turn signal light bulb or malfunctioning connection in the signal. If the panel light does not come on when the lever is moved, check for a blown fuse or a burned out bulb in the panel. Have the system inspected by your authorized Mitsubishi Motors dealer or a repair facility of your choice.
- It is possible to modify functions as follows:
 - Deactivate the turn signal light 3-flash function for lane changes.
 - Adjust the time required to operate the lever for the 3-flash function.
 See your authorized Mitsubishi Motors dealer for details. For vehicles equipped with the Mitsubishi Multi-Communication System, adjustments can be made using screen operations. For further details, refer to the separate owner's manual.

NOTE

- It is possible to change the tone of a sounding buzzer as the turn signal lights flash. [Vehicle equipped with the multi information display - type 1] Refer to “Changing the turn-signal sound” on page 5-145. [Vehicle equipped with the multi information display - type 2] See your authorized Mitsubishi Motors dealer for details.

Hazard warning flasher switch

N00522701328

If you press the flasher switch, the front and rear turn signals will flash intermittently, and so will the hazard warning lights. This is an emergency warning system and should not be used when the vehicle is in motion, except for emergencies.

If you need to leave your vehicle, the flashers will keep working after the ignition switch is removed or the operation mode is put in OFF.

NOTE

- If the flashers are used for several hours, the battery will run down. This could make it difficult or impossible to restart your vehicle.

ECO mode switch

N00579300028

ECO mode is an eco-driving support system which automatically controls the engine, air conditioning system, 4WD system (if so equipped) and S-AWC (if so equipped) to improve fuel efficiency.

Refer to “Electronically controlled 4WD system” on page 5-79.

Refer to “S-AWC (Super-All Wheel Control)” on page 5-81.

Refer to “Automatic climate control air conditioner” on page 7-5.

The ECO mode starts working by pressing the ECO mode switch when the ignition switch or operation mode is in ON.

Push the switch again and the ECO mode will cancel.

While the ECO mode is working, an ECO mode indicator will be turned on.

NOTE

- Even if the ECO mode is operating, you can select normal operation of the air conditioner.
For further information, please contact your authorized Mitsubishi Motors dealer.

Front fog light switch (if so equipped)

N00522801420

The front fog lights illuminate only when the headlights are on low beam.

Turning the knob in the direction of the “ON” position turns on the front fog lights as well as the indicator in the instrument cluster. To turn them off, turn the knob in the direction of the “OFF” position.

The knob will return to the neutral position when it is released.

NOTE

- If the headlights are switched to high beam, the front fog lights will go out; they will illuminate again when the headlights are switched back to low beam.
- If the light switch is rotated to the “OFF” or “” position while the front fog lights are illuminated, they will automatically turn off. They can be turned back on again by rotating the combination headlights and dimmer switch back to “” position, and turning the knob in the direction of the “ON” position.
- Do not use fog lights except in conditions of fog, otherwise excessive light glare may temporarily blind oncoming vehicle drivers.

Wiper and washer switch

N00523001722

CAUTION

- If the washer is used in cold weather, the washer fluid sprayed against the glass may freeze, which may hinder visibility. Warm the glass with the defroster before using the washer.

Windshield wipers**NOTE**

- To ensure a clear rearward view, the rear window wiper will automatically perform several continuous operations if the selector lever is put in the “R” position while the windshield wipers are operating. Refer to “Rear window wiper and washer” on page 5-189.

Except for vehicle with rain sensor

The windshield wiper and washer can be operated with the ignition switch or the operation mode is in ON or ACC.

If the blades are frozen to the windshield, do not operate the wipers until the ice has melted and the blades are freed, otherwise the wiper motor may be damaged.

MIST- Misting function

The wipers will operate once.

OFF- Off

INT- Intermittent (Speed sensitive)

LO- Slow

HI- Fast

To adjust intermittent intervals

With the lever in the “INT” (speed sensitive intermittent operation) position, the intermittent intervals can be adjusted by turning the knob (A).

- 1- Fast
- 2- Slow

NOTE

- The speed-sensitive-operation function of the windshield wipers can be deactivated. For further information, please contact your authorized MITSUBISHI MOTORS dealer or a repair facility of your choice. On vehicles equipped with Mitsubishi Multi-Communication System, screen operations can be used to make the adjustment. Refer to separate owner's manual for details.

Misting function

The misting function can be used when the ignition switch or the operation mode is in ON or ACC.

The wipers will operate once if the wiper lever is raised to the “MIST” position and

released. This operation is useful when it is drizzling, etc. The wipers will continue to operate while the lever is held in the “MIST” position.

Vehicle with rain sensor

The windshield wipers can be operated with the ignition switch or the operation mode is in ON or ACC.

If the blades are frozen to the windshield or rear window, do not operate the wipers until the ice has melted and the blades are freed, otherwise the wiper motor may be damaged.

- MIST- Misting function
The wipers will operate once.
- OFF- Off
- INT- Auto-wiper control
Rain sensor
The wipers will automatically operate depending on the degree of wetness on the windshield.
- LO- Slow
- HI- Fast

Rain sensor (if so equipped)

Can only be used when the ignition switch or the operation mode is in ON.

If the lever is put in the “AUTO” position, the rain sensor (A) will detect the extent of rain (or snow, other moisture, dust, etc.) and the wipers will operate automatically.

Keep the lever in the “OFF” position if the windshield is dirty and the weather is dry.

Wiper operation under these conditions can scratch the windshield and damage the wipers.

⚠ CAUTION

- With the ignition switch or the operation mode in ON and the lever in the “AUTO” position, the wipers may automatically operate in the situations described below.
 - When cleaning the outside surface of the windshield, if you touch the rain sensor.
 - When cleaning the outside surface of the windshield, if you wipe with a cloth the rain sensor.
 - When using an automatic car wash.
 - A physical shock is applied to the windshield.
 - A physical shock is applied to the rain sensor.

If your hands get trapped, you could suffer injuries or the wipers could malfunction. Be sure to turn the ignition switch to the “OFF” or “LOCK” position or put the operation mode in OFF, or move the lever to the “OFF” position to deactivate the rain sensor.

📖 NOTE

- To protect the rubber parts of the wipers, this operation of the wipers does not take place even if the lever is put in the “AUTO” position when the vehicle is stationary and the ambient temperature is about 32 °F (0 °C) or lower.
- Do not cover the sensor by affixing a sticker or label to the windshield. Also, do not put any water-repellent coating on the windshield. The rain sensor would not be able to detect the extent of rain, and the wipers might stop working normally.
- In the following cases, the rain sensor may be malfunctioning. Have the vehicle checked at an authorized Mitsubishi Motors dealer or a repair facility of your choice.
 - When the wipers operate at a constant interval despite changes in the extent of rain.
 - When the wipers do not operate even though it is raining.

📖 NOTE

- The wipers may automatically operate when things such as insects or foreign objects are affixed to the windshield on top of the rain sensor or when the windshield is frozen. Objects affixed to the windshield will stop the wipers when the wipers cannot remove them. To operate the wipers again, move the lever to the “LO” or “HI” position. Also, the wipers may operate automatically due to strong direct sunlight or electromagnetic wave. To stop the wipers, move the lever to the “OFF” position.
- Contact an authorized Mitsubishi Motors dealer or a repair facility of your choice when replacing the windshield glass.

To adjust the sensitivity of the rain sensor

With the lever in the “AUTO” (rain sensor) position, it is possible to adjust the sensitivity of the rain sensor by turning the knob (B).

Wiper and washer switch

5

“+”- Higher sensitivity to rain

“-”- Lower sensitivity to rain

NOTE

- Automatic wiper operation (rain sensitive) can be changed to intermittent operation, either vehicle speed sensitive or not vehicle speed sensitive.

For further information, please contact your authorized MITSUBISHI MOTORS dealer or a repair facility of your choice.

On vehicles equipped with Mitsubishi Multi-Communication System, screen operations can be used to make the adjustment.

Refer to the separate owner's manual for details.

Misting function

Move the lever in the direction of the arrow and release, to operate the wipers once.

Use this function when you are driving in mist or drizzle.

The wipers will operate once if the lever is raised to the “MIST” position and released when the ignition switch or the operation mode is in ON or ACC. The wipers will continue to operate while the lever is held in the “MIST” position.

The wipers will operate once if the lever is moved to the “AUTO” position and the knob (C) is turned in the “+” direction when the ignition switch or the operation mode is in ON.

Windshield washer

N00504601354

The windshield washer can be operated with the ignition switch or the operation mode in ON or ACC.

The washer fluid will be sprayed onto the windshield by pulling the lever toward you.

When the wipers are not in operation or in intermittent operation, by pulling the lever toward you, the wipers will operate several times while the washer fluid is being sprayed.

Intelligent washer

By releasing the lever soon after pulling it toward you, the washer fluid will be sprayed several times while the wipers are operating several times.

Intelligent washer will stop operating with any operation of the lever.

Rear window wiper and washer

N00523201418

The rear window wiper and washer can be operated when the ignition switch or the operation mode is in ON or ACC.

Turn the knob to operate the rear window wiper.

OFF- Off

INT- The wiper operates continuously for several seconds then operates intermittently at intervals of about 8 seconds.

 Washer fluid will be sprayed onto the rear window glass while the knob is turned fully in either direction.

When the washer fluid is sprayed, the wiper will automatically operate 2 or 3 times.

NOTE

- It is possible to modify functions as follows:
 - Intelligent washer can be activated. Refer to “Intelligent washer” on page 5-189.
 - The wipers can be set to operate again after about 6 seconds.

These functions are not activated when the vehicle is shipped from the factory.

To activate or deactivate these functions, please contact your authorized Mitsubishi Motors dealer.

On vehicles equipped with Mitsubishi Multi-Communication System, screen operations can be used to make the adjustment.

Refer to the separate owner’s manual for details.

NOTE

- The rear window wiper will automatically perform several continuous operations if the selector lever is put in the “R” position while the windshield wipers or the rear window wiper is operating.(automatic operation mode)

After the automatic operation, the rear window wiper will stop operating if the knob is in the “OFF” position. If the knob is in the “INT” position, the rear window wiper will return to the intermittent operation.

It is possible to set the rear window wiper to perform the automatic operation only if the selector lever is put in the “R” position while the rear window wiper is operating with the knob in the “INT” position.

See your authorized Mitsubishi Motors dealer for details.

 **NOTE**

- If the knob is in the “OFF” position, turn the knob to the “INT” position twice quickly to operate the rear window wiper continuously. (continuous operation mode)
Turn the knob to the “OFF” position to stop the rear window wiper continuous operation.
- The wiper intermittent operation time can be adjusted.
See your authorized Mitsubishi Motors dealer for details.
For vehicles equipped with the Mitsubishi Multi-Communication System, adjustments can be made using screen operations. For further details, refer to the separate owner’s manual.
- The washer fluid reservoir is located in the engine compartment.
Check the fluid level regularly and refill if necessary. (Refer to “Washer fluid” on page 9-12.)

Precautions to observe when using wipers and washers

N00523501277

 **CAUTION**

- If the washer is used in cold weather, the washer fluid sprayed onto the glass might freeze, blocking your view. Heat the glass with the defroster before using the washer.

 **NOTE**

- Do not use the wipers when the windshield is dry. This could scratch the glass and wear the wiper blades prematurely.
- Before using the wipers in cold weather, check to be sure that the wiper blades are not frozen to the windshield or rear window. Using the wipers while the blades are frozen could cause the wiper motor to burn out.
- If the moving wipers become blocked part-way through a sweep by ice or other deposits on the glass, the wipers may temporarily stop operating to prevent the motor from overheating. In this case, park the vehicle in a safe place, turn the ignition switch to the “OFF” position or put the operation mode in OFF, and then remove the ice or other deposits.
Because the wipers will start operating again after the wiper motor cools down, check that the wipers operate before using them.
- Avoid using the washer for more than 20 seconds at a time. Do not operate the washer when the washer fluid reservoir is empty or the pump may fail.
- During cold weather, add a recommended washer solution that will not freeze in the washer fluid reservoir. Otherwise the washer may not work or may be damaged.
- Replace the wiper blades when they are worn. Use the proper size replacement blades. For further information, please contact your authorized Mitsubishi Motors dealer.

Wiper deicer switch (if so equipped)

N00584400027

The electric rear window defogger switch can be operated when the engine is running. When the front wipers have frozen to the windshield at the parked positions, turning on this switch will heat the windshield to make the wipers operable. Press the electric rear window defogger switch and the deicer will operate.

 **NOTE**

- The wiper deicer is activated/deactivated, depending on the operation of the rear window defogger. Refer to “Electric rear window defogger switch” on page 5-190.

Electric rear window defogger switch

N00523701468

The rear window defogger can be used when the engine is running. The indicator light (A) will come on when you press the electric rear window defogger switch. Electric current will flow through the heating wires on the rear window to help clear away moisture or frost.

After about 15 to 20 minutes of operation, the system will shut off automatically. To switch the defogger OFF before 15 to 20 minutes have passed, press the switch again. The indicator light will go out and the defogger will turn off.

If you need the defogger for more than 15 to 20 minutes, press the switch again. This will add 15 to 20 more minutes.

⚠ CAUTION

- The rear window defogger is not designed to melt snow. Remove any snow manually before using the rear window defogger.
- Use the rear window defogger only after the engine has started and is running. Be sure to turn the defogger switch off immediately after the window is clear to save on battery power.

⚠ CAUTION

- Do not place stickers, tape, or other items that are attached with adhesive over the grid wires on the rear window.
- When cleaning the inside rear window, use a soft cloth and wipe lightly over the grid wires.

📖 NOTE

- If your vehicle is equipped with door mirror heater, mist can also be removed from the outside rearview mirrors when the rear window defogger switch is pressed. (Refer to “Door mirror heater” on page 5-59.)
- On vehicles equipped with the wiper deicer, when the rear window defogger switch is pushed, the windshield becomes warm and the wipers become operable. (Refer to “Wiper deicer switch” on page 5-190.)

📖 NOTE

- It is possible to change the setting to make the rear window defogger operate automatically when ambient temperature becomes low while the engine is running, even if you do not push the rear window defogger switch.

It operates automatically only once after turning the ignition switch to the “ON” position or putting the operation mode in ON.

If you choose this setting, the door mirror heater (if so equipped) and wiper deicer (if so equipped) will also operate automatically at the same time.

For further information, please contact your authorized Mitsubishi Motors dealer.

On vehicles equipped with Mitsubishi Multi-Communication System, screen operations can be used to make the adjustment.

Refer to the separate owner’s manual for details.

Horn switch

N00523801195

To honk the horn, press around the “” mark on the steering wheel.

Link System (if so equipped)

5

Link System (if so equipped)

N00563701112

The Link System takes control of the devices connected via the USB input terminal or the Bluetooth® 2.0 interface; the system allows the connected device to be operated by using the switches in the vehicle or voice commands.

See the following section for details on how to operate.

Refer to “Bluetooth® 2.0 interface” on page 5-192.

Refer to “USB input terminal” on page 5-215.

Refer to “Listen to an iPod” on page 7-33.

Refer to “Listen to Audio Files on a USB Device” on page 7-35.

Refer to “To play iPod/USB memory device tracks via voice operation” on page 7-38.

5-192 Features and controls

Refer to “Listen to Bluetooth Audio” on page 7-41.

Bluetooth® is a registered trademark of BLUETOOTH SIG, INC.

Link System End User License Agreement

N00563801025

You have acquired a device that includes software licensed to Mitsubishi Motors Corporation from JOHNSON CONTROLS Inc (the automotive experience business unit), and their subsequent 3rd party suppliers. For a complete list of these 3rd party products and their end user license agreements, please go to the following website.

<http://www.jciblueconnect.com/faq/fulldisclosure.pdf>

Bluetooth® 2.0 interface (if so equipped)

N00563901260

The Bluetooth® 2.0 interface allows for making/receiving hands-free calls in the vehicle using a Bluetooth® compatible cellular phone. It also allows the user to play music, saved in a Bluetooth® music player, from the vehicle’s speakers.

The system is equipped with a voice recognition function, which allows you to make hands-free calls by simple switch operations and voice command operations using a defined voice tree.

The Bluetooth® 2.0 interface can be used when the ignition switch or the operation mode is in ON or ACC.

Before you can use the Bluetooth® 2.0 interface, you must pair the Bluetooth® device and Bluetooth® 2.0 interface. Refer to “Connecting the Bluetooth® 2.0 interface and Bluetooth® device” on page 5-199.

Bluetooth® is a registered trademark of BLUETOOTH SIG, INC.

⚠ WARNING

- Although the Bluetooth® 2.0 interface allows you to make hands-free calls, if you choose to use the cellular phone while driving, you must not allow yourself to be distracted from the safe operation of your vehicle. Anything, including cellular phone usage, that distracts you from the safe operation of your vehicle increases your risk of an accident.
- Refer to and comply with all state and local laws in your area regarding cellular phone usage while driving.

NOTE

- If the ignition switch or the operation mode is left in ACC, the accessory power will automatically turn off after a certain period of time and you will no longer be able to use the Bluetooth® 2.0 interface. The accessory power comes on again if the ignition switch or the engine switch is operated. Refer to “ACC power auto-cutout function” on page 5-19 and 5-60.
- The Bluetooth® 2.0 interface cannot be used if the Bluetooth® device has a dead battery or the device power is turned off.
- Hands-free calls will not be possible if your phone does not have service available.
- If you place the Bluetooth® device in the vehicle’s third seat or luggage compartment, you may not be able to use the Bluetooth® 2.0 interface.
- Some Bluetooth® devices are not compatible with the Bluetooth® 2.0 interface.
- You can confirm the Link System software version by pressing the HANG-UP button 3 times (press and hold 2 times and then press briefly) within 10 seconds.

NOTE

- For detail of the Bluetooth® 2.0 interface, refer to the following website:
[For vehicles sold in U.S.A.]
You can access the Mitsubishi Motors North America website.
[For vehicles sold in Canada and Mexico]
You can access the Mitsubishi Motors website.
Please read and agree to the “Warning about Links to the Web Sites of Other Companies”, the websites mentioned above may connect you to websites other than the Mitsubishi Motors website.
<http://www.mitsubishi-motors.com/en/products/index.html>
- Software updates by cellular phone/digital audio device manufacturers may change/alter device connectivity.

Steering control switch and microphone

N00564001109

- 1- Volume up button
- 2- Volume down button
- 3- SPEECH button
- 4- PICK-UP button
- 5- HANG-UP button
- 6- Microphone

Volume up button

Press this button to increase the volume.

Bluetooth® 2.0 interface (if so equipped)

Volume down button

Press this button to decrease the volume.

SPEECH button

- Press this button to change to voice recognition mode.

While the system is in voice recognition mode, “Listening” will appear on the audio display.

NOTE

- On vehicles equipped with the Mitsubishi Multi-Communication System, pressing the SPEECH button will activate the voice recognition mode (a beep will sound when successfully activated). To use the voice recognition of the Bluetooth® 2.0 interface, press the PICK-UP button.

- If you press the button briefly while in voice recognition mode, it will interrupt prompting and allow voice command input.

Pressing the button longer will deactivate the voice recognition mode.

- Pressing this button briefly during a call will enable voice recognition and allow voice command input.

PICK-UP button

- Press this button when an incoming call is received to answer the telephone.

NOTE

- When not receiving incoming calls, pressing the PICK-UP button on vehicles equipped with the Mitsubishi Multi-Communication System, will activate the voice recognition of the Bluetooth® 2.0 interface.
- When another call is received during a call, press this button to put the first caller on hold and talk to the new caller.
 - In such circumstances, you can press the button briefly to switch between callers. You will switch to the first caller and the other caller will be put on hold.
 - To establish a three-way call in such situations, press the SPEECH button to enter voice recognition mode and then say “Join calls.”

HANG-UP button

- Press this button when an incoming call is received to refuse the call.
- Press this button during a call to end the current call.

When another call is on hold, you will switch to that call.

- If this button is pressed in the voice recognition mode, the voice recognition mode will be deactivated.

NOTE

- When you press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System) to enter voice recognition mode with a cellular phone paired to the system, current information on the cellular phone, such as “remaining battery life,” “signal strength” or “roaming,” will be displayed on the audio display.*

*: Some cellular phones will not send this information to the Bluetooth® 2.0 interface.
- Call waiting and three-way calls can be used by the Bluetooth® 2.0 interface, only if it is possible to use those services with your cellular phone.

Microphone

Your voice will be recognized by a microphone in the overhead console, allowing you to make hands-free calls with voice commands.

NOTE

- If a cellular phone is within close proximity of the microphone, it may distort the sound quality. In this case, place the cellular phone as far as possible from the microphone.

Voice recognition function

N00564101113

The Bluetooth® 2.0 interface is equipped with a voice recognition function. Simply say voice commands and you can perform various operations and make or receive hands-free calls.

With the Bluetooth® 2.0 interface, voice recognition is possible for US English, North American Spanish, Canadian French and Japanese. The factory setting is “English.”

NOTE

- If the voice command that you say differs from the predefined command or cannot be recognised due to ambient noise or some other reason, the Bluetooth® 2.0 interface will ask you for the voice command again up to 3 times.

NOTE

- For best performance and further reduction of ambient noise, the vehicle windows should be closed, lower the blower speed and refrain from conversation with your passengers while engaging the voice recognition function.
- Some voice commands have alternative commands.
- Depending on the selected language, some functions may not be available.
- Language can be changed by using the audio control panel besides the following procedure.
For details, refer to “System settings” on page 7-45. For DISPLAY AUDIO and Mitsubishi Multi-Communication System, refer to the separate owner’s manuals.

Selecting the language

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Setup.”
3. Say “Language.”
4. The voice guide will say “Select a language: English, Spanish, French or Japanese.” Say the desired language. (Example: “English”)

5. The voice guide will say “English (Spanish, French or Japanese) selected. Is this correct?” Say “Yes.”
If you say “No,” the system will return to Step 4.

NOTE

- The voice guide will repeat the same message twice. The first message is in the current language, and the second message is in the selected language.
- If many entries are registered in the vehicle phonebook, changing the language will take a longer time.
- Changing the language deletes the mobile phonebook imported to the Bluetooth® 2.0 interface. If you wish to use it, you will have to import it again.

6. When the voice guide says “English (Spanish, French or Japanese) selected,” the language change process will be completed and the system will return to the main menu.

Useful voice commands

N00564200016

Help function

N00564301027

The Bluetooth® 2.0 interface is equipped with a help function.

If you say “Help” when the system is waiting for a voice command input, the system will tell you a list of the commands that can be used under the circumstances.

Canceling

N00564401028

There are 2 cancel functions.

If you are at the main menu, say “Cancel” to exit from the Bluetooth® 2.0 interface.

If you are anywhere else within the system, say “Cancel” to return to the main menu.

NOTE

- You can return to the previous menu by saying “Go Back.” (if so equipped)

Confirmation function setting

N00564501032

The Bluetooth® 2.0 interface is equipped with a confirmation function.

With the confirmation function activated, you are given more opportunities than normal to confirm a command when making various settings to the Bluetooth® 2.0 interface. This allows you to decrease the possibility that a setting is accidentally changed.

The confirmation function can be turned on or off by following the steps below.

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Setup.”
3. Say “Confirmation prompts.”
4. The voice guide will say “Confirmation prompts are <on/off>. Would you like to turn confirmation prompts <off/on>.” Answer “Yes” to change the setting or answer “No” to keep the current setting.
5. The voice guide will say “Confirmation prompts are <off/on>” and then the system will return to the main menu.

Security function

N00564601105

It is possible to use a passcode as a security function by setting a passcode of your choice for the Bluetooth® 2.0 interface.

When the security function is turned on, it is necessary to make a voice input of a 4-digit

passcode in order to use all functions of the Bluetooth® 2.0 interface, except for reception.

Setting the passcode

Use the following procedure to turn on the security function by setting a passcode.

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Setup.”
3. Say “Passcode.”
4. The voice guide will say “Passcode is disabled. Would you like to enable it?” Answer “Yes.” Answer “No” to cancel the setting of the passcode and return to the main menu.
5. The voice guide will say “Please say a 4-digit passcode. Remember this passcode. It will be required to use this system.” Say a 4-digit number which you want to set as a passcode.
6. For confirmation purposes, the voice guide will say “Passcode <4-digit passcode>. Is this correct?” Answer “Yes.” Answer “No” to return to the passcode input in Step 5.

7. When the registration of the passcode is completed, the voice guide will say “Passcode is enabled” and the system will return to the main menu.

NOTE

- Passcode will be required to access the system after the next ignition cycle.
- It is required for a little time after engine stop that the entered passcode is actually recorded in the system.
If the ignition switch or the operation mode is made to ACC or ON or the engine is started immediately after engine stop, there is a case when the entered passcode is not recorded in the system. At this time, please try to enter the passcode again.

Entering the passcode

If a passcode has been set and the security function is enabled, the voice guide will say “Hands-free system is locked. State the passcode to continue” when the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System) is pressed to enter voice recognition mode. Say the 4-digit passcode number to enter the passcode.

If the entered passcode is wrong, the voice guide will say “<4-digit passcode>, Incorrect

passcode. Please try again.” Enter the correct passcode.

NOTE

- You can reenter the passcode as many times as you want.
- If you have forgotten your passcode, say “Cancel” to quit the voice input mode and then check with an authorized Mitsubishi Motors dealer.

Disabling the passcode

Use the following procedure to turn off the security function by disabling the passcode.

NOTE

- System must be unlocked to disable the passcode.

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Setup.”
3. Say “Passcode.”
4. The voice guide will say “Passcode is enabled. Would you like to disable it?” Answer “Yes.”
Answer “No” to cancel the disabling of the passcode and return to the main menu.

5. When the disabling of the passcode is completed, the voice guide will say “Passcode is disabled” and the system will return to the main menu.

Speaker enrollment function

N00564700011

5

The Bluetooth® 2.0 interface can use the speaker enrollment function to create a voice model for one person per language.

This makes it easier for the Bluetooth® 2.0 interface to recognise voice commands said by you.

You can turn a voice model registered with the speaker enrollment function on and off whenever you want.

Speaker enrollment

N00564801110

It takes about 2 to 3 minutes to complete the speaker enrollment process.

To ensure the best results, run through the process while in the driver’s seat, in an environment that is as quiet as possible (when there is no rain or strong winds and the vehicle windows are closed). Please turn off your phone while in speaker enrollment to prevent interruption of the process.

Use the following procedure for speaker enrollment.

Bluetooth® 2.0 interface (if so equipped)

1. Stop your vehicle in a safe area, put the selector lever in the “P” (PARK) position and pull the parking brake lever.

NOTE

- Speaker enrollment is not possible unless the vehicle is parked. Make sure you park the vehicle in a safe area before attempting speaker enrollment.

5

2. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
3. Say “Voice training.”
4. The voice guide will say “This operation must be performed in a quiet environment while the vehicle is stopped. See the owner’s manual for the list of required training phrases. Press and release the SPEECH button when you are ready to begin. Press the HANG-UP button to cancel at any time.”
Press the SPEECH button to start the speaker enrollment process.

NOTE

- If you do not start the speaker enrollment process within 3 minutes after pressing the SPEECH button, the speaker enrollment function will time out.
The voice guide will say “Speaker enrollment has timed out.” The system will then beep and the voice recognition mode will be deactivated.

5. The voice guide will prompt for phrase 1. Repeat the corresponding phrase listed in table “Enrollment commands” on page 5-215.
The system will register your voice and then move on to the registration of the next command. Continue the process until all phrases have been registered.

NOTE

- To repeat the most recent voice training command, press and release the SPEECH button.
- If you press the HANG-UP button anytime during the process, the system will beep and stop the speaker enrollment process.

6. When all enrollment commands have been read out, the voice guide will say “Speaker enrollment is complete.” The system will then end the speaker enrollment process and return to the main menu.

NOTE

- Completing the speaker enrollment process will turn on the voice model automatically.
- The commands “Help” and “Cancel” will not work in this mode.

Enabling and disabling the voice model and retraining

N00564901078

You can turn a voice model registered with the speaker enrollment function on and off whenever you want.

You can also retrain the system.

Use the following procedure to perform these actions.

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Voice training.”
3. If you have completed a speaker enrollment process once already, the voice guide will say either “Enrollment is enabled. Would you like to disable or retrain?” or “Enrollment is disabled. Would you like to enable or retrain?”

4. When enrollment is “enabled,” the voice model is on; when enrollment is “disabled,” the voice model is off. Say the command that fits your needs.

Say “Retrain” to start the speaker enrollment process and recreate a new voice model. (Refer to “Speaker enrollment” on page 5-197.)

Connecting the Bluetooth® 2.0 interface and Bluetooth® device

N00565001281

Before you can make or receive hands-free calls or play music using the Bluetooth® 2.0 interface function, you must pair the Bluetooth® device and Bluetooth® 2.0 interface.

NOTE

- Pairing is required only when the device is used for the first time. Once the device has been paired with the Bluetooth® 2.0 interface, all you need is to bring the device into the vehicle next time and the device will connect to the Bluetooth® 2.0 interface automatically (if supported by the device). The device must have Bluetooth® turned ON to connect.

Up to 7 Bluetooth® devices can be paired with the Bluetooth® 2.0 interface.

If multiple paired Bluetooth® devices are available in the vehicle, the cellular phone or music player most recently connected is automatically connected to the Bluetooth® 2.0 interface.

You can also change a Bluetooth® device to be connected.

To pair

To pair a Bluetooth® device with the Bluetooth® 2.0 interface, use either one of the following 2 methods (Type 1 or Type 2).

■ Pairing procedure- Type 1 (if so equipped)

1. Stop your vehicle in a safe area, put the selector lever in the “P” (PARK) position and pull the parking brake lever.

NOTE

- You cannot pair any Bluetooth® device with the Bluetooth® 2.0 interface unless the vehicle is parked. Before pairing a Bluetooth® device with the Bluetooth® 2.0 interface, confirm that the vehicle is parked in a safe location.

2. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).

3. Say “Setup.”

4. Say “Pairing Options.”

5. The voice guide will say “Select one of the following: pair, edit, delete, or list.” Say “Pair.”

NOTE

- If 7 devices have already been paired, the voice guide will say “Maximum devices paired” and then the system will end the pairing process. To register a new device, delete one device and then repeat the pairing process. (Refer to “Selecting a device: Deleting a device” on page 5-203.)

6. The voice guide will say “Please say a 4-digit pairing code.” Say a 4-digit number. When the confirmation function is on, the system will confirm whether the number said is acceptable. Answer “Yes.” Answer “No” to return to pairing code selection.

 **NOTE**

- Some Bluetooth® devices require a specific pairing code. Please refer to the device manual for pairing code requirements.
 - The pairing code entered here is only used for the Bluetooth® connection certification. It is any 4-digit number the user would like to select.
- Remember the pairing code as it needs to be keyed into the Bluetooth® device later in the pairing process.
- Depending on the connection settings of the Bluetooth® device, this code may have to be entered each time you connect the Bluetooth® device to the Bluetooth® 2.0 interface. For the default connection settings, refer to the instructions for the device.

7. The voice guide will say “Start pairing procedure on the device. See the device manual for instructions.” Enter in the Bluetooth® device the 4-digit number you have registered in Step 6.

 **NOTE**

- Depending on the Bluetooth® device, it may take a few minutes to pair it with the Bluetooth® 2.0 interface.

 **NOTE**

- If the Bluetooth® 2.0 interface cannot recognize the Bluetooth® device, the voice guide will say “Pairing has timed out” and the pairing process will be cancelled. Confirm that the device you are pairing supports Bluetooth®, and try pairing it again.
- If you enter the wrong number, the voice guide will say “Pairing failed” and the pairing process will be cancelled. Confirm the number is right, and try pairing it again.

8. The voice guide will say “Please say the name of the device after the beep.” You can assign a desired name for the Bluetooth® device and register it as a device tag. Say the name you want to register after the beep.

 **NOTE**

- When the confirmation function is on, after repeating the device tag you have said, the voice guide will ask “Is this correct?” Answer “Yes.” To change the device tag, answer “No” and then say the device tag again.

9. The voice guide will say “Pairing complete,” and the pairing process will end.

■ **Pairing procedure- Type 2** (if so equipped)

1. Stop your vehicle in a safe area, put the selector lever in the “P” (PARK) position and pull the parking brake lever.

 **NOTE**

- You cannot pair any Bluetooth® device with the Bluetooth® 2.0 interface unless the vehicle is parked. Before pairing a Bluetooth® device with the Bluetooth® 2.0 interface, confirm that the vehicle is parked in a safe location.

2. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).

3. Say “Pair Device.”

 **NOTE**

- The following procedure (① to ③) can also be used instead of saying “Pair Device.” Replace this step 3 with the following procedure if you prefer.
 - ① Say “Setup.”
 - ② Say “Pairing Options.”
 - ③ The voice guide will say “Select one of the following: pair, edit, delete, or list.” Say “Pair.”
- If 7 devices have already been paired, the voice guide will say “Maximum devices paired” and then the system will end the pairing process. To register a new device, delete one device and then repeat the pairing process. (Refer to “Selecting a device: Deleting a device” on page 5-203.)

4. The voice guide will say “Start pairing procedure on the device. See the device manual for instructions.” and then will say “The pairing code is <pairing code>.”

 **NOTE**

- Some Bluetooth® devices require a specific pairing code. Please refer to the device manual for pairing code requirements and read the next section “If your device requires a specific pairing code” on page 5-202 to set the pairing code.

 **NOTE**

- The pairing code entered here is only used for the Bluetooth® connection certification. Depending on the connection settings of the Bluetooth® device, this code may have to be entered each time you connect the Bluetooth® device to the Bluetooth® 2.0 interface. For the default connection settings, refer to the instructions for the device.

5. Enter in the Bluetooth® device the 4-digit number that has been read out in Step 4.

 **NOTE**

- Depending on the Bluetooth® device, it may take a few minutes to pair it with the Bluetooth® 2.0 interface.
- If the Bluetooth® 2.0 interface cannot recognize the Bluetooth® device, the voice guide will say “Pairing has timed out” and the pairing process will be cancelled. Confirm that the device you are pairing supports Bluetooth®, and try pairing it again.

 **NOTE**

- If you enter the wrong number, the voice guide will say “Pairing failed” and the pairing process will be cancelled. Confirm the number is right, and try pairing it again. If your device requires a specific pairing code, you need to set the pairing code. Refer to the device manual for pairing code requirements and read the next section “If your device requires a specific pairing code” on page 5-202.

6. The voice guide will say “Please say the name of the device after the beep.” You can assign a desired name for the Bluetooth® device and register it as a device tag. Say the name you want to register after the beep.

 **NOTE**

- When the confirmation function is on, after repeating the device tag you have said, the voice guide will ask “Is this correct?” Answer “Yes.” To change the device tag, answer “No” and then say the device tag again.

7. The voice guide will say “Pairing Complete. Would you like to import the contacts from your mobile device now?” Answer “Yes,” and the voice guide will say “Please wait while the contacts are imported. This may take several minutes.” Answer “No” to end the pairing process.

If your device requires a specific pairing code

If your device requires a specific pairing code, you need to set the pairing code. Follow the procedures below.

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Setup.”
3. Say “Pairing Options.”
4. Say “Set Code.”
5. The voice guide will say “Do you want the pairing code to be random or fixed?” Say “Fixed.”
6. The voice guide will say “Please say a 4-digit pairing code.” Say a 4-digit number.
7. The voice guide will say “Pairing code set to <pairing code>.”
When the confirmation function is on, the system will confirm whether the number said is acceptable. Answer “Yes.”

Answer “No,” the system will return to Step 6.

8. The voice guide will say “Do you want to pair a device now?” Answer “Yes,” the system will proceed to Step 3 in the pairing process. Refer to the “Pairing procedure- Type 2.”

Selecting a device

N00565101080

If multiple paired Bluetooth® devices are available in the vehicle, the cellular phone or music player most recently connected is automatically connected to the Bluetooth® 2.0 interface.

You can connect to the other paired cellular phone or music player by following setting change procedures.

■ **To select a cellular phone**

N00582200034

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Setup.”
3. Say “Select phone.”

4. After the voice guide says “Please say,” the numbers of the cellular phones and device tags of corresponding cellular phones will be read out in order, starting with the cellular phone that has been most recently connected.

Say the number of the cellular phone that you want to connect to.

When the confirmation function is on, the system will ask you again whether the phone that you want to connect to is correct. Answer “Yes” to continue and connect to the cellular phone.

Answer “No,” and the voice guide will say “Please say.” Say the number of the phone that you want to connect to.

 **NOTE**

- You can connect to a phone at any time by pressing the SPEECH button and saying the number, even before all of the paired numbers and device tags of corresponding cellular phones are read out by the system.

5. The selected phone will be connected to the Bluetooth® 2.0 interface. The voice guide will say “<device tag> selected” and then the system will return to the main menu.

■ To select a music player

N00582300035

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Setup.”
3. Say “Select music player.”
4. After the voice guide says “Please say,” the numbers of the music players and device tags of corresponding music players will be read out in order, starting with the music player that has been most recently connected.
Say the number of the music player that you want to connect to.
When the confirmation function is on, the system will ask you again whether the music player that you want to connect to is correct. Answer “Yes” to continue and connect to the music player.
Answer “No,” and the voice guide will say “Please say.” Say the number of the music player that you want to connect to.

NOTE

- You can connect to a music player at any time by pressing the SPEECH button and saying the number, even before all of the paired numbers and device tags of corresponding music players are read out by the system.

5. The selected music player will be connected to the Bluetooth® 2.0 interface.
The voice guide will say “<device tag> selected” and then the system will return to the main menu.

■ Deleting a device

N00582400036

Use the following procedure to delete a paired Bluetooth® device from the Bluetooth® 2.0 interface.

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Setup.”
3. Say “Pairing Options.”
4. The voice guide will say “Select one of the following: pair, edit, delete, or list.” Say “Delete.”
5. After the voice guide says “Please say,” the numbers of the devices and device tags of corresponding devices will be read out in order, starting with the device that has been most recently connected. After it completes reading all pairs, the voice guide will say “or all.”
Say the number of the device that you want to delete from the system.

- If you want to delete all paired phones from the system, say “All.”
6. For confirmation purposes, the voice guide will say “Deleting <device tag> <number>. Is this correct?” or “Deleting all devices. Is this correct?”
Answer “Yes” to delete the phone(s).
Answer “No,” the system will return to Step 4.
 7. The voice guide will say “Deleted,” and then the system will end the device deletion process.

NOTE

- If the device deletion process fails for some reason, the voice guide will say “Delete failed” and then the system will cancel deleting the device.

To check a paired Bluetooth® device

N00565201036

You can check a paired Bluetooth® device by following the steps below.

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Setup.”

3. Say “Pairing Options.”
4. The voice guide will say “Select one of the following: pair, edit, delete, or list.” Say “List.”
5. The voice guide will read out device tags of corresponding devices in order, starting with the Bluetooth® device that has been most recently connected.
6. After the device tags of all paired Bluetooth® devices have been read, the system will say “End of list, would you like to start from the beginning?”

To hear the list again from the beginning, answer “Yes.”

When you are done, answer “No” to return to the main menu.

 **NOTE**

- If you press and release the SPEECH button and say “Continue” or “Previous” while the list is being read, the system will advance or rewind the list.
Say “Continue” to proceed to the device with the next highest number or “Previous” to return to the phone with the previous number.
- You can change the device tag by pressing and releasing the SPEECH button and then saying “Edit” while the list is being read.

 **NOTE**

- You can change the phone to be connected by pressing and releasing the SPEECH button and then saying “Select phone” while the list is being read.
- You can change the music player to be connected by pressing and releasing the SPEECH button and then saying “Select music player” while the list is being read.

Changing a device tag

N00565301037

You can change the device tag of a paired cellular phone or music player.

Follow the steps below to change a device tag.

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Setup.”
3. Say “Pairing Options.”
4. The voice guide will say “Select one of the following: pair, edit, delete, or list.” Say “Edit.”

5. The voice guide will say “Please say,” and read out the numbers of the Bluetooth® devices and device tags of corresponding devices in order, starting with the Bluetooth® that has been most recently connected.

After all paired device tags have been read, the voice guide will say “Which device, please?” Say the number of the device tag you want to change.

 **NOTE**

- You can press and release the SPEECH button while the list is being read, and immediately say the number of the device tag you want to change.

6. The voice guide will say “New name, please.” Say the name you want to register as a new device tag.
When the confirmation function is on, the voice guide will say “<New device tag>. Is this correct?” Answer “Yes.”
Answer “No,” you can say the new device tag you want to register again.
7. The device tag is changed.
When the change is complete, the voice guide will say “New name saved” and then the system will return to the main menu.

Operating a music player connected via Bluetooth®

N00565401070

For the operation of a music player connected via Bluetooth®, refer to the following sections.

[For vehicles equipped with the AM/FM radio/CD player]

Refer to “Listen to Bluetooth Audio” on page 7-41.

[For vehicles equipped with the Mitsubishi Multi-Communication System (MMCS)]

Refer to the separate owner’s manual.

[For vehicles equipped with the DISPLAY AUDIO]

Refer to the separate owner’s manual.

How to make or receive hands-free calls

N00565501097

You can make or receive hands-free calls using a Bluetooth® compatible cellular phone connected to the Bluetooth® 2.0 interface. You can also use the phonebooks in the Bluetooth® 2.0 interface to make calls without dialing telephone numbers.

To make a call P.5-205

Send function P.5-207

Receiving calls P.5-207

Mute function P.5-207

Switching between hands-free mode and private mode P.5-207

NOTE

- Hands-free calls may not operate correctly when you place or receive the call directly from your cellular phone, instead of using the Bluetooth® 2.0 interface.

To make a call

N00565601098

You can make a call in the following 3 ways using the Bluetooth® 2.0 interface:

- By saying a telephone number
- By using the Bluetooth® 2.0 interface’s phonebook
- By redialing a telephone number

Making a call by using the telephone number

You can make a call by saying the telephone number.

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Dial.”
3. After the voice guide says “Number please,” say the telephone number.
4. The voice guide will say “Dialing <number recognized>.”

The Bluetooth® 2.0 interface will then make the call.

When the confirmation function is on, the system will confirm the telephone number again. To continue with that number, answer “Yes.”

To change the telephone number, answer “No.” The system will say “Number please” then say the telephone number again.

NOTE

- In the case of English, the system will recognise both “zero” and “oh” (Letter “o”) for the number “0.”
- The Bluetooth® 2.0 interface supports numbers (0 to 9) and characters (+, # and *).
- The maximum supported telephone number length is as follows:
 - International telephone number: + and telephone numbers (to 18 digits).

 **NOTE**

- Except for international telephone number: telephone numbers (to 19 digits).

Making a call using a phonebook

You can make calls using the vehicle phonebook or mobile phonebook of the Bluetooth® 2.0 interface.

For details on the phonebooks, refer to “Phonebook function” on page 5-207.

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Call.”

 **NOTE**

- If you say “Call” when the vehicle phonebook and the mobile phonebook are empty, the voice guide will say “The vehicle phonebook is empty. Would you like to add a new entry now?”
Answer “Yes,” and the voice guide will say “Entering the phonebook - new entry menu.” You can now create data in the vehicle phonebook.
Answer “No,” the system will return to the main menu.

3. After the voice guide says “Name please,” say the name you want to call, from those registered in the phonebook.

4. If there is only 1 match, the system will proceed to Step 5.

If there are 2 or more matches, the voice guide will say “More than one match was found, would you like to call <returned name>.” If that person is the one you want to call, answer “Yes.”

Answer “No,” the name of the next matching person will be uttered by the voice guide.

 **NOTE**

- If you say “No” to all names read by the system, the voice guide will say “Name not found, returning to main menu” and the system will return to the main menu.

5. If only 1 telephone number is registered under the name you just said, the voice guide will proceed to Step 6.

If 2 or more telephone numbers are registered that match the name you just said, the voice guide will say “Would you like to call <name> at [home], [work], [mobile], or [other]?” Select the location to call.

 **NOTE**

- If the name you selected has matching data in the vehicle phonebook but no telephone number is registered under the selected location, the voice guide will say “{home/work/mobile/other} not found for <name>. Would you like to add location or try again?”
Say “Try again,” and the system will return to Step 3.
Say “Add location” and you can register an additional telephone number under the selected location.
- If the name you selected has matching data in the mobile phonebook but no telephone number is registered under the selected location, the voice guide will say “{home/work/mobile/other} not found for <name>. Would you like to try again?”
Answer “Yes,” and the system will return to Step 3.
Answer “No,” and the call will be cancelled. Start over again from Step 1.

6. The voice guide will say “Calling <name> <location>” and then the system will dial the telephone number.

NOTE

- When the confirmation function is on, the system will check if the name and location of the receiver are correct. If the name is correct, answer “Yes.”
To change the name or location to call, answer “No.” The system will return to Step 3.

Redialing

You can redial the last number called, based on the history of dialed calls in the paired cellular phone.

Use the following procedure to redial.

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Redial.”

Send function

N00565700018

During a call, press the SPEECH button to enter voice recognition mode, then say “<numbers> SEND” to generate DTMF tones.

For example, if during a call you need to simulate the pressing of a phone button as a

response to an automated system, press the SPEECH button and speak “1 2 3 4 pound send” and the 1234# will be sent via your cellular phone.

Receiving calls

N00565801045

If an incoming phone call is received while the ignition switch or the operation mode is in ON or ACC, the audio system will be automatically turned on and switched to the incoming call, even when the audio system was originally off.

The voice guide announcement for the incoming call will be output from the front passenger’s seat speaker.

If the CD player or radio was playing when the incoming call was received, the audio system will mute the sound from the CD player or radio and output only the incoming call.

To receive the call, press the PICK-UP button on the steering wheel control switch.

When the call is over, the audio system will return to its previous state.

Mute function

N00565900010

At any time during a call, you can mute the vehicle microphone.

Bluetooth® 2.0 interface (if so equipped)

Pressing the SPEECH button and then saying “Mute” during a call will turn ON the mute function and mute the microphone.

Saying “Mute off” in the same way will turn off the mute function and cancel the mute on the microphone.

Switching between hands-free mode and private mode

N0056600014

The Bluetooth® 2.0 interface can switch between hands-free mode (hands-free calls) and private mode (calls using cellular phone).

If you press the SPEECH button and say “Transfer call” during a hands-free call, you can stop the hands-free mode and talk in private mode.

To return to hands-free mode, press the SPEECH button again and say “Transfer call.”

Phonebook function

N0056600018

The Bluetooth® 2.0 interface has 2 types of unique phonebooks that are different from the phonebook stored in the cellular phone. They are the vehicle phonebook and the mobile phonebook.

Bluetooth® 2.0 interface (if so equipped)

These phonebooks are used to register telephone numbers and make calls to desired numbers via voice recognition function.

NOTE

- Disconnecting the battery cable will not delete information registered in the phonebook.

5

Vehicle phonebook

N00566101120

This phonebook is used when making calls with the voice recognition function.

Up to 32 names can be registered in the vehicle phonebook per language.

Also, each entry has 4 locations associated with: home, work, mobile and other. You can register one telephone number for each location.

You can register a desired name as a name for any phonebook entry registered in the vehicle phonebook.

Names and telephone numbers can be changed later on.

The vehicle phonebook can be used with all paired cellular phones.

■ To register a telephone number in the vehicle phonebook

N00580500059

You can register a telephone number in the vehicle phonebook in the following 2 ways: Reading out a telephone number, and selecting and transferring 1 phonebook entry from the phonebook of the cellular phone.

■ To register by reading out a telephone number

N00580600063

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Phonebook.”
3. The voice guide will say “Select one of the following: new entry, edit number, edit name, list names, delete, erase all, or import contact.” Say “New entry.”
4. The voice guide will say “Name please.” Say your preferred name to register it.

NOTE

- If the maximum number of entries are already registered, the voice guide will say “The phonebook is full. Would you like to delete a name?” Say “Yes” if you want to delete a registered name. If you say “No,” the system will return to the main menu.

5. When the name has been registered, the voice guide will say “home, work, mobile, or other?” Say the location for which you want to register a telephone number.

NOTE

- When the confirmation function is on, the voice guide will say “<Location>. Is this correct?” Answer “Yes.” If a telephone number has been registered for the selected location, the voice guide will say “The current number is <telephone number>, number please.” If you do not want to change the telephone number, say “cancel” or the original number to keep it registered.

6. The voice guide will say “Number please.” Say the telephone number to register it.

 **NOTE**

- In the case of English, the system will recognise both “zero” and “oh” (Letter “o”) for the number “0.”

7. The voice guide will repeat the telephone number you have just read, and then register the number.

When the telephone number has been registered, the voice guide will say “Number saved. Would you like to add another number for this entry?”

To add another telephone number for a new location for the current entry, answer “Yes.” The system will return to location selection in Step 5.

Answer “No” to end the registration process and return to the main menu.

 **NOTE**

- When the confirmation function is on, after repeating the telephone number you have read, the voice guide will ask “Is this correct?” Answer “Yes.”
Answer “No” to return to telephone number registration in step 6.

■ To select and transfer one phonebook entry from the phonebook of the cellular phone

N00580700048

You can select 1 phonebook entry from the phonebook of the cellular phone and register it in the vehicle phonebook.

 **NOTE**

- Transfer is not permitted unless the vehicle is parked. Before transferring, make sure that the vehicle is parked in a safe location.
- All or part of data may not be transferred, even when the cellular phone supports Bluetooth®, depending on the compatibility of the device.
- The maximum supported telephone number length is 19 digits. Any telephone number of 20 digits or more will be truncated to the first 19 digits.
- If telephone numbers contain characters other than 0 to 9, *, # or +, these characters are deleted before the transfer.
- For the connection settings on the cellular phone side, refer to the instructions for the cellular phone.

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).

2. Say “Phonebook.”
3. The voice guide will say “Select one of the following: new entry, edit number, edit name, list names, delete, erase all, or import contact.” Say “Import contact.”
4. The voice guide will say “Would you like to import a single entry or all contacts?” Say “Single entry.”

The Bluetooth® 2.0 interface will become ready to receive transferred phonebook data.

 **NOTE**

- If the maximum number of entries are already registered, the voice guide will say “The phonebook is full. Would you like to delete a name?” Say “Yes” if you want to delete a registered name.
If you say “No,” the system will return to the main menu.

5. After the voice guide says “Ready to receive a contact from the phone. Only a home, a work, and a mobile number can be imported,” the Bluetooth® 2.0 interface will receive the phonebook data from the Bluetooth® compatible cellular phone.

6. Operate the Bluetooth® compatible cellular phone to set it up so that the phonebook entry you want to register in the vehicle phonebook can be transferred to the Bluetooth® 2.0 interface.

 **NOTE**

- If the Bluetooth® 2.0 interface cannot recognize the Bluetooth® compatible cellular phone or the connection takes too much time, the voice guide will say “Import contact has timed out” and then the system will cancel the registration. In such case, start over again from Step 1.
- Pressing the HANG-UP button or pressing and holding the SPEECH button will cancel the registration.

7. When the reception is complete, the voice guide will say “<Number of telephone numbers that had been registered in the import source> numbers have been imported. What name would you like to use for these numbers?”
Say the name you want to register for this phonebook entry.

 **NOTE**

- If the entered name is already used for other phonebook entry or similar to a name used for other phonebook entry, that name cannot be registered.

8. The voice guide will say “Adding <name>.”

When the confirmation function is on, the system will ask if the name is correct. Answer “Yes.”

Answer “No,” the voice guide will say “Name please.” Register a different name.

9. The voice guide will say “Numbers saved.”
10. The voice guide will say “Would you like to import another contact?”
Answer “Yes” if you want to continue with the registration. You can continue to register a new phonebook entry from Step 5.
Answer “No,” the system will return to the main menu.

■ To change the content registered in the vehicle phonebook

N00579800049

You can change or delete a name or telephone number registered in the vehicle phonebook. You can also listen to the list of names registered in the vehicle phonebook.

 **NOTE**

- The system must have at least one entry.

◆ Editing a telephone number

N00579900053

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Phonebook.”
3. The voice guide will say “Select one of the following: new entry, edit number, edit name, list names, delete, erase all, or import contact”. Say “Edit number.”
4. The voice guide will say “Please say the name of the entry you would like to edit, or say list names.” Say the name of the phonebook entry you want to edit.

 **NOTE**

- Say “List names,” and the names registered in the phonebook will be read out in order. Refer to “Vehicle phonebook: Listening to the list of registered names” on page 5-211.

5. The voice guide will say “Home, work, mobile or other?” Select and say the location where the telephone number you want to change or add is registered.
When the confirmation function is on, the system will check the target name and location again. Answer “Yes” if you want to continue with the editing.

Answer “No,” the system will return to Step 3.

- The voice guide will say “Number, please.” Say the telephone number you want to register.

NOTE

- If the telephone number is already registered in the selected location, the voice guide will say “The current number is <current number>. New number, please.” Say a new telephone number to change the current number.

- The voice guide will repeat the telephone number.

When the confirmation function is on, the system will ask if the number is correct. Answer “Yes.”

Answer “No,” the system will return to the Step 3.

- Once the telephone number is registered, the voice guide will say “Number saved” and then the system will return to the main menu.

NOTE

- If the location where a telephone number was already registered has been overwritten with a new number, the voice guide will say “Number changed” and then the system will return to the main menu.

◆ Editing a name

N00580100055

- Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
- Say “Phonebook.”
- The voice guide will say “Select one of the following: new entry, edit number, edit name, list names, delete, erase all, or import contact.” Say “Edit name.”
- The voice guide will say “Please say the name of the entry you would like to edit, or say list names.” Say the name you want to edit.

NOTE

- Say “List names,” and the names registered in the phonebook are read out in order. Refer to “Vehicle phonebook: Listening to the list of registered names” on page 5-211.

- The voice guide will say “Changing <name>.”

When the confirmation function is on, the system will check if the name is correct. Answer “Yes” if you want to continue with the editing based on this information. Answer “No,” the system will return to Step 4.

- The voice guide will say “Name please.” Say the new name you want to register.

- The registered name will be changed. When the change is complete, the system will return to the main menu.

◆ Listening to the list of registered names

N00580200043

- Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).

- Say “Phonebook.”

- The voice guide will say “Select one of the following: new entry, edit number, edit name, list names, delete, erase all, or import contact.” Say “List names.”

- Bluetooth® 2.0 interface will read out the entries in the phonebook in order.

- When the voice guide is done reading the list, it will say “End of list, would you like to start from the beginning?” When you want to check the list again from the beginning, answer “Yes.”

When you are done, answer “No” to return to the previous or main menu.

 **NOTE**

- You can call, edit or delete a name that is being read out.
Press the SPEECH button and say “Call” to call the name, “Edit name” to edit it, or “Delete” to delete it.
The system will beep and then execute your command.
- If you press the SPEECH button and say “Continue” or “Previous” while the list is being read, the system will advance or rewind the list. Say “Continue” to proceed to the next entry or “Previous” to return to the previous entry.

◆ **Deleting a telephone number**

N00580300057

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Phonebook.”
3. The voice guide will say “Select one of the following: new entry, edit number, edit name, list names, delete, erase all, or import contact.” Say “Delete.”

4. The voice guide will say “Please say the name of the entry you would like to delete, or say list names.” Say the name of the phonebook entry in which the telephone number you want to delete is registered.

 **NOTE**

- Say “List names,” and the names registered in the phonebook are read out in order. Refer to “Vehicle phonebook: Listening to the list of registered names” on page 5-211.

5. If only one telephone number is registered in the selected phonebook entry, the voice guide will say “Deleting <name> <location>.”

If multiple telephone numbers are registered in the selected phonebook entry, the voice guide will say “Would you like to delete [home], [work], [mobile], [other], or all?”

Select the location to delete, and the voice guide will say “Deleting <name> <location>.”

 **NOTE**

- To delete the telephone numbers from all locations, say “All.”

6. The system will ask if you really want to delete the selected telephone number(s) to go ahead with the deletion, answer “Yes.” Answer “No,” the system will cancel deleting the telephone number(s) and then return to Step 4.
7. When the telephone number deletion is complete, the voice guide will say “<name> <location> deleted” and then the system will return to the main menu.
If all locations are deleted, the system will say “<name> and all locations deleted” and the name will be removed from the phonebook. If numbers still remain under the entry, the name will retain the other associated numbers.

■ **Erasing the phonebook**

N00580400045

You can delete all registered information from the vehicle phonebook.

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Phonebook.”
3. The voice guide will say “Select one of the following: new entry, edit number, edit name, list names, delete, erase all, or import contact.” Say “Erase all.”

4. For confirmation purposes, the voice guide will ask “Are you sure you want to erase everything from your hands-free system phonebook?” Answer “Yes.”

Answer “No” to cancel the deletion of all registered information in the phonebook and return to the main menu.

5. The voice guide will say “You are about to delete everything from your hands-free system phonebook. Do you want to continue?” Answer “Yes” to continue.

Answer “No” to cancel the deletion of all registered information in the phonebook and return to the main menu.

6. The voice guide will say “Please wait, erasing the hands-free system phonebook” and then the system will delete all data in the phonebook.

When the deletion is complete, the voice guide will say “Hands-free system phonebook erased” and then the system will return to the main menu.

Mobile phonebook

N00566201059

All entries in the phonebook stored in the cellular phone can be transferred in a batch and registered in the mobile phonebook.

Up to 7 mobile phonebooks, each containing up to 1,000 names, can be registered.

The Bluetooth® 2.0 interface automatically converts from text to voice the names registered in the transferred phonebook entries, and creates names.

NOTE

- Only the mobile phonebook transferred from the connected cellular phone can be used with that cellular phone.
- You cannot change the names and telephone numbers in the phonebook entries registered in the mobile phonebook. You cannot select and delete specific phonebook entries, either. To change or delete any of the above, change the applicable information in the source phonebook of the cellular phone and then transfer the phonebook again.

To import a devices phonebook

Follow the steps below to transfer to the mobile phonebook the phonebook stored in the cellular phone.

NOTE

- Transfer should be completed while the vehicle is parked. Before transferring, make sure that the vehicle is parked in a safe location.
- The already stored phonebook in the mobile phonebook is overwritten by the stored phonebook in the cellular phone.

NOTE

- All or part of data may not be transferred, even when the cellular phone supports Bluetooth®, depending on the compatibility of the device.
- Only a home, a work, and a mobile number can be imported.
- The maximum supported telephone number length is 19 digits. Any telephone number of 20 digits or more will be truncated to the first 19 digits.
- If telephone numbers contain characters other than 0 to 9, *, # or +, these characters are deleted before the transfer.
- For the connection settings on the cellular phone side, refer to the instructions for the cellular phone.

1. Press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System).
2. Say “Phonebook.”
3. The voice guide will say “Select one of the following: new entry, edit number, edit name, list names, delete, erase all, or import contact.” Say “Import contact.”
4. The voice guide will say “Would you like to import a single entry or all contacts?” Say “All contacts.”

5. The voice guide will say “Importing the contact list from the mobile phonebook. This may take several minutes to complete. Would you like to continue?” Answer “Yes,” transferring to the mobile phonebook the phonebook stored in the cellular phone will start. Answer “No,” the system will return to the main menu.

 **NOTE**

- The transfer may take some time to complete depending on the number of contacts.
- If the Bluetooth® 2.0 interface could not be connected to the Bluetooth® compatible cellular phone, the voice guide will say “Unable to transfer contact list from phone” and then the system will return to the main menu.
- If you press the HANG-UP button or press and hold the SPEECH button during the data transfer, the transfer will be cancelled and the system will return to the main menu.
- If an error occurs during the data transfer, all transfer will be cancelled and the voice guide will say “Unable to complete the phonebook import” and then the system will return to the main menu.
- If there are no contacts in the phonebook, the voice guide will say “There are no contacts on the connected phone.”

6. When the transfer is complete, the voice guide will say “Import complete” and then the system will return to the main menu.

General information

N00566301092

MODEL: MMC FCC ID: CB2MDGMY10
IC: 279B-MDGMY10

Your Bluetooth® 2.0 interface operates on a radio frequency subject to Federal Communications Commission (FCC) Rules (For vehicles sold in U.S.A.) and Industry Canada Rules (For vehicles sold in Canada). This device complies with Part 15 of the FCC Rules and RSS-210 of the Industry Canada Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

 **CAUTION**

- Changes or modifications made to this equipment not expressly approved by the manufacturer may void the FCC authorization to operate this equipment.

The term “IC:” before the radio certification number only signifies that Industry Canada technical specifications were met.

The antenna used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provided with installation instructions and transmitter operating conditions for satisfying RF exposure compliance.

FCC Notice: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, use and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

ICES Notice: This Class B digital apparatus complies with Canadian ICES-003.

USB input terminal (if so equipped)

N00566701100

You can connect your USB memory device or iPod* to play music files stored in the USB memory device or iPod.

This section explains how to connect and remove a USB memory device or iPod. See the following section for details on how to play music files.

Refer to “Listen to an iPod” on page 7-33. Refer to “Listen to Audio Files on a USB Device” on page 7-35. Refer to “To play iPod/USB memory device tracks via voice operation” on page 7-38.

*: “iPod” is a registered trademark of Apple Inc. in the United States and other countries.

How to connect a USB memory device

N00566801114

1. Park your vehicle in a safe place and turn the ignition switch to the “LOCK” position or put the operation mode in OFF.
2. Open the USB input terminal cover (A) in the floor console box.

USB input terminal (if so equipped)

3. Connect a commercially available USB connector cable (C) to the USB memory device (B).

4. Connect the USB connector cable (C) to the USB input terminal (D).

5

AA0113117

CAUTION

- Keep the lid of the floor console box closed while driving the vehicle. A lid or the contents of the floor console box could otherwise cause injuries.

NOTE

- Do not connect the USB memory device to the USB input terminal directly. The USB memory device may be damaged.
- When closing the floor console box, be careful not to trap the USB connector cable.

5. To remove the USB connector cable, turn the ignition switch to the “LOCK” position or put the operation mode in OFF first and perform the installation steps in reverse.

How to connect an iPod

N00566901102

1. Park your vehicle in a safe place and turn the ignition switch to the “LOCK” position or put the operation mode in OFF.
2. Open the USB input terminal cover (A) in the floor console box.

AA0110493

3. Connect the Dock connector (C) to the iPod (B).

AA0098115

NOTE

- Use a genuine Dock connector from Apple Inc.

4. Connect the Dock connector (C) to the USB input terminal (D).

AA0113120

CAUTION

- Keep the lid of the floor console box closed while driving the vehicle. A lid or the contents of the floor console box could otherwise cause injuries.

NOTE

- When closing the floor console box, be careful not to trap the connector cable.

5. To remove the Dock connector, turn the ignition switch to the “LOCK” position or put the operation mode in OFF first and perform the installation steps in reverse.

Types of connectable devices and supported file specifications

N00567001041

Except for vehicles equipped with the Bluetooth® 2.0 interface

For details about the types of connectable devices and supported file specifications, refer to the following pages and manuals.

[For vehicles equipped with the AM/FM radio/CD player]

Refer to “Listen to an iPod” on page 7-33, “Listen to Audio Files on a USB Device” on page 7-35 and “Audio Files (MP3/WMA/AAC)” on page 7-20.

[For vehicles equipped with the Mitsubishi Multi-Communication System (MMCS)]

Refer to the separate owner’s manual.

[For vehicles equipped with the DISPLAY AUDIO]

Refer to the separate owner’s manual.

For vehicles equipped with the Bluetooth® 2.0 interface

For details about the types of connectable devices and supported file specifications, refer to the following section.

Device types

N00567101130

Devices of the following types can be connected.

Model name	Condition
USB memory device	Storage capacity of 256 Mbytes or more
Models other than USB memory devices and iPods	Digital audio player supporting mass storage class

For these connectable device types, “iPod*,” “iPod classic*,” “iPod nano*,” “iPod touch*” and “iPhone*,” refer to the following website:

[For vehicles sold in U.S.A.]

You can access the Mitsubishi Motors North America website.

[For vehicles sold in Canada and Mexico]

You can access the Mitsubishi Motors website. Please read and agree to the “Warning about Links to the Web Sites of Other Companies”. The websites mentioned above may connect you to websites other than the Mitsubishi Motors website.

<http://www.mitsubishi-motors.com/en/products/index.html>

*: “iPod,” “iPod classic,” “iPod nano,” “iPod touch,” and “iPhone” are registered trademarks of Apple Inc. in the United States and other countries.

NOTE

- Depending on the type of the USB memory device or other device connected, the connected device may not function properly or the available functions may be limited.
- It is recommended to use an iPod with firmware updated to the latest version.
- You can charge your iPod by connecting it to the USB input terminal when the ignition switch or the operation mode is in ON or ACC.
- Do not keep your USB memory device or iPod in your vehicle.
- It is recommended that you back up the files in case of data damage.

NOTE

- Do not connect to the USB input terminal any device (hard disk, card reader, memory reader, etc.) other than the connectable devices specified in the previous section. The device and/or data may be damaged. If any of these devices was connected by mistake, remove it after turning the ignition switch to the “LOCK” position or putting the operation mode in OFF.

5

File specifications

N00567201056

You can play music files of the following specifications that are saved in a USB memory device or other device supporting mass storage class. When you connect your iPod, playable file specifications depend on the connected iPod.

Item	Condition
File format	MP3, WMA, AAC, WAV
Maximum number of levels (including the root)	Level 8
Number of folders	700
Number of files	65,535

Sun visors

N00524601363

Pull the sun visor downward (1) to reduce front glare while driving. To reduce side glare, turn the visor to the side (2).

AG0000309

Vanity mirror

A vanity mirror is fitted to the back of the sun visor. Operating the lid of the vanity mirror will automatically turn on the mirror light (A).

AG0000123

CAUTION

- If the lid of vanity mirror with light is kept open for prolonged periods of time, the vehicle's battery will be discharged.

Card holder

Cards can be slipped into the holder (B) on the sun visor.

12 V power outlets

N00525001625

⚠ CAUTION

- Be sure to use a “plug-in” type accessory operating at 12 V and at 120 W or less. When using more than one socket at the same time, make sure the total power consumption of the electrical accessories does not exceed 120 W at 12 V.
- Also be aware that using electronic equipment with the engine off may run the battery down.
- When the power outlet is not in use, be sure to close the power outlet cover or replace the cap. This will prevent the power outlet from becoming clogged and short circuiting.

To use a “plug-in” type accessory, open the cover or remove the cap, and insert the plug in the power outlet.

📖 NOTE

- If your vehicle is equipped with two 12V power outlets, they can be used simultaneously.

Type 1

Accessories can be operated when the ignition switch or the operation mode is in ON or ACC.

5

Type 2

Accessories can be operated in all ignition switch positions or all operation modes.

5

HomeLink® Wireless Control System (if so equipped)

N00554301040

HomeLink® Wireless Control System is a registered trademark of Gentex Corporation.

HomeLink® provides a convenient way to replace up to 3 hand-held radio-frequency (RF) transmitters used to activate devices such as gate operators, garage door openers, entry door locks, security systems, even home lighting. Additional HomeLink® information can be found at www.homelink.com, www.youtube.com/HomeLinkGentex, or by calling the toll-free HomeLink®-Hotline at 1-800-355-3515.

⚠ WARNING

- Do not use HomeLink® with any garage door opener that lacks safety stop and reverse features as required by U.S. Federal Regulations. A garage door opener which cannot detect an object in the path of a closing garage door and then automatically stop and reverse, does not meet current U.S. Federal Regulations. Using a garage door opener without these features increases the risk of serious injury or death.
- During programming, your garage door or gate may open or close. Make sure that people and objects are clear of the garage door or gate that you are programming.

📖 NOTE

- Once HomeLink® is programmed, retain the original transmitter for future programming procedures (for example, new vehicle purchases). Upon sale of the vehicle, the programmed HomeLink® buttons should be erased for security purposes. Refer to “Cleaning the programmed information” on page 5-224.

📖 NOTE

- You can program a maximum of 3 devices. To change or replace any of the 3 devices after it has been initially programmed, you must first erase the current settings. See “Cleaning the programmed information” on page 5-224 or “Reprogramming a single HomeLink® button” on page 5-224.

- 1- HomeLink® button 1
- 2- HomeLink® button 2
- 3- HomeLink® button 3

Before programming Home-Link®

N00584600029

- Some garage door openers manufactured after 1995 have “rolling code protection”. To program a garage door opener equipped with “rolling code protection”; you will need to access the garage door opener motor to press the motor’s “Learn” or “Smart” buttons. For convenience, use a ladder and another person to assist you.
- It is recommended that a new battery be placed in the hand-held transmitter of the device being programmed to HomeLink® for quicker training and accurate transmission of the radio-frequency signal.

Programming a new Home-Link®

N00584700020

To program HomeLink® to operate a garage door, gate, or entry door opener, home or office lighting, you need to be at the same location as the device.

1. Press the HomeLink® button that you would like to program. The indicator light (A) will flash orange slowly.

NOTE

- You do not need to continue holding the HomeLink® button.
- If the indicator light does not flash, refer to “Cleaning the programmed information” on page 5-224.

2. Position the end of your hand-held transmitter (B) 1 to 3 inches (2 to 8 cm) away from the HomeLink® button while keeping the indicator light in view.

NOTE

- Some hand-held transmitters may actually train better from a distance of 6 to 12 inches (15 to 20 cm). Keep this in mind if you have difficulty with the programming process.

3. Press and hold the hand-held transmitter button while watching the indicator light (A). Continue pressing the button until the indicator light (A) changes from slowly flashing orange to either rapidly flashing green (rolling code) or continuously lit green (fixed code). Now you may release the hand-held transmitter button.

 **NOTE**

● Some devices may require you to replace this “Programming a new HomeLink®” step 3 with procedures noted in the “Gate operator / Canadian programming” section. If the indicator light does not change to rapidly flashing green or continuously lit green after performing these steps, contact HomeLink® at www.homelink.com

5

4. Press the HomeLink® button that was just programmed and observe the indicator light.
 - If the indicator light continuously illuminates green, programming is complete and your device should operate when the HomeLink® button is pressed and released.
 - If the indicator light rapidly flashes green, firmly press, hold for 2 seconds and release the programmed HomeLink® button. Repeat the “press/hold/release” sequence a second time, and, depending on the brand of the garage door opener (or other rolling code equipped device), repeat this sequence a third time to complete the programming process. At this point if your device operates, programming is complete.

- If the device does not operate, continue with “Programming a new HomeLink®” steps 5 to 7 to complete the programming of a rolling code equipped device.
5. At the garage door opener receiver (motor-head unit) in the garage, locate the “Learn” or “Smart” button. This can usually be found where the hanging antenna wire is attached to the motor-head unit (see the garage door opener manual to identify the “Learn” button.)
 6. Firmly press and release the “Learn” or “Smart” button. (The name and color of the button may vary by manufacturer.) There are typically 30 seconds to initiate step 7.
 7. Return to the vehicle and firmly press, hold for 2 seconds and release the programmed HomeLink® button. Repeat the “press/hold/release” sequence a second time, and, depending on the brand of the garage door opener (or other rolling code equipped device), repeat this sequence a third time to complete the programming process.
HomeLink® should now activate your rolling code equipped device.

 **NOTE**

● In the event that there are still programming difficulties or questions, additional HomeLink® information and programming videos can be found online at www.homelink.com, www.youtube.com/HomeLinkGenTex, or by calling the HomeLink® Hotline.

Gate operator/Canadian programming

N00584800021

Canadian radio-frequency laws require transmitter signals to “time-out” (or quit) after several seconds of transmission - which may not be long enough for HomeLink® to pick up the signal during programming. Similar to this Canadian law, some U.S. gate operators are designed to “time-out” in the same manner.

The indicator LED on the hand-held transmitter will go off when the device times out indicating that it has finished transmitting.

If you live in Canada or you are having difficulties programming a gate operator or garage door opener by using the “Programming” procedures, replace “Programming a new HomeLink®” step 3 with the following:

NOTE

- If programming a garage door opener or gate operator, it is advised to unplug the device during the “cycling” process to prevent possible overheating.

3. Press and release - every 2 seconds (“cycle”) your hand-held transmitter until the HomeLink® indicator light changes from slowly flashing orange to either rapidly flashing green (rolling code) or continuously lit green (fixed code). Now you may release the hand-held transmitter button. Proceed with “Programming a new HomeLink®,” step 4 to complete.

Additional steps for programming a door system with feedback

N00584900022

The HomeLink® has the capability of receiving garage door status from compatible garage door opener systems. Check your garage door opener manual for the available feature and HomeLink® compatibility. Also for a listing of compatible systems contact HomeLink® at: www.homelink.com

1. Within 5 seconds after successfully programming the garage door opener (refer to “Programming a new HomeLink®,” section), both garage door operation indicators (A) will flash rapidly green indicating that the garage door feedback has been enabled.

If the indicators do not flash, perform steps 2 and 3 while pressing the HomeLink® button up to the first 10 times after successful programming.

2. Press and release the programmed HomeLink® button to activate the door. You now have 1 minute in which to complete step 3.

3. Once the door has stopped, press and release the “Learn” or “Smart” button on the garage door opener (refer to your garage door opener owner’s manual for the location of the “Learn” button). Both the HomeLink® garage door operation indicators will flash rapidly green upon successful synchronization with the door opener (within 5 seconds).

5

Operating HomeLink®

N00585000020

To operate, simply press and release the programmed HomeLink® button. Activation will now occur for the trained device (i.e. garage door opener, gate operator, security system, entry door lock, home/office lighting, etc.). For convenience, the hand-held transmitter of the device may also be used at any time.

Garage door feedback

N00585200022

The HomeLink® has the capability of receiving garage door status from compatible garage door opener systems. Refer to “Additional steps for programming a door system with feedback” on page 5-223. Garage door status is then displayed with indicators (A).

The indicators will illuminate/blink in response to the following conditions:

↘ ↗: Blinking ▼ ▲: Illuminates

Garage door opener closing	↘ (orange)
Garage door opener closed	▼ (green)
Out of range	↘ (red)
Garage door opener opening	↗ (orange)
Garage door opener opened	▲ (green)
Out of range	↗ (red)

The HomeLink® has the capability of listening to these messages at a range up to 820.2 feet (250 m) (open line of sight), but range may be reduced by obstacles such as houses or trees. You may have to slow your vehicle speed to receive the CLOSED or OPENED message feedback from the garage door opener. If the unit is out of range before receiving either the UP or DOWN message from the door opener, both the UP and DOWN indicators will flash red followed by a continuous lit orange indicator in the direction the door was last moving.

Recall of the door state after initial feedback is possible by simultaneously pressing either HomeLink® buttons 1 and 2 or buttons 2 and 3 for 2 seconds. The last recorded message will be displayed for 3 seconds, again following the garage door status indication of the figure above.

Clearing the programmed information

To erase programming from the 3 buttons (individual buttons cannot be erased but can be “reprogrammed” as outlined below), follow the steps noted:

1. Press and hold the 2 outer HomeLink® buttons for at least 10 seconds. The indicator will change from continuous yellow to rapidly flashing green.
2. Release both buttons.

NOTE

- Do not hold for longer than 20 seconds.

3. HomeLink® is now in the train (or learning) mode and can be programmed at any time beginning with “Programming a new HomeLink®” step 1.

Reprogramming a single HomeLink® button

N00585400024

To reprogram a HomeLink® button, complete the following.

1. Press and hold the desired HomeLink® button. Do not release the button.
2. The indicator light will begin to slowly flash orange after 20 seconds. The HomeLink® button can be released at this point. Proceed with “Programming a new HomeLink®” step 2.

NOTE

- If you do not complete the programming of a new device to the button, it will revert to the previously stored programming. For questions or comments, visit www.homelink.com, www.youtube.com/HomeLinkGentex, or by calling the HomeLink® Hotline.

General information

N00585600026

Your HomeLink® system operates on a radio frequency subject to Federal Communications Commission (FCC) Rules (For vehicles sold in U.S.A.) and Industry Canada Rules (For vehicles sold in Canada). This device complies with Part 15 of the FCC Rules and RSS- 210 of the Industry Canada Rules. Operation is subject to the following two conditions.

- This device may not cause harmful interference.
- This device must accept any interference that may be received, including interference that may cause undesired operation.

CAUTION

- The transmitter has been tested and complies with FCC and IC rules. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the device.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End Users must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must be at least 12 inches (20 cm) from the user and must not be co-located or operating in conjunction with any other antenna or transmitter.

The term "IC:" before the certification/registration number only signifies that Industry Canada technical specifications were met.

Interior lights

N00525301602

NOTE

- Be aware that leaving the light illuminated with the engine off may run the battery down. Never leave the vehicle without checking that the light is off.

AA0110275

- 1- Cargo room light → P.5-227
- 2- Dome light (rear) → P.5-226
- 3- Dome light (front)/Reading lights → P.5-226
- 4- Downlight → P.5-177

Dome light (front)/Reading lights

N00525401469

Dome light (front)

5

AA0110288

1- (DOOR)

When any of the doors or the liftgate is opened, the dome light illuminates; when any of them are closed, the dome light goes off after approximately 30 seconds. However, the light goes off immediately if:

- The doors and the liftgate are closed while the ignition switch is in the “ON” position or the operation mode is in ON.
- The driver’s door is closed while the its lock knob is in the lock position, after all the other doors are closed.

- The doors and the liftgate are closed and the power door lock function is used to lock the doors.
- The keyless entry system remote control transmitter is used to lock the doors.
- In vehicles equipped with the F.A.S.T.-key, the doors and the liftgate are locked using the F.A.S.T.-key.

NOTE

- When the engine is started using the key while the doors and liftgate are closed, if you remove the key, the dome light will illuminate for approximately 30 seconds then go off.
- When the engine is started using the F.A.S.T.-key while the doors and liftgate are closed, if the operation mode is put in OFF, the dome light will illuminate for approximately 30 seconds and then go off.
- The time until the light goes off can be adjusted. See your authorized Mitsubishi Motors dealer for details. For vehicles equipped with the Mitsubishi Multi-Communication System, adjustments can be made using screen operations. For details, refer to the separate owner’s manual.

2- (OFF)

The dome light stays off regardless of any door or the liftgate being opened or closed.

Reading lights

N00537601165

Regardless of the dome light switch position, when you press the lens (A), the light on the side that is pressed illuminates; when you press the lens (A) again, the light goes out.

AA0110305

Dome light (rear)

N00525801245

AA0110291

1- (ON)

The dome light illuminates regardless of any door or the liftgate being opened or closed.

2- (●)

When any of the doors or the liftgate is opened, the dome light illuminates; when any of them are closed, the dome light goes off after approximately 30 seconds. However, the light goes off immediately if:

- The door and the liftgate are closed while the ignition switch is in the “ON” position or the operation mode is in ON.
- The driver’s door is closed while the its lock knob is in the lock position, after all the other doors are closed.
- The door and the liftgate are closed and the power door lock function is used to lock the doors.
- The keyless entry system remote control transmitter is used to lock the doors.
- In vehicles equipped with the F.A.S.T.-key, the doors and the liftgate are locked using the F.A.S.T.-key.

 **NOTE**

- When the engine is started using the key while the doors and liftgate are closed, if you remove the key, the dome light will illuminate for approximately 30 seconds then go off.
- When the engine is started using the F.A.S.T.-key while the doors and liftgate are closed, if the operation mode is put in OFF, the dome light will illuminate for approximately 30 seconds and then go off.
- When the dome light switch is in the “ON” position, the light will not go off, even when all the doors and the liftgate are closed.
- The time until the light goes off can be adjusted. See your authorized Mitsubishi Motors dealer for details. For vehicles equipped with the Mitsubishi Multi-Communication System, adjustments can be made using screen operations. For details, refer to the separate owner’s manual.

3- (OFF)

The dome light stays off regardless of any door or the liftgate being opened or closed.

Cargo room light

N00526101186

5

1- (ON)

The cargo room light illuminates regardless of the liftgate being opened or closed.

2- (●)

When the liftgate is opened, the cargo room light illuminates; when it is closed, it goes out.

3- (OFF)

The cargo room light stays out regardless of the liftgate being opened or closed.

Interior light auto-cutout function (dome light and other lights)

N00526301449

- If interior lights are left on with the ignition switch in the “LOCK” position or the operation mode in OFF, the lights go off automatically after approximately 30 minutes.
- The lights come on again if the ignition switch or the engine switch is operated, if any door or liftgate is opened or closed, or if the keyless entry or F.A.S.T.-key is operated.

NOTE

- The interior light auto-cutout function can be deactivated. The time until the lights automatically go off can be adjusted. See your authorized Mitsubishi Motors dealer for details.
For vehicles equipped with the Mitsubishi Multi-Communication System, adjustments can be made using screen operations. For details, refer to the separate owner’s manual.

Storage spaces

N00526401567

CAUTION

- Never leave lighters, carbonated drink cans, or spectacles in the cabin when parking the vehicle in hot sunshine. The cabin will become extremely hot, so lighters and other flammable items may catch fire and unopened drink cans (including beer cans) may rupture. The heat may also deform or crack plastic spectacle lenses and other spectacle parts that are made of plastic.
- Keep the lids of storage spaces closed while driving the vehicle. A lid or the contents of a storage space could otherwise cause injuries during a sudden stop.

NOTE

- Do not leave valuables in any storage space when leaving the vehicle.

- 1- Luggage floor box
- 2- Floor console box
- 3- Glove compartment
- 4- Sunglasses holder (if so equipped)

Glove compartment

N00551501298

⚠ WARNING

- An open glove compartment door can cause a serious injury or death to the front passenger in an accident, even if the passenger is wearing his/her seat belt. Always keep the glove compartment door closed when driving.

To open, pull the lever (A).

📖 NOTE

- When the lights are illuminated with the light switch in the “☀️”, “🌙” or “AUTO” position (vehicles with automatic light control), the glove compartment light illuminates.

Card holder

There is a card holder on the inside of the glove compartment.

Floor console box

N00551601244

To open the console box, lift the release lever (A) and raise the lid.

The floor console box can also be used as an arm rest.

B- Tissue holder

C- Pen holder

D- Tray

NOTE

- The USB input terminal is located in the floor console box (if so equipped). For details, refer to “USB input terminal” on page 5-215.

5 Luggage floor box

N00552301046

There is a luggage floor box under the luggage floor board.

To use the box, raise the luggage floor board.

5 persons

- 1- Luggage floor box (front)
- 2- Luggage floor box (center)
- 3- Luggage floor box (rear)

The luggage floor board can be folded at the indicated positions (A).

- 4- Luggage floor board (front)
- 5- Luggage floor board (rear)

*: Front of the vehicle

- 3. To access the center of the luggage floor box (front), insert your hand in the gap (C) and raise the board as illustrated.

■ To access the luggage floor box (front)

1. Fold the second seatback forward. Refer to “Folding the second row seats” on page 4-13.
2. Insert your hand in the gap (B) and fold the board as illustrated.

■ To access the luggage floor box (center)

1. Raise the luggage floor board (rear) by pulling up on the strap (D).

2. Insert your hand in the gap (E) and raise the board as illustrated.

7 persons

Sunglasses holder (if so equipped)

N00502601073

To open, push the lid.

⚠ CAUTION

- Do not use for storing objects heavier than typical sunglasses. There is risk that the holder lid will open accidentally, resulting in an injury due to falling objects.

📖 NOTE

- Some types of sunglasses cannot fit snugly in the holder. Before storing, check the shape to make sure they fit.

Cup holders

Cup holders

N00527301417

The cup holder is designed for holding cups or drink-cans securely in its holes.

For the front seat

5

The cup holder is located in front of the floor console.

For the second row seat

N00537001185

This cup holder is located in the second row seat arm rest. Pull the arm rest down to use the cup holder.

For the third row seat

N00532401038

The cup holder is located at the right side of the third row seat.

Bottle holders

N00527301420

CAUTION

- Drink beverages while driving your vehicle is distracting and can cause an accident.
- Vibration and shaking while driving may cause beverages to spill. Be very careful, as spilling hot beverages could cause burns.

There are bottle holders located on both sides of front and rear doors.

NOTE

- Do not store cup or drink can in the bottle holder.
- Make sure all lids are tightly closed when storing beverages that are in plastic bottles, etc.

NOTE

- Some beverages may not be stored, depending on the size and shape of the plastic bottles, etc.

Cargo area cover (if so equipped)

N00528301153

WARNING

- For vehicles equipped with third row seat, when the third row seat is in use, always remove the cargo area cover to avoid serious injury or death at an accident.

To use

1. Pull out the spring-loaded cover and insert it in the mounting grooves (A) on both sides.

2. Remove the cover from the mounting grooves, and the cover will be rolled back into the retracted position.

NOTE

- Do not place anything on the cargo area cover.

Cargo area cover (if so equipped)

To change position

There are 2 installation holes (B) for the cargo area cover.

1. Move one of the sliders (C) toward the inside of the vehicle, and fit the protruding portion (D) into the installation hole that is to be used. Move the opposite slider in the same fashion.

2. After changing the position, gently shake the entire cargo area cover to make sure it is securely retained.

NOTE

- If the second row seat touches the cargo area cover, move the cargo area cover rearward. The cargo area cover could be damaged if it supports the seatback of the second row seats.

To remove

1. Roll back the cargo area cover.
2. Move one of the sliders (C) toward the inside of the vehicle and lift it to remove the cargo area cover.

To refit

To refit the cargo area cover, follow the removal steps in reverse. Gently shake the entire cargo area cover after fitting it to make sure it is securely retained.

To store (if so equipped)

The cover can be fitted at the indicated position when not in use.
Raise the luggage floor board and store the cover.

**NOTE**

- On vehicles with premium sound system, you can not use this storing position.

Assist grips

N00559001084

The assist grips (located above the doors on the headliner) are not designed to support body weight. They are intended for use only while seated in the vehicle.

**CAUTION**

- Do not use the assist grips when getting into or out of the vehicle. The assist grips could detach causing you to fall.

Coat hooks

N00553601163

There is a coat hook on the second row seat assist grip.

**WARNING**

- Do not put a hanger or any heavy or pointed object on the coat hook. If the curtain airbag was activated, any such item could be propelled away with great force and could prevent the curtain airbag from inflating correctly. Hang clothes directly on the coat hook (without using a hanger). Make sure there are no heavy or sharp objects in the pockets of clothes that you hang on the coat hook.

Luggage hooks

N00528501269

There are hooks on the sides of the luggage area for use in securing luggage.

5

⚠ CAUTION

- Do not load the luggage higher than the top of the seatback.
Be sure that luggage is firmly secured.
Restricted rear vision or flying objects entering the passenger compartment during sudden braking could result in a serious accident.

Trailer towing	6-11

Driving precaution

N00629300053

WARNING

- **Utility vehicles have a significantly higher rollover rate than other types of vehicles. Avoid abrupt maneuvers and excessive speed. Always buckle up.**

6

Utility vehicles have higher ground clearance and a narrower track, which enables them to perform in a wide variety of off-road situations. Because of the higher ground clearance, these vehicles have a higher center of gravity, which makes them handle differently than ordinary vehicles when driving on pavement. They are not designed to maneuver or corner at the same speed on pavement as conventional 2-wheel drive passenger cars any more than low-slung sports cars are designed to perform satisfactorily in off-road conditions.

Always drive safely and steer the vehicle carefully. Avoid operating the vehicle in a manner that might require sharp turns or abrupt maneuvers. As with other vehicles of this type, failure to operate this vehicle correctly can result in loss of control or vehicle rollover.

In a rollover crash, an unbelted person is significantly more likely to die than a person wearing a seat belt. Before starting the vehi-

cle, always make certain that you and all your passengers are properly wearing their seat belts (with children in the rear seat, in appropriate restraints).

Fuel economy

N00628801191

Fuel economy is dependent on many factors. Your personal driving habits can have a significant effect on your fuel consumption. Several recommendations for achieving the greatest fuel economy are listed below.

- Whenever accelerating from a stop, always accelerate slowly and smoothly.
- When parked for even a short period, do not idle the engine. Shut it off.
- Plan your trips to avoid unnecessary stops.
- Keep your tires inflated to the recommended pressures.
- When driving a 4-wheel drive vehicle on highways or dry improved roads, set the drive mode to “4WD ECO” or “4WD AUTO” (Electronically controlled 4WD), or “AWC ECO” or “NORMAL” (S-AWC).
- For freeway driving, maintain a speed of approximately 50 mph (80 km/h) when traffic, roadway and weather conditions safely permit.

- Keep your air filter clean and your vehicle lubricated according to the recommendations in this manual.
- Always keep your vehicle well maintained. A poorly maintained engine wastes fuel and costs money.
- Never overload your vehicle.

Driving, alcohol and drugs

N00628900049

Drunk driving is one of the most frequent causes of accidents.

Your driving ability can be seriously impaired even with blood alcohol levels far below the legal minimum. If you have been drinking, don't drive. Ride with a designated non-drinking driver, call a cab or a friend, or use public transportation. Drinking coffee or taking a cold shower will not make you sober.

Similarly, prescription and nonprescription drugs affect your alertness, perception and reaction time. Consult with your doctor or pharmacist before driving while under the influence of any of these medications.

WARNING

- **NEVER DRINK AND DRIVE.**
Your perceptions are less accurate, your reflexes are slower and your judgment is impaired.

Floor mat

N00628600033

The original equipment floor mat provided with your vehicle was specifically designed for your vehicle.

Always properly position the floor mat and assure it does not interfere with operation of the pedals. Always use the retaining clip on the driver's floorboard to secure the floor mat. When used, this clip will help prevent the floor mat from moving forward and possibly interfering with the operation of the pedals. To prevent the floor mat from moving forward and possibly interfering with the operation of the pedals, Mitsubishi genuine floor mats are recommended.

AA0105323

NOTE

- The shape of the mat and the number of retaining clips may vary depending on the vehicle model.

To install the floor mat

N00628700050

1. Place the floor mat to fit the shape of the floorboard.
2. Align the floor mat with the installation holes over the retaining clips.
3. Secure the floor mat with retaining clips.

WARNING

- If a floor mat is the wrong size or is not properly installed, it can interfere with the operation of the pedals. Interference with the pedals can cause unintended acceleration and/or increased stopping distances resulting in a crash and injury. Always make sure the floor mat does not interfere with the accelerator or brake pedal.
- Always use the retaining clip on the driver's floorboard to secure the floor mat.
- Always install the mat with the correct side facing down.

WARNING

- Never install a second mat over or under an existing floor mat.
- Do not use a floor mat designed for another model vehicle even if it is a Mitsubishi genuine floor mat.
- Before driving, be sure to check the following:
 - Periodically check that the floor mat is properly secured with the retaining clips. If you remove the floor mat while cleaning the inside of your vehicle or for any other reason, always check the condition of the floor mat after it has been reinstalled.
 - While the vehicle is stopped with the engine off, check that the floor mat is not interfering with the pedals by depressing the pedals fully.

AA0105336

Vehicle preparation before driving

N00629001709

For a safer and more enjoyable trip, always check for the following:

Seat belts and seats

6

- Before starting the vehicle, make certain that you and all passengers are seated and wearing their seat belts properly (with children in the rear seat, in appropriate restraints), and that all the doors and the liftgate are locked.
- Move the driver's seat as far backward as possible, while keeping good visibility, and good control of the steering wheel, brakes, accelerator, and controls. Check the instrument panel indicators and multi-information display for any possible problem.
- Similarly, the front passenger seat should also be moved as far back as possible.
- Make sure that infants and small children are properly restrained in accordance with all laws and regulations.

Defrosters

Check these by selecting the defroster mode, and set the blower switch on high. You should be able to feel the air blowing against the windshield.

Refer to “Defrosting or defogging (windshield, door windows)” on page 7-13

Tires

Check all the tires for heavy tread wear or uneven wear patterns. Look for stones, nails, glass, or other objects stuck in the tread. Look for any tread cuts or sidewall cracks. Check the wheel nuts for tightness, and the tires (including spare tire) for proper pressure. Replace your tires before they are heavily worn out.

As your vehicle is equipped with a tire pressure monitoring system, there is a risk of damage to the tire inflation pressure sensors when the tire is replaced on the rim. Tire replacement should, only, be performed by an authorized Mitsubishi Motors dealer.

Lights

Have someone watch while you turn all the exterior lights on and off. Also check the turn

signal indicators and high-beam indicators on the instrument panel.

Fluid leaks

Check the ground under the vehicle after parking overnight, for fuel, water, oil, or other leaks. Make sure all the fluid levels are correct. Also, if you can smell fuel, you need to find out why immediately and have it fixed.

Safe driving techniques

N00629201134

Even this vehicle's safety equipment, and your safest driving, cannot guarantee that you can avoid an accident or injury. However, if you give extra attention to the following areas, you can better protect yourself and your passengers:

- Drive defensively. Be aware of traffic, road and weather conditions. Leave plenty of stopping distance between your vehicle and the vehicle ahead.
- Before changing lanes, check your mirrors, blind spots, and use your turn-signal light.
- While driving, watch the behavior of other drivers, bicyclists, and pedestrians.

- Always obey applicable laws and regulations. Be a polite and alert driver. Always leave room for unexpected events, such as sudden braking.
- If you plan to drive in another country, obey their vehicle registration laws and make sure you will be able to get the right fuel.

Driving during cold weather

N00629400445

- Check the battery. At the same time, check the terminals and wiring. During extremely cold weather, the battery will not be as strong. Also, the battery power level may drop because more power is used for cold starting and driving. Before driving the vehicle, check to see if the engine runs at the proper speed and if the headlights are as bright as normally. Charge or replace the battery if necessary. During extreme cold weather, it is possible that a very low battery could freeze.

WARNING

- **The battery gives off explosive hydrogen gas. Any spark or flame can cause the battery to explode, which could cause serious injury or death.**
Always wear protective clothes and a face mask when working with your battery, or let a skilled mechanic do it.

- Warm the engine sufficiently. After starting the engine, allow a short warm-up time to distribute oil to all cylinders. Then drive your vehicle slowly. Stay at low speeds at first so that the transaxle, transfer case and rear axle oil have time to spread to all lubrication points.
- Check the engine antifreeze. If there is not enough coolant because of a leak or from engine overheating, add Mitsubishi Motors Genuine Super Long Life Coolant Premium or equivalent. Please read this section in conjunction with the “Engine coolant” on page 9-8.

WARNING

- **Never open the radiator cap when the radiator is hot. You could be seriously burned.**

Braking

N00629501528

All the parts of the brake system are critical to safety. Have the vehicle serviced by an authorized Mitsubishi Motors dealer or a repair facility of your choice at regular intervals according to the “WARRANTY AND MAINTENANCE MANUAL”.

When brakes are wet

Check the brake system while driving at a low speed immediately after starting, especially when the brakes are wet, to confirm they work normally.

A film of water can be formed on the brake discs and prevent normal braking after driving in heavy rain or through large puddles, or after the vehicle is washed. If this occurs, dry the brakes out by driving slowly while lightly depressing the brake pedal.

When driving in cold weather

On snowy roads, ice can form on the braking system, making the brakes less effective. While driving in such conditions, pay close attention to surrounding vehicles and to the condition of the road surface. From time to time, lightly depress the brake pedal and check how effective the brakes are.

When driving downhill

It is important to take advantage of the engine braking by downshifting while driving on steep downhill roads in order to prevent the brakes from overheating.

Parking

N00629601330

Parking on a hill

When parking on a hill, set the parking brake, and turn the front wheels toward the curb on a downhill, or away from the curb on an uphill. If necessary, apply chocks to the wheels.

Be sure that the parking brake is firmly set when parked and that the selector lever is in the “P” (PARK) position.

When parking on a hill, it is important to set the parking brake before moving the selector lever to the “P” (PARK) position. This prevents loading the parking brake against the transaxle. When this happens, it is difficult to move the selector lever out of the “P” (PARK) position.

Parking with the engine running

Never leave the engine running while you take a short nap or rest. Also, never leave the engine running in a closed or poorly ventilated place.

WARNING

- Leaving the engine running risks injury or death from accidentally moving the selector lever or the accumulation of toxic exhaust fumes in the passenger compartment.

Where you park

Your front bumper can be damaged if you scrape it over curbs or parking stop blocks. Be careful when traveling up or down steep slopes where your bumper can scrape the road.

WARNING

- Do not park your vehicle in areas where combustible materials such as dry grass or leaves can come in contact with a hot exhaust, since a fire could occur.

When leaving the vehicle

Always remove the key from the ignition switch and lock all doors and the liftgate when leaving the vehicle unattended. Always try to park your vehicle in a well lit area.

Do not keep the steering wheel fully turned for a long time

Move effort could be required to turn the steering wheel.

Refer to “Electric power steering system (EPS)” on page 5-93.

Loading information

N00629900352

It is very important to know how much weight your vehicle can carry. This weight is called the vehicle capacity weight and includes the weight of all occupants, cargo (including the roof load), non-factory-installed options, and the tongue weight of the trailer, if any, being towed. The tire and loading information placard located on the driver’s door sill of your vehicle will show how much weight it may properly carry.

WARNING

- Never overload your vehicle. Overloading can damage your vehicle, adversely affect vehicle performance, including handling and braking, cause tire failure, and result in an accident.

It is important to familiarize yourself with the following terms before loading your vehicle:

- Vehicle maximum load on the tire: load on an individual tire that is determined by distributing to each axle its share of the maximum loaded vehicle weight and dividing by two.
- Vehicle normal load on the tire: load on an individual tire that is determined by distributing to each axle its share of the curb weight, accessory weight, and normal occupant weight and dividing by two.
- Maximum loaded vehicle weight: the sum of -
 - (a) Curb weight;
 - (b) Accessory weight;
 - (c) Vehicle capacity weight; and
 - (d) Production options weight.
- Curb weight: the weight of a motor vehicle with standard equipment including the maximum capacity of fuel, oil, and coolant.
- Accessory weight: the combined weight (in excess of those standard items which may be replaced) of automatic transmission, power steering, power brakes, power windows, power seats, radio, and heater, to the extent that these items are available as factory- installed equipment (whether installed or not).
- Vehicle capacity weight: the rated cargo and luggage load plus 150 lbs (68 kg)
 - *times the vehicle's designated seating capacity.
- Production options weight: the combined weight of those installed regular production options weighing over 5 lbs (2.3 kg) in excess of those standard items which they replace, not previously considered in curb weight or accessory weight, including heavy duty brakes, ride levelers, roof rack, heavy duty battery, and special trim.
- Normal occupant weight: 150 lbs (68 kg)
 - *times the number of specified occupants (3 in the case of your vehicle)
- Occupant distribution: Occupant distribution within the passenger compartment (In your vehicle the distribution is 2 in front, 1 in second row seat)
 - *:150 lbs (68 kg) is the weight of one person as defined by U.S.A. and Canadian regulations.

Tire and loading information placard

N00630101407

The tire and loading information placard is located on the inside sill of the driver's door.

AG0015743

6

This placard shows the maximum number of occupants permitted to ride in your vehicle as well as “the combined weight of occupants and cargo” (A), which is called the vehicle capacity weight. The weight of any non-factory installed options, as well as the tongue weight of a trailer being towed and roof load is included in the definition of “cargo” when determining the vehicle capacity weight. This placard also tells you the size and recommended inflation pressure for the original equipment tires on your vehicle. For more information, refer to “Tires” on page 9-15.

Type 1

Steps for Determining Correct Load Limit

N00630201222

1. Locate the statement “The combined weight of occupants and cargo should never exceed XXX kg or XXX lbs.” on your vehicle’s placard.
2. Determine the combined weight of the driver and passengers that will be riding in your vehicle.
3. Subtract the combined weight of the driver and passengers from XXX kg or XXX lbs.
4. The resulting figure equals the available amount of cargo and luggage load capacity. For example, if the “XXX” amount equals 1400 lbs. and there will be five 150 lbs. passengers in your vehicle, the amount of available cargo and luggage load capacity is 650 lbs. (1400 - 750 (5 x 150) = 650 lbs.)

5. Determine the combined weight of luggage and cargo being loaded on the vehicle. That weight may not safely exceed the available cargo and luggage load capacity calculated in Step 4.
6. If your vehicle will be towing a trailer, load from your trailer will be transferred to your vehicle. Consult this manual to determine how this reduces the available cargo and luggage load capacity of your vehicle.

Type 2

NOTE

- The following table shows examples on how to calculate total load, cargo/luggage and towing capacities of your vehicle with varying seating configurations and number and size of occupants. This table is for illustration purposes only and may not be accurate for the seating and load carry capacity of your vehicle.
- For the following example the combined weight of occupants and cargo should never exceed 865 lbs (392 kg).

Occupants			Combined weight of occupants and cargo from Tire Placard	MINUS	Combined Occupant's weight	=	AVAILABLE Cargo/Luggage and Trailer Tongue Weight
TOTAL	FRONT	REAR					
<u>EXAMPLE 1</u>							
5	2	3			Occupant 1: 200 lbs (91 kg) Occupant 2: 130 lbs (59 kg) Occupant 3: 160 lbs (73 kg) Occupant 4: 100 lbs (45 kg) Occupant 5: 80 lbs (36 kg) <hr/> TOTAL WEIGHT: 670 lbs (304 kg)		
			865 lbs (392 kg)	minus	670 lbs (304 kg)	=	195 lbs (88 kg)
<u>EXAMPLE 2</u>					Occupant 1: 210 lbs (95 kg) Occupant 2: 180 lbs (82 kg) Occupant 3: 150 lbs (68 kg) <hr/> TOTAL WEIGHT: 540 lbs (245 kg)		
3	2	1					
			865 lbs (392 kg)	minus	540 lbs (245 kg)	=	325 lbs (147 kg)
<u>EXAMPLE 3</u>					Occupant 1: 200 lbs (91 kg) Occupant 2: 200 lbs (91 kg) <hr/> TOTAL WEIGHT: 400 lbs (182 kg)		
2	2	0					
			865 lbs (392 kg)	minus	400 lbs (182 kg)	=	465 lbs (210 kg)

AJM100083

- Under a maximum loaded vehicle condition, gross axle weight ratings (GAWR's) for the front and rear axles must not be exceeded. For further information on GAWR's, vehicle loading and trailer towing, see the "Specifications" section of this manual.

Cargo loads

N00629700435

Cargo load precautions

N00630301092

To determine the cargo load capacity for your vehicle, subtract the weight of all vehicle occupants from the vehicle capacity weight.

6 For additional information, if needed, refer to “Steps for Determining Correct Load Limit” on page 6-8.

DO NOT USE the Gross Vehicle Weight Rating and Gross Axle Weight Rating numbers listed on the safety certification label located on the inside sill of the driver’s door as the guide for passengers and/or cargo weight. (Except for Vehicles for Mexico)

⚠ WARNING

- To reduce the risk of serious injury or death, the combined weights of the driver, passengers and cargo and must never exceed the vehicle capacity weight.
- Exceeding the vehicle capacity weight will adversely affect vehicle performance, including handling and braking, and may cause an accident.
- Do not load cargo or luggage higher than the top of the seatback. Be sure that your cargo or luggage cannot move when your vehicle is in motion.
Having either the rear view blocked, or your cargo being thrown inside the cabin if you suddenly have to brake can cause a serious accident or injury or death.
- Put cargo or luggage in the cargo area of your vehicle. Try to spread the weight evenly.

Loading cargo on the roof

N00630401123

⚠ WARNING

- Weight placed on the roof of the vehicle will raise the vehicle’s center of gravity and adversely affect its handling characteristics. As a result, driving errors or emergency maneuvers could lead to a loss of control and result in an accident. Drive slowly and avoid excessive maneuvers such as sudden braking or quick turning.

⚠ WARNING

- Make sure that the weight of luggage and the roof carrier do not exceed the maximum roof load, 110 lb (50 kg). If the maximum roof load is exceeded, this could cause damage to the vehicle or result in an accident.
- The total weight of all occupants and luggage, including your roof load, must not exceed the vehicle capacity weight. For more information, refer to “Tire and loading information placard” on page 11-3
- Roof load is determined by adding the weight of the roof carrier and the weight of the luggage placed on the roof carrier.
- For additional information, refer to “Maximum roof load” on page 11-5.

⚠ CAUTION

- Do not load luggage directly onto the roof. Use a roof carrier that properly fits your vehicle.
For installation, refer to the instruction manual provided with the roof carrier.
- Place the luggage on the carrier so that its weight is distributed evenly with the heaviest items on the bottom. Do not load items that are wider than the roof carrier.

⚠ CAUTION

- Before driving and after traveling a short distance, always check the load to make sure it is securely fastened to the roof carrier. Stop the vehicle periodically and check that the load remains secure. If the load is not secure, it could fall from the vehicle and damage your vehicle, another vehicle or create a road hazard.

📖 NOTE

- To prevent wind noise or reduction in gas mileage, remove the roof carrier when not in use.
- Before using an automatic car wash, check with the attendant to determine if the roof carrier should be removed.

Roof carrier mounting bracket cover (if so equipped)

N00630601112

When installing the roof carrier, use the provided brackets.
The brackets are located under each cover.

To remove the covers

1. Slide each cover (A) toward the front of the vehicle.
2. Lift the front edge of the cover (A).

*: Front of the vehicle

To install the covers

Install the covers by performing the removal step in reverse.

Trailer towing

N00629801329

Towing a trailer will adversely affect your vehicle's handling, performance, braking, durability and driving economy (fuel consumption, etc.).

If you do tow a trailer with this vehicle, be sure to use proper equipment and cautious steering and braking for safe driving.

⚠ CAUTION

- Do not lose control of your vehicle when towing a trailer.
- Always use proper equipment.
- Always drive carefully
- Damage to your vehicle caused by improper equipment or driving is not covered by your warranty.

Weight limits

Never exceed the vehicle capacity weight, maximum trailer weight (A), maximum tongue weight (B) and Gross Axle Weight Rating (GAWR).

Vehicle capacity weight

The vehicle capacity weight is printed on the tire and loading information placard as “combined weight of occupants and cargo”. The weight includes the weight of all occupants and the total weight it can carry. For more information, refer to “Tire and loading information placard” on page 6-7.

Maximum trailer weight

Recommendations for towing up to this limit are as follows.

Models	Maximum trailer weight
2.4 liter models	With brake 1,500 lbs. (680 kg)
	Without brake 1,250 lbs. (567 kg)
3.0 liter models	With brake 3,500 lbs. (1,588 kg)
	Without brake 1,400 lbs. (635 kg)

Tongue weight

The tongue weight of any trailer is important because it affects the vehicle capacity weight. The vehicle capacity weight includes any cargo you may carry, and the people who will be riding in the vehicle. If you will tow a trailer, you must include the tongue weight of the trailer in your calculation of the vehicle capacity weight. For more information regarding vehicle capacity weight, refer to “Tire and loading information placard” on page 6-7. Do not exceed the maximum tongue weight for your vehicle.

Models	Maximum tongue weight
2.4 liter models	With brake 150 lbs. (68 kg)
	Without brake 125 lbs. (57 kg)
3.0 liter models	With brake 350 lbs. (159 kg)
	Without brake 140 lbs. (64 kg)

After you’ve loaded your trailer, weigh the trailer and then the tongue, separately, to see if the weights are proper. Keep the trailer tongue load at 10% of the loaded trailer weight for dead weight hitches.

Tongue loads can be adjusted by proper distribution of the load in the trailer. This can be checked by separately weighing the loaded trailer and then the tongue.

Gross axle weight rating (GAWR)

The GAWRs are printed on the certification label which is riveted on the door sill on the driver's side.

Refer to "Vehicle labeling" on page 11-2.

Trailer hitches

Choose a proper hitch and ball, and make sure it is installed at a height that is compatible with the trailer.

Use a good equalizing hitch which uniformly distributes the trailer tongue load throughout the frame.

WARNING

- If you make any holes in the body of your vehicle for installing a trailer hitch, be sure to seal the holes later when you remove the hitch. If you don't seal them, deadly carbon monoxide (CO) from your exhaust can enter your vehicle. Refer to "Exhaust system" on page 9-24.

NOTE

- Mitsubishi Motors recommends that sway control be used whenever you are towing, to improve towing stability.
For further information, please contact your authorized Mitsubishi Motors dealer.

Safety chains

A safety chain must always be used between the towing vehicle and the trailer. Leave sufficient slack in the chain for turns. The chain should cross under the trailer tongue to prevent the tongue from dropping to the ground in case it becomes damaged or separated. For correct safety chain procedures, consult your authorized Mitsubishi Motors dealer.

CAUTION

- Never tow a trailer without using a safety chain securely attached to both the trailer and the vehicle. If the coupling unit or hitch ball experiences a problem, the trailer may separate from your vehicle.

Maintenance when trailer towing

Your vehicle will need service more often when you're towing a trailer. Refer to "WARNING AND MAINTENANCE MANUAL". Especially important in trailer operation are manual transaxle oil, automatic transaxle fluid, engine oil, rear axle oil, belt, cooling system and brake system. Each of these is covered in this manual.

For details, please refer to the "Vehicle care and maintenance" section.

Check periodically to see that all hitch nuts and bolts are tight.

Trailer brakes

Mitsubishi Motors recommends that any trailer having a total weight of 1,250 lbs (567 kg) or more (2400 models), 1,400 lbs (635 kg) or more (3000 models) be equipped with its own electric or surge-type brakes.

If you choose electric brakes, be sure they are electrically actuated. Do not attempt to tap into your vehicle's hydraulic system. No matter how successful it may seem, any attempt to attach trailer brakes to your vehicle's hydraulic system will lower braking effectiveness and create a potential hazard.

Trailer lights

Trailer lights and equipment must comply with federal, state, and local regulations. Check with your local recreational vehicle dealer for the requirements in your area, and use only equipment designed for your vehicle.

6

Since lighting and wiring vary by trailer type and brand, you should have a qualified technician install a suitable connector between the vehicle and the trailer. Improper equipment or installation can cause damage to your vehicle's electrical system and affect your vehicle warranty.

Additional trailer equipment

Many states and Canadian provinces require special outside mirrors when towing a trailer. Even if not required, you should install special mirrors if you cannot clearly see behind you, or if the trailer creates a blind spot.

Ask your trailer sales or rental agency if any other items are recommended or required for your towing situation.

Operating hints

WARNING

- **If you have a rear window open and you tow a trailer with your vehicle, carbon monoxide gas which you cannot see or smell could come into your vehicle. It can cause unconsciousness or death. Refer to “Exhaust system” on page 9-24.**
To maximize your safety when towing a trailer:
- **Have your exhaust system inspected for leaks, and make necessary repairs before starting on your trip.**
- **Keep the rear windows closed.**
- **If exhaust does come into your vehicle through a window or another opening, drive with your front, main heating or cooling system on and with the blower on any speed. This will bring fresh, outside air into your vehicle. Do not use recirculation because it only recirculates the air inside your vehicle. Refer to “Air selection switch” on page 7-9.**

Driver preparation

Towing a trailer requires a certain amount of experience.

Before setting out for the open road, you'll want to get to know your trailer. Acquaint

yourself with the feel of handling and braking with the added weight of the trailer. Always keep in mind that the vehicle you are driving is now a good deal longer and not nearly as responsive as your vehicle is without a trailer.

Vehicle preparation

Before you start, check the trailer hitch, safety chains, tires and mirror adjustment.

Tire

Be sure your vehicle's tires are inflated to the cold inflation pressure listed in the manual. You'll find these numbers on the tire and loading information placard at the sill of the driver's door.

Refer to “Tire inflation pressures” on page 9-18.

Following distance

Stay at least twice as far behind the vehicle ahead as you would when driving your vehicle without a trailer. This can help you avoid situations that require heavy braking and sudden turns.

Passing

You'll need more passing distance up ahead when you're towing a trailer. And, because you're a good deal longer, you'll need to go much farther beyond the passed vehicle before you can return to your lane.

Backing up

Hold the bottom of the steering wheel with one hand. Then, to move the trailer to the left, just move that hand to the left. To move the trailer to the right, move your hand to the right. Always back up slowly and, if possible, have someone guide you.

Making turns

CAUTION

- Making sharp turns while towing a trailer could cause the trailer to come in contact with the vehicle. Your vehicle could be damaged. Avoid making sharp turns while towing a trailer.

When you're turning with a trailer, make wider than normal turns to help prevent the trailer from striking shoulders, curbs, road signs, trees or other objects.

Avoid jerky or sudden maneuvers. Signal well in advance.

Overheating

Towing a trailer puts additional burden on the engine and transaxle, which may cause overheating. Following are some suggestions to reduce overheating:

Cause of overheating	Solution
Air conditioning on	Turn off
Highway speeds	Reduce speed
Going up hills	Select lower gear position
Stop-and-go city traffic	With the vehicle stopped, shift to the "N" (NEUTRAL) position and idle the engine at high idle.

When towing at high altitudes, engine coolant and automatic transaxle oil will overheat at a lower temperature than at normal altitudes.

If you turn your engine off immediately after towing at high altitude on steep uphill grades, your vehicle may show signs similar to overheating. To avoid this, let the engine run while parked (preferably on level ground) with the automatic transaxle in the "P" (PARK) position for a few minutes before turning the engine off.

- If the engine coolant temperature indicator  flashes on the information screen in the multi-information display or the engine power drops suddenly, refer to "Engine overheating" on page 8-4.
- If the  warning display or  warning display illuminates, refer to "Warning display" on page 5-66, 5-74.

Driving on hills

Reduce speed and downshift before you start down a long or steep downgrade. If you don't downshift, over using the brakes can cause reduced brake efficiency.

You can tow in "D" (DRIVE) position. You may want to shift the selector lever to the 3rd or a lower position, under heavy loads or hilly conditions.

Parking

Always place chocks or blocks under both the vehicle and trailer wheels when parking. Be sure that the parking brake is firmly set and that the selector lever is in the "P" (PARK) position. Avoid parking on a hill with a trailer, but if it cannot be avoided, do so only after performing the following:

Trailer towing

1. Apply the brakes and keep them applied.
2. Have someone place chocks or blocks under both the vehicle and trailer wheels.
3. When the chocks or blocks are in place, release your brakes slowly until the chocks or blocks absorb the load.
4. Apply the parking brake firmly.
5. Set the selector lever to the “P” (PARK) position and turn off the engine.

6

When restarting out after parking on a hill:

1. Check that the selector lever is set to the “P” (PARK) position.
2. Start the engine. Be sure to keep the brake pedal depressed.
3. Set the selector lever to the “D” (DRIVE) position or “R” (REVERSE) position.
4. Release the parking brake and brake pedal and slowly pull or back away from the chocks or blocks. Stop and apply your brakes.
5. Have someone retrieve the chocks or blocks.

Air flow and direction adjustments

N00730201340

Driver's vents

Move the knob (A) to make adjustments.
To close the vent, fully move the knob (A) to the outer side.

AA0112312

- 1- Close
- 2- Open

Passenger's vents

Move the knob (A) to make adjustments.
To close the vent, fully move the knob (A) to the left side.

AA0112325

- 1- Close
- 2- Open

NOTE

- On rare occasions, air from the vents of an air-conditioned vehicle may be foggy. This is due to only moist air cooling suddenly and it does not indicate a problem.
- Do not let drinks or other liquids get into the vents as they could prevent the air conditioning from operating normally.

Changing the mode selection

N00736401605

To change the position and amount of air flowing from the vents, press the MODE switch or defogger switch. Refer to “MODE switch” on page 7-9, “Defogger switch” on page 7-9.

These symbols are used in the next several illustrations to demonstrate the quantity of air coming from the vents.

→ : Small amount of air from the vents

➔ : Medium amount of air from the vents

➔➔ : Large amount of air from the vents

Face position

Air flows only to the upper part of the passenger compartment.

Foot/Face position

Air flows to the upper part of the passenger compartment, and flows to the leg area.

Foot position

Air flows mainly to the leg area.

NOTE

- The foot/face air flow ratio can be adjusted with the mode selection in the “” position.

For further information, we recommend you to consult an authorized Mitsubishi Motors dealer or a repair facility of your choice.

On vehicles equipped with Mitsubishi Multi-Communication System, screen operations can be used to make the adjustment. Refer to the separate owner’s manual for details.

Foot/Defroster position

Air flows to the leg area, the windshield and the door windows.

Defroster position

Air flows mainly to the windshield and the door windows.

NOTE

- The foot/defroster air flow ratio can be adjusted with the mode selection in the  position. For further information, we recommend you to consult an authorized Mitsubishi Motors dealer or a repair facility of your choice. On vehicles equipped with Mitsubishi Multi-Communication System, screen operations can be used to make the adjustment. Refer to the separate owner's manual for details.

Automatic climate control air conditioner

The air conditioner can only be used while the engine is running.

- 16- Blower speed display

NOTE

- There is an interior air temperature sensor (A) in the illustrated position. Never place anything over the sensor, since doing so will prevent it from functioning properly.

AJZ100244

NOTE

- Since the air conditioning operation is controlled while the ECO mode is operating, you may feel that effectiveness of the air conditioner is insufficient.
→ ECO mode switch P.5-184
- Even during ECO mode operation, you can select normal operation of the air conditioner.
On vehicles equipped with Mitsubishi Multi-Communication System, screen operations can be used to change the setting. Refer to the separate owner's manual for details.
- In extreme cold, the air conditioning control panel screen may operate sluggishly. This does not indicate a problem.
It will disappear when the vehicle interior temperature rises to a normal temperature.

Blower speed selection switch

N00736901192

Press ▲ of the blower speed selection switch to increase the blower speed.
Press ▼ of the blower speed selection switch to decrease the blower speed.
The selected blower speed will be shown in the display (A).

- 1- Increase
2- Decrease

Temperature control switch

N00737001334

Press ▲ or ▼ of the temperature control switch to the desired temperature.
The selected temperature will be shown in the display (A).

**NOTE**

- The temperature value of air conditioner is switched in conjunction with outside temperature display unit of the multi information display.
On vehicles equipped with multi information display - Type 1, refer to “Changing the temperature unit” on page 5-143.
On vehicles equipped with multi information display - Type 2, refer to “Changing the temperature unit” on page 5-153.

NOTE

- When the engine coolant temperature is low, the air temperature from the heater will be cool/cold until the engine warms up, even if you have selected warm air with the switch. To prevent the windshield and windows from fogging up, the vent mode will be changed to “” and the blower speed will be reduced while the system is operating in the AUTO mode.
- When you feel that it is hotter or colder than the set temperature, you may adjust it to your preference. For further information, we recommend you to consult an authorized Mitsubishi Motors dealer or a repair facility of your choice.
- When the temperature is set to the highest or the lowest setting, the air selection and the air conditioner will be automatically changed as follows. Also, if the air selection is operated manually after an automatic changeover, manual operation will be selected.
 - Quick Heating (When the temperature is set to the highest setting)
Outside air will be introduced and the air conditioner will stop.
 - Quick Cooling (When the temperature is set to the lowest setting)
Inside air will be recirculated and the air conditioner will operate.

The above indicates the factory settings. You can personalize the air selection switch and

air conditioning switch to match your personal preferences.

Contact your Mitsubishi Motors dealer or a repair facility of your choice for assistance. Refer to “Personalizing the air conditioning switch (Changing the function setting)” on page7-11.

Refer to “Personalizing the air selection (Changing the function setting)” on page7-10.

■ Synchronized mode and dual mode (if so equipped)

The driver’s side and the passenger’s side temperature can be controlled independently. At this time, the “DUAL” indicator will be shown in the display (A).

AJA100177

- Synchronized mode

If the driver’s side temperature control switch is pressed, the passenger’s side temperature will also be controlled to the same setting temperature as the driver’s side.

- Dual mode

If the passenger’s side temperature control switch is pressed under synchronized mode, the system will switch to dual mode. In dual mode, the driver’s side and the passenger’s side temperature can be set separately by using each temperature control switch.

Press the AUTO switch to return to synchronized mode.

Mode switch

N00737101221

To change the amount of air flowing from the vents, press the MODE switch. Each time the MODE switch is pressed, the mode changes to the next one in the following sequence: “” → “” → “” → “” → “” → “”. The selected mode is shown in the display (A). Refer to “Changing the mode selection” on page 7-3.

Defogger switch

N00703401038

When this switch is pressed, the mode changes to the “” mode and the blower speed will be set at the maximum automatically. The indicator light (A) will come on and the “” mode is shown in the display (B).

NOTE

- When the defogger switch is pressed, the air conditioning system automatically operates and outside air (as opposed to recirculated air) is selected. This automatic switching control is carried out to prevent misting of the windows even if “Disable automatic air conditioning control” or “Disable automatic air selection control” is set. Refer to “Personalizing the air conditioning switch (Changing the function setting)” on page 7-11, “Personalizing the air selection (Changing the function setting)” on page 7-10.
- The indicator light (A) will go off when adjusting the blower speed.

7

Air selection switch

N00737201378

Normally, use the outside air position to keep the windshield and side windows clear and to quickly remove fog or frost from the windshield.

To change the air selection, simply press the air selection switch.

- Outside air {Indicator light (A) OFF}
Outside air is introduced into the passenger compartment.
- Recirculated air {Indicator light (A) ON}
Air is recirculated inside the passenger compartment.

7 When the air conditioning turns on, the air selection is controlled automatically. When the air conditioning turns off, the air selection automatically goes back to the outside position.

If high cooling performance is desired, or if the outside air is dusty or contaminated in some way, use the recirculation position. Switch to the outside position every now and then to keep the windows from fogging up.

CAUTION

- Using recirculated air for a long time may cause the windows to fog up.

NOTE

- If the mode selection is set “” position, you cannot turn the air conditioner off or select the recirculation position. This prevents the windows from fogging up.

NOTE

- When the engine coolant temperature rises to a certain level, the air selection is automatically switched to the recirculation position and the indicator light (A) comes on. At this time, the system will not switch to the outside position even if the air selection switch is pushed.

Personalizing the air selection (Changing the function setting)

N00712300036

You can change the following functions to match your preference.

- **Enable automatic air selection control:**
When the AUTO switch is pressed, the air selection switch will also be automatically controlled.
- **Disable automatic air selection control:**
Even when the AUTO switch is pressed, the air selection switch will not be automatically controlled.
- **Changing the settings**
Press the air selection switch for approximately 10 seconds or longer. When the setting has changed, the system will beep and the indicator light will flash.

- When the setting has changed from enabled to disabled, the system will beep three times and the indicator light will flash three times.
- When the setting has changed from disabled to enabled, the system will beep two times and the indicator light will flash three times.

On vehicles equipped with Mitsubishi Multi-Communication System, screen operations can also be used to change the setting. Refer to the separate owner’s manual for details.

NOTE

- The factory setting is “Enable automatic air selection control”.
- When the defogger switch is pressed, the air selection will automatically change to the outside air position, even if the system is set to “Disable automatic air selection control”, in order to prevent windows from fogging up.

Air conditioning switch

N00737301353

Push the switch, and the air conditioning compressor will turn on. The “” indicator will be shown in the display (A).

Push the switch again and the air conditioning compressor will stop and the indicator goes off.

⚠ CAUTION

- Using the air conditioning slightly increases the engine idle speed. Therefore, make sure your foot is firmly on the brake pedal when shifting the transaxle into drive.

📖 NOTE

- If a problem is detected in the air conditioning compressor, the “⚙” indicator blinks. Press the air conditioning switch once to turn it off, then once more to turn it back on. If the “⚙” indicator does not blink, there is no problem. If it does blink, have it checked at an authorized Mitsubishi Motors dealer or a repair facility of your choice.

📖 NOTE

- For example, sometimes after using a high-pressure car wash, the condenser can get wet, and the “⚙” indicator blinks temporarily. Wait for a while, press the air conditioning switch once to turn the system off, then once more to turn it back on. Once the water evaporates, the blinking will stop.

■ Personalizing the air conditioning switch (Changing the function setting)

N00712200022

You can change the following functions to match your preference.

- Enable automatic air conditioning control: When the AUTO switch is pressed, or when the temperature control switch has been set to the minimum temperature, the air conditioning switch is automatically controlled.
- Disable automatic air conditioning control: The air conditioning switch is not automatically controlled, unless the air conditioning switch is used.
- Changing the settings: Press the air conditioning switch for about 10 seconds or longer.

When the setting has changed, the system will beep and the indicator light will flash.

- When the setting has changed from enabled to disabled, the system will beep three times and the indicator light will flash three times.
- When the setting has changed from disabled to enabled, the system will beep two times and the indicator light will flash three times.

On vehicles equipped with Mitsubishi Multi-Communication System, screen operations can also be used to change the setting. Refer to the separate owner's manual for details.

7

📖 NOTE

- The factory setting is “Enable automatic air conditioning control”.
- When the defogger switch is pressed, the air conditioner will run automatically, even if the system is set to “Disable automatic air conditioning control”, in order to prevent windows from fogging up.

AUTO switch

N00703501042

When the AUTO switch is pressed, the indicator light (A) comes on and the mode selection, blower speed adjustment, recirculated/outside air selection, temperature adjustment,

Automatic climate control air conditioner

and air conditioner ON/OFF status are all controlled automatically. The selected mode and the blower speed are not shown in the display.

OFF switch

N00703601027

Push the switch to turn off the air conditioning system.

Operating the air conditioning system (automatic mode)

N00731701443

In normal conditions, use the system in the AUTO mode and follow these procedures:

1. Push the AUTO switch.
2. Set the temperature control switch to the desired temperature. The temperature can be set within a range of around 61 (LO) to 89 (HI) (when the outside temperature unit of the multi-information display shows °F) or 17 (LO) to 31 (HI) (when the outside temperature unit of the multi-information display shows °C).

The vents, recirculation/outside air, blower speed, temperature adjustment, and ON/OFF of air conditioner will be controlled automatically.

NOTE

- Set the temperature at about 75 (when the outside temperature unit of the multi-information display shows °F) or 24 (when the outside temperature unit of the multi-information display shows °C) under normal conditions.
- When the engine coolant temperature is low, the air temperature from the heater will be cool/cold until the engine warms up, even if you have selected warm air with the temperature switch. To prevent the windshield and windows from fogging up, the vent mode will be changed to “**Operating the air conditioning system (manual mode)**

N00731801125

Blower speed and vent mode may be controlled manually by setting the blower speed selection switch and the MODE switch to the desired positions. To return to automatic operation, press the AUTO switch.

Defrosting or defogging (windshield, door windows)

N00732401506

CAUTION

- For safety, make sure you have a clear view through all the windows.

To remove frost or mist from the windshield and door windows, use the MODE switch or defogger switch (“**■ For ordinary defrosting**

Use this setting to keep the windshield and door windows clear of mist, and to keep the leg area heated (when driving in rain or snow).

1. Set the air selection switch to the outside position.
2. Set the MODE switch to the “Comfort controls 7-13

■ For quick defrosting

1. Push the defogger switch.
2. Set the temperature to the highest position.

NOTE

- While the “” indicator light is on, the air conditioning compressor will run automatically. The outside air position will also be selected and the blower speed will be set at the maximum automatically.
- If the “” indicator light is on, you cannot turn the air conditioner off or select the recirculation position. This prevents the windows from fogging up.

NOTE

- To defog quickly, direct the air flow from the side vents toward the door windows.
- When defrosting, do not set the temperature to the maximum cool position. This will blow cool air on the window glass and fog it up.

Important air conditioning operating tips

N00733701346

1. Park the vehicle in the shade whenever possible. Parking in the hot sun makes the vehicle interior extremely hot which then requires more time to cool. If it is necessary to park in the sun, open the windows for the first few minutes of air conditioning to expel the hot air.
2. Afterwards, keep the windows closed when the air conditioner is in use. The entry of outside air through open windows will reduce cooling efficiency.
3. When running the air conditioner, make sure the air intake, which is located in front of the windshield, is free of obstructions such as leaves. Leaves collected in the air-intake chamber may reduce air flow and plug the water drains.

Air conditioning system refrigerant and lubricant recommendations

If the air conditioner seems less effective than usual, the cause might be a refrigerant leak. Have the system inspected by your authorized Mitsubishi Motors dealer or a repair facility of your choice.

CAUTION

- The air conditioning system in your vehicle must be charged with the refrigerant HFC-134a and the lubricant SUN-PAG56. Use of any other refrigerant or lubricant will cause severe damage and may require replacing your vehicle's entire air conditioning system. The release of refrigerant into the atmosphere is not recommended. The new refrigerant HFC-134a in your vehicle is designed not to harm the earth's ozone layer. However, it may contribute slightly to global warming. It is recommended that the old refrigerant be saved and recycled for future use.

During a long period of disuse

The air conditioner should be operated for at least five minutes each week, even in cold weather. This includes the quick defrosting mode. Operating the air condition system weekly maintains lubrication of the compressor internal parts to keep the air conditioner in the best operating condition.

Air purifier

N00733801190

The air conditioning system is equipped with an air filter to remove pollen and dust. The air filter’s ability to collect pollen and dirt is reduced as it becomes dirty, so replace it periodically. For the maintenance interval, refer to the “WARRANTY AND MAINTENANCE MANUAL”.

 **NOTE**

- Operation in certain conditions such as driving on a dusty road and frequent use of the air conditioner can lead to reduction of service life of the filter. When you feel that the air flow is lower than normal or when the windshield or windows start to fog up easily, replace the air filter. Contact your Mitsubishi Motors dealer or a repair facility of your choice for assistance.

AM/FM radio/CD player (if so equipped)

N00734302102

The audio system can only be used when the ignition switch or the operation mode is in ON or ACC.

 **NOTE**

- To listen to the audio system while the engine is not running, turn the ignition switch to the “ACC” position or put the operation mode in ACC. If the ignition switch or the operation mode is left in ACC, the accessory power will automatically turn off after a certain period of time and you will no longer be able to use the audio system. The accessory power comes on again if the ignition switch or the engine switch is operated with it in the “ACC” position. Refer to “ACC power auto-cutout function” on page 5-19 and 5-60.
- If a cellular phone is used inside the vehicle, it may create noise in the audio equipment. This does not mean that anything is wrong with your audio equipment. In such a case, use the cellular phone at a place as far away as possible from the audio equipment.

 **NOTE**

- If foreign objects or water get into the audio equipment, or if smoke or a strange odor comes from it, immediately turn off the audio system and have it checked at an authorized Mitsubishi Motors dealer or a repair facility of your choice. Never try to repair it yourself. Avoid using the audio system until it is inspected by a qualified person.
- If the audio system is damaged by foreign objects, water, or fire, have the system checked by a qualified Mitsubishi Motors technician.

Important Points on Usage

N00715000021

iPod/iPhone Playback Function (if so equipped)

- This product supports audio playback from iPod/iPhone devices, however differing versions mean that playback cannot be guaranteed.
- Please be aware that depending on the iPod/iPhone model or version, operation may differ.

How to Clean

N00715200023

- If the product becomes dirty, wipe with a soft cloth.
- If very dirty, use a soft cloth dipped in neutral detergent diluted in water, and then wrung out. Do not use benzene, thinners, or other chemical wipes. This may harm the surface.

7

Trademarks

N00715300053

- Product names and other proper names are the trademarks or registered trademarks of their respective owners.
- Furthermore, even if there is no specific denotation of trademarks or registered trademarks, these are to be observed in their entirety.

“Made for iPod”, “Made for iPhone” mean that an electronic accessory has been designed to connect specifically to iPod or iPhone, respectively, and has been certified by the developer to meet Apple performance standards.

iPhone, iPod, iPod classic, iPod nano, and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries.

Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards.

NOTE

- iPod and iTunes licensing allows individual users to privately reproduce and play back non-copyrighted material as well as material that may be legally copied and reproduced. Infringement of copyright is prohibited.
- For vehicles with a Bluetooth® 2.0 interface, the types of devices that can be connected may vary.

Handling of Discs

N00715400025 handling of discs.

This explains care that should be taken in the

Important Points on Handling

- Fingerprints or other marks on the read surface of the disc may result in its content being more difficult to read. When holding the disc, grip both edges, or one edge and the center hole, in order that the read surface is not touched.
- Do not affix paper or stickers, or otherwise damage the disc.
- Do not forcefully insert a disc if another is already within the device. This can result in damage to discs, or malfunction.

Cleaning

- Periodically clean the read surface of the disc. When cleaning, do not wipe in a circular motion. Instead, wipe gently outwards from the center of the disc to the outer edge.
- New discs may have burring around the outer edge or in the hole in the center. Ensure you check for these. If there are burrs, these may lead to faulty operation, therefore ensure these are removed.

Important Points on Storage

- When not using discs, ensure these are kept in cases, and stored out of direct sunlight.

- If discs are not going to be used for a long period of time, remove these from the product.

Disc Playback Environment

In cold environments such as in mid-winter when the interior of the vehicle is cold, turning the heater on and immediately trying to use the product may cause condensation (water droplets) to form on the disc and internal optical components, and this may prevent the product from operating correctly.

In these conditions, remove the disc, and wait a short time before use.

Copyright

Actions such as unauthorized reproduction, broadcast, public performance, or rental of discs that comprise other than personal use are prohibited by law.

Types of Disc That Can Be Played Back

N00715500026

The following marks are printed on the disc label, package, or jacket.

Type	Size	Maximum playback time	Comments
CD-DA 	5 inches (12 cm)	74 minutes	—
CD-TEXT 	5 inches (12 cm)	74 minutes	—
CD-R/RW  	5 inches (12 cm)	—	•Disc containing MP3 files

Discs That May Not Be Played Back

- Playback of discs other than those described in “Types of Disc That Can Be Played Back” is not guaranteed.
- 3 inches (8 cm) discs may not be used.
- Do not insert irregularly-shaped discs (for example, heart-shaped), as these may result in malfunction. Additionally, discs that have transparent portions may not be played back.

Audio Files (MP3/WMA/AAC)

- Discs that have not been finalized cannot be played back.
- Even if recorded using the correct format on a recorder or computer, application software settings and environments; disc peculiarities, damage, or marking; or dirt or condensation on the lens inside the product may render the disc unplayable.
- Depending on the disc, some functions may not be used, or the disc may not play back.
- Do not use discs with cracks or warps.
- If the disc has stickers affixed, remains from removed stickers, or affixed adhesive, then do not use the disc.
- Discs that have decorative labels or stickers may not be used.
- There may be noise during playback.
- There may be jumping in the audio.
- The disc may not be recognized.
- The first track may not be played back.
- It may take longer than usual until start of playback of tracks.
- Playback may start from within the track.
- Some parts may not be played back.
- Tracks may freeze during playback.
- Tracks may be displayed erroneously.

Audio Files (MP3/WMA/AAC)

N00715600027

This product can play back MP3/WMA/AAC format audio files recorded on CD-ROM, CD-R/RW, and USB devices.

There are limitations on the files and media that can be used, therefore read the following prior to recording MP3/WMA/AAC format audio files on discs or USB devices.

Additionally, ensure you read the user manuals for your CD-R/RW drive and the writing software, and ensure these are used correctly. If the MP3/WMA/AAC format audio files includes title information or other data, then this can be displayed.

Nonstandard CDs

This product will play back audio CDs, however please be aware of the following points regarding CD standards.

- Ensure that you use discs with **disc** on the label surface.
- Playback of other than standard CDs is not guaranteed. Even if the audio can be played back, the audio quality cannot be guaranteed.
- When playing back other than standard CDs, the following may occur.

CAUTION

- CD-ROM and CD-R/RW media can only play back MP3 format audio files.
- Actions such as copying audio CDs or files and either distributing these to others for free or for charge, or uploading files via the Internet or other means to servers is an infringement of the law.
- Do not append the file extensions “.mp3”, “.wma”, or “.m4a”, to other than MP3/WMA/AAC format files. Playing back discs with these types of files recorded upon them may cause the files to be incorrectly identified for playback, which may lead to loud noise, resulting in speaker damage or accident.

NOTE

- Depending on the condition of the disc recorder or recording software used, correct playback may not be possible. In these cases, refer to the user manual for your product or software.
- Depending on your computer's operating system, version, software, or settings, files may not have a file extension appended. In these cases, append the file extensions “.mp3”, “.wma”, or “.m4a” when copying the files.
- Files larger than 2GB in size cannot be played back.

Data Formats That Can Be Played Back

N00715700028

Data formats that can be played on discs (CD-ROM, CD-R/RW) and USB devices differ.

Data format	DISC	USB device
MP3	○	○
WMA	X	○
AAC	X	○

Folder Structure

N00715800029

Up to 8 folder levels can be recognized. You can create a folder structure as in Genre - Artist - Album - Track (MP3/WMA/AAC format audio files) for management of tracks.

Name	Specification	Explanation	
Format specifications	ISO9660	Level 1	Maximum 8 character file name, and 3 character file extension. (single-byte alphanumeric capital letters, numerals, “_” may be used)
	ISO9660 extension	Joliet	Files names up to a maximum 64 characters can be used.
Multisession	Not supported (only first session supported)		
Maximum number of levels	8 levels (if the root is the 1st level)		
Maximum folder number	700 folders (including root)		

7

Name	Specification	Explanation
Maximum file number* ¹	65,535 files (total number on media. Other than MP3, WMA, and AAC files not included)	
File name and folder name restrictions	Maximum 64 bytes (for Unicode, 32 characters), files/ folders with file/ folder names longer than this will not be displayed or played back.	
USB supported formats	The recommended file system is FAT32. 1 partition only	

*1. Do not include other than MP3/WMA/AAC files. However, if storing many tracks within the same folder, these may not be recognized even if less than the maximum number of tracks. In these cases, divide the tracks up into multiple folders.

 NOTE
<ul style="list-style-type: none"> The order in which folders and audio files are displayed on this product may be different to how they are displayed on a computer.

What Is MP3?

N0071590020

MP3 is an abbreviation of “MPEG-1 Audio Layer 3”. MPEG is an abbreviation of “Motion Picture Experts Group”, and this is a video compression standard used in video CDs, etc.

MP3 is one of the audio compression methods contained in the MPEG audio standard, and reduces the quality of sounds that are beyond the auditory resolution of the human ear and that are hidden by louder sounds, thus creating high-quality data with a lower data size.

Because this can compress CD audio to approximately 1/10 its original data size without perceptible loss, approximately 10 CDs can be written to a single CD-R/RW disc.

CAUTION

- MP3 files different to the standards at right may not play back correctly, or file/folder names may not be displayed correctly.

Standards for MP3 Files That Can Be Played Back

Specifications for MP3 files that can be played are as below.

Item	Details
Specification	MPEG-1 AUDIO LAYER3
	MPEG-2 AUDIO LAYER3
Sampling frequency [kHz]	MPEG-1: 32/44.1/48
	MPEG-2: 16/22.05/24
Bit rate [kbps]	MPEG-1: 32 to 320
	MPEG-2: 8 to 160
VBR (variable bit rate)	Support
Channel mode	Stereo/ Joint stereo/ Dual channel/ Monaural
File extension	mp3
Supported tag information	ID3 tag Ver. 1.0, Ver. 1.1, Ver. 2.2, Ver. 2.3, Ver. 2.4 (ISO-8859-1, UTF-16 (Unicode)), Titles, Artist name, Album name
Maximum number of characters that can be indicated on the display	64 characters

What Is WMA?

N0071600028

WMA is an abbreviation of Windows Media Audio, and this is an audio compression format from Microsoft. This is a compression format that has a higher compression ratio than MP3.

NOTE

- Microsoft, Windows Media, and Windows are registered trademarks of Microsoft Corporation (USA) and in other countries.

CAUTION

- WMA supports digital rights management (DRM). This product cannot play back WMA files protected using this system.
- WMA files different to the standards at right may not play back correctly, or file/folder names may not be displayed correctly.
- “Pro”, “Lossless”, and “Voice” are not supported.

Standards for WMA Files That Can Be Played Back

Specifications for WMA files that can be played are as below.

Item	Details
Specification	Windows Media Audio Version 7.0/8.0/9.0
Sampling frequency [kHz]	32/44.1/48
Bit rate [kbps]	48 to 320
VBR (variable bit rate)	Support
Channel mode	Stereo/Monaural
File extension	wma
Supported tag information	WMA tags Title name, Artist name, Album name
Maximum number of characters that can be indicated on the display	64 characters

What Is AAC?

N00716100029

AAC is an abbreviation of Advanced Audio Coding, and this is an audio compression standard used in “MPEG-2” and “MPEG-4”. This features 1.4x the compression of MP3, with comparable audio quality.

CAUTION

- AAC supports digital rights management (DRM). This product cannot play back AAC files protected using this system.
- AAC files different to the standards at right may not play back correctly, or file/folder names may not be displayed correctly.

Standards for AAC Files That Can Be Played Back

Specifications for AAC files that can be played are as below.

Item	Details	
Specification	Advanced Audio Coding MPEG4/AAC-LC MPEG2/AAC-LC	
Sampling frequency [kHz]	MPEG4	8/11.025/12/16/22.05/24/32/44.1/48
	MPEG2	8/11.025/12/16/22.05/24/32/44.1/48
Bit rate [kbps]	MPEG4	8 to 320
	MPEG2	8 to 320
VBR (variable bit rate)	Support	
Channel mode	Stereo/Monaural	

Item	Details
File extension	m4a
Supported tag information	AAC tags or ID3 tags Title, Artist name, Album name
Maximum number of characters that can be indicated on the display	64 characters

7

Important Points on Safety for the Customer

N00716200020

This product features a number of pictorial indications as well as points concerning handling so that you can use the product correctly and in a safe manner, as well as prevent injury or damage to yourself, other users, or property.

WARNING

- The driver should not pay close attention to the display while driving. This may prevent the driver looking where they are going, and cause an accident.

WARNING

- The driver should not perform complicated operations while driving. Performing complicated operations while driving may prevent the driver looking where they are going, and cause an accident. Therefore stop the vehicle in a safe location before performing such operations.
- Do not use during malfunctions, such as when no sound is audible. This may lead to accident, fire, or electric shock.
- Ensure water or other foreign objects do not enter the product. This may lead to smoking, fire, electric shock, or malfunction.
- Do not insert foreign objects into the disc slot. This may lead to fire, electric shock, or malfunction.
- In the event of abnormalities occurring when foreign objects or water enter the product, resulting in smoke or a strange smell, immediately stop using the product, and consult an authorized Mitsubishi Motors dealer or a repair facility of your choice. Continuing to use the product may result in accident, fire, or electric shock.
- Do not disassemble or modify the product. This may lead to malfunction, fire, or electric shock.

WARNING

- During thunderstorms, do not touch the antenna or the front panel. This may lead to electrical shock from lightning.

CAUTION

- Do not block ventilation holes or heat sinks on the product. Blocking ventilation holes or heat sinks may prevent heat from escaping from within the product, leading to fire or malfunction.
- Do not turn the volume up to the extent that you cannot hear sounds from outside the vehicle while driving. Driving without being able to hear sounds from outside the vehicle may result in an accident.
- Do not insert your hand or fingers into the disc slot. This may result in injury.

Operation Keys

N00716300021

Turn the Power ON/ OFF

N00716400048

1. Press the PWR/VOL key.

- Turn the power on, and resume playback from the previous status.
2. Press the PWR/VOL key.
Turn the power OFF.

NOTE

- Hold down the steering MODE key to also turn the audio function ON/OFF.

Adjust Volume

N00716500049

1. Turn the PWR/VOL key to adjust the volume.

Turn the PWR/VOL key clockwise to increase, and counter-clockwise to decrease the volume.

NOTE

- The maximum value for volume is 45, and the minimum is 0.
- The initial setting for volume is “17”.

Insert/Eject Discs

N00716600024

1. Insert the disc into the disc slot with the label surface up.

Push the disc in a certain amount, and the product will pull the disc in, and playback will start.

2. Press the ▲ key.
This will eject the disc from the product, so remove the disc.

CAUTION

- When replacing discs, first ensure that the vehicle is stopped in an area in which stopping is permitted.
- Do not insert your hand, fingers, or foreign objects into the disc slot. This may lead to injury, smoking, or fire.
- 3 inches (8 cm) CDs are not supported.

Explanation of Buttons

N00716700070

This explains names and functions of each part.

AJ1101387

1- ▲ key

Use to eject a disc.

2- 3 ◀◀ key/4 ▶▶ key

For audio, rewind/fast forward.

For radio, use as preset keys 3 and 4.

3- 2RDM key

For audio, play random playback; for radio, use as preset key 2.

4- 1RPT key

For audio, play repeat playback; for radio, use as preset key 1.

5- RADIO key

Switch the radio and the band.

6- PWR/VOL key

Adjust the volume, and turn the power ON/OFF.

7- MEDIA key

Switch between CD and other sources.

8- INFO key

Switch the content of the display.

9- CAT key

CAT (category content) searches and scans can be performed while receiving radio RBDS broadcasts.

Search channels in the satellite radio*¹.

10- SCAN key

For audio, play scan playback; for radio, scan for stations.

11- Disc slot

12- PAGE key

Display indicator page advance.

- 13- 5 **⏮** key
Play/Pause Bluetooth Audio*², and use as preset key 5 for radio.
 - 14- 6 **➡** key
Return during audio track search, and stop Bluetooth Audio*².
For radio, use as preset key 6.
 - 15- **⏪** key/ **⏩** key
For audio, select audio track/file; for radio, perform automatic station selection.
Select channels in the satellite radio*¹.
 - 16- MENU key
Switch to Menu mode.
 - 17- **▶/SEL** key
Adjust audio quality and select items.
For radio, manually select stations.
Select channels in the satellite radio*¹.
- *¹: Requires a satellite tuner connection.
*²: Requires a separately-purchased Bluetooth-capable audio device in equipment by type (vehicles with a Bluetooth[®] 2.0 interface).

Steering wheel audio remote control switch

N00716800042

AF0016154

- 1- Vol + key, - key
Adjust audio functions and the mobile phone function volume.
- 2- CH **▼** key, **▲** key
Select CD and other audio source tracks and radio stations.
Hold down to skip up and down through tracks.
Hold down to switch the satellite radio band during satellite radio reception.

- 3- MODE key
Hold down to turn the audio function ON/OFF. Additionally, each time this is pressed, this switches the audio source. The order of switching is as shown below.
If devices are not connected, then these are to be skipped, and the next source selected.

AJA102201

- *¹: An iPod cable (available separately) is required.
- *²: Requires a separately-purchased Bluetooth-capable audio device (vehicles with a Bluetooth[®] 2.0 interface).
- *³: Requires a satellite tuner connection.

Listen to Radio

N00716900069

This explains how to listen to AM and FM radio broadcasts.

To Listen to the Radio

Press the RADIO key to switch the band.

- 7** Switch between AM and FM bands. The selected band is indicated on the display.

NOTE

- Bands switch in the order AM, FM1, FM2, SIR1*, SIR2*, SIR3*, and SIR4*.
- If no signal is received, bands will not be switched to SIR2, SIR3, or SIR4.

*: When a satellite tuner is connected

Manual/Seek Station Selection

Turn the  /SEL key to the frequency to listen to.

 /SEL key (counter-clockwise)	Reduces the frequency being received.
--	---------------------------------------

 /SEL key (clockwise)	Increases the frequency being received.
 key (hold down)	Release the button to start seek station selection, and when a station is received, scanning stops.
 key (hold down)	

Scan Station Selection

Collective search for stations that can be received.

Press the SCAN key.

When a station is received, this is played for 5 seconds, then the product searches for the next station.

NOTE

- Press this button again while receiving the station to return to normal reception.

Preset Memory

Register the broadcast station in advance, and select this at a later time.

1. Tune in to the frequency to register.

2. Hold down any of the keys from the 1RPT key to the 6  key.

A “Beep” sounds, and the preset key is registered.

NOTE

- The preset memory can register a maximum of 6 stations for each band.
- If a preset key that already has a station registered is selected, then this is overwritten with the new preset.
- Pressing the preset key will select the previously registered frequency.

CAT Search

During RBDS broadcast reception, select CAT (category content), and automatically scan for stations.

1. During FM reception, press the CAT key. This switches to the CAT selection mode.
2. Press the CAT key to select CAT.
3. Press the  key or  key. The CAT (category content) indicator will flash, and station selection will automatically start. When a station is received, the frequency is displayed.

 **NOTE**

- This receives the station detected first.
- 10 seconds after reception, CAT search mode will be cancelled.
- To receive a different station, press the **1◀◀** key or **▶▶1** key again.

CAT Scan

During RBDS broadcast reception, select CAT (category content) to perform a collective search for stations.

1. During FM reception, press the CAT key. This switches to the CAT selection mode.
2. Press the CAT key to select CAT.
3. Press the SCAN key.

When a broadcast station is received, this is played for 5 seconds, then the product searches for the next station.

 **NOTE**

- Press this key again while receiving the station to return to normal reception.

Listen to Satellite Radio (if so equipped)

N0071700054

This section explains how to listen to satellite radio.

 **NOTE**

- A subscription is required to listen to satellite radio. Satellite radio cannot be received after the free trial period has expired.
- If no subscription has been made when the free trial period expires, the display will alternate between “CALL” and “888-539-SIRI”.

To listen to Satellite Radio

Press the RADIO key to switch the band.

Switches between SIR1, SIR2, SIR3, and SIR4 bands.

The selected band is indicated on the display.

 **NOTE**

- Bands switch in the order AM, FM1, FM2, SIR1, SIR2*, SIR3*, and SIR4*.
- Switch satellite radio bands by holding down the **▼** key or **▲** key on the steering remote control switch.

*:If no signal is received, bands will not be switched.

Select a Station

Press the **1◀◀** key or **▶▶1** key to select the station.

1◀◀ key	Go down one step from the channel being received.
▶▶1 key	Go up one step from the channel being received.
1◀◀ key (Hold down)	While the key is held down, it will cycle down through the channels being received.
▶▶1 key (Hold down)	While the key is held down, it will cycle up through the channels being received.

 **NOTE**

- When cycling up/down through channels, the channel number display in the upper level of the display changes.
- When channel number “000” is selected, the SIRIUS ID (12 digits) is displayed.

Listen to Satellite Radio (if so equipped)

Scan Station Selection

Channels are received in order and take 10 seconds each.

Scan All Channels

Press the SCAN key.

All of the channels are scanned.

NOTE

- Press this key again while receiving the channel to return to normal reception.
- Selecting a channel will cancel this.

Scan Category Channels

1. Press the CAT key.
Switches to the category search mode, and the category name is indicated on the display.
2. Turn the /SEL key to select the category.
3. Press the SCAN key.
The channels in the selected category are scanned.

NOTE

- Press the SCAN key or CAT key again while receiving the channel to return to normal reception.
- Turning the /SET key will cancel.

Preset Memory

Register the channel in advance, and select this at a later time.

1. Tune in to the channel to register.
2. Hold down any of the keys from the 1RPT key to the 6  key.
A “Beep” sounds, and the preset key is registered.

NOTE

- The preset memory can register a maximum of 6 stations per band.
- If a preset key that already has a channel registered is selected, then this is overwritten with the new preset.
- Pressing the preset key will select the previously registered channel.
The preset channels on the display are shown as “P1” though “P6”.

Channel Search

Other channels can be selected while listening to a channel.

1. Press the CAT key.
Switches to the category search mode, and the category name is indicated on the display.
2. Turn the /SEL key to select the category.
3. Press the /SEL key.
Switches to channel search mode.
4. Turn the /SEL key to select the channel.
5. Press the /SEL key.
A “Beep” sounds, and the selected channel is received. (Channel preliminary setting mode)
The channel name shown on the display flashes.
Press the /SEL key again to cancel the search mode and return to normal reception.
6. To continue the search, turn the /SEL key to select the channel.
The selected channel is received.
7. Press the /SEL key.
Cancels the search mode and returns to normal reception.

NOTE

- After making preliminary settings in the channel search mode, this will switch to the channel being received.
- Channel number “000” is for the SIRUS ID display, so it cannot be searched.
- If the “CAT ALL” category is selected, all channels can be searched in the channel search mode.
- In the category mode, press the CAT key to cancel search mode.
- In the channel search mode, press the 6 ➡ key to return to the category search mode.
- In the channel preliminary setting mode, press the 6 ➡ key to return to the category search mode without returning to the previous channel search mode.
- If there is no operation for 10 seconds, the search mode will be cancelled.

Initialize the CODE (Passcode)

The CODE required for changing the LOCK settings in the satellite settings is initialized. (The factory setting is “1111”.)

When the power is off, press the PWR/VOL key while holding down the /SEL key.
→ “Turn the Power ON/OFF” (P7-24)

Listen to CDs

N00717100026

This explains how to listen to audio CDs (CD-DA/CD-TEXT).

Play CDs

Insert the disc.

Insert a disc to automatically start playback. → “Insert/Eject Discs” (P.7-25)
If a disc is already within the product, press the MEDIA key to switch to CD as the source.

Select the Track

Press the  key or  key to select the track.

This enables selection of the next or previous track.

Fast Forward or Rewind

Hold down the 3  key or the 4  key.

Fast forward/rewind is possible.

Switch Playback Mode

Repeat playback, random playback, and scan playback are possible.

Repeat Playback (RPT)

Press the 1RPT key.

Repeat playback of the track currently being played.

NOTE

- Pressing again will cancel.
- Selecting a track, ejecting, fast forwarding, or rewinding will cancel.

Random Playback (RDM)

Press the 2RDM key.

Play the tracks on the disc in a random order.

NOTE

- Pressing again will cancel.
- Ejecting will cancel this.

Listen to MP3s

Scan Playback (SCAN)

Press the SCAN key.

Play the first 10 seconds of each of the tracks on the whole disc in order.

NOTE

- Press this button again during playback if you wish to hear that track, and that track will play normally.

7

Listen to MP3s

N00717200027

This explains how to listen to audio files on a disc.

CAUTION

- CD-ROM and CD-R/RW media can only play back MP3 format audio files.

To Listen to MP3s

Insert the disc.

Insert a disc to automatically start playback.
→ “Insert/Eject Discs” (P.7-25)

If a disc is already within the product, press the MEDIA key to switch to CD as the source.

NOTE

- Depending on the file structure, it may take some time to read the contents of the disc.

Select the Track (File)

Press the **1◀◀** key or **▶▶1** key to select the track.

This enables selection of the next or previous track.

Fast Forward or Rewind

Hold down the **3◀◀** key or the **4▶▶** key.

Fast forward/rewind is possible.

Switch Playback Mode

Repeat playback, random playback, and scan playback are possible.

Repeat Playback (RPT)

Press the 1RPT key.

Repeat playback of the track currently being played.

NOTE

- Pressing again will cancel.
- Selecting a file, ejecting, fast forwarding, or rewinding will cancel.

Folder Repeat Playback

Hold down the 1RPT key.

Repeat playback of the tracks within the folder currently being played.

NOTE

- Pressing again will cancel.
- Even if the file is selected, folder repeat playback will not be cancelled.

Random Playback (RDM)

Press the 2RDM key.

Play the tracks in the folder in a random order.

NOTE

- Pressing again will cancel.

Folder Random Playback

Hold down the 2RDM key.

Play all tracks in folders on the disc in a random order.

NOTE

- Pressing again will cancel.

Scan Playback (SCAN)

Press the SCAN key.

Play the first 10 seconds of each of the tracks in the folder currently being played in order.

NOTE

- Press this button again during playback if you wish to hear that track, and that track will play normally.

Search Tracks

Search folders and files, and select a track.

1. Turn the /SEL key to select the folder.
2. Press the /SEL key.

Files within the selected folder are displayed.

3. Turn the /SEL key to select the file.
4. Press the /SEL key.

This plays the selected file (track).

NOTE

- While the folder is selected, press the 6  key to cancel track search mode.
- If there is no operation for 10 seconds after selecting the folder, then track search mode will be cancelled.
- Select the folder, and hold down the /SEL key to start playback from the first track in that folder.
- While the file is selected, press the 6  key to return to the previous operation.
- While the file is selected, hold down the 6  key to cancel track search mode.
- If there is no operation for five seconds after selecting the file, that file is played back.
- Disc operations such as selecting a track will cancel track search mode.

Listen to an iPod

N00717300044

By connecting commercially-available iPod/iPhone devices to this product, you can play back tracks on these through the product.

CAUTION

- Do not leave the iPod/iPhone unattended in the vehicle.
- Never hold these devices in your hand to operate while driving, as this is dangerous.
- No indemnification for data loss resulting when the iPod/iPhone is connected to the product will be possible.
- Depending on how the devices are handled, audio files being damaged or lost, therefore it is recommended that data be backed up.

NOTE

- Depending on the generation, model, or software version of the iPod/iPhone, playback on this product may not be possible. (→P.7-16) Additionally, playback as explained in this document may not be possible.

 **NOTE**

- For vehicles with a Bluetooth® 2.0 interface, the types of devices that can be connected may vary.
[For vehicles sold in U.S.A.]
For details, access the Mitsubishi Motors North America website.
[For vehicles sold in Canada and Mexico]
For details, access the Mitsubishi Motors website. Please read and agree to the “Warning about Links to the Web Sites of Other Companies”. The websites mentioned above may connect you to websites other than the Mitsubishi Motors website.
<http://www.mitsubishi-motors.com/en/products/index.html>
- Regarding how to connect the iPod/iPhone, refer to “How to connect an iPod” on page 5-216.
- When connecting the iPod/iPhone, use a commercially-available iPod connection cable.
- Set up the device in order that no unsafe actions, such as plugging in the connection cable are taken while driving.
- When inserting and removing the iPod/iPhone, for safety’s sake first stop the vehicle.
- Depending on the status of the iPod/iPhone, it may take some time until the device is recognized, or playback starts.
- Buttons on the product will not operate while iPod/iPhone is connected.

 **NOTE**

- iPod/iPhone specifications and settings may mean that connection is not possible, or result in differences in operation or display.
- Depending on audio data in the iPod/iPhone, track information may not be displayed correctly.
- Depending on the status of the vehicle and device, the iPod/iPhone may not play back after starting the engine.
- Data containing copyright information may not play back.
- It is recommended that the iPod/iPhone equalizer settings be set to flat.
- Operate the iPod/iPhone while connected to this product.
- If the iPod/iPhone is connected via Bluetooth as a Bluetooth-capable audio device, then do not connect the iPod/iPhone using an iPod cable. Connection using both methods will result in erroneous operation.
- If an iPod/iPhone does not operate correctly, then remove the iPod/iPhone from the product, reset, then reconnect.

Play iPod

Press the MEDIA key to set the iPod as the source.

The selected source is indicated on the display.

Select the Track (File)

Press the ◀◀ key or ▶▶ key to select the track.

This enables selection of the next or previous track.

Fast Forward or Rewind

Hold down the 3 ◀◀ key or the 4 ▶▶ key.

Fast forward/rewind is possible.

Switch Playback Mode

Repeat playback and shuffle playback are possible.

Repeat Playback (RPT)

Press the 1RPT key.

Repeat playback of the track currently being played.

 **NOTE**

- Pressing again will cancel.

Shuffle Playback (RDM)

Press the 2RDM key.

Play tracks in the category currently being played in a random order.

NOTE

- Pressing again will cancel.

Album Shuffle Playback

Hold down the 2RDM key.

Play back the album in a random order (tracks in any order on the album).

NOTE

- Pressing again will cancel.

Search Tracks

Search categories or track names, and select a track.

1. Turn the /SEL key to select the category.

2. Press the /SEL key. Categories or tracks within the selected category are displayed.
3. Turn the /SEL key to select the category or track.
4. Press the /SEL key.
Repeat steps 1 to 4, and search for tracks.
Select the track, and press the /SEL key to play.

NOTE

- While the category (1st level) is selected, press the 6  key to cancel track search mode.
- If there is no operation for 10 seconds after selecting the category, then track search mode will be cancelled.
- Select the category, and hold down the /SEL key to start playback from the first track in that category.
- While the track is selected, press the 6  key to return to the previous operation.
- While the track is selected, hold down the 6  key to cancel track search mode.
- If there is no operation for five seconds after selecting the track, that file is played back.
- iPod operations such as selecting a track will cancel track search mode.

Listen to Audio Files on a USB Device

N0071740061

By connecting commercially-available USB devices such as USB memory to this product, you can play back audio files on these through the product.

CAUTION

- Do not leave the USB device unattended in the vehicle.
- Never hold these devices in your hand to operate while driving, as this is dangerous.
- Do not use hard discs, card readers, or memory readers, as damage may occur to these or to the data contained therein. If these are erroneously connected, then turn the ignition switch to the “OFF” or “LOCK” position or put the operation mode in OFF, then remove.
- Because of the risk of data loss, it is recommended that files be backed up.
- No guarantee is made as regards damage to the USB device, nor regarding loss or damage to data contained therein.
- Depending on how the devices are handled, audio files being damaged or lost, therefore it is recommended that data be backed up.

 **NOTE**

- Digital audio players that support the mass storage class specifications can be connected.
- For details regarding the types of USB devices that can be connected and the types of files that can be played back in vehicles with a Bluetooth® 2.0 interface, refer to “Types of connectable devices and supported file specifications” on page 5-217.
- Regarding how to connect USB devices, refer to “How to connect a USB memory device” on page 5-215.
- When connecting a USB device, use a connection cable. Failure to use a connection cable when connecting may place undue load on, or damage the USB connector.
- Set up the device in order that no unsafe actions, such as plugging in the connection cable are taken while driving.
- When inserting and removing the USB device, for safety’s sake first stop the vehicle.
- Do not insert other than audio devices into the USB port. Damage to the device or equipment may result.
- Depending on the status of the USB device, it may take some time until the device is recognized, or playback starts.
- Depending on USB devices, buttons on the product will not operate while the USB device is connected.

 **NOTE**

- USB device specifications and settings may mean that connection is not possible, or result in differences in operation or display.
- Depending on audio data in the USB device, track information may not be displayed correctly.
- Depending on the status of the vehicle and device, the iPod/iPhone may not play back after starting the engine.
- Data containing copyright information may not play back.
- This product can play back MP3, WMA, and AAC format audio files.
- Depending on the type of USB device, usage may not be possible, or functions that can be used may be restricted.
- The recommended file system for USB memory is FAT32.
- The maximum supported capacity for USB memory is 32GB.
- Operate the USB device containing recorded audio files while connected to this product.

Play Back of Audio Files on a USB Device

Press the MEDIA key to set USB as the source.

The selected source is indicated on the display.

Select the Track (File)

Press the ◀◀ key or ▶▶ key to select the track.

This enables selection of the next or previous track.

Fast Forward or Rewind

Hold down the 3 ◀◀ key or the 4 ▶▶ key.

Fast forward/rewind is possible.

Switch Playback Mode

Repeat playback, random playback, and scan playback are possible.

Repeat Playback (RPT)

Press the 1RPT key.

Repeat playback of the track currently being played.

 **NOTE**

- Pressing again will cancel.

 **NOTE**

- Selecting a file will cancel this. However, it will not be cancelled in vehicles with a Bluetooth® 2.0 interface.

Folder Repeat Playback

Hold down the 1RPT key.

Repeat playback of the tracks within the folder currently being played.

 **NOTE**

- Pressing again will cancel.
- Selecting a folder will cancel this.
- Cycling up/down through files will cancel this.
- Even if the file is selected, folder repeat playback will not be cancelled.

Folder Random Playback (RDM)

Press the 2RDM key.

Play tracks in the folder currently being played in a random order.

 **NOTE**

- Pressing again will cancel.
- Selecting a folder will cancel this.

 **NOTE**

- Cycling up/down through files will cancel this.
- Even if the file is selected, folder random playback will not be cancelled.

All Folder Random Playback

Hold down the 2RDM key.

Play the tracks in all folders in a random order.

 **NOTE**

- Pressing again will cancel.
- Selecting a folder will cancel this.
- Cycling up/down through files will cancel this.
- Even if the file is selected, all folder random playback will not be cancelled.

Scan Playback (SCAN)

Press the SCAN key.

Play the first 10 seconds of each of the tracks on the whole USB device in order.

 **NOTE**

- Press this button again during playback if you wish to hear that track, and that track will play normally.

Folder Scan Playback

Hold down the SCAN key.

Play the first 10 seconds of the first track in each folder on the USB device in order.

 **NOTE**

- Press this button again during playback if you wish to hear that track, and that track will play normally.

Search Tracks

Search folders and files, and select a track.

1. Turn the  /SEL key to select the folder.
2. Press the  /SEL key.

Files within the selected folder are displayed.

3. Turn the  /SEL key to select the file.
4. Press the  /SEL key.

To play iPod/USB memory device tracks via voice operation (vehicles with Bluetooth® 2.0 interface)

This plays the selected file (track).

NOTE

- While the folder is selected, press the 6 ➡ key to cancel track search mode.
- If there is no operation for 10 seconds after selecting the folder, then track search mode will be cancelled.
- Select the folder, and hold down the  /SEL key to start playback from the first track in that folder.
- While the file is selected, press the 6 ➡ key to return to the previous operation.
- While the file is selected, hold down the 6 ➡ key to cancel track search mode.
- If there is no operation for five seconds after selecting the file, that file is played back.
- Operations such as selecting a track will cancel track search mode.

To play iPod/USB memory device tracks via voice operation (vehicles with Bluetooth® 2.0 interface)

N00772001038

When connected to the USB input terminal desired tracks on the iPod/USB memory device can be selected and played via voice operation.

For information concerning the voice recognition function or speaker registration function, refer to “Bluetooth® 2.0 interface” on page 5-192.

The following explains how to prepare for voice operation and play the tracks.

Preparation for voice operation

N00772101039

To use the voice operation, press the SPEECH button (except for vehicles with Mitsubishi Multi-Communication System) or PICK-UP button (for vehicles with Mitsubishi Multi-Communication System) first.

AJA109880

- 1- SPEECH button
- 2- PICK-UP button

To search by artist name

N00772200017

1. Say “Play” on the main menu.

NOTE

- The Bluetooth® 2.0 interface starts recognizing the connected device. If the connected device cannot be recognized or a connection error occurs, the Bluetooth® 2.0 interface starts an appropriate voice guide. Follow the voice guide.

2. After the voice guide says “Would you like to play by Artist, Album, Playlist or Genre?,” say “Artist”.

NOTE

- If you say “Artist <name>,” you can skip step 3.

3. After the voice guide says “What Artist would you like to play?,” say the artist name.
4. If there is only one match, the system proceeds to step 6.
5. If there are two or more matches, the voice guide will say “More than one match was found, would you like to play <artist name>?” If you say “Yes,” the system proceeds to step 6.

If you say “No,” the next matching artist is uttered by the system.

NOTE

- If you say “No” to three or all artist names uttered by the system, the voice guide will say “Artist not found, please try again” and the system returns to step 2.
- Search time depends on the number of songs on your connected device. Devices containing a large number of songs may take longer to return search results.

6. After the voice guide says “Playing <artist name>,” the system creates a playlist index for the artist.

NOTE

- If the confirmation function is active, the voice guide confirms if the artist name is correct. If the artist name is correct, say “Yes”. If not, say “No”. After the voice guide says “Artist not found, please try again,” the system returns to step 2.

7. The system exits the voice recognition mode and starts playback.

To search by album title

N00772300018

1. Say “Play” on the main menu.

NOTE

- The Bluetooth® 2.0 interface starts recognizing the connected device. If the connected device cannot be recognized or a connection error occurs, the Bluetooth® 2.0 interface starts an appropriate voice guide. Follow the voice guide.

2. After the voice guide says “Would you like to play by Artist, Album, Playlist or Genre?,” say “Album”.

NOTE

- If you say “Album <title>,” you can skip step 3.

3. After the voice guide says “What Album would you like to play?” say the album title.
4. If there is only one match, the system proceeds to step 6.
5. If there are two or more matches, the voice guide will say “More than one match was found, would you like to play <album title>?” If you say “Yes,” the system proceeds to step 6. If you say “No,” the name of the next matching album is uttered by the system.

NOTE

- If you say “No” to three or all album titles uttered by the system, the voice guide will say “Album not found, please try again” and the system returns to step 2.

6. After the voice guide says “Playing <album title>,” the system creates a playlist index for the album title.

NOTE

- If the confirmation function is active, the voice guide confirms if the album title is correct. If the album title is correct, say “Yes”. If not, say “No”. After the voice guide says “Album not found, please try again,” the system returns to step 2.

7. The system exits the voice recognition mode and starts playback.

To search by playlist

N00772400019

1. Say “Play” on the main menu.

 **NOTE**

- The Bluetooth® 2.0 interface starts recognizing the connected device.
If the connected device cannot be recognized or a connection error occurs, the Bluetooth® 2.0 interface starts an appropriate voice guide. Follow the voice guide.

2. After the voice guide says “Would you like to play by Artist, Album, Playlist or Genre?,” say “Playlist”.

 **NOTE**

- If you say “Playlist <playlist>,” you can skip step 3.
If the device has no playlist, the voice guide will say “There are no playlists stored on device” and the system returns to step 2.

3. After the voice guide says “What Playlist would you like to play?,” say the playlist name.

4. If there is only one match, the system proceeds to step 6.

5. If there are two or more matches, the voice guide will say “More than one match was found, would you like to play <playlist>?” If you say “Yes,” the system proceeds to step 6.

If you say “No,” the next matching playlist name is uttered by the system.

 **NOTE**

- If you say “No” to three or all playlist names uttered by the system, the voice guide will say “Playlist not found, please try again” and the system returns to step 2.

6. After the voice guide says “Playing <playlist>,” the system creates an index for the playlist.

 **NOTE**

- If the confirmation function is active, the voice guide confirms if the playlist name is correct. If the playlist name is correct, say “Yes”. If not, say “No”. After the voice guide says “Playlist not found, please try again,” the system returns to step 2. Refer to “Confirmation function setting” on page 5-196.

7. The system exits the voice recognition mode and starts playback.

To search by genre

N00772500010

1. Say “Play” on the main menu.

 **NOTE**

- The Bluetooth® 2.0 interface starts recognizing the connected device.
If the connected device cannot be recognized or a connection error occurs, the Bluetooth® 2.0 interface starts an appropriate voice guide. Follow the voice guide.

2. After the voice guide says “Would you like to play by Artist, Album, Playlist or Genre?,” say “Genre”.

 **NOTE**

- If you say “Genre <type>,” you can skip step 3.

3. After the voice guide says “What Genre would you like to play?,” say the music type.

4. If there is only one match, the system proceeds to step 6.

5. If there are two or more matches, the voice guide will say “More than one match was found, would you like to play <genre>?” If you say “Yes,” the system proceeds to step 6.

If you say “No,” the next matching genre is uttered by the system.

 **NOTE**

- If you say “No” to three or all genres uttered by the system, the voice guide will say “Genre not found, please try again” and the system returns to step 2.

6. After the voice guide says “Playing <genre>,” the system creates an index for the genre.

 **NOTE**

- If the confirmation function is active, the voice guide confirms if the genre is correct. If the genre is correct, say “Yes”. If not, say “No”. After the voice guide says “Genre not found, please try again,” the system returns to step 2. Refer to “Confirmation function setting” on page 5-196.

7. The system exits the voice recognition mode and starts playback.

Listen to Bluetooth Audio (if so equipped)

N00717500020

This product can play back tracks on commercially-available Bluetooth-capable audio devices.

 **CAUTION**

- Never hold these devices in your hand to operate while driving, as this is dangerous.
- Do not leave the Bluetooth audio device unattended in the vehicle.
- Depending on how the devices are handled, audio files being damaged or lost, therefore it is recommended that data be backed up.

 **NOTE**

- Depending on the type of Bluetooth-capable audio devices, usage may not be possible, or functions that can be used may be restricted.
- Confirm together with the user manuals for the commercially-available Bluetooth-capable audio devices.
- Depending on the type of Bluetooth-capable audio devices, volume levels may differ. There is the danger of loud volumes, so prior to use, it is recommended that you turn the volume down.
→ “Adjust Volume” (P.7-25)
- Depending on the status of the Bluetooth audio device, it may take some time until the device is recognized, or playback starts.
- Bluetooth audio device specifications and settings may mean that connection is not possible, or result in differences in operation or display.
- Depending on audio data in the Bluetooth audio device, track information may not be displayed correctly.

 **NOTE**

- Depending on the status of the vehicle and device, the iPod/iPhone may not play back after starting the engine.

Connect a Bluetooth-capable Audio Device

Regarding how to connect your Bluetooth device, refer to “Connecting the Bluetooth[®] 2.0 interface and Bluetooth device” on page 5-199.

Operation methods below describe situations once connection has been completed.

 **NOTE**

- If the iPod/iPhone is connected via Bluetooth as a Bluetooth-capable audio device, then do not connect the iPod/iPhone using an iPod cable. Connection using both methods will result in erroneous operation.

Play Bluetooth Audio

1. Press the MEDIA key to set Bluetooth Audio as the source.

The selected source is indicated on the display.

Listen to Bluetooth Audio (if so equipped)

2. Press the 5  key. Bluetooth Audio playback starts.

NOTE

- Hold down the 5  key to pause.
- Press the 6  key to stop.

Select the Track (File)

7

Press the 1  key or 2  key to select the track.

This enables selection of the next or previous track.

Fast Forward or Rewind

Hold down the 3  key or the 4  key.

Fast forward/rewind is possible.

Switch Playback Mode

Repeat playback, random playback, and scan playback are possible.

Repeat Playback (RPT)

Press the 1RPT key.

Repeat playback of the track currently being played.

NOTE

- Each time the 1RPT key is pressed, this switches in the order Repeat OFF, 1 track repeat, All track repeat, and Repeat OFF.

Random Playback (RDM)

Press the 2RDM key.

Play the tracks in the Bluetooth Audio device in a random order.

NOTE

- Pressing again will cancel.

Scan Playback (SCAN)

Press the SCAN key.

Play the first 10 seconds of each of the tracks on the whole Bluetooth Audio device in order.

NOTE

- Press this button again during playback if you wish to hear that track, and that track will play normally.

Display Indicator

This explains content of the display indicator.

Change the Display Mode

N0071780052

You can change the content of the display indicator.

Press the INFO key to switch the display content.

Each time the INFO key is pressed, the display content changes.

CAUTION

- The operation of changing display contents may impede safe driving, therefore check safety before operation.

NOTE

- Up to 11 characters may be displayed at one time. To display 12 or more characters, press the PAGE key, and subsequent characters will be displayed.

During FM Reception

This switches in the order “Frequency”, “Station name”, and “Radio text”.

NOTE

- Radio text has a maximum display of 64 characters.
- If there is no text information to display, then “NO MESSAGE” is displayed.

During Satellite Radio Reception

(if so equipped)

This switches in the order “Channel name”, “Category name”, “Artist name”, “Track name”, and “Composer name”.

NOTE

- The channel and category have a maximum display of 8 characters. The other items have a maximum display of 36 characters.

During CD-DA playback

This switches in the order “Disc title”, “Track title”, and “Operating status”.

NOTE

- If there is no text information to display, then “NO TITLE” is displayed.

During MP3/WMA/AAC Playback

This switches in the order “Folder title”, “File title”, and “Operating status”.

NOTE

- If there is no text information to display, then “NO TITLE” is displayed.

Display the ID3tag

Hold down the INFO key.

This switches the ID3tag display. Each time INFO key is pressed, this switches in the order “Album name”, “Track name”, “Artist name”, “Genre name”*, and “Operating status”.

*:Displayed when playing back audio files on a USB device (vehicles with a Bluetooth® 2.0 interface).

NOTE

- During display of the ID3tag, hold down the INFO key to switch to the folder title display.
- The genre name display may not be possible.

During iPod Playback

N0071820024

This switches in the order “Albums”, “Track name”, “Artist name”, “Genre name”, and “Operating status”.

NOTE

- If there is no text information to display, then “NO TITLE” is displayed.
- Displayed genre name in equipment by type (vehicles with a Bluetooth® 2.0 interface).
- The genre name display may not be possible.

During Bluetooth® 2.0 Audio Playback (if so equipped)

N0071830025

Operating details are the same as in “During iPod Playback” (P.7-44).

Audio Quality and Volume Balance Adjustment

N0071840026

Change audio quality settings.

Adjust Audio Quality and Volume Balance

1. Press the /SEL key to select settings items.

Each time the /SEL key is pressed, this switches in the order BASS, TREBLE, FADER, BALANCE, SCV, and Cancel.

2. Turn the /SEL key to adjust.

Adjustment items	Turn counter-clockwise	Turn clockwise
BASS	-6 to 0 (low low-pass volume)	0 to +6 (high low-pass volume)
TREBLE	-6 to 0 (Low high-pass volume)	0 to +6 (High high-pass volume)
FADER	CENTER to REAR 11 (emphasize REAR)	FRONT 11 to CENTER (emphasize FRONT)
BALANCE	LEFT 11 to CENTER (emphasize LEFT)	CENTER to RIGHT 11 (emphasize RIGHT)
SCV	OFF, LOW (Low vehicle compensated volume effect)	MID, HIGH (High vehicle compensated volume effect)

Each time the **▶**/SEL key is pressed, this switches in the order Satellite radio settings*¹, Gracenote DB*², PHONE settings, Adjust time, and Cancel.

3. Turn the **▶**/SEL key to set.
4. Press the **▶**/SEL key to determine.

This completes settings, and displays the next settings item.

*¹:Displayed when a satellite tuner is connected.

*²:Displayed when playing back audio files (vehicles with a Bluetooth[®] 2.0 interface).

System Settings

N00718500072

Change system settings such as product time.

1. Press the MENU key.
2. Press the **▶**/SEL key to select settings items.

Satellite Radio Settings (if so equipped)

Change each satellite radio setting.

Settings name	Settings item	Settings value	Settings content
SIRIUS ID	—	—	This displays the SIRIUS ID.
SKIP SETTING	SKIP SETTING SELECT CH* ¹	ON	SKIP can be set for each channel. Channels for which SKIP is set are excluded from the search during up/down channel selecting and scanning. They can be received when selecting channels using the preset keys or searching for a station.
		OFF	
	SKIP SETTING ALL RESET	—	When “YES” is selected, the SKIP settings for all channels are turned off.
LOCK SETTING	LOCK SETTING SELECT CH* ²	ON	LOCK can be set for each channel. Channels for which LOCK is set are excluded from the search during up/down channel selecting and scanning. If a channel for which LOCK is set is selected when selecting channels using the preset keys or searching for a station, “CH LCKED” is displayed within about 2 seconds after the channel text is displayed. The sound is muted.
		OFF	
	LOCK SETTING ALL RESET	—	When “YES” is selected and the CODE for settings is input, the LOCK settings for all channels are turned off.
	LOCK SETTING EDIT CODE	—	The CODE required for the LOCK settings is changed. (The factory setting is “1111”.) If the input code is incorrect, “LOCK SETTING WRG LC” is displayed.

*¹: Each time the /SET key is pressed, this switches in the order Settings channel select, Change SKIP settings, and Complete settings.

To return to “each channel SKIP setting”, press the 6  key.

*2: Once the CODE (passcode) of your choice is entered, each time the **♪/SET** key is pressed, this switches in the order Settings channel select, Change LOCK settings, and Complete settings.

To return to “each channel LOCK setting”, press the **6** **➡** key. Input the CODE from the **1** **RPT** key to the **6** **➡** key.

Time Setting

Set the time manually.

1. Select “YES” at the “Adjust time” screen, and press the **♪/SEL** key.
2. Press the various keys to adjust.

- H** - “Hour” setting
Press this key to fast-forward the “hours”.
- M** - “Minutes” setting
Press this key to fast-forward the “minutes”.

3. Press the **♪/SEL** key.
This completes the adjustment.

NOTE

- In order to finish adjusting the time, hold down the **♪/SEL** key until the seconds are reset to “00”.
- The time can also be set using another procedure.
Refer to “CLOCK” on page 7-51.

PHONE Settings

Change the mobile phone voice cut- in settings and the Bluetooth® 2.0 interface language.

Depending on the vehicle, PHONE settings may not be possible.

NOTE

- Cancel functions such as the mobile phone “dial lock”, and connect while on the standby screen.
- While connected, mobile phone (receiving calls, etc.) operations may not function correctly.

NOTE

- Depending on the distance between the product and the mobile phone, the conditions within the vehicle, and types of screening, connection may not be possible. In these cases, situate the mobile phone as close as possible to the product.
- Even though a Bluetooth-capable mobile phone, characteristics and specifications may mean that correct operation may not be possible.
- For safety’s sake, do not operate the mobile phone while driving. When operating the mobile phone, first stop the vehicle in a safe location.
- Even though a Bluetooth-capable mobile phone, phone specifications and settings may result in differences in display, or prevent correct operation.
- Some models may not be confirmed as connected, or may not connect.

Supported profiles

Hands-free	HFP(v1.5)
Phonebook transfer	OPP(v1.1), PBAP(v1.0)

Vehicles without a Bluetooth® 2.0 Interface

A hands-free kit (available separately) is required.

(“Set value” bold typeface indicates factory default settings.)

Settings value	Settings content
PHONE OFF	Do not use mobile phone voice cut-in.
PHONE MUTE	During mobile phone voice cut-in, mute the audio.
PHONE ATT	During mobile phone voice cut-in, output audio from all speakers.
PHONE IN-L	During mobile phone voice cut-in, output sound from the left front speaker.
PHONE IN-R	During mobile phone voice cut-in, output sound from the right front speaker.
PHONE IN-LR	During mobile phone voice cut-in, output sound from the left and right front speakers.

Vehicles with a Bluetooth® 2.0 Interface

(“Set value” bold typeface indicates factory default settings.)

Settings name	Settings value	Settings content
HFM voice language settings	ENG-LISH	Change the hands free module voice language.
	FRENCH	
	SPANISH	
	JAPANESE	

Gracenote DB (Vehicles with a Bluetooth® 2.0 interface)

The version number can be confirmed.

1. Select “Gracenote DB” and press the **▶/SEL** key.
2. Turn the **▶/SEL** key and select “DB Version”.
3. Press the **▶/SEL** key.
The DB Version is displayed.

Troubleshooting

N00718600044

Please check these items if a message appears on the display, or if you think something is not working properly.

If This Message Appears...

A message is displayed on this product according to the situation.

Mode	Message	Cause	Response
CD	CHECK DISC	The disc is inserted upside down.	Insert with the label side up.
		The disc has condensation on it.	Wait a while before inserting again.
	DISC ERROR	The disc is damaged.	Clean the read surface of the disc.
		The disc is dirty.	
	INTERNAL E	The drive has malfunctioned for some reason.	Check that there is no problem with the disc, and insert the disc again. If the problem persists, consult an authorized Mitsubishi Motors dealer or a repair facility of your choice.
HEAT ERROR	The temperature inside the product is high.	Remove the disc, and wait for the internal temperature to return to normal.	

Troubleshooting

Mode	Message	Cause	Response
USB	FILE ERROR	Files that cannot be played are selected.	Select files that can be played. → “Audio Files (MP3/WMA/AAC)” (P.7-20)
	USB BUS PWR	There is high or low electrical current or voltage.	Turn the power OFF and wait a short while. If the problem persists, consult an authorized Mitsubishi Motors dealer or a repair facility of your choice.
	LSI ERROR	There is an internal malfunction for some reason.	
	UNSUPPORTED FORMAT	Unsupported audio files have been played.	Confirm audio files that can be played. → “Audio Files (MP3/WMA/AAC)” (P.7-20)
	UNSUPPORTED DEVICE	An unsupported USB device has been connected.	Please connect a USB memory device.
iPod	NO SONG	An iPod/iPhone not containing any tracks has been connected.	Connect an iPod/iPhone containing tracks.
	VER ERROR	This iPod/iPhone software version is not supported.	Please change to a supported software version.
Other	ERROR DC	An abnormal direct voltage has been sent to the speakers.	Turn the power OFF and wait a short while. If the problem persists, consult an authorized Mitsubishi Motors dealer or a repair facility of your choice.

If You Think Something Is Not Working Properly...

Here is a list of symptoms, causes and responses if you think something is not working properly.

Symptoms	Cause	Response
There is no sound or quiet sound.	The volume is turned to its minimum.	Adjust the volume. → “Adjust Volume” (P.7-25)
	The balance or fader is turned to one side.	Adjust the balance or fader. → “Adjust Audio Quality and Volume Balance” (P.7-44)

Symptoms	Cause	Response
The disc cannot be inserted.	A disc is already in the product.	Eject the disc. → “Insert/Eject Discs” (P.7-25)
	There is no disc in the product, but the product says it is loading.	Press the eject button once. → “Insert/Eject Discs” (P.7-25)
The disc cannot be played.	The disc is inserted upside down.	Insert with the label side up.
	The disc has condensation on it.	Wait a while before inserting.
	The disc is dirty.	Clean the read surface of the disc.
The sound skips in the same place.	The disc is damaged or dirty.	Check the disc.
There is no sound, even if the disc is inserted.	Damage to or dirt on the disc means that its data cannot be read.	Check the disc. Additionally, if using CD-R/RW discs, their characteristics may render them unable to be played.

Antenna

N00734201494

Roof antenna

To remove

Turn the pole (A) counterclockwise.

To install

Screw the pole (A) clockwise into the base (B) until it is securely retained.

NOTE

- Be sure to remove the roof antenna in the following cases:
 - When using an automatic car wash

NOTE

- When covering your vehicle with a car cover
- When driving into a structure that has a low ceiling.

Clock (if so equipped)

N00755001150

The time is displayed when the ignition switch or the operation mode is in ON or ACC.

NOTE

- Reset the time after the battery terminals are disconnected and reconnected.

Time Setting

7

1. Press and hold the PAGE key until the clock display flashes.
2. Press the various keys to adjust.

H - “Hour” setting

Press this key to fast-forward the “hours”.

M - “Minutes” setting

Press this key to fast-forward the “minutes”.

3. Press the PAGE key to finish adjusting the time. When the adjustment is complete, the clock display stops flashing.

NOTE

- If the PAGE key is pressed and held when the time adjustment is finished, the seconds will be reset to “00”.

NOTE

- The time can also be set using another procedure. Refer to “System Settings” on page 7-45.

General information about your radio

N00733901465

Your vehicle’s radio receives both AM and FM stations.

The quality of your reception is affected by distance, obstacles, and signal interference.

Signal transmission

FM signals do not follow the earth surface nor are they reflected by the upper atmosphere. For this reason, FM broadcasts cannot be received over long distances. AM signals follow the earth’s surface and are reflected by the upper atmosphere. For this reason, AM broadcasts can be received over longer distances.

TA0000241

Weak reception (fading)

Because of the limited range of FM signals and the way FM waves transmit, you may experience weak or fading FM reception. When the broadcast is blocked by mountains or similar obstructions, reception can be disturbed.

Reflection

The reason why one can hear FM but not AM in parking garages, under bridges etc., is that FM signals, unlike AM signals, are reflected by solid objects such as buildings, etc.

Because FM signals are easily reflected by buildings, this can also cause reception disturbances.

The direct signal from the broadcast station reaches the antenna slightly before the reflected signal. This time difference may cause some reception disturbance or flutter.

This problem occurs primarily in urban areas.

Cross modulation

If one listens to a weak station and is in the vicinity of another strong station, both stations might be received simultaneously.

FM stereo reception

Stereo reception requires a high quality broadcast signal. This means that types of disturbances mentioned previously become more marked and the reception range is somewhat diminished during stereo reception.

Causes of disturbances

FM reception is affected by the electrical systems of vehicles in the vicinity, especially those without an electronic noise suppression device. The disturbance is even greater if the station is weak or poorly tuned.

FM reception is not as sensitive to electrical disturbances as AM. AM reception is sensitive to electrical disturbances such as power lines, lightning and other types of similar electrical phenomena.

For emergencies

If the vehicle breaks down	8-2
Jump-starting the engine	8-2
Engine overheating	8-4
Jack and tools	8-5
How to change a tire	8-6
Towing	8-14
Operation under adverse driving conditions	8-15
Fuel Pump Shut-off System	8-16

If the vehicle breaks down

N00836301230

If your vehicle breaks down on the road, move to the shoulder and turn on the hazard warning flashers. If there is no shoulder, or the shoulder is not safe, drive in the right lane slowly with the hazard lights flashing, until you come to a safe stopping place. Keep the flashers flashing.

If the engine stops/fails

8

If the engine stops, there will be no power assist to the steering and brakes, making these difficult to use.

- The brake booster will not work, so the brakes will not grip well. The brake pedal will be harder to press than usual.
- Since there is no power steering assist, the steering wheel will be hard to turn.

When the engine fails at the intersection

Get help from your passengers, bystanders, etc. to push the vehicle and move it to a safe area.

Jump-starting the engine

N00836401778

If the engine cannot be started because the battery is weak or dead, you can start it with the battery from another vehicle using jumper cables.

WARNING

- To reduce the risk of igniting flammable gas that may be emitted from the battery, carefully read this section before jump-starting the vehicle.
- Do not try to start your vehicle by pushing or towing. This can cause an accident resulting in serious injury or death and can damage the vehicle.

NOTE

- Do not use jumper cables if they have damage or corrosion.

1. Take off any metal jewelry such as watch bands or bracelets that might create an accidental electrical contact.
2. Position the vehicles close enough together so that the jumper cables can reach, but be sure the vehicles aren't touching each other.

CAUTION

- Check the other vehicle. It must have a 12-volt battery. If the other system isn't 12-volt, both systems can be damaged.

3. Set the parking brake firmly on your vehicle and move the selector lever into the "P" (PARK) position.
4. Set the parking brake firmly on the other vehicle. Put the automatic transaxle in "P" (PARK) or the manual transaxle in "N" (Neutral).
5. Turn the ignition switch (the engine switch) on each vehicle to the "LOCK" or "OFF" position.

NOTE

- Turn off all lights, heater, and other electrical loads. This will avoid sparks and help save both batteries.

6. Make sure your battery electrolyte is at the proper level. (Refer to "Battery" on page 9-13.)

⚠ WARNING

- If the electrolyte fluid is not visible, or looks frozen, **DO NOT ATTEMPT JUMP STARTING!!**
The battery might split open or explode if the temperature is below the freezing point or if it is not filled to the proper level.

7. Connect one end of one jumper cable ① to the positive (+) terminal of the discharged battery (A), and then connect the other end ② to the positive (+) terminal of the booster battery (B).

2.4 liter models

3.0 liter models

⚠ WARNING

- Make sure that the jumper cables and your clothing are clear of the cooling fans and drive belts. Entanglement with the fans or belts can cause serious personal injury.

NOTE

- Open the terminal cover before connecting the jumper cable to the positive terminal of the battery. (Refer to “Battery” on page 9-13.)
- Use the proper cables suitable for the battery size. Otherwise heat damage to the cables could result.

8. Connect one end of the other jumper cable ③ to the negative (-) terminal of the booster battery (B), and then connect the other end ④ to the designated ground location of the vehicle with the discharged battery (A) at the point farthest from the battery.

⚠ WARNING

- Be sure to follow the proper order when connecting the batteries, of: ①→②→③→④
- Make sure that the connection ④ is made to the correct designated location (as shown in the illustration) properly. If the connection is directly made to the negative (-) terminal of the battery, the flammable gases from inside the battery might catch fire and explode, causing personal injury.
- When connecting the jumper cable, do not connect the positive (+) cable to the negative (-) terminal. Sparks can make the battery explode.

9. Start the engine in the vehicle providing the boost. Let the engine idle a few minutes, then start the engine in the vehicle with the discharged battery.

10. After the engine is started, disconnect the cables in the reverse order from the way you connected them.

Charging the battery by using an external battery charger

WARNING

- Always remove the battery from your vehicle when the battery is charged by an external battery charger.
- Keep sparks, cigarettes, and flames away from the battery because the battery could explode.
- Keep your work area well vented when charging or using the battery in an enclosed space.
- Remove all the caps before charging the battery.
- Electrolyte (battery acid) is made of corrosive diluted sulfuric acid. If electrolyte comes in contact with your hands, eyes, clothes, or the painted surface of your vehicle, thoroughly flush with water. If electrolyte gets in your eyes, flush them immediately and thoroughly with water, and get prompt medical attention.
- Always wear protective clothing and goggles when working near the battery.
- Keep the battery out of the reach of children.

8

As your vehicle has anti-lock brakes

If you drive your vehicle with a low battery charge after the engine has been started by using jumper cables, the engine may misfire. This can cause the anti-lock braking system warning light to blink on and off. This is only due to the low battery voltage. It is not a problem with the brake system. If this happens, fully charge the battery and ensure the charging system is operating properly.

Engine overheating

N00836501375

When the engine is overheating, the warning will be displayed in the instrument cluster as follows.

- The information screen in the multi information display will be interrupted and the engine coolant temperature warning display will appear. Also  will blink. (Color liquid crystal display type)
- The high coolant temperature warning lamp will illuminate. (Mono-color liquid crystal display type)

If these warnings are displayed:

1. Stop the vehicle in a safe place. Turn on the hazard warning flashers.
2. With the engine still running, carefully raise the engine hood to vent the engine compartment.
3. Check that the cooling fan is running. If the fan is not turning, stop the engine immediately and contact an authorized Mitsubishi Motors dealer or a repair facility of your choice for assistance.

WARNING

- To avoid personal injury, keep hands, hair, jewelry and clothes away from the cooling fan. The cooling fan can start at any time.

4. If you see steam or spray coming from under the hood, turn off the engine.
5. If you do not see steam or spray coming from under the hood, leave the engine on until the high coolant temperature warning goes off. After the high coolant temperature warning has gone off, you can start driving again. If the high coolant temperature warning stays on, turn off the engine.

⚠ WARNING

- Before raising the engine hood, check to see if there is steam or spray coming from under the hood. Steam or spray coming from an overheated engine could seriously scald you.
Do not open the hood until there is no steam or spray.

- When you do not see any more steam or spray, open the hood. Look for obvious leaks, such as a split radiator hose. Be careful as components will be hot. Any leak source must be repaired.
- If there is no obvious leak source, check the coolant level in the engine coolant reserve tank. If there is none, or if it is too low, slowly add coolant.
- If the engine coolant reserve tank needs coolant, you will probably also need to add coolant to the radiator. Do not loosen or remove the radiator cap until the engine has cooled down.

⚠ WARNING

- Removing the radiator cap could scald you with escaping hot water or steam. When checking the radiator level, cover the cap with a cloth before trying to remove it. Turn it slowly counterclockwise, without pressing down, to the first notch. The pressure in the system will then be let out. When the pressure is COMPLETELY LET OUT, press down and keep turning the cap counterclockwise until it comes off.

- Start the engine, and slowly add coolant, up to the bottom of the filler neck. Use plain water if you have to (and replace it with the right coolant as soon as possible).
- Replace the radiator cap and tighten it fully. Check the engine coolant temperature display on the multi information display (Color liquid crystal display type) or the high coolant temperature warning light (Mono-color liquid crystal display type). You can start driving again when the high coolant temperature warning does not come on.
- Have the system inspected by your authorized Mitsubishi Motors dealer or a repair facility of your choice.

Jack and tools

N00836601389

Storage

The jack and tools are stowed on the right side of the luggage compartment.

- 1- Tools
2- Jack

How to change a tire

Tools

- 1- Bar
- 2- Wheel nut wrench

Removing and storing the jack

To remove

1. Remove the lid.
2. Retract the jack to remove it from the attaching hardware (A).

To store

1. Retract the jack, then return it to its original position.
2. Extend the jack and firmly set it in its storage area, then attach the lid.

How to change a tire

N00836901829

Before changing a tire, first stop your vehicle in a safe, flat location.

1. Park the vehicle on level and stable ground.
2. Set the parking brake firmly.
3. Move the selector lever to the “P” (PARK) position and turn the ignition switch (the engine switch) to the “LOCK” or “OFF” position.
4. Turn on the hazard warning flashers and set up a warning sign, such as a warning triangle or flashing signal lamp, at an adequate distance from the vehicle, and have all your passengers leave the vehicle.
5. To prevent the vehicle from rolling when it is raised on the jack, place chocks or blocks (A) at the tire that is diagonally opposite from the tire (B) you are changing.

⚠️ WARNING

- Be sure to apply chocks or blocks to the correct tire when jacking up the vehicle. If the vehicle moves while jacked up, the jack could slip out of position, leading to an accident.

📖 NOTE

- The chocks shown in the illustration do not come with your vehicle. It is recommended that you purchase chocks or blocks and keep them in the vehicle for use if needed.
- If chocks or blocks are not available, use stones or any other objects that are large enough to hold the wheel in position.

- Get the jack, bar and wheel nut wrench ready.
(Refer to “Jack and tools” on page 8-5.)

Spare tire information

N00849600315

Compact spare tire

The compact spare tire is stowed below the luggage compartment floor. It is designed to save space in the luggage compartment. Its lighter weight makes it easier to use if a flat tire occurs.

⚠️ WARNING

- Tires, including spare tire, degrade over time with age even when they are not being used. It is recommended that tires over 6 years generally be replaced even if damage is not obvious.

⚠️ CAUTION

- While the compact spare tire is stowed, the inflation pressure should be checked at least once a month to assure that it remains at the recommended inflation pressure. See the tire and loading information placard attached to the driver’s door sill. Refer to “Tire and loading information placard” on page 11-3.

⚠️ CAUTION

- Driving with an improperly inflated tire can cause an accident. If you have no choice but to drive with an under-inflated tire, keep your speed down and avoid sudden steering or braking, if possible. Inflate the tire to the correct pressure as soon as possible. Refer to “Tire inflation pressures” on page 9-18.
- The compact spare tire should be used only temporarily. While the compact spare tire is being used, the tire pressure monitoring system will not function properly. Have the tire replaced or repaired at an authorized Mitsubishi Motors dealer or a repair facility of your choice as soon as possible.
- Do not go over 50 mph (80 km/h) when driving with the compact spare tire.
- Avoid sudden starting and braking when driving with the compact spare tire.
- Do not drive through automatic car washes and over obstacles that could possibly damage the underside of your vehicle. Because the compact spare tire is smaller than the original tire, there is less clearance between the ground and your vehicle.
- Because the compact spare tire is designed only for your vehicle, do not use it on any other vehicle.
- Do not put the compact spare tire on a different wheel, and do not put standard tires, snow tires, wheel covers or trim rings on the compact spare wheel. Otherwise, you could damage these parts or other parts on your vehicle.

How to change a tire

CAUTION

- Do not use tire chains with your compact spare tire. Using a chain could cause damage to your vehicle and loss of the chains.

To remove the spare tire

N00849701296

1. Open the liftgate and use the bar to remove the cover (A) over the tire hanger mounting bolt.

AA0111706

2. With the wheel nut wrench, loosen the tire hanger mounting bolt by turning it counterclockwise.

AA0111719

CAUTION

- While checking the tire hanger, carefully loosen the tire hanger mounting bolt. Loosening it too much could pull out the hook and cause the compact spare tire to drop.

3. Lift up the section of the tire hanger (B) that is marked with the arrow in the illustration and remove it from the hook (C). Then lower it and remove the tire.

AA0111722

CAUTION

- When hooking or unhooking the tire hanger, be sure to hold the tire hanger firmly to prevent it from dropping on your foot.

To change a tire

N00849801457

1. On vehicles with wheel covers, first remove the covers (refer to “Wheel covers” on page 8-13). Then, loosen the wheel nuts with the wheel nut wrench. Do not remove the wheel nuts yet.

AA0000877

2. Place the jack under one of the jacking points (A) shown in the illustration. Use the jacking point closest to the tire you wish to change.

⚠ WARNING

- Set the jack only at the positions shown here. If the jack is set at a wrong position, it could dent your vehicle or the jack might fall over and cause personal injury.
- Do not use the jack on a tilted or soft surface. Otherwise, the jack might slip and cause personal injury. Always use the jack on a flat, hard surface. Before setting the jack, make sure there are no sand or pebbles under the jack base.

3. Rotate the jack by hand until the flange portion (B) fits in the groove (C) at the top of the jack.

⚠ WARNING

- Stop jacking up the vehicle as soon as the tire is raised off the ground. It is dangerous to raise the vehicle any higher.
- Do not get under your vehicle while using the jack.
- Do not bump the raised vehicle or leave it sitting on the jack for a long time. Both are very dangerous.
- Do not use a jack except the one that came with your vehicle.
- The jack should not be used for any purpose other than to change a tire.
- No one should be in your vehicle when using the jack.
- Do not start or run the engine while your vehicle is on the jack.
- Do not turn the raised wheel. The tires that are still on the ground could turn and make your vehicle fall off the jack.

📖 NOTE

- Put the spare wheel under the vehicle body near the jack. This makes it safer if the jack slips out of position.

4. Insert the bar (D) into the wheel nut wrench (E). Then put the end of the bar into the shaft's jack end, as shown in the illustration.

Slowly rotate the wheel nut until the tire is raised slightly off the ground surface.

How to change a tire

- Remove the wheel nuts with the wheel nut wrench, then take the wheel off.

CAUTION

- Handle the wheel carefully when changing the tire, to avoid scratching the wheel surface.

- Clean out any mud, etc. on the hub surface (F), hub bolts (G) or in the installation holes (H) in the wheel, and then mount the spare tire.

WARNING

- Mount the spare wheel with the valve stem (I) facing outward. If you cannot see the valve stem (I), you have installed the wheel backwards. Operating the vehicle with the spare wheel installed backwards can cause vehicle damage and result in an accident.

- Turn the wheel nut clockwise by hand to initially tighten them.

[Type 1: On vehicles with steel wheels]

Temporarily tighten the wheel nuts by hand until the tapered parts of the wheel nuts make light contact with the seats of the wheel holes and the wheel is not loose.

[Type 2: On vehicles with aluminium wheels]

Temporarily tighten the wheel nuts by hand until the flange parts of the wheel nuts make light contact with the wheel and the wheel is not loose.

NOTE

- Flange nuts can be temporarily used on the compact spare wheel as shown in the illustration, but return to the original wheel and tire as soon as possible.

CAUTION

- Never apply oil to either the wheel bolts or the nuts or they will tighten too much.

NOTE

- If all 4 aluminum wheels are changed to steel wheels, use tapered nuts.

8. Lower the vehicle slowly until the tire touches the ground, by rotating the wheel nut wrench counterclockwise.

9. Tighten the nuts in the order shown in the illustration until each nut has been tightened to the torque listed here.
65 to 80 ft-lb (88 to 108 N•m)

CAUTION

- Never use your foot or a pipe extension to apply added force to the wheel nut wrench when tightening the wheel nuts. If you do so, you can over-tighten the wheel nuts and damage the wheel, wheel nuts and hub bolts.

10. Lower the jack all the way and remove it.
11. Check the tire inflation pressure. The recommended tire pressure for your vehicle is listed on the tire and loading information placard attached to the driver's door sill as shown in the illustration. Refer to "Tire inflation pressures" on page 9-18.

CAUTION

- Driving with an improperly inflated tire can cause an accident. If you have no choice but to drive with an under-inflated tire, keep your speed down and avoid sudden steering or braking, if possible. Inflate the tire to the correct pressure as soon as possible. Refer to "Tire inflation pressures" on page 9-18.
- After changing the tire and driving the vehicle about 620 miles (1,000 km), retighten the wheel nuts to make sure that they have not come loose.
- If the steering wheel vibrates when driving after changing the tire, have the tire checked for balance at an authorized Mitsubishi Motors dealer or a repair facility of your choice.
- Do not mix one type of tire with another or use a different size from the one listed. This would cause early wear and poor handling.

To store the spare tire

N00832300020

1. Place the tire on the center of the tire hanger, with the wheel surface facing upwards.

⚠ CAUTION

- Storing the tire with the wheel surface facing down may damage the wheel or tire hanger. If you find any damage on a spare tire, do not use the tire and contact an authorized Mitsubishi Motors dealer or a repair facility of your choice.

8

2. Lift up the tire hanger (A) and hook it on the hook (B).

⚠ CAUTION

- Make sure you hook the tire hanger in the proper position. If the tire hanger is not hooked properly, the hook could damage the vehicle body or the tire could fall off the vehicle while driving, causing an accident.

3. With the wheel nut wrench, firmly tighten the tire hanger mounting bolt by turning it clockwise.

⚠ CAUTION

- Confirm that the tire hanger is firmly secured after storing the spare tire. If the tire hanger is not secured, it could drop out while driving, causing an accident.
- When hooking or unhooking the tire hanger, be sure to hold the tire hanger firmly to prevent it from dropping on your foot.

4. Install the cover over the tire hanger mounting bolt.

To store the flat tire, jack, bar and wheel nut wrench

N00850001172

Store the flat tire in the luggage compartment. Reverse the removing procedure when storing the jack, bar and wheel nut wrench. Refer to “Jack and tools” on page 8-5.

Wheel cover (if so equipped)

N00849401235

To remove

Wrap the tip of the bar with a cloth, insert it into the notch provided in the wheel cover, and pry the cover away from the wheel. Using the same procedure at the other wheel cover notches, work the wheel cover away from the wheel to remove it completely.

NOTE

- The wheel cover is made of plastic. Be careful when prying it off.

CAUTION

- Trying to remove the wheel cover with only your bare hands can seriously injure your fingers.

To install

CAUTION

- Before installing the wheel cover to the wheel, make sure that the tabs (A) on the back of the wheel cover correctly engage the ring (B) to prevent the wheel cover from coming off. Do not install a wheel cover that has broken tabs.

1. Align the tire air valve (C) and the wheel cover notch (D).

NOTE

- The back of the cover has a symbol (E) that shows the position of the notch.

2. Push the bottom (F) of the wheel cover into the wheel.
3. Gently push in both sides (G) of the wheel cover and hold them in place with both knees.
4. Gently tap the top (H) of the wheel cover around its outer circumference to push it in.

AG0008855

8 Towing

N00837001898

If your vehicle needs to be towed

If towing is necessary, we recommend you to have it done by a commercial tow truck service.

When towing is required, transport the vehicle using a tow truck.

Incorrect towing equipment could damage your vehicle.

CAUTION

- Do not attempt to be towed by another vehicle with a rope.

NOTE

- Your vehicle cannot tow any other vehicle.

There may be local regulations concerning towing in your area.

Obey the regulations of the area where you are driving your vehicle.

AJE100351

Towing the vehicle by a tow truck

CAUTION

- This vehicle must not be towed by a tow truck using sling lift type equipment (Type A) as illustrated. Using a sling lift will damage the bumper and front end.
- This vehicle must not be towed with the driving wheels on the ground (Type B) as illustrated. This could result in the driving system damage.
- Do not tow all-wheel drive vehicles with the rear wheels on the ground (Type C) as illustrated. This could result in the driving system damage or vehicle may jump at the carriage. If you tow all-wheel drive vehicles, use only Type D or E equipment.

⚠ CAUTION

- [For front-wheel drive vehicle equipped with the active stability control (ASC)]
If the vehicle is towed with the ignition switch in the “ON” position or the operation mode in ON and only the front wheels raised off the ground (Type C), the ASC may operate, resulting in an accident. When towing the vehicle with the front wheels raised, keep the ignition switch or the operation mode as follows.
[Except for vehicles equipped with the F.A.S.T.-key]
The ignition switch is in “LOCK”, “OFF” or “ACC” position.
[Vehicles equipped with the F.A.S.T.-key]
The operation mode is in OFF or ACC.

Towing a front-wheel drive vehicle with front wheels off the ground (Type C)

Release the parking brake.
Set the selector lever to the “N” (NEUTRAL) position.

Operation under adverse driving conditions

N00837201760

If your vehicle becomes stuck in sand, mud or snow

If your vehicle becomes stuck in snow, sand, or mud, it can often be moved by a rocking motion. Rock your vehicle back and forth to free it.

Do not rev the engine or spin the wheels. Constant efforts to free a stuck vehicle can cause overheating and transaxle failure. Let the engine idle for a few minutes to cool the transaxle before trying again.

If your vehicle is still stuck after several rocking attempts, call for a commercial tow truck service.

⚠ WARNING

- **When trying to rock your vehicle out of a stuck position, make sure that there are no people nearby. The rocking motion can make your vehicle suddenly lurch forward or backward, and injure any bystanders.**

On wet roads**⚠ CAUTION**

- Avoid flooded roads. Water is often deeper than it looks, and you could be seriously hurt by driving into flood water.
- When driving in rain, on water-covered roads, or through a car wash, water could get into the brake discs and make them fail temporarily. In such cases, lightly press the brake pedal to see if they are working properly. If they are not, press the pedal lightly several times while driving to dry the brake pads or linings, then check them again.
- When driving in rain, a layer of water may form between the tires and the road surface (hydroplaning). This loosens your tires' grip on the road, making it difficult to steer or brake properly. When driving on a wet road:
 - Drive your vehicle at a safe speed.
 - Do not drive on worn tires.
 - Always keep the tires at the correct inflation pressures.

On snowy or icy roads

- When driving on a road covered with snow or ice, use snow tires. Tire chains cannot be used on your vehicle. There may be state or local regulations about using snow tires. Always check the regulations in your local area before using them. Refer to “Snow tires” on page 9-21 and “Tire chains” on page 9-21.
- Drive slowly. Do not make sudden starts or stops, sharp turns, or slam on the brakes.
- Allow extra distance between your vehicle and the vehicle in front of you, and avoid sudden braking.
- If a skid occurs when the accelerator pedal is depressed, take your foot off the pedal. Steer gently in the direction of the skid.
- Your vehicle is equipped with an anti-lock braking system (ABS). Hold the brake pedal down firmly and keep it depressed. Do not pump the brake pedal which will result in reduced braking performance.
- After parking on snowy or icy roads, it may be difficult to move your vehicle due to the brake being frozen. Depress the accelerator pedal little by little to move the vehicle when safe to do so.

CAUTION

- Do not depress the accelerator pedal rapidly. The vehicle could start moving when it breaks free from the ice, possibly resulting in an accident.

On a bumpy or rutted road

- Drive as slow as possible when driving on bumpy, rutted roads or over potholes.

CAUTION

- Driving on bumpy, rutted roads or over potholes can damage the tires and wheels. Wheels with low-profiles tires or under-inflated tires are especially at risk for damage.

Fuel Pump Shut-off System

N00860600031

WARNING

- **Before attempting to restart the engine after a collision, always inspect the ground under the vehicle for leaking fuel. If a fuel leak is found or a fuel odor is detected, do not restart the engine.**
- **Mitsubishi Motors recommends that your vehicle be inspected by an authorized Mitsubishi Motors dealer after any collision.**

In the event of a collision causing frontal air-bag deployment, the fuel pump shut-off system will activate to stop fuel supply to the engine.

Vehicle care and maintenance

Cleaning the outside of your vehicle	9-39

Service precautions

N00937301384

Taking regular care of your vehicle will preserve its value and appearance as long as possible.

You can do some of the maintenance work yourself, and the rest should only be performed by an authorized Mitsubishi Motors dealer or a repair facility of your choice.

If you discover a malfunction or other problem, have it corrected by an authorized Mitsubishi Motors dealer or a repair facility of your choice.

9

This section describes the maintenance inspections that you can do yourself, if you so desire. Follow the instructions and precautions for each procedure.

A- Cooling fans

B- Caution label

*: Front of the vehicle

WARNING

- When checking or servicing the inside of the engine compartment, be sure the engine is stopped and has had a chance to cool down.
- If you need to work in the engine compartment with the engine running, be especially careful that your clothing, hair, etc. does not get caught in the cooling fans, drive belts, or other moving parts.
- The cooling fans can turn on automatically even if the engine is not running. Turn the ignition switch to the “LOCK” position to be safe while you work in the engine compartment.
- Do not smoke or allow open flames around fuel or the battery. The fumes are flammable.
- Be extremely careful when working around the battery. It contains poisonous and corrosive sulfuric acid.
- Do not get under your vehicle while it is on a jack. Always use properly rated automotive jack stands.
- Handling your vehicle’s parts and materials in the wrong way can injure you. Ask an authorized Mitsubishi Motors dealer or a repair facility of your choice if you have questions.

DIAMOND CARE PROTECTION PLAN

Have you purchased the Mitsubishi Motors Diamond Care Protection Plan? The Plan supplements your new vehicle warranties. See your authorized Mitsubishi Motors dealer for details.

Catalytic converter

N00937401457

The catalytic converter requires you to use unleaded fuel only. Leaded gasoline will destroy the emission-control effectiveness of the converter.

Normally, the catalytic converter does not require maintenance. However, it is important to keep the engine properly tuned for the converter to continue to work properly.

⚠ CAUTION

- Damage to the catalytic converter can result if your vehicle is not kept in proper operating condition. If the engine malfunctions or misfires, or if your vehicle performance suffers, have it serviced promptly. Running your vehicle when it is overheated may result in damage to the converter and vehicle.

⚠ WARNING

- **Do not park or run your vehicle in areas where combustible materials such as dry grass or leaves can come in contact with a hot exhaust, since a fire could occur.**
- **Do not put undercoat paint on the catalytic converter.**

To reduce the possibility of catalytic converter damage:

- Use UNLEADED GASOLINE ONLY of the type of recommended in the “Fuel selection”.
- Do not drive with an extremely low fuel level. Running out of gas could damage the catalytic converter.
- Do not try to start the engine by pushing or towing the vehicle. If the battery is weak or run down, use jumper cables to properly start the engine.

- Do not idle the engine with any spark plug wires disconnected or removed, such as when performing diagnostic tests.
- Do not idle the engine for a long time if it is idling roughly or otherwise obviously malfunctioning.
- To prevent the catalytic converter from being damaged from unburned gas, do not race the engine when turning off the ignition switch.
- Stop driving the vehicle if you think the performance is noticeably low, or the engine has a malfunction such as with the ignition, etc. If you are not able to stop driving immediately, slow down and drive for only a short time. Have your vehicle checked at an authorized Mitsubishi Motors dealer or a repair facility of your choice as soon as possible.
- In unusual situations involving major engine problems, a burning odor may indicate severe and abnormal catalytic converter overheating. If this occurs, stop in a safe place, shut the engine off and let the vehicle cool. Once the engine is cool, immediately take your vehicle to a dealer or a repair facility of your choice for service.

Engine hood

N00937501588

To open

Use the engine hood release lever (located under the instrument panel near the driver's door) to unlock the engine hood.

Pull the lever toward you to release the engine hood latch.

**⚠ WARNING**

- **Never use the release lever to unlatch the engine hood while the vehicle is in motion.**
- **Do not drive your vehicle unless the engine hood is locked.**

Engine hood

Release the lever and lift the engine hood.

NOTE

- To prevent damage to the engine hood and wipers, make sure the wipers are at resting position when you open the engine hood.

Support the engine hood with the hood prop. Insert the hood prop securely in the opening under the hood marked with an arrow.

CAUTION

- Always insert the support prop into the hole specially made for it. Propping the engine hood at any other place could cause the prop to slip out and lead to an accident.
- The hood prop can fall out if the hood is lifted by a strong wind.

To close

Unlatch the prop from the engine hood and put it back in its retainer.

Slowly lower the engine hood about 8 inches (20 cm), then let it drop from its own weight.

CAUTION

- Be careful not to trap your hands or fingers when closing the engine hood.

CAUTION

- Make sure the engine hood is firmly closed before driving.
If you drive without the engine hood completely closed, it could open up while driving.

NOTE

- If this does not close the engine hood properly, drop it again from a slightly higher position.
- Do not push down strongly on the engine hood. Depending on how strongly or where you push down, you could create a dent in the vehicle body.
- If you drive with the engine hood left open, a warning display is displayed on the information screen in the multi-information display.

View of the engine compartment

9

- 1- Engine oil level dipstick
- 2- Engine oil cap
- 3- Air cleaner filter
- 4- Brake fluid reservoir
- 5- Washer fluid reservoir
- 6- Automatic transaxle fluid level dipstick
- 7- Engine coolant reservoir
- 8- Battery

Engine oil and oil filter

N0093770204

To check and refill engine oil

It is normal for an engine to use oil. You may need to add oil between the recommended oil change intervals. Before starting the engine, check the engine oil level. Refill if necessary.

9

To check the oil level, remove the dipstick, wipe it off, and gently reinsert it all the way. Slowly pull the dipstick straight out and check the oil level by checking the upper surface of the dipstick. The oil level must not go above the line on the dipstick.

NOTE

- If it is difficult to verify the oil level, wipe off the dipstick and reinsert it. Wait a moment and then recheck the oil level by checking the upper surface of the dipstick.

If the level does not reach the line which shows the minimum amount of oil required, remove the oil filler cap on the engine valve cover, and fill to within the “Good” range.

CAUTION

- Overfilling will cause oil aeration and loss of oil pressure, which could damage the engine.

WARNING

- Used engine oil is poisonous, and can damage your skin. Prolonged and repeated contact may cause serious skin disorders, including dermatitis and cancer. Do not let used oil touch your skin and wash thoroughly after working with it.
- Keep used oil out of the reach of children.

NOTE

- Engine oil consumption is greatly influenced by payload, engine speed, etc.

NOTE

- The engine oil will deteriorate rapidly if the vehicle is subjected to severe conditions (for example, repeated operation on rough roads, in mountainous regions, on roads with many uphill and downhill gradients, or over short distances). Consequently, the oil will require earlier replacement in accordance with the schedule in the “WARRANTY AND MAINTENANCE MANUAL”.

Engine oil identification mark

Mitsubishi Motors recommends using only engine oils with the ILSAC certification symbol on the front of the container.

If you cannot find oils with the ILSAC certification symbol, use an API classification SN oil with the following label.

This mark appears on the top of the oil container and tells you two important things about the oil.

- 1- The upper part indicates the quality of the oil.
- 2- The center part indicates the SAE grade of the oil viscosity.

Recommended engine oil viscosity

Use engine oil with the proper thickness for the outdoor temperatures where you will be driving.

Mitsubishi Motors Genuine 0W-20 Synthetic Engine Oil is recommended for optimum fuel economy and cold weather starting.

If Mitsubishi Motors Genuine 0W-20 Synthetic Engine Oil is not available, 5W-20 grade oils displaying the ILSAC certification can be used.

However, Mitsubishi Motors Genuine 0W-20 Synthetic Engine Oil should be used at the next oil change to maintain optimum fuel economy and cold weather starting.

To replace the oil filter

The oil filter should be replaced at the time or mileage specified in the “WARRANTY AND MAINTENANCE MANUAL”.

Only use high quality replacement filters on this vehicle. The manufacturer’s specifications for Mitsubishi Motors Genuine oil fil-

Engine coolant

ters require that the filter can withstand a pressure of 256 psi (1.8 MPa). A Mitsubishi Motors Genuine oil filter is the best replacement filter.

Follow the installation instructions printed on the filter.

9

Engine coolant

N00937801594

To check the coolant level

The engine coolant reserve tank (A) lets you quickly see when you need to add coolant. When the engine is cold, the level of the coolant in the reserve tank should be between the FULL and LOW marks. The radiator usually stays full so there is no reason to remove the radiator cap (B) except when you check the coolant freeze point or replace the antifreeze coolant.

AJM100517

*: Front of the vehicle

To add coolant

Use “Mitsubishi Motors Genuine Super Long Life Coolant Premium” or equivalent*.

*: similar high quality ethylene glycol based non-silicate, non-amine, non-nitrate and non-borate coolant with long life hybrid organic acid technology

Mitsubishi Motors Genuine Coolant provides excellent protection against corrosion and rust formation on all metals, including aluminum, and prevents clogs in some parts of engine.

If you need to add coolant often, or if the level in the reserve tank does not drop when the engine cools, the cooling system should be pressure-tested for leaks. Take your vehicle to an authorized Mitsubishi Motors dealer or a repair facility of your choice for testing.

CAUTION

- Do not use alcohol or methanol antifreeze or any engine coolants that contain them. Using the wrong antifreeze can corrode aluminum parts.

CAUTION

- The required concentration of anti-freeze differs depending on the expected ambient temperature.
Above -31 °F (-35 °C): 50 % concentration of anti-freeze
Below -31 °F (-35 °C): 60 % concentration of anti-freeze
You can check the concentration level with a gauge from an automotive supply store, or your authorized Mitsubishi Motors dealer or service station can check it for you.
- Do not use water to adjust the concentration of coolant.
- Do not top off the tank with plain water only. Water by itself boils at a lower temperature and does not stop rust or freezing. If the water freezes, it will damage your cooling system. Do not use tapwater. It can cause corrosion and rust.

Radiator cap

The radiator cap must be sealed tight to prevent losing coolant, which may result in engine damage. Only use a Mitsubishi Motors Genuine Parts radiator cap, or an approved equivalent.

WARNING

- **Wait for the engine to cool down before opening the radiator cap. Otherwise hot steam or boiling coolant could spray up from the radiator and scald you.**

Points to remember

- Do not overfill the reserve tank.
- Your vehicle uses a special radiator cap that stays sealed and lets the coolant flow from the reserve tank back to the radiator when the engine cools down. If you need to change the cap, use the exact same kind.
- Check the coolant freeze point in the radiator with the proper gauge, and only when it is safe. If you add antifreeze, the contents of the reserve tank must be protected against freezing.
- Keep the front of the radiator and condenser clean.
- If the engine coolant temperature does not rise after the engine is warmed-up, take your vehicle to an authorized Mitsubishi Motors dealer or a repair facility of your choice to have the thermostat checked, and replaced if necessary.

Air cleaner filter

N00937901494

The air cleaner filter will get dirty and dusty from use and not filter properly. Replace it with a new filter using the schedule in the “WARRANTY AND MAINTENANCE MANUAL”.

1. For 2.4 L models, remove the two clips (A), then remove the Air duct (B).

2. For 2.4 L models, while holding down the tab (C), pull out the connector (D).

3. Unclamp the cover. Open up the top of the cover and take out the air cleaner filter.

4. Replace the air cleaner filter and put the cover back on in its original position.

3.0 L models

CAUTION

- Take care not to scratch the engine air flow sensor when removing the air cleaner cover.

5. For 2.4 L models, put the duct back on in its original position.

2.4 L models

NOTE

- Mitsubishi Motors Genuine Parts are recommended when replacing the air cleaner filter.
- For 2.4 L models, make sure that the connector is properly reconnected.
- After replacing the air cleaner filter, make sure that the hinges at the bottom of cover are firmly set.

Automatic transaxle fluid (if so equipped)

N00938000570

The automatic transaxle should be maintained and serviced by an authorized Mitsubishi Motors dealer or a repair facility of your choice to obtain the best performance and longest life. It is important that the transaxle fluid is kept at the correct level.

To check the fluid level

The fluid level should be checked when the bar graph for the engine coolant temperature display on the multi-information display shows the engine is warmed up and the fluid in the transaxle is heated to its normal working temperature. Driving with the wrong fluid level will rapidly wear out the transaxle and destroy the fluid.

Procedure for checking the fluid level

1. With the brake pedal fully depressed and the engine idling, select each gear momentarily, ending with the selector lever in the "P" (PARK) position.

2. The fluid level should be at the HOT mark, but never above the HOT mark when the engine is warmed up. Add or drain fluid to get to the correct level.
3. Make certain that the dipstick cap is installed properly to keep dirt and water out of the transaxle.

WARNING

- Transaxle fluid is extremely flammable and poisonous. Do not spill fluid when adding or draining.

Fluid type

Use only "Mitsubishi Motors Genuine ATF-J3" transaxle fluid to ensure optimum transaxle performance.

CAUTION

- Using the improper transaxle fluid may damage the transaxle.

Special additives

Mitsubishi Motors Corporation does not recommend the addition of any fluid additives to the transaxle.

Continuously variable transmission (CVT) fluid (if so equipped)

N00938101103

The continuously variable transmission (CVT) should be maintained and serviced by an authorized Mitsubishi Motors dealer or a repair facility of your choice to obtain the best performance and longest life. It is important that the transmission fluid is kept at the correct level.

Fluid type

Use only "Mitsubishi Motors Genuine CVTF-J4" transmission fluid to ensure optimum transmission performance.

Transfer oil (All-wheel drive models)

CAUTION

- Using the improper transaxle fluid may damage the transaxle.

Special additives

Do not use any fluid additives to the transmission.

Transfer oil (All-wheel drive models)

N00938401281

Whenever the transfer oil level is checked, add oil as necessary to maintain the proper level. Fill with the oil according to the table below.

Fluid type

Lubricant	Mitsubishi Motors Genuine Super Hypoid Gear Oil API classification GL-5
Viscosity range	SAE 80

Rear axle oil (All-wheel drive models)

N00915201279

Whenever the oil level is checked, add oil as necessary to maintain the proper level. Fill with the oil according to the table below.

Fluid type

Lubricant	Mitsubishi Motors Genuine Super Hypoid Gear Oil API classification GL-5
Viscosity range	SAE 80

Washer fluid

N00938601342

The windshield and rear window washer fluid reservoir is in the engine compartment.

Check the washer fluid level at regular intervals and add washer fluid to reservoir if necessary.

Open the reservoir cap and check the fluid level with the dipstick.

When freezing weather is anticipated, flush out the water in the reservoir by operating the pump. Fill the reservoir with windshield anti-freeze (not radiator antifreeze), and operate the system for a few seconds to flush out the residual water.

Brake fluid

N00938701271

To check the fluid level

Check the fluid level in the reservoir. The fluid level must be between the “MAX” and “MIN” marks on the reservoir.

The fluid level falls slightly with wear of the brake pads, but this does not indicate any abnormality.

If the fluid level falls sealed tight in a short length of time, it indicates leaks from the brake system.

If this occurs, have the vehicle checked by an authorized Mitsubishi Motors dealer or a repair facility of your choice.

Fluid type

Use the recommended brake fluid conforming to DOT 3 or DOT 4. The reservoir cap must be tightly sealed to keep dirt and water out.

CAUTION

- Do not let any petroleum-based fluid touch, mix with, or get into the brake fluid. This will damage the seals.
- Be careful when handling brake fluid. It can damage painted surfaces.
- Use only the listed brake fluid. Different brands of brake fluid have different additives, and these can cause a chemical reaction. Do not mix brands of brake fluid.
- Keep the reservoir tank cap closed to keep the brake fluid from evaporating.

Battery

N00939101940

The condition of the battery is very important for quick starting and to keep the vehicle's electrical system working properly. Check the battery regularly.

If battery performance is suspect, have the battery and charging system tested by an authorized Mitsubishi Motors dealer or a repair facility of your choice.

NOTE

- After replacing the battery, the electronic control system data for the automatic trans-axle, etc., will be erased. As a result, shifting may be rough. Shifting will become smoother after several changes in speed.

Checking battery electrolyte level

The electrolyte level must be between the limits shown on the outside of the battery. Fill it with distilled water as needed. The inside of the battery is divided into several compartments. Take the cap off of each compartment and fill to the mark.

Do not fill above the top line because a spill during driving could cause damage.

During cold weather

The battery is weaker in cold temperatures. This has to do with its chemical and physical properties and is why a very cold battery, especially one with a low charge, will have a hard time starting your vehicle.

It is recommended that you have your battery and charging system checked by an authorized Mitsubishi Motors dealer or a repair

Battery

facility of your choice before the start of cold weather. If necessary, have it charged. This will provide more reliable starting, and longer battery life.

Disconnection and connection

To disconnect the battery cable, stop the engine. Disconnect the negative (-) terminal first, then the positive (+) terminal. To reconnect the battery, first connect the positive (+) terminal and then the negative (-) terminal, before starting the vehicle.

9

NOTE

- Open the terminal cover (A) before disconnecting or connecting the positive (+) terminal of the battery.
- Loosen the nut (B) and then disconnect the battery cable from the positive (+) terminal.

WARNING

- Never disconnect the battery while the engine is running, or you could damage the vehicle's electrical parts.
- Never short-circuit the battery. This could cause it to overheat and be damaged.
- Keep sparks, cigarettes, and flames away from the battery because the battery could explode.
- Electrolyte (battery acid) is made of corrosive diluted sulfuric acid. If it spills on nearby parts, it can crack, stain, or discolor them. And if it gets on your skin or in your eyes, it can cause burns or blindness. Please observe the following handling instructions:
 - If electrolyte gets on plastic parts or other nearby parts, wipe it off with a soft cloth or chamois soaked in a solution of water and neutral detergent then immediately rinse the affected parts with plenty of water.
 - If electrolyte gets on your hands or clothes, rinse thoroughly with water. If electrolyte gets in your eyes, flush them with water immediately and get immediate medical attention.
- Open doors and windows in any closed space where you may be charging or working with the battery.
- Always wear protective clothing and goggles when working with the battery, or have a skilled automobile technician do it.

WARNING

- If you are quick-charging your battery, first disconnect the battery cables.
- In order to prevent a short-circuit, be sure to disconnect the negative (-) terminal first, and reconnect it last.
- If the electrolyte level is very low, have the battery checked at an authorized Mitsubishi Motors dealer or a repair facility of your choice.
- Battery posts, terminals and related accessories contain lead and lead compounds. Wash hands after handling.

NOTE

- Check each battery terminal for corrosion. You can prevent further corrosion by washing with a solution of baking soda and water. Grease the posts and clamps after cleaning or tightening them.
- Ensure the battery is securely installed and cannot be moved. Also check each terminal for tightness.
- If you will not be driving your vehicle for a long period of time, remove the battery and store it in a place where the battery fluid will not freeze. The battery only should be stored with a full charge.
- Before cleaning the battery, tighten all the filler port caps to keep dirt and moisture out.

Tires

N00939201589

WARNING

- **Driving with tires that are worn, damaged or improperly inflated is dangerous. These type tire conditions will adversely affect vehicle performance. These type tire conditions can also cause a tread separation or blowout which may result in an accident causing serious injury or death.**
- **Tires, including spare tire, degrade over time with age even when they are not being used. It is recommended that tires over 6 years generally be replaced even if damage is not obvious.**

It is important to familiarize yourself with the following terms:

- **Cold tire pressure:**
 - The measured pressure after the vehicle has been parked for at least three hours, or
 - The measured pressure when the vehicle is driven less than 1 mile (1.6 km) after having been parked for three hours.
- **Maximum pressure:** the maximum permissible cold tire inflation pressure for this tire.
- **Recommended inflation pressure:** the inflation pressure for optimum tire performance.
- **Intended outboard sidewall:**
 - The sidewall that contains a whitewall, bears white lettering or bears manufacturer, brand, and/or model name molding that is higher or deeper than the same molding on the other sidewall of the tire, or
 - The outward facing sidewall of an asymmetrical tire that has a particular side that must always face outward when mounted on a vehicle.
- **Passenger car tire:** a tire intended for use on passenger cars, multipurpose passenger vehicles, and trucks that have a gross vehicle weight rating (GVWR) of 10,000 pounds or less.
- **Light truck (LT) tire:** a tire designated by its manufacturer as primarily intended for use on lightweight trucks or multipurpose passenger vehicles.
- **Tread:** portion of a tire that comes into contact with the road.
- **Tread rib:** a tread section running circumferentially around a tire.
- **Tread separation:** pulling away of the tread from the tire carcass.
- **Carcass:** the tire structure, except tread and sidewall rubber which, when inflated, bears the load.
- **Sidewall:** portion of a tire between the tread and bead.
- **Section width:** the linear distance between the exteriors of the sidewalls of an inflated tire, excluding elevations due to labeling, decoration, or protective bands.
- **Bead:** the part of the tire that is made of steel wires, wrapped or reinforced by ply cords and that is shaped to fit the rim.
- **Ply:** a layer of rubber-coated parallel cords.
- **Cord:** the strands forming the plies in the tire.
- **Rim:** a metal support for a tire or a tire and tube assembly upon which the tire beads are seated.
- **Rim diameter:** nominal diameter of the bead seat.
- **Groove:** the space between two adjacent tread ribs.

H	<p>Speed symbol A symbol indicating the range of speeds at which a tire can carry a load corresponding to its load index under certain operating conditions.</p> <p>The maximum speed corresponding to the speed symbol should only be achieved under specified operating conditions. (i.e. tire pressure, vehicle loading, road conditions and posted speed limits)</p>
---	--

Maximum Load

Maximum load indicates the maximum load this tire is designed to carry.

⚠ WARNING

- **Overloading of your tire is dangerous. Overloading can cause tire failure, affect vehicle handling, and increase your stopping distance. Use tires of the recommended load capacity for your vehicle. Never overload them.**

Maximum Pressure

Maximum Pressure indicates the maximum permissible cold tire inflation pressure for this tire.

Tire Identification Number (TIN)

The TIN may be found on one or both sides of the tire but the date code may only be on one side. Look for the TIN on the outboard side of tires as mounted on the vehicle. If the TIN is not found on the outboard side then you will find it on the inboard side of the tire.

EXAMPLE: DOT MA L9 ABCD 1504

DOT	Department of Transportation This symbol certifies that the tire is in compliance with the U.S. Department of Transportation tire safety standards, and is approved for highway use.
MA	Code representing the tire manufacturing location. (2 digits)
L9 ABC D	Code representing the tire size. (2 digits) Code used by tire manufacturer. (1 to 4 digits)
15	Number representing the week in which the tire was manufactured. (2 digits)
04	Number representing the year in which the tire was manufactured. (2 digits)

Treadwear, Traction and Temperature Grades

Treadwear

The treadwear grade is a comparative rating based on the wear rate of the tire when tested under controlled conditions on a specified government test course. For example, a tire graded 150 would wear one and one-half (1½) times as well on the government course as a tire graded 100. The relative performance of tires depends upon the actual conditions of their use, however, and may depart significantly from the norm due to variations in driving habits, service practices and differences in road characteristics and climate.

Traction

The traction grades, from highest to lowest, are AA, A, B and C. Those grades represent the tire's ability to stop on wet pavement as measured under controlled conditions on specified government test surfaces of asphalt and concrete. A tire marked C may have poor traction performance.

Temperature

The temperature grades are A (the highest), B and C, representing the tire's resistance to the generation of heat and its ability to dissipate heat when tested under controlled conditions on a specified indoor laboratory test wheel. Sustained high temperature can cause the material of the tire to degenerate and reduce tire life, and excessive temperature can lead to sudden tire failure. The grade C corresponds to a level of performance which all passenger car tires must meet under the Federal Motor Vehicle Safety Standard No. 109. Grades B and A represent higher levels of performance on the laboratory test wheel than the minimum required by law.

Tire inflation pressures

N00939300815

Proper tire inflation pressure is essential for the safe and satisfactory operation of your vehicle. The wrong tire pressure will cause problems in three major areas:

- Safety

Too little pressure increases flexing in the tire and can cause tire failure. Too much pressure can cause a tire to lose its ability to cushion shock. Objects on the road and potholes could then cause tire damage that may result in tire failure.

- Economy

The wrong tire pressure can cause uneven wear patterns in the tire tread. These abnormal wear patterns will reduce the tread life, and the tire will have to be replaced sooner.

Too little pressure also makes it harder for the tire to roll, and this uses up more fuel.

- Ride comfort and vehicle stability

The superior riding experience built into your vehicle partly depends on the correct tire pressure. Too much pressure gives an uncomfortable and jarring ride. Too little pressure feels as if your vehicle is slow to respond.

Unequal tire pressures can make steering your vehicle uneven and unpredictable.

The tire pressure for your vehicle under normal driving conditions is listed on the placard attached to the driver's door sill.

(Refer to "Tire and loading information placard" on page 11-3.)

The recommended inflation pressures under normal driving conditions should be used for the tires listed below.

Item	Tire size	Front	Rear
Normal tire	P215/70R16 P225/55R18	240 KPA, 35 PSI	240 KPA, 35 PSI

Item	Tire size	Front	Rear
Compact spare wheel	T155/90D16	420 KPA, 60 PSI	

Tire pressures should be checked, and adjusted if necessary, at least once a month. Pressures should be checked more often whenever weather temperatures change severely, because tire pressures change with outdoor temperatures. The pressures listed are always “cold inflation pressure”.

Cold inflation pressure is measured after the vehicle has been parked for at least three hours or is driven less than 1 mile (1.6 km) after having been parked for three hours.

Cold inflation pressure must not go above the maximum values molded into the tire sidewall. After driving several miles, your tire inflation pressure may increase 2 to 6 psi (14 to 41 kPa) from the cold inflation pressure. Do not let air out of the tires to get back to the specified cold pressure, or your tires will be too low.

Check your tires each time you refuel. If one tire looks lower than the others, check the pressure for all of them.

You should also take the following safety precautions:

- Keep your tires inflated to the recommended pressures. (See the tire and loading information placard attached to the driver’s door sill.)
- Stay within the recommended load limits.
- Make sure that the weight of any load in your vehicle is evenly distributed.
- Drive at safe speeds.
- After filling your tires to the correct pressure, check them for damage and air leaks. Be sure to reinstall the caps on the valve stems.

Replacing tires and wheels

N00939600241

CAUTION

- Avoid using different size tires from the one listed and the combined use of different types of tires, as this can affect driving safety. Refer to “Tires and wheels” on page 11-7.
- On all-wheel drive vehicles, always use tires of the same size, same type, and same brand, and which have no wear differences. Using tires that differ in size, type, brand or the degree of wear, will increase the differential oil temperature, resulting in possible damage to the driving system. Further, the drive train will be subjected to excessive loading, possibly leading to oil leakage, component seizure, or other serious problems.

CAUTION

- Only Mitsubishi Motors Authorized wheels should be used, because your vehicle is equipped with a tire pressure monitoring system. Use of another type of wheel risks air leaks and sensor damage, as it will not be possible to install the tire pressure sensor properly.

Tire maintenance

N00939700141

The following maintenance steps are recommended:

- Check tire pressures regularly.
- Have regular maintenance done on the wheel balance and front and rear suspension alignment.
- Rotate your tires regularly as described in the “Tire rotation” section on page 9-20.

Tread wear indicator

N00939800184

- 1- Location of the tread wear indicator
- 2- Tread wear indicator

Tread wear indicators are built into the original equipment tires on your vehicle to help you know when your tires should be replaced. Many states have laws requiring that you replace your tires at this point.

These indicators are molded into the bottom of the tread grooves and will appear when the tire tread is worn down to 1/16 inch (1.6 mm).

When the bands appear next to one another in two or more places, replace your tires.

NOTE

- Tire wear indicators can have different marks and locations depending on the tire manufacturer.

Tire rotation

N00939901528

To even out the wear on your tires and make them last longer, Mitsubishi Motors Corporation recommends that you rotate your tires at the mileage listed in the “WARRANTY AND MAINTENANCE MANUAL”.

However, the timing for tire rotation may vary according to your vehicle condition, road surface conditions, and your own personal driving habits. Any time you notice unusual wear, rotate your tires as soon as possible.

When rotating tires, check for uneven wear, damage, and wheel alignment. Abnormal wear is usually caused by a wrong tire pressure, wheels that are not aligned properly, wheels that are out-of-balance, or severe braking.

Check with an authorized Mitsubishi Motors dealer or a repair facility of your choice to find out the reason for uneven tread wear.

The first tire rotation is the most important one. It will allow all your tires to wear evenly.

Tires that do not have arrows showing rotation direction

Tires that have arrows showing rotation direction

AJ3100339

CAUTION

- A compact spare tire can be installed temporarily in place of a tire that has been removed during the tire rotation. However, it must not be included in the regular tire rotation sequence.
- If the tires have arrows (A) indicating the correct direction of rotation, swap the front and rear tires on the left-hand side of the vehicle and the front and rear tires on the right-hand side of the vehicle separately. Keep each tire on its original side of the vehicle. When installing the tires, make sure the arrows point in the direction in which the wheels will turn when the vehicle moves forward. Any tire whose arrow points in the wrong direction will not perform to its full potential.

⚠ CAUTION

- Only Mitsubishi Motors Authorized wheels should be used, because your vehicle is equipped with a tire pressure monitoring system.

Use of another type of wheel risks air leaks and sensor damage, as it will not be possible to install the tire pressure sensor properly.

⚠ CAUTION

- Avoid the combined use of different types of tires. Using different types of tires can affect vehicle performance and safety.

Snow tires

N00940000320

In some areas of the country, snow tires are required for winter driving. If snow tires are required in your area, you must choose snow tires of the same size and type as the original tires provided with your vehicle. Snow tires should also be installed on all four wheels. Otherwise your safety and vehicle handling can be reduced.

Even where laws may permit it, snow tires should not be operated at sustained speeds over 75 mph (120 km/h).

Tire chains

N00940101139

⚠ CAUTION

- Tire chains cannot be used on your vehicle. The clearance between the chains and the body is not sufficient to allow proper clearance, and the vehicle body might be damaged.

Brake pedal free play

N00940300293

To check the brake pedal free play (A), turn off the engine and press the brake pedal several times with your foot. Then press the pedal down with your fingers until you first feel resistance.

Brake pedal free play:
.1 to .3 inch (3 to 8 mm)

If the free play is not within these limits, take your vehicle to an authorized Mitsubishi Motors dealer or a repair facility of your choice for adjustment.

Parking brake

N00940401259

Parking brake lever stroke

Check the parking brake lever travel occasionally. To check this, pull the lever up slowly and count the number of clicks of the ratchet. Parking brake lever stroke:

6 to 7 notches (clicks)

(Parking brake adjustment when pulled with the force of 200 N)

Also check to see if the lever stays gripped by the ratchet after pulling.

9

WARNING

- Continued operation of the vehicle with the parking brake lever out of adjustment may result in the vehicle moving when unattended.

Wiper blades

N00940700138

Check the wiper blades occasionally. Clean them regularly to remove deposits of salt and road film. Use a sponge or cloth and a mild detergent or non-abrasive cleaner to clean the blades and glass areas.

Replace the blades if they continue to streak or smear.

NOTE

- Do not run the wipers on dry glass for a long time. This wears out the rubber and can scratch the glass.

During cold weather

If the blades are frozen to the windshield or rear window, do not operate the wipers until the ice has melted and the blades are freed, otherwise the wiper motor may be damaged.

Emission-control system maintenance

N00940800328

Your vehicle is equipped with an emission-control system that meets all the requirements of the U.S. Environmental Protection Agency

and Environment Canada. The emission-control system is made of:

- a positive crankcase ventilation system
- an evaporative emission-control system
- an exhaust emission-control system

To be sure the emission-control system works properly, have your vehicle inspected and maintained by an authorized Mitsubishi Motors dealer or a repair facility of your choice. This should be done at the time or mileage specified in the “WARRANTY AND MAINTENANCE MANUAL”.

These, and all the other “general” maintenance services listed in this manual, need to be performed to keep your vehicle running properly and reliably.

You should also have an inspection and service any time you suspect a malfunction.

 **NOTE**

- To meet government regulations and promote cleaner air, your vehicle is equipped with an onboard diagnostic system (OBD). The engine electronic control module that controls OBD functions stores various data (especially about the exhaust emissions). This data will be erased if the battery cable is disconnected, which could make a rapid diagnosis difficult. Do not disconnect the battery cable when the engine malfunction indicator (“SERVICE ENGINE SOON” or “Check engine light”) is ON.

Spark plugs

N00940900231

Spark plugs must fire properly to ensure proper engine performance and emission-control.

Do not reuse spark plugs by cleaning or regapping. Spark plugs should be replaced at the mileage specified in the “WARRANTY AND MAINTENANCE MANUAL”.

 **NOTE**

- Use the recommended or equivalent spark plugs listed under “Engine specifications” on page 11-6. Use of other plugs could cause engine damage, loss of performance or radio noise.

Fuel hoses

N00941000040

Check the hose surfaces for any heat and mechanical damage, hard and brittle rubber, cracking, tears, cuts and abrasions. Pay special attention to the hoses closest to high heat sources such as the exhaust manifold. Check all the hose connections, such as clamps and couplings, to make sure they are secure and that there are no leaks. If you see any wear or damage, replace the hoses immediately.

Intake valve clearance

N00950100050

Have the valve clearance checked at an authorized Mitsubishi Motors dealer at the mileage specified in the “WARRANTY AND MAINTENANCE MANUAL”.

If the engine sounds abnormally loud, have adjustments made by an authorized Mitsubishi Motors dealer.

Fuel system (tank, pipe line and connection, and fuel tank filler cap)

N00941300173

Check these regularly for damage or leaks in the fuel lines and connections. Check the fuel tank filler cap for damage or looseness. Pay special attention to the fuel lines closest to

high heat sources such as the exhaust manifold.

 **WARNING**

- If you see a fuel leak or if you smell fuel, do not run the engine. Any spark (including from the ignition), flame or smoking material could cause an explosion or fire. Call an authorized Mitsubishi Motors dealer or a repair facility of your choice for assistance.

Evaporative emission control system (except evaporative emission canister)

N00941400187

If the fuel-vapor vent line is clogged or damaged, the fuel-vapor mixture will escape, polluting the air.

Have the system checked at an authorized Mitsubishi Motors dealer at the mileage specified in the “WARRANTY AND MAINTENANCE MANUAL”.

General maintenance

N00941501299

The next pages list the maintenance service recommended by Mitsubishi Motors Corporation. In addition to the general maintenance that needs to be performed at the times listed,

General maintenance

there are other parts which do not usually need regular maintenance.

But, if any of these parts stops working properly, your vehicle performance could suffer. Have these items checked if you notice a problem with them.

If you have any questions, see your authorized Mitsubishi Motors dealer for assistance.

Disc brake pads

N00941600059

Good brakes are essential for safe driving. Check the brake pads for wear. For good braking performance, replace the brake pads with the same type pads as the originals.

Brake hoses

N00941700076

Brake hoses and tubing should be checked for:

- Severe surface cracking, scuffing or worn spots. If the fabric casing of the hose is showing through any cracks or worn spots in the rubber hose cover, the hose should be replaced. The brakes can fail if the hose wears through.
- Improper installation may cause twisting, or wheel, tire or chassis interference.

Ball joint, steering linkage seals, drive shaft boots

N00941800093

Check the following parts for damage and grease leaks:

- Ball joint boots of the suspension and steering linkage
- Bellows on both ends of the drive shaft

Exhaust system

N00942201118

WARNING

- **Carbon monoxide gas from your vehicle's exhaust is poisonous. Breathing these fumes can cause unconsciousness or death.**

The best way to keep carbon monoxide gas from entering inside your vehicle is to have the engine exhaust system properly serviced. Have a competent mechanic inspect the complete exhaust system and nearby body areas for broken, damaged, deteriorated, or mispositioned parts if you notice any of the following:

- A change in the sound of the exhaust system
- The smell of exhaust fumes inside the vehicle

- The underside or rear of the vehicle is damaged

Also check the exhaust system each time the vehicle is raised for lubrication, oil changes, or required service. Any open seams or loose connections could let dangerous exhaust fumes seep into the luggage and passenger compartments.

Check for any of the following conditions:

- Check for holes or exhaust gas leaks caused by corrosion or damage.
- Check the joints and connections for looseness or exhaust gas leaks.
- Check the rubber hangers and brackets for damage.

Timing belt

N00942300079

The timing belt should be replaced with a new one at the mileage listed in the "WARRANTY AND MAINTENANCE MANUAL".

Hood lock release mechanism and safety catch

N00942501124

The hood lock release mechanism and hood safety catch should be checked, cleaned, and oiled when needed for easy movement and to prevent rust and wear. Use Multipurpose Grease NLGI Grade 2 sparingly for all sliding parts of the hood latch and release lever. Work the grease into the hood lock mechanism until all the movable surfaces are covered.

Also, put a light coat of the same grease on the safety catch wherever moving parts touch.

For cold and snowy weather

N00942600102

Ventilation slots

The ventilation slots in front of the windshield should be brushed clear after a heavy snowfall so that the operation of the heating and ventilation systems will not be impaired.

Weatherstripping

To prevent freezing of the weatherstripping on the doors, engine hood, etc., they should be treated with silicone grease.

Additional equipment (For regions where snow is encountered)

It is a good idea to carry a shovel or a short-handled spade in the vehicle during the winter so that you can clear away snow if you get stranded. A small hand-brush for sweeping snow off the vehicle and a plastic scraper for the windshield, side and rear window are also useful.

Fusible links

N00942700291

The fusible links will melt to prevent a fire if a large current attempts to flow through certain electrical systems.

In case of a melted fusible link, see your authorized Mitsubishi Motors dealer or a repair facility of your choice for inspection and replacement.

For the fusible links, please refer to “Fuse load capacities” on page 9-26.

WARNING

- **Fusible links must not be replaced by any other device. Failing to fit the correct fusible link may result in fire in the vehicle, property destruction and serious or fatal injuries at any time.**

Fuses

N00942801912

Fuse block location

To prevent damage to the electrical system from short-circuiting or overloading, each individual circuit is equipped with a fuse. The fuse blocks are located in the passenger compartment and in the engine compartment.

Passenger compartment

The fuse blocks in the passenger compartment are located behind the fuse lid in front of the driver's seat at the position shown in the illustration.

Pull the fuse lid to remove it.

A- Main fuse block
B- Sub fuse block

Fuse load capacities

N00954801355

This fuse list shows the names of the electrical systems and their fuse capacities. There are spare fuses in the fuse block cover in the engine compartment. Always replace a blown fuse with one of the same capacity as the original.

Passenger compartment fuse location table

AA3008975

No.	Symbol	Electrical system	Capacity
1		Power window control	30 A*

No.	Symbol	Electrical system	Capacity
2		Defogger	30 A*
3		Heater	30 A
4		Windshield wipers	30 A
5		Door locks	20 A
6		Rear fog light	10 A
7		12 V power outlet	15 A

F23		Battery current sensor	7.5 A
#1	—	Spare fuse	10 A
#2	—	Spare fuse	15 A
#3	—	Spare fuse	20 A

*: Fusible link

- Some fuses may not be installed on your vehicle, depending on the vehicle model or specifications.
- The table above shows the main equipment corresponding to each fuse.

The fuse block does not contain spare 7.5 A, 25 A or 30 A fuses. If one of these fuses burns out, substitute with the following fuse.

7.5 A: 10 A spare fuse

25 A: 20 A spare fuse

30 A: 30 A audio system amplifier fuse

When using a substitute fuse, replace with a fuse of the correct capacity as soon as possible.

Identification of fuse

Capacity	Color
7.5 A	Brown
10 A	Red
15 A	Blue
20 A	Yellow
25 A	Natural (white)
30 A	Green (fuse type) / Pink (fusible link type)
40 A	Green (fusible link type)

Fuse replacement

N00954901141

1. Before replacing a fuse, always turn off the electrical item connected to the fuse and turn the ignition switch to the "LOCK" or "OFF" position or put the operation mode in OFF.
2. There is a fuse remover (A) in the engine compartment fuse block.

AA0110796

3. Clamp it on the fuse you wish to remove, and pull the fuse straight out from the fuse block.

AG0002752

4. Use the fuse location diagrams and the matching tables, to check the fuse that is related to the problem. If the fuse is not blown, something else must be causing the problem. Have the system inspected by your authorized Mitsubishi Motors dealer or a repair facility of your choice.

AG0002765

- B- Fuse is OK
C- Blown fuse

5. Insert a new fuse of the same capacity securely into the appropriate slot.

⚠ CAUTION

- Never use a fuse with a capacity greater than the one listed or any substitute, such as wire, foil etc. This would cause the circuit wiring to heat up and could cause a fire.
- If the replacement fuse blows again after a short time, have the electrical system checked by an authorized Mitsubishi Motors dealer or a repair facility of your choice to find and correct the cause.

Replacement of light bulbs

N00942901359

Before replacing the bulb, be sure the light is off. Do not touch the glass part of the new bulb with your bare fingers; the oil from your skin will stay on the glass and dim or destroy the bulb when it gets hot.

⚠ CAUTION

- Bulbs are extremely hot immediately after being turned off. When replacing the bulb, wait for it to cool sufficiently before touching it. You could otherwise be burned.

⚠ CAUTION

- Handle halogen light bulb with care. The gas inside a halogen light bulb is highly pressurized, so dropping, knocking, or scratching a halogen light bulb can cause it to shatter.

- Never hold the halogen light bulb with a bare hand, dirty glove, etc.

The oil from your hand could cause the bulb to break the next time the headlights are used.

If the glass surface is dirty, clean it with alcohol and let it dry completely before installing the bulb.

9

📖 NOTE

- If you are unsure of how to carry out the work as required, it is recommended that these procedures be carried out by an authorized Mitsubishi Motors dealer or a repair facility of your choice.
- Be careful not to scratch the vehicle body when removing a light and lens.

📖 NOTE

- When it rains, or when the vehicle has been washed, the inside of the lens sometimes becomes temporarily foggy. This is the same phenomenon as when window glass mists up on a humid day, and does not indicate a functional problem.

When the light is switched on, the heat will remove the fog. However, if water gathers inside the light, please have it checked by an authorized Mitsubishi Motors dealer or a repair facility of your choice.

Bulb capacity

N00943000132

The bulb should only be replaced with a new bulb with the same rating and type. The type and rating are listed on the base of the bulb.

7 - Stop light	—	—

 NOTE
<ul style="list-style-type: none"> The following lights use an LED instead of the bulb. Check with an authorized Mitsubishi Motors dealer or a repair facility of your choice when either light needs to be repaired or replaced. Rear side-marker light High-mounted stop light Tail light Stop light

Inside

N00950401656

AA0110868

Item	Wattage
1 - Cargo room light	8 W
2 - Dome light (rear)	8 W
3 - Dome light (front)/Reading light	8 W
4 - Downlight	-
5 - Vanity mirror lights	2 W
6 - Glove compartment light	1.4 W

NOTE

- The downlight uses an LED instead of the bulb. Check with an authorized Mitsubishi Motors dealer or a repair facility of your choice when the light needs to be repaired or replaced.

Headlights (low beam, except for vehicles equipped with LED headlights)

N00901801173

1. When replacing the bulb on the left side of the vehicle, remove the bolt (A) holding down the relay box and move the relay box toward the rear of the vehicle. (if so equipped)

AA0110871

*- Front of the vehicle

2. Turn the cap (B) counterclockwise to remove it.

AJA109079

*- Front of the vehicle

3. Turn the socket (C) counterclockwise to remove it, and then pull the bulb out of the socket.

AJA109082

- To install the bulb, perform the removal steps in reverse.

NOTE

- When installing the bulb, align the tab (D) with the notch (E) of the socket.

Headlights (low beam, for vehicles equipped with LED headlights)

N00900301142

NOTE

- The headlights uses an LED instead of the bulb. Check with an authorized Mitsubishi Motors dealer or a repair facility of your choice when the light needs to be repaired or replaced.

Headlights (high beam)

N00901901132

- When replacing the bulb on the right side of the vehicle, remove the clip (A) holding down the washer tank spout and move the spout toward the rear of the vehicle.

- Turn the cap (B) counterclockwise to remove it.

*- Front of the vehicle

- Turn the bulb (C) counterclockwise to remove it and then while holding down the tab (D), pull out the bulb (E).

- To install the bulb, perform the removal steps in reverse.

Headlight aim adjustment

N00943201359

The alignment of the headlights should be checked by an authorized Mitsubishi Motors dealer or a repair facility of your choice.

Front side-marker lights

N00915501197

- When replacing the bulb on the left side of the vehicle, move the relay box toward the rear of the vehicle. (if so equipped) (Refer to “Headlight (low beam, except for vehicles equipped with LED headlights): Step 1” on page 9-32.

Replacement of light bulbs

2. Turn the socket (A) counterclockwise to remove it, and then pull the bulb out of the socket.

*- Front of the vehicle

3. To install the bulb, perform the removal steps in reverse.

Parking lights/Daytime running lights (if so equipped)

N00917301610

NOTE

- The parking lights and daytime running lights (if so equipped) uses an LED instead of the bulb.
Check with an authorized Mitsubishi Motors dealer or a repair facility of your choice when the light needs to be repaired or replaced.

Front turn signal lights

N00943401423

1. Remove the 12 clips (A, B), and then remove the cover (C).

2. Turn the socket (D) counterclockwise to remove it, then remove the bulb from the socket by turning it counterclockwise while pressing in.

*: Front of the vehicle

3. To install the bulb, perform the removal steps in reverse.

Side turn signal lights (if so equipped)

N00943501147

NOTE

- The side turn signal lights uses an LED instead of the bulb.
- Check with an authorized Mitsubishi Motors dealer or a repair facility of your choice when the light needs to be repaired or replaced.

2. Remove the 3 screws (B) and remove the light unit.

AJA109109

3. While holding down the tab (D), pull out the socket (E).

AJA109112

4. Turn the bulb (F) counterclockwise to remove it.

AJA109125

5. To install the bulb, perform the removal steps in reverse.

Front fog lights (if so equipped)

N00943601845

1. Insert a straight blade (or minus) screwdriver with a cloth over its tip at the points indicated by arrows and pry gently to remove the cover (A).

AJA109095

NOTE

- When unfastening the screws or the fog light, be careful not to move the beam position adjustment screw (C).

AJZ102307

Rear combination lights

N00943701556

1. Open the liftgate.

Replacement of light bulbs

2. Remove the screws (A), and then move the light unit toward the rear of the vehicle to unfix the notch (B) and pins (C).

3. Turn the socket counterclockwise and remove it, and then pull the bulb out of the socket.

- D- Rear turn signal light
E- Tail light and stop light (LED) - cannot be replaced

NOTE

- When mounting the light unit, align the notch (F) and pin (G) on the light unit with the clip (H) and hole (I) in the body.

9

NOTE

- The rear side-marker light, tail light and stop light use an LED instead of the bulb. Check with an authorized Mitsubishi Motors dealer or a repair facility of your choice when the light needs to be repaired or replaced.

4. To install the bulb, perform the removal steps in reverse.

Back-up lights

N00929101080

1. Push the light unit upward to remove it.

NOTE

- Wrap a cloth around the tip of the screwdriver to keep from scratching the lens.

- Turn the socket (A) counterclockwise to remove it, and then pull the bulb out of the socket.

- To install the bulb, perform the removal steps in reverse.

NOTE

- When installing the light unit, first insert the notch (B) into the hole on the body, and then push on the light unit to fit it into place.

License plate lights

N00944000360

- When removing the light unit (A), push it toward the left side of the vehicle body.

- Use a screw driver to gently pry up the tab (B) and remove the lens.

NOTE

- Wrap a cloth around the tip of the screwdriver to keep from scratching the lens.

- Pull the bulb out of the socket.

- To install the bulb, perform the removal steps in reverse.

NOTE

- When mounting the light unit, insert tab (C) first then align tab (D) with its hole.

High-mounted stop light

N00943900102

NOTE

- The high-mounted stop light uses an LED instead of the bulb. Check with an authorized Mitsubishi Motors dealer or a repair facility of your choice when the light needs to be repaired or replaced.

Vehicle care precautions

N00945100166

9

In order to maintain the value of your vehicle, perform regular maintenance using the proper materials and procedures. Be sure to use only those materials and procedures that meet your local environmental pollution control regulations. Choose the materials you will use carefully, to be sure that they do not contain corrosives. If you are not sure, contact an authorized Mitsubishi Motors dealer for help in choosing these materials.

CAUTION

● Cleaning products can be dangerous. Some are poisonous and others are highly flammable. Some are dangerous if you breathe their fumes in a closed space. When you use anything in a container to clean your vehicle, be sure to follow the instructions. Always open your vehicle doors or windows when you're cleaning the inside. Never use the following chemicals to clean your vehicle:

- Gasoline
- Carbon Tetrachloride
- Benzine
- Kerosene
- Naphtha
- Acetone
- Turpentine
- Paint Thinner
- Lacquer Thinner
- Nail Polish Remover

These can all be dangerous, and they all can damage your vehicle.

Cleaning the inside of your vehicle

N00945200095

After washing the inside of your vehicle with any cleaner, wipe it dry in a shady, well ventilated area.

CAUTION

- Do not use organic substances (solvents, benzine, kerosene, alcohol, gasoline, etc.) or alkaline or acidic solutions. These chemicals can cause discoloring, staining or cracking of the surface. If you use cleaners or polishing agents, make sure their ingredients do not include the substances mentioned above.

NOTE

- Always read the instructions on the cleaner label.

Plastic, vinyl leather, fabric and flocked parts

N00945300155

1. Lightly wipe these off with a soft cloth soaked in a 3% solution of gentle soap and water.
2. To rinse, dip the cloth in fresh water, wring it out well, and wipe off all the soap.

 **NOTE**

- Do not use cleaners, conditioners, and protectants containing silicones or wax. Such products, when applied to the instrument panels or other parts, may cause reflections on the windshield and obscure vision. Also, if such products get on the switches of the electrical accessories, it may lead to failure of these accessories.

Upholstery

N00945500128

1. To maintain the value of your new vehicle, maintain the upholstery carefully and keep the interior clean.
Use a vacuum cleaner and brush to clean the seats. If stained, vinyl and synthetic leather should be cleaned with an appropriate cleaner. Cloth fabrics can be cleaned with either upholstery cleaner or a 3% solution of gentle soap in lukewarm water.
2. Clean the carpeting with a vacuum cleaner and remove any stains with carpet cleaner. Oil and grease can be removed by lightly dabbing with a clean white cloth and spot remover.

 **NOTE**

- If fuzzing is difficult to remove from the seat upholstery, draw a suitable defuzzing brush over the surface in one direction.

Genuine leather (if so equipped)

N00945600187

1. To clean, lightly wipe the leather with a soft cloth soaked in a 5% solution of gentle soap and water.
2. To rinse, dip the cloth in fresh water, wring it out well, and wipe off all the soap.
3. To preserve and protect, use a leather protecting agent on the genuine leather surface.

 **NOTE**

- If genuine leather is wet with water, wipe it with a dry, soft cloth. If left damp, mildew may grow.
- The genuine leather surface can be damaged if brushed with a nylon or synthetic fiber brush.
- Organic solvents such as benzine, kerosene, alcohol, gasoline, or acid or alkaline solvents can discolor the genuine leather surface and should not be used.
- Genuine leather can mildew if not kept clean. Clean up any oil stains immediately.

 **NOTE**

- The genuine leather surface may harden and shrink if it is exposed to the direct sunlight for long hours. When your vehicle is parked, place it in the shade as much as possible.
- When the temperature of the vehicle interior rises in summer, vinyl products left on the genuine leather seat may deteriorate and stick to the seat.

Cleaning the outside of your vehicle

N00945700058

To protect your vehicle's finish, wash it often and thoroughly. If desired, you may wax your vehicle using a nonabrasive automobile wax.

Foreign material

N00945800033

Industrial pollution, road tar, bird droppings, tree sap, insect remains, sea water and other foreign matters can damage the finish on your vehicle.

Generally, the longer any foreign material stays on the finish, the worse the damage. Wash your vehicle as soon as possible whenever the finish gets soiled.

Washing

N00945901637

Chemicals contained in the dirt and dust picked up from air, rain, snow, or road surfaces can damage the paint and body of your vehicle if left on.

Frequent washing and waxing is the best way to protect your vehicle from this damage.

Do not wash the vehicle in direct sunlight. Park the vehicle in the shade and spray it with water to remove dust. Next, using plenty of clean water and a car washing mitt or sponge, wash the vehicle from top to bottom.

Use a mild car washing soap if necessary. Rinse thoroughly and wipe dry with a chambray or soft cloth. After washing the vehicle, carefully clean the joints and flanges of the doors, hood, etc., where dirt is likely to remain.

CAUTION

- When washing the underside of your vehicle or the wheels, wear a pair of gloves to protect your hands.
- If your vehicle has rain sensor wipers, place the wiper switch lever in the “OFF” position to deactivate the rain sensor before washing the vehicle. Otherwise, the wipers will operate in the presence of water spray on the windshield and may get damaged as a result.

CAUTION

- Never spray or splash water on the electrical parts in the engine compartment. This may damage them. Be careful also when washing the underbody to ensure that water does not enter the engine compartment.
- Avoid automatic car washers that use rotating brushes. These brushes may scratch the paint surface and make it dull. Scratches are more noticeable on darker colored vehicles.
- Some hot water washing equipment uses high pressure and heat to clean your vehicle. Because hot water can damage plastics parts and seep inside your vehicle, make sure you do the following when using such equipment:
 - Keep the washing nozzle at least 28 inches (70 cm) away from the vehicle body.
 - When washing around the door glass, hold the nozzle at a distance of more than 28 inches (70 cm) and at a right angle to the glass surface.
- Make sure to do the following when using an automatic car wash, with help from either this manual or the car wash operator, to avoid damaging your vehicle:
 - Fold the outside rearview mirrors.
 - Remove the antenna.
 - Tape or remove the rear wiper arm assembly.
 - If your vehicle is equipped with a roof rails, check with the car wash operator before using the car wash.

CAUTION

- If your vehicle is equipped with the rain sensor wipers, place the wiper switch lever in the “OFF” position to deactivate the rain sensor.

During cold weather

Salt and other chemicals used on winter roads in some geographical areas can have a detrimental effect on the vehicle underbody. You should flush the underbody with a high pressure hose every time you wash the outside of your vehicle.

Take special care to remove mud or other debris which could trap and hold salt and moisture.

After washing your vehicle, wipe off all waterdrops from the rubber parts around the doors to prevent the doors from freezing.

NOTE

- When the door is frozen, opening it by force may tear off or crack the rubber gasket installed around the door. Pour warm water to melt the ice. Be sure to thoroughly wipe off the water after opening the door. To prevent freezing of the weatherstripping on the doors, hood, etc., treat with silicone lubricant.

Waxing

N00946000205

Wax your vehicle once or twice a year, or when water does not bead up on the paint. Use a soft cloth to put a small amount of wax on the painted surfaces. After the wax has dried, polish with a dry soft cloth. Do not wax your vehicle in direct sunlight. You should wax when the painted surfaces are cool.

⚠ CAUTION

- Waxes containing high abrasive compounds should not be used. These waxes remove rust and stain effectively from the paintwork, but are harmful to the finish of the paint, because they also remove paint/clearcoat. They are also harmful to other glossy surfaces such as the grille, trim, moldings, etc.
- Do not use gasoline, benzine, kerosene or paint thinners to remove road tar or other dirt from the vehicle surface.
- Do not put wax on the areas having black matte coating because it can cause uneven discoloration, patches, blurs, etc. If these get wax on them, wipe the wax off right away with a soft cloth and warm water.

⚠ CAUTION

- On vehicles with sunroof, be careful not to apply any wax on the weatherstrip (black rubber) when waxing the area around the sunroof opening. If stained with wax, the weatherstrip cannot maintain a weatherproof seal with the sunroof.

Polishing

N00946100046

If painted surfaces have been severely damaged and lost their original luster and color tone, polish the surface lightly with a fine polishing compound. Avoid limiting your polishing to the damaged surface only; polish a somewhat wider area, moving the polishing cloth in one direction. After polishing, flush the compound from the surface and apply a coat of wax to regain a beautiful luster.

Damaged paint

N00946201099

Small cracks and scratches in the paint coat should be touched up as soon as possible with touch-up paint to prevent corrosion. Check body areas facing the road or the tires carefully for damage to the paint caused by flying stones, etc. The paint code number for your vehicle can be found on the vehicle

information code plate located on the front passenger door sill.

Cleaning plastic parts

N00946301221

Use a sponge or chamois to clean these parts. If the vehicle wax sticks to a gray or black rough surface of the bumper, molding or lights, the surface may appear white in color. In this case, wipe it off using lukewarm water and a soft cloth or chamois.

⚠ CAUTION

- Do not use a scrubbing brush or other rough scrubber as these may damage the plastic surface.
- Do not use wax containing compounds (polishing powder) which may damage the plastic surface.
- Do not let plastic parts get soiled with gasoline, oil, brake fluids, engine oils, greases, paint thinner, and sulfuric acid (battery electrolyte), as such substances will cause stains, cracks, or discoloration.

If any of these get on a plastic part, wipe them up with a soft cloth or chamois and a mild solution of soap and water. Then rinse them immediately with water.

Chrome parts

N00946400052

To prevent spots and corrosion of chrome parts, wash with water, dry thoroughly, and apply a nonabrasive automotive wax. If the chrome is severely damaged or pitted, use a commercially available chrome polish.

Aluminum wheels (if so equipped)

N00946500183

1. Remove dirt using a wet sponge.
2. Use a mild detergent on any dirt that cannot be removed easily with water. Rinse off the detergent after washing the wheel.
3. Dry the wheel thoroughly using a chamois leather or a soft cloth.

CAUTION

- Do not use a brush or other hard implement on the wheels.
- Do not use any cleaner that contains an abrasive substance or is acidic or alkaline. Doing so could cause the coating on the wheels to peel or become discolored or stained.
- Do not directly apply hot water using a steam cleaner or by any other means.
- Contact with seawater or road salt used for de-icing can cause corrosion. Rinse off such substances as soon as possible.

Window glass

N00946600054

The window glass can usually be cleaned using only a sponge and water. Glass cleaner can be used to remove wax, oil, grease, dead insects, etc. After washing the glass, wipe it dry with a clean, dry, soft cloth.

Wiper blades

N00946700068

Use a soft cloth and glass cleaner to remove grease, dead insects, etc., from the wiper blades. Replace the wiper blades when they no longer clean the windshield and rear window properly.

Cleaning the sunroof (if so equipped)

N00946800069

Clean the inside of the sunroof with a soft cloth. Hard deposits should be wiped away with a cloth dipped in warm, neutral detergent solution. Wipe away the solution with a sponge dipped in fresh water.

NOTE

- The surface treatment on the inside of the glass may be removed if a hard cloth or organic solvent is used.

Engine compartment

N00947000071

Never spray or splash water on the electrical accessories in the engine compartment. This puts the engine at risk of being damaged. Do not bring the circumferential parts, the plastic parts and so on into contact with sulfuric acid (battery electrolyte) which may crack, stain or discolor them. If they are in contact, wipe off with soft cloth, chamois or the like and an aqueous solution of neutral detergent then immediately rinse the affected parts with plenty of water.

Customer assistance/Reporting Safety Defects

Consumer information (For vehicles sold in U.S.A.)10-2
Reporting Safety Defects10-2
Important facts to know in case of an accident10-4

Consumer information (For vehicles sold in U.S.A.)

N01047100171

This information is provided in compliance with the requirements of the National Highway Traffic Safety Administration, Department of Transportation. It provides the purchasers and/or prospective purchasers with information on reporting safety defects.

Uniform tire quality grading

DOT quality grades - All passenger vehicle tires must conform to Federal Safety Requirements in addition to these grades. The specific grade rating in each grade category is shown on the side wall of the tires on your vehicle.

Treadwear

The treadwear grade is a comparative rating based on the wear rate of the tire when tested under controlled conditions on a specified government test course. For example, a tire graded 150 would wear one and one-half ($1\frac{1}{2}$) times as well on the government course as a tire graded 100. The relative performance of tires depends upon the actual conditions of

their use, however, and may depart significantly from the norm due to variations in driving habits, service practices and differences in road characteristics and climate.

Traction AA, A, B, C

The traction grades, from highest to lowest, are AA, A, B and C. Those grades represent the tire's ability to stop on wet pavement as measured under controlled conditions on specified government test surfaces of asphalt and concrete. A tire marked C may have poor traction performance.

WARNING

- The traction grade assigned to this tire is based on straight-ahead braking traction tests, and does not include acceleration, cornering, hydroplaning, or peak traction characteristics.

Temperature A, B, C

The temperature grades are A (the highest), B and C, representing the tire's resistance to the generation of heat and its ability to dissipate heat when tested under controlled conditions on a specified indoor laboratory test wheel. Sustained high temperature can cause the

material of the tire to degenerate and reduce tire life, and excessive temperature can lead to sudden tire failure. The grade C corresponds to a level of performance which all passenger car tires must meet under the Federal Motor Vehicle Safety Standard No. 109. Grades B and A represent higher levels of performance on the laboratory test wheel than the minimum required by law.

WARNING

- The temperature grade for this tire is established for a tire that is properly inflated and not overloaded. Excessive speed, underinflation, or excessive loading, either separately or in combination, can cause heat buildup and possible tire failure.

Reporting Safety Defects

N01047201498

If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform the National Highway Traffic Safety Administration (NHTSA) in addition to notifying Mitsubishi Motors Corporation.

If NHTSA receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may order a recall and remedy campaign. However, NHTSA cannot become involved in individual problems between you, your dealer, or Mitsubishi Motors Corporation.

To contact NHTSA, you may call the Vehicle Safety Hotline toll-free at 1-888-327-4236 (TTY: 1-800-424-9153); go to <http://www.safercar.gov>; or write to:

**NHTSA Headquarters
1200 New Jersey Avenue, SE
West Building
Washington, DC 20590**

You can also obtain other information about motor vehicle safety from <http://www.safercar.gov>.

Important facts to know in case of an accident

N01047300098

We hope you will never be involved in an accident, but there is always that potential danger. So, please be sure to buckle up and drive safely.

In the event of an accident

- Remain calm.
- Check for injuries. Report all injuries to the police, and, if necessary, call for an ambulance.
- Record all the details of the accident. This will provide you with accurate records of the accident for discussions with your insurance company and other persons who may be acting on your behalf.

Key information to discuss with your insurance company

- Understand your repair estimate before approving repairs.
- Choosing the repair shop and the brands of parts that they use on your vehicle is your decision.

- Ask for genuine Mitsubishi Motors parts. Many times, to save money, your insurance company will recommend imitation parts that do not meet the original specifications of fit, finish, corrosion resistance or workmanship.

Mitsubishi Motors built-in protection

The strength and integrity built into your Mitsubishi vehicle is the result of a specific design referred to as “Energy Management”. Individual body parts are designed to act as one unit in the event of an accident. Shock waves are absorbed by protective panels or are channeled around the passenger compartment. This important feature is possible because high tensile steel is used in Mitsubishi panels and structural parts, something that cannot be guaranteed by the manufacturers of imitation parts. All Genuine Mitsubishi body panels and support brackets are designed and constructed as important protection features in the event of an accident. By replacing body parts with imitations, your vehicle may no longer meet original equipment specifications.

Consumer rights (For vehicles sold in U.S.A.)

As a consumer requesting repair on your vehicle, you have consumer rights. Across the country, State Insurance Commissioners have begun considering rules on the use of non-OEM parts. This could mean that repair shops will have to disclose to the consumer, when they intend to use non-OEM parts. Since regulations are not consistent on this point, remember you have a choice. So, if you want genuine Mitsubishi Motors parts, you may have to specifically request them. Make certain your insurance company understands imitations are not to be used in the repair of your vehicle. You deserve the best genuine Mitsubishi Motors parts.

Genuine Mitsubishi Motors parts

Genuine Mitsubishi Motors parts are built with the high quality and durability standards you expect. Genuine Mitsubishi Motors replacements parts are your guarantee that your vehicle will have all the technological advantages and maintain the style and protection of a brand new Mitsubishi Motors.

Remember to ask for genuine Mitsubishi Motors parts.

Vehicle labeling

N01147401781

Keep a record of the chassis number and vehicle identification number. Such information will assist police if your vehicle is stolen.

11

1 - Vehicle emission control information label

The vehicle emission control information label is affixed on the underside of the engine hood.

2 - Vehicle identification number plate

The vehicle identification number is stamped on the plate riveted to the left front corner of the dashboard. It is visible from outside of the vehicle through the windshield.

3 - Air conditioning label

The air conditioning label is affixed on the inside panel of the engine hood.

4 - Vehicle information code plate

The vehicle information code plate is located on the front passenger door sill.

Chassis number

The chassis number is stamped on the bulkhead as shown in the illustration.

Engine serial number

The engine serial number is stamped on the cylinder block as shown in the illustrations.

*- Front of the vehicle

Tire		P215/70R16 99H		P225/55R18 97H
Wheel	Size	16 x 6 1/2JJ	16 x 6 1/2J	18 x 7J
	PCD	4.5 in (114.3 mm)		
	Offset	1.5 in (38 mm)		

PCD: Pitch Circle Diameter (installation holes)

NOTE

- Contact an authorized Mitsubishi Motors dealer for details on the combination used on your vehicle.
- These tires satisfy vehicle loading conditions described in this owner's manual.

Capacity

N01148002169

11

Item		Capacity	Lubricants
Fuel (approximate)	Front-wheel drive vehicles	16.6 gal (63 L)	Refer to "Fuel selection" on page 3-2
	All-wheel drive vehicles	15.8 gal (60 L)	
Engine oil	2.4 liter models	Oil pan	Engine oils displaying the ILSAC certification mark ("starburst" symbol) on the container. If these oils are not available, and API classification SN can be used.
		Oil filter	
	3.0 liter models	Oil pan	
		Oil filter	
Automatic transaxle		8.7 qt (8.2 L)	Refer to "Automatic transaxle fluid" on page 9-11.
Continuously variable transmission (CVT)		7.2 qt (6.9 L)	Refer to "Continuously variable transmission (CVT) fluid" on page 9-11.

Capacity

Item		Capacity	Lubricants
Transfer oil		.50 qt (0.47 L)	Mitsubishi Motors Genuine Super Hypoid Gear Oil API classification GL-5 SAE 80
Differential	Rear axle	.42 qt (0.4 L)	Mitsubishi Motors Genuine Super Hypoid Gear Oil API classification GL-5 SAE 80
Brake		As required	Conforming to Brake fluid DOT3 or DOT4
Hood lock release mechanism and safety catch		As required	Multipurpose type grease NLGI Grade 2
Engine coolant {Includes .69 qt (0.65 L) in reserve tank}	2.4 liter models	6.3 qt (6.0 L)	Mitsubishi Motors Genuine Super Long Life Coolant Premium or equivalent*
	3.0 liter models	9.5 qt (9.0 L)	
Washer fluid		4.8 qt (4.5 L)	—
Refrigerant (air conditioning)		Refer to the “Air conditioning label” on page 11-2.	HFC-134a

*:similar high quality ethylene glycol based non-silicate, non-amine, non-nitrate and non-borate coolant with long life hybrid organic acid technology
